Claimant has established by a preponderance of the evidence that the medical treatment he received at Centura, the Lidoderm patches, Gabapentin and chiropractic care prescribed and recommended by Dr. Zuehlsdorff, and injections recommended by Dr. Trainor, are reasonable and necessary to cure or relieve the effects of Claimant's industrial injury. The evidence establishes Claimant went to Centura on the date of his injury for evaluation and treatment directly related to is work injury. Claimant credibly testified he was instructed to go to Centura by Insurer. Dr. Zuehlsdorff' testified such treatment was reasonable, necessary, and causally related to Claimant's injury. With respect to Lidoderm, Gabapentin, and chiropractic care, Claimant's medical records demonstrate he contemporaneously reported relief with these treatments when he saw Dr. Zuehlsdorff. Dr. Zuehlsdorff testified these treatments were reasonable, necessary, and causally related to his work injury. Finally, Dr. Zuehlsdorff and Dr. Trainor have both recommended lumbar TESI injections. Dr. Zuehlsdorff testified this course of treatment is reasonable and necessary to cure or relieve the effects of Claimant's work injury. The ALJ finds Dr. Zuehlsdorff's unrebutted testimony credibly and persuasively establishes it is more likely than not that the treatment for which Claimant seeks authorization and

payment was reasonable and necessary to cure or relieve the effects of Claimant's January 3, 2022 back injury.

ORDER

It is therefore ordered that:

1. Respondents shall pay the cost of Claimant's treatment at Centura/Lakewood Emergency and Urgent Care Center, according to the Worker's Compensation Medical Fee Schedule.

2. Claimant's request for authorization of the left L4-5 and L5-S1 transforaminal epidural steroid injections recommended by Dr. Trainor and Dr. Zuehlsdorff is granted.

3. Claimant's request for authorization of chiropractic treatment, Lidoderm patches, and Gabapentin is granted.

4. All matters not determined herein are reserved for future determination.

If you are dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED: March 7, 2023.

Steven R. Kabler
Administrative Law Judge
Office of Administrative Courts
1525 Sherman Street, 4th Floor
Denver, Colorado, 80203

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. WC 5-148-539-004

ISSUES

1. Whether Claimant established by a preponderance of the evidence that he sustained a compensable injury arising out of the course of employment with [Redacted, hereinafter TO] and/or [Redacted, hereinafter AA].

2. If Claimant established the existence of a compensable injury, whether Claimant is entitled to medical benefits.

3. If Claimant established the existence of a compensable injury, whether Claimant is entitled to temporary disability benefits.

FINDINGS OF FACT

Based on the evidence presented at hearing, the ALJ makes the following findings of fact:

Parties

1. Claimant is a 64-year-old man who contends he was employed by both TO[Redacted] and AA[Redacted]. Claimant contends he sustained an injury arising out of the course of employment with TO[Redacted] and AA[Redacted] on December 3, 2019.

2. AA[Redacted] is an adult day care facility located in Aurora, Colorado that provides services to older and disabled adults. These services include planned activities, meals, and transportation to various locations, such medical appointments, pharmacies, immigration offices, and others. As part of its services, AA[Redacted] transports clients to and from their homes to AA's[Redacted] facility. [Redacted, hereinafter AB] owns and operates AA[Redacted]. AB[Redacted] testified that all individuals who perform services for AA[Redacted] are independent contractors, consequently, AA[Redacted] does not maintain workers' compensation insurance.

3. TO[Redacted] is a home health care agency that provides in-home health care, personal care, and other services to its clients, including assistance with activities of daily living, such as laundry and trash removal. TO[Redacted] employs approximately 110 individuals. AB[Redacted] also owns TO[Redacted], and credibly testified that TO[Redacted] is a distinctly different business entity than AA[Redacted], and maintains a different tax ID, different payroll, and provides different services. TO[Redacted] maintains workers' compensation insurance through Insurer.

Background and Claimant's Relationship with Respondents

4. Beginning in 2013, Claimant was a client of Aurora Mental Health Center (AuMHC), receiving assistance dealing with issues that developed after Claimant served as an

interpreter for the United States Army in the Iraq war. Sometime in 2013, Claimant was working to obtain a certificate in family support through AuMHC, which required Claimant to perform volunteer work. Claimant began volunteering at AA[Redacted] in 2013 or 2014. (Ex. N). Claimant testified he provided transportation, served as a translator, helped serve meals, and provided other services, and that he dealt entirely with AB's[Redacted] husband, [Redacted, hereinafter SA], and had no communications with AB[Redacted].

5. Claimant testified that after completing his certificate in 2014, he worked for and was paid by AuMHC until 2019. He testified he worked for AuMHC on the weekends, and worked for AA[Redacted] during the week. Claimant testified he continued to provide the services to AA[Redacted] clients, such as translating, serving meals, and providing transportation from 2014 through 2019. Claimant was not paid for any of the services he alleges he provided during this time period. AB[Redacted] testified that Claimant was a volunteer at AA[Redacted], and occasionally came to AA[Redacted] to eat meals, but was not a staff member and was not employed by AA[Redacted]. No documentary evidence was presented establishing Claimant was employed by AA[Redacted] at any time from 2014 through summer 2019.

6. AB[Redacted] testified that Claimant never applied for a job and did not fill out an application for employment or to be an independent contractor. However, in the summer or fall of 2019, Claimant asked AA[Redacted] for a job. (Ex. N). AA[Redacted] agreed to train Claimant as a driver/client assistant for two months with pay. (Ex. N and R). Claimant began transporting AA[Redacted] clients from their homes to AA[Redacted], sometime in the summer or fall of 2019. Claimant testified he initially used his own vehicle, and later used a van owned by AA[Redacted] to transport clients.

7. Although AB[Redacted]testified Claimant was not paid for his services, AA[Redacted] did issue Claimant at least two checks in the amount of $1,500.00 from its payroll account on November 1, 2019 and December 2, 2019. (Ex. A). Claimant testified he was also paid $1,500 per month in September and October 2019, although no credible evidence of such payments was admitted.

8. Claimant testified that at various times, SA[Redacted] promised to pay Claimant, make Claimant a partner in the business, make him a manager, and buy him a home. No credible evidence of the alleged promises was presented at hearing.

<u>December 3, 2019 Incident</u>

9. In December 2019, AB[Redacted] and SA[Redacted] were out of the country, and their son, [Redacted, hereinafter NB], served in a supervisory role at AA[Redacted] during their absence. On December 3, 2019, an incident occurred between Claimant and NB[Redacted], during which Claimant asserts he sustained injuries to both knees. Claimant testified NB[Redacted] confronted him while Claimant was getting in one of AA's[Redacted] vans, pushed Claimant against the van, hit Claimant's legs with the van door two times, and hit claimant in the face. Claimant did not work again for

AA[Redacted] after December 3, 2019. For the reasons described below, Claimant's testimony regarding the incident with NB[Redacted] was not credible.

10. Claimant testified after the incident, he left the scene, went home, and slept, and that he went to a doctor a week later. No documentary evidence was presented admitted indicating Claimant sought medical care the week after December 3, 2019.

11. In January 2020, Claimant contacted AA[Redacted] and demanded $150,000 for back wages he asserted he was owed from 2014 to 2019. When AA[Redacted] refused to pay Claimant $150,000, Claimant began filing a series of claims against AA[Redacted]. Claimant testified he decided to file "everything" against AA[Redacted] as a way of obtaining the money he believed he was owed for alleged back wages.

12. On February 3, 2020, Claimant filed a Workers' Claim for Compensation against AA[Redacted] claiming to have suffered an injury to his large toe on December 12, 2017. (Ex. B).

13. Claimant filed a claim for unemployment benefits against AA[Redacted], which was denied on February 10, 2020. (Ex. CC).

14. On February 13, 2020, Claimant contacted the Aurora Police Department (APD) and reported that he had been assaulted by NB[Redacted]on December 3, 2019. The APD investigated and prepared a police report on February 13, 2020. (Ex. D). Claimant reported to APD that on December 3, 2019, as he "was getting out of the van, NB[Redacted] approached him from behind and shoved him up against the van a couple of times while yelling at him to turn over the van keys." Claimant also alleged he attempted to run into the building "but NB[Redacted] grabbed him by the back of his coat and yanked him back before he could reach the front door." Claimant reported he "decided to run off and left the premise." When questioned about injuries, Claimant "stated he had a few scratches on his legs from being shoved up against the van." Claimant indicated he had not photographed the injuries which had healed. The APD report indicates a witness – [Redacted, hereinafter MB] -- was interviewed and did not corroborate Claimant's report
that NB[Redacted] physically assaulted Claimant. (Ex. D).

15. Claimant later filed a complaint with the Colorado Civil Rights Division (CCRD) against AA[Redacted], alleging he was harassed and subject to unequal terms and conditions based on his national origin, disability, and/or retaliation for engaging in protected activity. (Ex. N). After investigation, the CCRD issued an order dismissing Claimant's complaint on January 13, 2021. (Ex. N).

16. Claimant also filed a claim against AA[Redacted] with the Equal Employment Opportunity Commission (EEOC). The EEOC adopted the CCRD's findings and issued a Dismissal and Notice of Rights on April 5, 2021. (Ex. P). AB[Redacted] testified that Claimant also filed complaints or grievances against AA[Redacted] with OSHA and the IRS.

17. On July 1, 2021, Claimant filed a civil lawsuit in which he asserted employment related claims against AA[Redacted], and SA[Redacted] and AB[Redacted] individually. Claimant did not assert he was employed by TO[Redacted] in the civil lawsuit. Ultimately, the parties reached a settlement and resolved the civil suit. (Ex. S, T, and BB).

18. No evidence was admitted indicating Claimant filed any claim or complaint against TO[Redacted], or that Claimant asserted he was employed by TO[Redacted] in any of the claims filed.

19. On September 24, 2020, Claimant filed a Workers' Claim for Compensation against AA[Redacted] related to the December 3, 2019 incident. Claimant asserted he sustained "fracture, strain" injuries to both knees on December 3, 2019. Claimant described the injury as occurring when "[NB[Redacted]] aggressively pushed the car door into my left knee, causing me to twist my right leg/knee." Claimant did not assert he was employed by TO[Redacted] in the September 24, 2020 Workers' Claim for Compensation. (Ex. H).

CLAIMANTS' MEDICAL TREATMENT

20. Claimant's first documented visit with any healthcare provider after the alleged December 3, 2019 work injury was a visit at AuMHC on February 5, 2020. Although the record references an altercation at work, it does not reference any physical injuries from the alleged altercation. (Ex. C).

21. Claimant's first documented medical evaluation for any physical injuries after December 3, 2019, was on June 3, 2020, when Claimant saw Khatera Jahan, FNP-C, at Colorado Alliance for Health Equity and Progress (CAHEP). At that visit, Claimant reported his knee pain began in December 2019 when someone opened a car door that hit his knee. Claimant reported his knee was initially painful with bruising and pain had continued to increase since. On examination, Claimant was noted to have inflammation present on the left lateral knee, tenderness with palpation, mild pain with flexion and extension and a negative McMurray's test. Claimant was referred for x-rays of the left knee. (Ex. E).

22. An x-ray of Claimant's left knee was performed on June 22, 2020, which was interpreted as showing normal soft tissues, narrowed joint spaces in 3 compartments, with prominent osteophytes and sclerosis. It was also noted that Claimant had a large loose osteochondral joint bodies in the suprapatellar bursa. (Ex. F).

23. On June 22, 2020, Claimant was evaluated at Colorado Joint Replacement by Todd Miner, M.D. Claimant reported that his left knee pain began on December 5, 2019 as the result of "another … employee purposefully hit him in the leg while opening the car door. The car door struck him on the outside of the knee." Claimant reported the pain and swelling initially improved but began to worsen more recently. (Ex. G). Dr. Miner noted Claimant had a remote history of ACL reconstruction on the left knee. Dr. Miner indicated "At this time I believe his symptoms are primarily related to the heterotopic ossification that is superior lateral of his kneecap as well as to the advanced osteoarthritis

of the left knee. … I feel both his arthritic condition and the fairly large loose osseous bodies in the suprapatellar region are likely aggravating his knee and contributing to his knee symptoms. He does have very severe tricompartmental arthritis of his left knee which is most likely attributing to the pain he is experiencing as well." Dr. Miner performed a left knee corticosteroid injection and recommended physical therapy. Although Dr. Miner
referenced a workers' compensation claim, he did not offer any credible opinion indicating Claimant's alleged work injury either caused or contributed to Claimant's need for treatment or his then-existing condition. (Ex. G).

24. On September 16, 2020, Claimant returned to Dr. Miner. Dr. Miner noted that Claimant's imaging studies demonstrated "severe varus osteoarthritis of both knees with bone-on-bone collapse of the medial compartments and advanced patellofemoral involvement." Due to his severe osteoarthritis, Dr. Miner felt that knee replacement was his best option to alleviate symptoms and restore mobility. He also indicated that bilateral knee replacement, as opposed to unilateral staged knee replacement was a reasonable treatment option. While Dr. Miner referenced Claimant's alleged workplace injury, he did not credibly opine that the need for bilateral knee replacement was causally related to Claimant's alleged work injury. (Ex. G).

25. On October 22, 2020, Claimant underwent a right total knee arthroplasty performed by Dr. Miner. (Ex. K). No credible evidence was admitted indicating Claimant's right total knee arthroplasty was causally related to Claimant's employment with AA[Redacted] or causally related to the December 3, 2019 incident involving NB[Redacted].

CONCLUSIONS OF LAW

Generally

The purpose of the Workers' Compensation Act of Colorado, §§ 8-40-101, et seq., C.R.S. is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. *See* § 8-40-102(1), C.R.S. Claimant shoulders the burden of proving entitlement to benefits by a preponderance of the evidence. *See* § 8-43-201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 592 P.2d 792 (Colo. 1979). The facts in a workers' compensation case must be interpreted neutrally; neither in favor of the rights of the claimant, nor in favor of the rights of respondents; and a workers' compensation claim shall be decided on the merits. § 8-43-201, C.R.S.

Assessing weight, credibility, and sufficiency of evidence in Workers' Compensation proceeding is the exclusive domain of the administrative law judge. *University Park Care Center v. Indus. Claim Appeals* Office, 43 P.3d 637 (Colo. App. 2001). Even if other evidence in the record may have supported a contrary inference, it is for the ALJ to resolve conflicts in the evidence, make credibility determinations, and draw plausible inferences from the evidence. *Id*. at 641. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the

witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *Prudential Ins. Co. v. Cline*, 57 P.2d 1205 (Colo. 1936); *Bodensieck v. Indus. Claim Appeals Office*, 183 P.3d 684 (Colo. App. 2008). The weight and credibility to be assigned expert testimony is a matter within the discretion of the ALJ. *Cordova v. Indus. Claim Appeals Office*, 55 P.3d 186 (Colo. App. 2002). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colorado Springs Motors, Ltd. v. Indus. Comm'n*, 441 P.2d 21 (Colo. 1968).

The ALJ's factual findings concern only evidence and inferences found to be dispositive of the issues involved; the ALJ has not addressed every piece of evidence or every inference that might lead to conflicting conclusions and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Eng'g, Inc. v. Indus. Claim Appeals Office*, 5 P.3d 385 (Colo. App. 2000).

Compensability

A claimant's right to recovery under the Workers Compensation Act is conditioned on a finding that the claimant sustained an injury while the claimant was "at the time of the injury, … performing service arising out of and in the course of the employee's employment." § 8-41-301(1)(b), C.R.S.; *Triad Painting Co. v. Blair*, 812 P.2d 638, 641
(Colo. 1991). The Claimant must prove her injury arose out of the course and scope of her employment by a preponderance of the evidence. § 8-41-301(1)(b) & (c), C.R.S.; *see City of Boulder v. Streeb*, 706 P.2d 786 (Colo. 1985). "Arising out of" and "in the course of" employment comprise two separate requirements. *Triad Painting Co.*, 812 P.2d at 641. An injury occurs "in the course of" employment where the claimant demonstrates that the injury occurred within the time and place limits of his employment and during an activity that had some connection with his work-related functions. *See Triad Painting Co. v. Blair*, 812 P.2d at 641; *Hubbard v. City Market,* W.C. No. 4-934-689-01 (ICAO, Nov. 21, 2014).

The "arising out of" element is narrower and requires claimant to show a causal connection between the employment and the injury such that the injury "has its origin in an employee's work-related functions and is sufficiently related thereto as to be considered part of the employee's service to the employer in connection with the contract of employment." *Popovich v. Irlando*, 811 P.2d 379, 383 (Colo. 1991); *City of Brighton v. Rodriguez*, 318 P.3d 496, 502 (Colo. 2014). The mere fact that an injury occurs at work does not establish the requisite causal relationship to demonstrate that the injury arose out of the employment. *Finn v. Indus. Comm'n,* 437 P.2d 542 (Colo. 1968); *Sanchez v. Honnen Equip. Co.,* W.C. No. 4-952-153-01 (ICAO, Aug. 10, 2015).

The claimant must prove causation to a reasonable probability. Lay testimony alone may be sufficient to prove causation. However, where expert testimony is presented on the issue of causation it is for the ALJ to determine the weight and credibility to be assigned such evidence. *Rockwell Int'l v. Turnbull,* 802 P.2d 1182 (Colo. App.

1990); *Marjorie Jorgensen v. Air Serve Corp.,* W.C. No. 4-894-311-03, (ICAO, Apr. 9, 2014).

Medical Treatment

Respondents are liable to provide medical treatment that is reasonable and necessary to cure and relieve the effects of an industrial injury. Section 8-42-101(1)(a),
C.R.S. A service is medically necessary if it cures or relieves the effects of the injury and is directly associated with the claimant's physical needs. *Bellone v. Indus. Claim Appeals Office,* 940 P.2d 1116 (Colo. App. 1997); *Parker v. Iowa Tanklines*, Inc., W.C. No. 4-517- 537, (ICAO May 31, 2006). The question of whether the claimant proved treatment is reasonable and necessary is one of fact for the ALJ. *Kroupa v. Indus. Claim Appeals Office,* 53 P.3d 1192 (Colo. App. 2002). *Hobirk v. Colorado Springs School Dist.,* W.C. No. 4-835-556-01 (ICAO Nov. 15, 2012).

Temporary Total Disability

To prove entitlement to Temporary Total Disability (TTD) benefits, Claimant must prove her industrial injury caused a disability lasting more than three work shifts, she left work as a result of the disability, and the disability resulted in an actual wage loss. *Anderson v. Longmont Toyota,* 102 P.3d 323 (Colo. 2004); *City of Colorado Springs v. Indus. Claim Appeals Office,* 954 P.2d 637 (Colo. App. 1997). Section 8-42-103(1)(a) requires Claimant to establish a causal connection between a work-related injury and a subsequent wage loss in order to obtain TTD benefits. *PDM Molding, Inc. v. Stanberg*, 898 P.2d 542 (Colo. 1995). The term "disability" connotes two elements: (1) medical incapacity evidenced by loss or restriction of bodily function; and (2) impairment of wage earning capacity as demonstrated by Claimant's inability to resume his or her prior work. *Culver v. Ace Electric*, 971 P.2d 641, 649 (Colo. 1999).

The impairment of earning capacity element of disability may be evidenced by a complete inability to work, or by restrictions which impair the claimant's ability effectively and properly to perform regular employment. *Ortiz v. Charles J. Murphy & Co.*, 964 P.2d 595, 597 (Colo. App. 1998) TTD benefits ordinarily continue until terminated by the occurrence of one of the criteria listed in § 8-42-105 (3), C.R.S. The existence of disability is a question of fact for the ALJ. No requirement exists that a claimant produce evidence of medical restrictions, a claimant's testimony alone is sufficient to demonstrate a disability. *Lymburn v. Symbios Logic,* 952 P.2d 831, 833 (Colo. App. 1997).

Claimant's Claims Against TO[Redacted]

Claimant has failed to establish that he sustained a compensable injury arising out of the course of employment with TO[Redacted]. Specifically, Claimant has failed to establish he was an "employee" of TO[Redacted] on December 3, 2019, or any other time. As relevant to Claimant's alleged relationship with TO[Redacted], the Act defines employee as "any individual who performs services for pay for another …" § 8-43-202 (2)(a), C.R.S. No credible evidence was presented indicating Claimant was

performing any service for TO[Redacted] on December 3, 2019, or that he was employed by TO[Redacted] in any capacity. No credible evidence was presented in support of Claimant's contention that TO[Redacted]and AA[Redacted] were the same entity. Claimant's Workers' Claim for Compensation related to the December 3, 2019 incident did not identify TO[Redacted] as his employer. Moreover, in the multiple claims Claimant filed against AA[Redacted], he did not allege he was employed by TO[Redacted]. Because no credible evidence exists establishing any employment relationship between Claimant and TO[Redacted], Claimant has failed to establish that he sustained any injury arising out of the course of employment with TO[Redacted]. Because Claimant has failed to establish that he sustained a compensable injury, Claimant has failed to establish an entitlement to medical or temporary disability benefits.

Claimant's Claims Against AA[Redacted]

Claimant has failed to establish by a preponderance of the evidence that he sustained a compensable injury arising out of the course of employment with AA[Redacted]. Unlike TO[Redacted], the evidence does establish it is more likely than not Claimant was providing services for AA[Redacted] on December 3, 2019 for pay.

AA[Redacted] offered Claimant two-months of paid training to determine whether Claimant could work as a driver for AA[Redacted]. AA[Redacted] paid Claimant $1,500 on November 1, 2019 and December 2, 2019. That Claimant did not formally apply for a position with AA[Redacted], and had not completed paperwork A AA[Redacted] deemed necessary does not lead to a different conclusion. The evidence was undisputed that Claimant was using or preparing to use one of AA's[Redacted] vans on December 3, 2019 when an incident with NB[Redacted]occurred. The ALJ makes no conclusions about the nature of Claimant's relationship except as relevant to the December 3, 2019 incident.

Claimant has failed to establish he sustained an injury arising out of his employment with AA[Redacted]. Claimant's testimony regarding the alleged incident with NB[Redacted]on December 3, 2019 was not credible, and no credible evidence was admitted establishing that Claimant sustained an injury on December 3, 2019. Claimant's first documented report of the alleged incident is the February 13, 2019 APD report, in which Claimant did not report being struck with a car door, or sustaining injuries to either knee. Instead, Claimant reported only scratches on his legs that had healed. Claimant's statements to APD that NB[Redacted]physically assaulted him were not corroborated by the other witness interviewed. Although the evidence establishes that Claimant and NB[Redacted] had an interaction on December 3, 2019, no credible evidence exists that NB[Redacted] assaulted Claimant, struck him in the knee with a van door, or otherwise injured Claimant.

Claimant's testimony that he chose to file numerous claims against AA[Redacted] in an attempt to obtain $150,000 also undermines Claimant's credibility. Although Claimant filed several different claims against AA[Redacted] in the months after December 2019, he did not file a workers' claim for compensation related to the

December 3, 2019 incident until September 2020, more than nine months after the alleged events. Claimant also did not seek medical treatment for his alleged knee injuries until June 3, 2020, six months after the alleged incident.

When Claimant did seek medical attention, his physician, Dr. Miner attributed Claimant's symptoms to ongoing severe arthritic conditions of the knee. Although Dr. Miner mentioned a workers' compensation claim, he offered no credible explanation as to how the alleged incident caused an injury to Claimant's knees, aggravated his pre existing condition, or caused the need for surgery. The ALJ finds, more likely than not that Claimant's knee condition and the need for surgery is the result of his preexisting knee condition, and is unrelated to any employment with AA[Redacted] or the December 3, 2019 incident involving NB[Redacted].

The ALJ finds Claimant has failed to establish by a preponderance of the evidence that he sustained a compensable injury arising out of the course of employment with AA[Redacted]. Because Claimant has failed to establish a compensable injury, Claimant has failed to establish an entitlement to medical treatment or temporary disability benefits.

ORDER

It is therefore ordered that:

1. Claimant's claims for workers' compensation benefits against TO[Redacted] and Insurer are denied and dismissed.

2. Claimant's claims for workers' compensation benefits against AA[Redacted] are denied and dismissed.

If you are dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED: March 14, 2023

Steven R. Kabler
Administrative Law Judge
Office of Administrative Courts
1525 Sherman Street, 4th Floor
Denver, Colorado, 80203

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. WC 5-204-404-001

ISSUES

1. Whether Claimant established by a preponderance of the evidence that he sustained a compensable injury arising out of the course of his employment with Employer on April 1, 2022.

2. Whether Claimant established by a preponderance of the evidence an entitlement to medical benefits.

3. Whether Claimant established by a preponderance of the evidence that left knee surgery recommended by Dr. Schnell is reasonable and necessary to cure or relieve the effects of a work-related injury.

4. Determination of Claimant's average weekly wage.

FINDINGS OF FACT

1. Claimant is a 24-year-old man who worked for Employer as a concrete finisher.

2. On April 19, 2022, Claimant was working with a crew laying and finishing a raised concrete pad at the Larimer County Jail. Because the pad was inside a building, a concrete pumping truck was used to move concrete to the pad location through an 80-foot-long hose measuring 3.5 inches in diameter. (Ex. D). The project required placement of 18.5 cubic yards of concrete into an area approximately 25 to 30 feet in length and 15-20 feet in width. Due to the relatively small size of the project, the crew working on the pad was in close proximity to one another. (Ex. D). The concrete pumping truck arrived at the Larimer County Jail project at 5:30 a.m., on April 19, 2022 and remained on site until 9:45 a.m. (Ex. D).

3. Claimant testified his job assignment on April 19, 2022 was to place concrete into the pad form by holding the open end of the concrete hose. April 19, 2022 was the first time Claimant had performed this role. Claimant testified that sometime between 12:00 and 1:00 p.m., he was pulling the hose and had his left foot hooked beneath a piece of metal rebar or reinforcement mesh, when the pump "caught air"[1] and "blasted [him} in the opposite direction" (*i.e.*, backward). Claimant testified he fell to the ground after the hose "kicked," causing him to twist and injure his left knee. Claimant testified another worker helped him up. Claimant testified he verbally reported the incident to his foreman, [Redacted, hereinafter JH], and returned to work finishing concrete after the pour was completed.

[1] The phrase "catching air" refers to a situation where air interrupts the flow of concrete from the pump truck through the hose, causing the hose to expel air, rather than concrete.

4. [Redacted, hereinafter JS], one of Employer's foremen who was working at the project on April 19, 2022, testified at hearing. JS[Redacted] testified the crew working on the pad was close to each other at all times, and he did not recall Claimant's role in the work that day. JS[Redacted] testified when a concrete pump "catches air" it makes a loud, distinct noise that would have been audible to everyone present. When this occurs the pump operator will stop the pump to assess the problem. He did not recall the pump catching air on April 19, 2022, and did not recall Claimant being injured.

5. JH[Redacted] testified at hearing. JH[Redacted] was the foreman supervising Claimant on April 19, 2022, and was present while the concrete was being poured. JH[Redacted] testified when a concrete pump catches air it makes a distinct sound, and he did not recall the hose catching air or any other problems with the concrete pour on April 19, 2022. He testified it would be difficult for a person to hook a foot under the reinforcement mesh used on the pour because of the small distance between the mesh and the ground. JH[Redacted] did not see Claimant fall that day, but Claimant did report pain in his leg as the crew was finishing pouring concrete. He indicated Claimant wanted to keep working that day after reporting an injury.

6. Claimant first sought medical treatment for his left knee on April 21, 2022, when he saw Jeffrey Baker, M.D., at Concentra in Fort Collins, Colorado. Claimant reported to Dr. Baker that the injury occurred on April 19, 2022 at 11:00 a.m., while Claimant "was moving the concrete pump line laterally and he felt a 'pop' in his left knee." Dr. Baker characterized the incident as "the result of [a misstep] while carrying a cement hose." (Ex. 5). Dr. Baker's examination revealed no swelling of Claimant's knee. Claimant reported tenderness over the lateral and medial joint lines, and lateral collateral ligament, crepitus, and limited range of motion in all planes. Dr. Baker found positive Lachman's, laxity on varus stress, and lateral McMurray tests.[2] He diagnosed Claimant with a knee strain, and referred him for physical therapy. (Ex. 5). Claimant underwent six sessions of physical therapy at Concentra for his left knee. (Ex. 9).

7. On April 22, 2022, Employer prepared First Report of Injury or Illness (FROI), which described Claimant's injury occurring as he "was pulling a concrete hose and stepped backwards wrong and hurt his knee." (Ex. M).

8. On April 25, 2022, Claimant saw Linda Young, M.D., at Concentra. On examination, Dr. Young noted trace effusion and found tenderness over the lateral joint line and lateral collateral ligament, limited range of motion in all planes, and positive Lachman's and lateral McMurray tests. Dr. Young diagnosed claimant with internal derangement of the left knee, and ordered an MRI. (Ex. 6)

9. On May 3, 2022, Claimant underwent an MRI on his left knee. The MRI showed irregular tearing of the posterior horn of the lateral meniscus, and a complete or near complete tear of the anterior cruciate ligament (ACL) at the femoral attachment. The MRI

[2] Lachman's test is an anterior collateral ligament test. McMurray test is a meniscus test. (See WCRP Rule 17, Exhibit 6).

noted no effusion within the joint. The remainder of Claimant's knee ligaments and tendons were intact. (Ex. B).

10. Claimant returned to Dr. Baker on May 5, 2022. Dr. Baker indicated Claimant was returning for "left knee and lower back injuries as a result of a fall from the bottom step of his truck breaking."[3] He reviewed Claimant's MRI, diagnosed a left knee strain, ACL tear, and tear of the meniscus, and referred Claimant for an orthopedic consultation. Claimant saw Dr. Baker five additional times through August 22, 2022. At these visits, Dr. Baker's exam findings remained substantially unchanged. (Ex. 5).

11. On May 17, 2022, Respondents filed a Notice of Contest, indicating Claimant's claim was contested due to the need for further investigation. (Ex. L).

12. On May 23, 2022, Claimant saw Lucas Schnell, D.O., for an orthopedic consultation on referral from Dr. Baker. Dr. Schnell described Claimant's injury as occurring while "holding onto the concrete pump when it jerked violently. He had a pivot-shift type injury and felt an immediate pop in his knee. He notices swelling within an hour as well. " Dr. Schnell reviewed Claimant's May 3, 2022 MRI report and images and noted that Claimant had a lateral discoid meniscus with a posterior horn tear, and near-complete ACL rupture. On examination, Dr. Schnell found mild left knee effusion, a positive Lachman's test, positive anterior drawer test, and pain apprehension with lateral McMurray's testing. Based on his examination and the MRI film, Dr. Schnell diagnosed Claimant with a left ACL rupture, left posterior horn lateral meniscus tear, and left discoid meniscus. He recommended arthroscopic left knee ACL reconstruction surgery, lateral meniscus saucerization, and meniscectomy. Dr. Schnell opined that Claimant's described "twisting mechanism with his work Injury does correlate with an ACL rupture and lateral meniscal tear." (Ex. C). Dr. Schnell requested authorization of Claimant's surgery, which was denied by Insurer.

13. Dr. Baker and Dr. Schnell are authorized treating physicians.

14. On October 27, 2021, Mark Failinger, M.D., performed an independent medical examination (IME) of Claimant at Respondents' request. Dr. Failinger was admitted as an expert in orthopedic surgery and sports medicine and testified at hearing. Dr. Failinger documented Claimant's report of the mechanism of injury as: "[Claimant] was pulling the hose while pouring concrete, as he was pulling backwards, he states all the pressure was on his left knee when the pump 'caught air.' There was an air blast, and the hose kicked back. He states the hose pulled away from him, and it yanked him forward. He states he twisted and fell and felt a pop with some numbness to the left knee." (Ex. A). Dr. Failinger credibly testified that had Claimant sustained an acute ACL or meniscal tear on April 19, 2022, it would be unlikely Claimant could have returned to work that day, and that most patients would terminate weightbearing after such an injury.

15. Dr. Failinger reviewed Claimant's MRI films from May 3, 2022 and opined that there was "no medical possibility that the anterior ligament tear present on the MRI scan

[3] Dr. Baker continued to use this description of Claimant's mechanism of injury in each of his later records. No evidence was presented explaining the discrepancy in mechanism of injury in Dr. Baker's records.

occurred at the time of the alleged work incident of 04-19-2022." Dr. Failinger indicated the MRI did not show any acute changes to the Claimant's ACL, such as edema. He opined that an MRI of a recent ACL tear would tear would show significant edema (inflammation) within the ligament fibers and effusion in the joint even two and one-half weeks after the injury. He further opined Claimant's meniscus tears were also likely pre-existing and that a recent meniscal tear or worsening of a preexisting tear would also show significant joint effusion and more than minimal tibial bone bruising. Dr. Failinger opined that Claimant's ACL tear was preexisting, but placed Claimant at a greater risk of instability due the instability. Dr. Failinger opined that the need for ACL reconstruction and meniscal surgery was not due to any pathology caused by Claimant's April 19, 2022 work incident. Dr. Failinger agreed that ACL reconstruction may be reasonable and necessary, but does not believe the need for the surgery is work-related.

16. As of the date of hearing, Claimant had not undergone the surgery recommended by Dr. Schnell.

17. Claimant testified that he sustained a injury to his left knee in November 2021, while operating a motorized bicycle, that resulted in swelling and abrasions on his knee. Claimant testified he did not receive medical treatment for the injury, although he did limp, and his knee was bandaged. Claimant testified he had no prior injuries to his left knee. A photograph of Claimant's knee from November 8, 2021 was admitted into evidence as Exhibit D, and shows significant swelling and abrasions on Claimant's left knee. JH[Redacted] testified that Claimant was placed on light duty for approximately one month following the November 2021 knee injury. During that time, JH[Redacted] testified he observed Claimant limping, but he did not notice Claimant having difficulty with his assigned job tasks. Claimant was not on light duty from January 1, 1022 to April 18, 2022, and was able to work without limitations finishing concrete.

18. From December 26, 2021 through April 16, 2022, Claimant averaged 31.5 hours per week, including overtime. At the time of his injury, Claimant earned $24.00 per hour. The ALJ finds that Claimant's average weekly wage at the time of his injury was $756.00 per week.

CONCLUSIONS OF LAW

Generally

The purpose of the Workers' Compensation Act of Colorado, §§ 8-40-101, et seq., C.R.S. is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. *See* § 8-40-102(1), C.R.S. Claimant shoulders the burden of proving entitlement to benefits by a preponderance of the evidence. *See* § 8-43-201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 592 P.2d 792 (Colo. 1979). The facts in a workers' compensation case must be interpreted neutrally; neither in favor of the rights of the claimant, nor in favor of the rights of respondents; and a workers' compensation claim shall be decided on the merits. § 8-43-201, C.R.S.

Assessing weight, credibility, and sufficiency of evidence in Workers' Compensation proceeding is the exclusive domain of the administrative law judge. *University Park Care Center v. Indus. Claim Appeals* Office, 43 P.3d 637 (Colo. App. 2001). Even if other evidence in the record may have supported a contrary inference, it is for the ALJ to resolve conflicts in the evidence, make credibility determinations, and draw plausible inferences from the evidence. *Id*. at 641. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *Prudential Ins. Co. v. Cline*, 57 P.2d 1205 (Colo. 1936); *Bodensieck v. Indus. Claim Appeals Office*, 183 P.3d 684 (Colo. App. 2008). The weight and credibility to be assigned expert testimony is a matter within the discretion of the ALJ. *Cordova v. Indus. Claim Appeals Office*, 55 P.3d 186 (Colo. App. 2002). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colorado Springs Motors, Ltd. v. Indus. Comm'n*, 441 P.2d 21 (Colo. 1968).

The ALJ's factual findings concern only evidence and inferences found to be dispositive of the issues involved; the ALJ has not addressed every piece of evidence or every inference that might lead to conflicting conclusions and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Eng'g, Inc. v. Indus. Claim Appeals Office*, 5 P.3d 385 (Colo. App. 2000).

Compensability

A claimant's right to recovery under the Workers Compensation Act is conditioned on a finding that the claimant sustained an injury while the claimant was "at the time of the injury, … performing service arising out of and in the course of the employee's employment." § 8-41-301(1)(b), C.R.S.; *Triad Painting Co. v. Blair*, 812 P.2d 638, 641 (Colo. 1991). The Claimant must prove her injury arose out of the course and scope of her employment by a preponderance of the evidence. § 8-41-301(1)(b) & (c), C.R.S.; *see City of Boulder v. Streeb*, 706 P.2d 786 (Colo. 1985). "Arising out of" and "in the course of" employment comprise two separate requirements. *Triad Painting Co.*, *supra*.

An injury occurs "in the course of" employment where the claimant demonstrates that the injury occurred within the time and place limits of his employment and during an activity that had some connection with his work-related functions. *See Triad Painting Co. supra*; *Hubbard v. City Market,* W.C. No. 4-934-689-01 (ICAO Nov. 21, 2014). The "arising out of" element is narrower and requires claimant to show a causal connection between the employment and the injury such that the injury "has its origin in an employee's work-related functions and is sufficiently related thereto as to be considered part of the employee's service to the employer in connection with the contract of employment." *Popovich v. Irlando*, 811 P.2d 379, 383 (Colo. 1991); *City of Brighton v. Rodriguez*, 318 P.3d 496, 502 (Colo. 2014). The mere fact that an injury occurs at work does not establish the requisite causal relationship to demonstrate that the injury arose out of the employment. *Finn v. Indus. Comm'n,* 437 P.2d 542 (Colo. 1968); *Sanchez v. Honnen Equip. Co.,* W.C. No. 4-952-153-01 (ICAO Aug. 10, 2015).

However, the mere occurrence of symptoms at work does not require the ALJ to conclude that the duties of employment caused the symptoms, or that the employment aggravated or accelerated any pre-existing condition. Rather, the occurrence of symptoms at work may represent the result of or natural progression of a pre-existing condition that is unrelated to the employment. *See F.R. Orr Construction v. Rinta,* 717 P.2d 965 (Colo. App. 1995); *Atsepoyi v. Kohl's Dept. Stores*, W.C. No. 5-020-962-01, (ICAO, Oct. 30, 2017). The question of whether the requisite causal connection exists is one of fact for determination by the ALJ. *City of Boulder v. Streeb*, 706 P.2d 786 (Colo. 1985); *Faulkner v. Indus. Claim Appeals Office,* 12 P.3d 844 (Colo. App. 2000). *Fuller v. Marilyn Hickey Ministries, Inc., W.C. No. 4-588-675 (*ICAO Sept. 1, 2006*).*

Claimant has failed established by a preponderance of the evidence that he sustained a compensable injury to his left knee arising out of the course of his employment with Employer on April 19, 2022. While Claimant did report knee pain to JH[Redacted] on April 19, 2022, the evidence does not credibly establish that Claimant incurred an injury to his left knee on April 19, 2022.

Claimant has offered inconsistent explanations of the mechanism of injury. Claimant testified he injured his knee while operating the concrete pump hose with his left foot placed beneath the rebar mesh when the hose "caught air" blasting him backward, causing him to fall. Claimant's testimony regarding the mechanism of injury was inconsistent with his initial report to Dr. Baker, the First Report of Injury, and includes elements not previously reported to his health care providers. For example, both Dr. Baker's initial report and the First Report of Injury indicate Claimant's injury occurred as the result of a misstep. Claimant did not report the concrete hose "catching air," being "blasted" back, twisting his knee, or falling, or positioning his foot beneath the rebar mesh until weeks or months later. Claimant did not report to either Dr. Schnell or Dr. Failinger that his foot was placed beneath the concrete rebar. Moreover, Claimant testimony that he was "blasted" in the opposite direction is inconsistent with his report to Dr. Failinger that he was pulled forward. Finally, neither JH[Redacted] nor JS[Redacted], who were present at the job site, recall the concrete hose "catching air," or recall Claimant falling. The inconsistencies in Claimant's descriptions of the mechanism of injury render Claimant's testimony unreliable and not credible. Dr. Schnell's opinion that Claimant's injury is causally related to his employment is not persuasive because it is based on the Claimant's unreliable description of the mechanism of injury.

While it is undisputed that Claimant has a ruptured ACL and meniscal pathology in his left knee, the ALJ finds persuasive Dr. Failinger's opinion that Claimant's left knee pathology was preexisting. Dr. Failinger credibly opined that an ACL tear or a meniscus tear sustained on April 19, 2022, would be accompanied by significant inflammation which would remain present for weeks after the injury. However, Claimant's April 21, 2022 examination by Dr. Baker's revealed "no swelling." Similarly, while Dr. Young and Dr. Schnell noted "trace" and "mild" effusion, neither noted significant swelling. Claimant's MRI also notes no joint effusion. The lack of significant swelling is inconsistent with an acute ACL or meniscal tear. Claimant's positive Lachman's and McMurray tests are

explained by his preexisting pathology, and are not necessarily indicative of an acute injury.

The ALJ finds credible Dr. Failinger's testimony that had Claimant sustained a torn ACL and/or meniscal tear on April 19, 2022, it is unlikely he would have been able to return to work that day. The ALJ concludes Claimant's ability to return to work the remainder of April 19, 2022, is inconsistent with an acute injury to the left knee.

Based on the totality of the evidence, Claimant has failed to establish it is more likely than not he sustained a compensable injury to his left knee arising out of the course of his employment with Employer on April 19, 2022.

Medical Benefits & Surgical Authorization

Under section 8-42-101(1)(a), C.R.S., respondents are liable for authorized medical treatment that is reasonable and necessary to cure or relieve the effects of the industrial injury. *See Owens v. Indus. Claim Appeals Office*, 49 P.3d 1187, 1188 (Colo. App. 2002). The question of whether the claimant proved treatment is reasonable and necessary is one of fact for the ALJ. *Kroupa v. Indus. Claim Appeals Office,* 53 P.3d 1192 (Colo. App. 2002). All results flowing proximately and naturally from an industrial injury are compensable. *Id., citing Standard Metals Corp. v. Ball*, 474 P.2d 622 (Colo. 1970).

Because Claimant has failed to establish a compensable injury, Claimant's has also failed to establish an entitlement to medical benefits, or authorization of the surgery recommended by Dr. Schnell.

Average Weekly Wage

Section 8-42-102(2), C.R.S. requires the ALJ to calculate Claimant's average weekly wage (AWW) based on the earnings at the time of injury as measured by the Claimant's monthly, weekly, daily, hourly, or other earnings. However, if for any reason, the ALJ determines the default method will not fairly calculate the AWW, § 8-42-102(3), C.R.S. affords the ALJ discretion to determine the AWW in such other manner as will fairly determine the wage. § 8-42-102(3), C.R.S. establishes the so-called "discretionary exception". *Benchmark/Elite, Inc. v. Simpson*, 232 P.3d 777 (Colo. 2010); *Campbell v. IBM Corp*., 867 P.2d 77 (Colo. App. 1993). The overall objective in calculating the AWW is to arrive at a fair approximation of Claimant's wage loss and diminished earning capacity. *Campbell v. IBM Corp*., supra; *Avalanche Indus. v. ICAO*, 166 P.3d 147 (Colo. App. 2007). Where the Claimant's AWW at the time of injury is not a fair approximation of Claimant's later wage loss and diminished earning capacity, the ALJ is vested with the discretionary authority to use an alternative method of determining a fair wage. *See id*.

As found, Claimant's average weekly wage as of April 19, 2022 $756.00 per week. Neither of the AWW calculations proffered by the parties are supported by the evidence and do not accurately reflect Claimant's AWW.

ORDER

It is therefore ordered that:

1. Claimant's claim for worker's compensation benefits related to an alleged April 19, 2022 injury is denied and dismissed.

If you are dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED: March 23, 2023

Steven R. Kabler
Administrative Law Judge
Office of Administrative Courts
1525 Sherman Street, 4th Floor
Denver, Colorado, 80203

ISSUES PRESENTED

- Whether Claimant established, by a preponderance of the evidence, that [Redacted, hereinafter VG] suffered a compensable Coronavirus (Covid-19) infection arising out of his work duties for Employer on or about June 2, 2020.

- If Claimant established that VG[Redacted] suffered a compensable Covid-19 infection, whether she also established, by a preponderance of the evidence, that the care he received after his Covid-19 diagnosis was reasonable and necessary treatment to cure and relieve him of the effects of said infection.

- If Claimant established that VG[Redacted] suffered a compensable Covid-19 infection, whether she also established that his death was causally related to that infection.

- If Claimant established that VG[Redacted] suffered a compensable Covid-19 infection, whether she also demonstrated, by a preponderance of the evidence, that VG[Redacted] was temporarily totally disabled from June 2, 2020, until the date of his death on July 1, 2020.

- If Claimant established that VG[Redacted] suffered a compensable Covid-19 infection and that he succumbed to that infection, whether Claimant also demonstrated, by a preponderance of the evidence, that she and VG[Redacted] were in a common law marriage at the time of his passing.

- If Claimant established that she is the surviving spouse of VG[Redacted], whether she also demonstrated that she is entitled to wholly dependent death benefits pursuant to the provisions of C.R.S. § 8-41-501, § 8-42-114 and § 8-42-115 and if so, at what rate of compensation.

STIPULATION

Although Claimant indicates in her post-hearing position statement that the parties were unable to arrive at a stipulation concerning VG[Redacted] average weekly wage (AWW), Respondents, in their position statement, reference their willingness to stipulate that VG's[Redacted] AWW is $583.90. While no formal agreement appears to have been reached, since Respondents' AWW calculation is noted to be 10 cents more than what Claimant calculated for VG's[Redacted], the ALJ has reviewed Claimant's Exhibit 16 and ALJ agrees that, at the time of his death, VG's[Redacted] AWW is $583.80. This figure is based upon VG's[Redacted] gross wages for 2020 from a W2 form provided from Employer. Based upon the evidence presented, the ALJ is persuaded that this calculation represents the fairest approximation of VG's[Redacted] wage loss and diminished earning capacity based upon the 153 days of employment

from January 1, 2020 through June 1, 2020 after which VG[Redacted] was hospitalized and unable to work due to his alleged occupational disease. Accordingly, the ALJ finds VG's[Redacted] AWW to equal $583.80.

FINDINGS OF FACT

Based upon the evidence presented at hearing, the ALJ enters the following findings of fact:

Generally

1. Employer in this action operates a long term/skilled nursing facility, i.e. a nursing home known as [Redacted, hereinafter UC]. VG[Redacted] was employed by the facility as a member of the housekeeping department, specifically in the capacity of a floor technician or "floor tech".

2. As a floor tech for the facility, VG's[Redacted] duties included cleaning/maintaining the main areas of the building, such as the dining room, the hallways, the common areas and the lobby. He would also collect and dispose of the building's trash. As is relevant to the issues presented, VG[Redacted] was continuously employed by facility from March 2020 through June 1, 2020.

3. VG[Redacted] became sick with Covid-19 on or about May 26, 2020. His health deteriorated rapidly and he was admitted to the hospital on June 2, 2020 with acute respiratory failure with hypoxia due to pneumonia. (Ex. 11, p. 57). The evidence presented supports a finding that Claimant was hospitalized in the ICU unit and unable to work in any capacity between June 2, 2020 and July 1, 2020. Accordingly, the ALJ finds that VG[Redacted] was temporarily and totally disabled from June 2, 2020, through July 1, 2020.

4. Despite advanced in-patient hospital care, VG's[Redacted] condition did not improve. He was subsequently intubated and ventilator dependent for a period of time while in the hospital's ICU. After developing multisystem organ failure, the difficult decision was made to withdraw further life support. (Ex. 11, p. 88). VG[Redacted] passed away on July 1, 2020.

The Testimony of [Redacted, hereinafter DM]

5. DM[Redacted] testified as Employer's current infection prevention (IP) nurse. She has worked for Employer for the past 9 years. DM[Redacted] testified that she took over the IP nursing position in October 2020. When she assumed the position, DM[Redacted] "inherited" a list of every person, both staff and resident that had tested positive or whom had developed symptoms consistent with Covid-19 prior to October 2020. (Hrg. Trans., p. 19, ll. 18-24). DM[Redacted] testified that the chart documenting when a resident or staff member developed Covid-19 was originally put together by the previous IP nurse, [Redacted, hereinafter LN]. *Id* at p. 19, ll. 2-8. According to DM[Redacted], she continued to document those residents and staff members who

developed Covid-19 after she took over as the IP nurse. *Id*. at. p. 19, ll. 9-14. The aforementioned chart is contained at Exhibit 18.

6. DM[Redacted] testified that as soon as a positive Covid-19 test result was received or as soon as a resident presented with symptoms consistent with a Covid-19 infection, they were placed in quarantine. (Hrg. Trans., p. 20, ll. 1-5). Staff members testing positive or exhibiting symptoms were "automatically placed out of work". *Id*. at p. 21, ll. 1-12.

7. DM[Redacted] testified that approximately 110 residents resided in Employer's facility between April 1 and June 30, 2020. Based upon the charting done during this period, DM[Redacted] testified that 20 residents tested positive for Covid-19 and 8 out of this 20 died from Covid-19 related disease. (Hrg. Trans., p. 21, ll. 16-25; pp. 22-23, ll. 1-8; Ex. 18). DM[Redacted] testified that during this same period, 20 staff members tested positive for and/or developed Covid-19 and one died, that being VG[Redacted]. *Id*. at p. 23, ll. 9-15. DM[Redacted] indicated that VG[Redacted] was the third staff member to come back with a positive Covid-19 test. *Id.* at p. 23, ll. 22-23.

8. According to DM[Redacted], the National Guard came to the facility on May 2, 2020, and tested both residents and staff members who consented to testing. (Hrg. Trans., p. 24, ll. 7-14). Claimant's Ex. 18 reflects that VG[Redacted] was tested on this date and that he had a negative test result. (Ex. 18, p. 137).

9. DM[Redacted] testified that the first positive test for Covid-19 in a resident was returned on May 24, 2020. (Hrg. Trans. p. 32, ll. 12-13). According to DM[Redacted], the facility declared a Covid-19 outbreak shortly thereafter on May 29, 2020. (Hrg. Trans. p. 25, ll. 12-17). As a result of the outbreak, DM[Redacted] testified that the staff stepped up their use of personal protective equipment (PPE)[1] and increased cleaning measures. The facility also set up an isolation unit for infected residents at the direction of the public health department. *Id*. at p. 26, ll. 2-3; p. 27, ll. 3-18. Despite these measures, the evidence supports a finding that residents and staff continued to contract Covid-19. *Id*. at p. 26, ll. 4-8.

10. DM[Redacted] described the isolation unit, also known as the "red unit", as a completely closed off section of the facility that housed known positive Covid-19 residents. (Hrg. Trans., p. 27, ll. 8-11). According to DM[Redacted], only "designated" staff members were allowed to work in the red unit and those persons used a completely separate entrance to the building and that unit so they did not walk through the main parts of the facility. *Id*. at p. 27, ll. 12-15. Per DM[Redacted], VG[Redacted] was not tasked with moving any residents to the isolation unit. (Hrg. Trans., p. 31, ll. 20-23).

11. DM[Redacted] stated that the two employees who tested positive before VG[Redacted] were restorative certified nursing assistants (CNAs) who worked "very

[1] Any contact with a resident exhibiting symptoms or any time testing was initiated would require the use of full PPE, including a gown, gloves, an N95 mask and a face shield. (Hrg. Trans., p. 28, ll. 4-11).

closely" with the residents during range of motion exercise sessions. (Hrg. Trans., p. 30, ll. 5-8). The ALJ infers from DM's[Redacted] testimony that these CNAs had direct hands on contact with the residents. These CNAs did not work directly with VG[Redacted]. *Id*. at p. 30, ll. 11-12.

The Testimony of [Redacted, hereinafter MN]

12. MN[Redacted] testified as the Director of Environmental Services for Employer. (Hrg. Trans., p. 87, ll. 23-25). She has worked for Employer for 27 years and for the past six years has managed the laundry, housekeeping and directed the floor techs at Employer's facility. *Id*. at p. 88, ll. 1-14. She was VG[Redacted] immediate supervisor. *Id*. at p. 99, ll. 6-7.

13. MN[Redacted] described VG's[Redacted] job duties as a floor tech to include vacuuming the common areas, throwing out the trash from dirty utility rooms, sweeping, stripping wax and doing room changes, although MN[Redacted] testified that she did the "majority" of the room changes. (Hrg. Trans., p. 92, ll. 12-25).

14. MN[Redacted] testified that none of her staff ever worked inside the red unit. (Hrg. Trans., p. 93, ll. 11-20). According to MN[Redacted], the laundry and trash from the red unit would be gathered by the unit's staff, placed in trash or "red bags" and set outside the door to the unit. *Id.* at p. 93, ll. 21-25, p. 94, line 1. Once outside the red unit door, the floor techs under MN's[Redacted] direction would proceed to the isolation unit to pick up the trash and transport it and any soiled linens, et cetera out of the back door and disposed of or taken to the buildings laundry. *Id*. at p. 94, ll. 2-7. Despite being bagged and outside of the red unit, MN[Redacted] testified the collection of materials, including the trash and dirty laundry from inside the red unit required the use of full PPE, including a gown, gloves, a face shield and a N95 mask. *Id*.

15. While MN[Redacted] testified that VG[Redacted] did not work with or have any direct contact with anyone who was known to have tested positive for Covid-19, she noted that the facility is very large and the staff is comprised of dietary workers, therapists, nurses, CNAs and admissions people and that there was quite a few people in the building on a daily basis. (Hrg. Trans., p. 15-20). She also testified that her housekeepers would go into resident rooms to clean and that the housekeepers and floor techs could interact with each other. *Id*. at p. 2-14.

16. Although she did not know who completed the First Report of Injury form or where that person got the information concerning VG's[Redacted] contraction of Covid-19, MN[Redacted] testified that the First Report was incorrect in as much as VG[Redacted] did not transfer sick residents to the red unit. (Hrg. Trans., p. 99, ll. 8-18). Rather, MN[Redacted] testified she personally transported sick residents to the red unit because she was a supervisor and had taken on additional "education" with what to do with infectious people. Id. at p. 93, ll. 5-10. Nonetheless, she acknowledged that after she transported a sick resident to the red unit she would return to her regular

duties which included having contact with her housekeepers and the floor techs, including VG[Redacted].

17. The ALJ has reviewed the employer's first report of injury that was filed with the Division of Workers' Compensation. The First Report states that VG[Redacted] "may have been exposed to Covid-19 while moving Covid-19 positive residents to isolation rooms". The First Report indicates that it was completed on June 24, 2020; however, it does not show who completed it nor is it signed. (Cl. Ex 13).

The Testimony of [Redacted, hereinafter SJ]

18. Claimant, SJ[Redacted], the personal representative of the Estate of VG[Redacted] and his alleged widow, testified that VG[Redacted] was her husband at the time of his death on July 1, 2020. (Hrg. Trans., p. 37, ll. 4-6).

19. Claimant testified that she and the decedent got married in a "very little, private ceremony in March of 2016" shortly after they started dating. (Hrg. Trans., p. 37, ll. 7-10). Claimant testified that she and VG[Redacted] lived together continuously between March 2016 and his death on July 1, 2020 and that during this time, they held themselves out as husband and wife. *Id.* at p. 37, ll. 11-17, p. 42, ll. 9-12.

20. Per Claimant's testimony, she and VG[Redacted] exchanged wedding rings, shared debts and obligations, purchased a home in joint tenancy and she was named as his surviving spouse on his life insurance policy. (Hrg. Trans., p. 37, ll. 18-25, p. 38, ll. 1-3, p. 42. ll. 6-24. Further, Claimant testified that when VG[Redacted] was taken to Penrose Hospital on June 2, 2020, she did not go with him and while he was "winded", he was alert and able to talk. (Hrg. Trans., p. 45, ll. 23-25). Consequently, the information that was given to the hospital staff upon his admission came directly from VG[Redacted] . *Id*. at p. 46, ll. 2-4. The Admission Facesheet from Penrose Hospital lists Claimant as VG[Redacted]' "Spouse" and emergency contact. (Ex. 11, p. 56). Moreover, the medical records from Penrose Hospital reference Claimant as VG's[Redacted] wife. (See generally, Ex. 11).

21. Claimant's Exhibit 15(a) verifies that there was a probate action wherein Claimant requested to be named as the decedent's personal representative and his common law wife. This action was initially contested by one of VG's[Redacted] daughters; however, this daughter stopped cooperating with her attorney who was subsequently permitted to withdraw from the case on December 1, 2021. (Ex. 15(a)). There was a hearing in the Pueblo County District Court on January 11, 2022, during which the Court found that Claimant and VG[Redacted] "agreed to enter into marriage on March 17, 2016 and a ceremony was held near Mt. Princeton". After this ceremony, Claimant and VG[Redacted] "exchanged rings symbolizing their marriage to each other". (Ex. 15(a) at ¶ 13). Moreover, the Court determined from the testimony of Claimant that she and VG[Redacted] "intended to be married and shared a relationship of mutual support and obligation" based upon the fact that they signed a lease and cohabitated together in an apartment until they purchased a residence in joint tenancy

in April 2020; the mortgage agreement obligating both to be financially responsible for the mortgage and the property. *Id*. at ¶¶ 14-15. In addition to the medical records being "replete" with references to Claimant as VG's[Redacted] spouse, the Court noted that VG[Redacted] designated Claimant as his beneficiary on a life insurance policy, "clearly" identifying her as his spouse. *Id*. at ¶¶ 16-17. Finally the Court noted that Claimant filed a joint tax return identifying VG[Redacted] as her spouse. Based upon Claimant's testimony and the records submitted, the Court determined that there was "clear and convincing" evidence that Claimant was VG's[Redacted]spouse at the time of his death. *Id*. at ¶ 19. In concluding that Claimant was VG's[Redacted] surviving spouse, the Court noted: "The determination of [Claimant] as a common law spouse was necessary to complete administration of the estate, but also to establish her entitlement to workers' compensation benefits that will not be paid into or become assets of the estate". *Id*. at ¶ 27.

22. The ALJ has reviewed the certified copy of the Order from the District Court dated February 2, 2022 at Exhibit 15(a) and finds the testimony of the Claimant in the present proceeding consistent with that found by the District Court Judge in the Order of Intestacy. Based on the totality of the evidence presented, the ALJ is convinced that Claimant is the surviving common-law spouse of VG[Redacted]. Indeed, Respondents confess that Claimant established that she is the surviving widow and statutory dependent of VG[Redacted]. (Resp. Position Statement, Finding of Fact, ¶ 13, p. 4).

23. Claimant testified that in the months before VG[Redacted] fell ill in the latter part of May of 2020, she worked as a care plan coordinator for [Redacted, hereinafter IE] which is a program for all-inclusive care for the elderly. Claimant testified that commencing March 18, 2020, and continuing until the decedent was taken to Penrose on June 2, 2020, she worked from home. (Hrg. Trans., p. 38, ll. 4-24).

24. Claimant testified that during the month preceding VG's[Redacted] hospitalization there were four people living in her and VG's[Redacted] house, to wit: herself, VG[Redacted], his half-brother, [Redacted, hereinafter RR], and her son, [Redacted, hereinafter CR]. She testified that in order to prevent/minimize the Covid-19 virus from entering that home, she used Instacart to order the household groceries for delivery to the home. (Hrg. Trans., p. 39, ll. 6). Once delivered, everyone would participate in wiping the food down. *Id*. at p. 39, ll.10-11. Claimant also testified that when CR[Redacted], RR[Redacted], and VG[Redacted] came home from work at UC[Redacted][2], she would have them strip off their clothes, leave their shoes at the door, have them put their clothes in the washing machine, wash their hands with sanitizer, and take a shower. Id. at p. 39, ll. 11-19. No guests or visitors were permitted in the house. *Id.*

[2] VG[Redacted], RR[Redacted] and CR[Redacted] all worked at Employer's facility. RR[Redacted] and CR[Redacted] worked in the kitchen as dietary aids and would try to secure the same schedule so they could all car pool to/from work. (Hrg. Trans., p. 40, ll. 2-19).

25. Claimant testified that VG[Redacted] would travel straight home from work and that none of the other residents of the house were ill nor had they tested positive for Covid-19 before VG[Redacted] exhibited fell ill. (Hrg. Trans., p. 42, l. 25, p. 43, ll. 1-17). Indeed, Claimant testified that while she had gastritis and gastrointestinal issues in the period between April 1 through June 1, 2020, no one in the house was sick before VG[Redacted] became ill toward the end of May 2020. *Id.* at p. 48, ll. 13-18. Regarding trips into the community as a potential source of VG's[Redacted] Covid-19 infection, Claimant testified that she was pretty strict and nagged VG[Redacted] about the "whole thing". *Id*. at p. 46, ll. 11-25. She added that as a nurse, she was concerned about the virus and therefore suggested that the only place that RR[Redacted], CR[Redacted], or VG[Redacted] were going during that period of time was to work and back home. *Id.*

26. Claimant also suggested that VG's[Redacted] duties were not limited to maintaining the floors and collecting the building's trash. Indeed, Claimant testified that VG[Redacted] was cross-trained to feed residents and that he would go into the dining room and help feed people. (Hrg. Trans., p. 43, ll. 20-24). Claimant described VG[Redacted] as a "jack-of-all trades" who would facilitate room changes, move furniture from room to room, and assist with maintenance from time to time. *Id*. at p. 44, ll. 1-6.

27. Claimant testified that VG[Redacted] expressed concerns about Covid-19 exposure at Employer's facility and mentioned that he had to move residents to the isolation unit a few times and that he didn't feel safe. (Hrg. Trans., p. 44, ll. 7-12). Claimant testified further that she was aware, from speaking with VG[Redacted], that the employer had made PPE available to the employees. Nonetheless, she did not know if he wore it correctly. Id. at p. 44, ll. 13-16.

The Testimony of Dr. Marcus Oginsky

28. Dr. Marcus Oginsky testified as a board certified expert in the fields of internal medicine and healthcare quality management, which is a field of medicine that pertains to the analysis of data that describes the quality standards of medicine. (Hrg. Trans., p. 60, ll. 8-19). The Board Certification in health care quality management entails having at least five years of previous experience in health care quality management, 24 hours of continuous classes and lecture materials and once passing a test every two years, an additional eight hours of continuous education in the field of health care quality management. *Id*. at p. 64, ll. 2-14.

29. Dr. Oginsky is the chief quality officer at Midtown Inpatient Medicine. His job is to analyze data that is generated in the course of the clinical practice and using that data to both describe the quality and efficiencies of the practice. Dr. Oginsky has direct training in the analysis of probability and statistics, has personally treated over a thousand hospitalized Covid-19 patients in all levels and spectrums of the disease process caused thereby and has developed Covid-19 protocols for his hospital quality program. He has done additional work developing Covid-19 protocols privately which

have been published by the Centers for Disease Control (CDC). (Hrg. Trans., pp. 62-63, ll. 1-11).

30. Dr. Oginsky was asked by Claimant to review VG's[Redacted] treatment history and available records and opine as to where he most likely contracted his Covid-19 infection that lead to his hospitalization. Dr. Oginsky authored a report dated October 6, 2022, in which he noted the following medical history and course of treatment:

> VG[Redacted] was a 67-year-old male with reported history of diabetes mellitus, hypertension, and obstructive sleep apnea. He first developed a fever of 100.7 on 5/26/20. He was afebrile when he presented to work at UC[Redacted] on 5/27 and 5/28 despite a reported fever at home. On 5/29 he called off sick as he felt too ill to work. On 6/2/20 he fell more significantly ill, and his wife recorded low oxygen saturations at home. She took him to the Parkview Hospital emergency room, and he was emergently transferred to Penrose Hospital in Colorado Springs. On arrival to the hospital, Covid-19 was confirmed by RT-PCR testing, and he reported to the admitting critical care physician that he had contact with Covid-19 sick patients. Of note, the admitting physicians reported about one month of antecedent fatigue symptoms. However, the onset of his fever and the timing of acute respiratory failure are consistent with acute Covid-19 beginning with the fever onset on 5/26/2020. This timing is consistent with standard public health definitions of case onset. On arrival he was requiring maximum flow oxygen at 15 liters. He was treated with Remdesivir, steroids, and convalescent plasma. He required heated high flow oxygen and non-invasive ventilator support with BIPAP until 6/23/2020 when he required intubation and mechanical ventilation for progressive respiratory failure. He failed to improve on the mechanical ventilator and passed away on 7/1/2020 with the cause of death listed as Covid-19 pneumonia.

(Ex. 12, p. 94).

31. VG's[Redacted] death certificate documents that he died of Acute Respiratory Failure/ARDS and Covid-19 Pneumonia. (Ex.14). The ALJ credits the content of the medical records and the death certificate to find that VG's[Redacted] death was, more probably than not, precipitated by a Covid-19 infection that progressed to pneumonia and sepsis leading to multisystem organ failure and ultimately respiratory failure.

32. In his October 6, 2022 report, Dr. Oginsky noted that the State and County public health authorities registered a Covid-19 outbreak for Employer's facility on May 29, 2020, with the first weekly report after the "outbreak" designation referencing 6

Covid-19 cases in residents and 2 cases in staff.[3] The numbers did not improve over time. Indeed, subsequent weekly reports documented 10 cases in residents and 6 cases in staff on June 10, 2020 and 34 cases in residents, 12 cases in staff with 9 additional "probable" cases in staff by June 24, 2020. (Ex. 12, p. 94). At the close of the outbreak[4] on July 29, 2020, a total of 35 cases, with 2 additional probable cases and 9 deaths had been reported in/for residents of Employer's facility. Staff cases included 13 known cases, 9 probable cases and 1 death, that being VG[Redacted]. Dr. Oginsky was careful to point out that the outbreak designation on May 29, 2020, did not imply that this was the "start of illness in that [facility]". Rather, May 29, 2020 reflected the date "when it was clear that the disease was present (in the facility) and the authorities were made aware of cases. *Id.* at p. 94. The ALJ infers from Dr. Oginsky's report that Covid-19 was probably circulating about Employer's facility before May 29, 2020. Indeed, per DM[Redacted] a positive test result was reported for a resident on May 24, 2020. Accordingly, the ALJ is convinced that infections among residents and staff were occurring before May 24, 2020.

33. Dr. Oginsky discussed the unique characteristics of the Covid-19 virus in his October 6, 2022 report, noting that the virus is spread by inhaling aerosolized virus particles that are "buoyant in the air and can travel in the air directly into a person's airways and lungs". (Ex. 12, p. 95). He noted further that the infectivity of a virus is based upon its "attack rate", which is defined as the "percentage of individuals who become infected after an exposure". According to Dr. Oginsky, the attack rates for the original circulating Alpha variant of Covid-19 at the time VG[Redacted] was infected was different for different environments. Indeed, in a home environment, where there is typically no mask use but prolonged close family contact, the attack rate ranges from 60-80%. (Ex. 12, p. 95). In congregate care environments, such as jails/prisons, reported attack rates can reach up to 72% and in work environments, where workers are not as closely confined, the attack rate can reach 20-30%. *Id.*

34. In determining the medical probability as to where VG's[Redacted] Covid-19 exposure/infection occurred, Dr. Oginsky testified that you do not apply a system of direct transmission to the analysis of how an individual was infected with Covid-19. Rather, Dr. Oginsky explained that in the case of respiratory illnesses, including Covid-19, the illness is often not traceable to a single event and it is indeed rare to be able to document a direct contact to contact exposure. Thus, Dr. Oginsky testified that to determine the source of likely transmission, he analyzed the three environments wherein VG[Redacted] spent his time, i.e. the community at large, his workplace and his home. Dr. Oginsky undertook an analysis of the probability of Covid-19 transmission in each environment, accounting for the attack rates and the contagious nature of the disease and then applied the probability that VG[Redacted] was exposed to and infected by the contagion in those environments. Dr. Oginsky testified that the

[3] Per Colorado Department of Public Health & Environment (CDPHE) reporting guidelines an "outbreak" was present, at the time, if two cases were present in the facility. (Ex. 12, p. 94).
[4] An outbreak is considered closed after the passage of 30 days from the last associated case in the facility. (Ex. 12, p. 94).

environment that yields the highest probability for transmission is deemed to be the most medically probable source of the exposure/infection.

35. Using publically available community databases, Dr. Oginsky noted that for the week of May 22, 2020, the daily case rate for Pueblo County was no greater than 4 cases per 100,000 people. (Hrg. Trans., p. 68, ll. 6-11). However, because Covid-19 is plus or minus prevalent and contagious for a seven-day time period, that averages to about 28 contagious persons at any simultaneous time period for that week. So there would be approximately 28 people per 100,000 who would be contagious with Covid-19 in Pueblo which represents a prevalence rate of .03%. *Id*. at p. 68, ll. 12-19. Nonetheless, Dr. Oginsky noted that during the time period of VG[Redacted] infection access limitations to testing probably lead to the number of infections being underestimated by 4-10 fold. Dr. Oginsky opined that accounting for a worst case scenario, i.e. a 10 fold error, there would be a bump in the chances of coming into contact contagious person in the community to around 0.3% (.03% × 10 = 0.3%). Simply put, Dr. Oginsky noted that "[i]f VG[Redacted] were . . . moving around in the community going to stores, grocery stores, and restaurants, the chances of an encounter with a contagious stranger was only 0.3%". Moreover, Dr. Oginsky noted that any such encounter would have to involve a long enough exposure to transmit the virus to VG[Redacted], which Dr. Oginsky concluded, mathematically speaking, was an "extremely low probability event". (Ex. 12, p. 96).

36. In contrast, Dr. Oginsky opined that the chances of VG[Redacted] being exposed/infected at home or in the workplace were substantially higher than in the community at large. Concerning the home environment, Dr. Oginsky testified that the attack rate, i.e. the infectivity percentage in the home environment is the highest it can be because there is often a "lower degree of air circulation" in the home than in other environments combined with a failure to employ environmental controls such as masking and social distancing. (Hrg. Trans., p. 71, ll. 11-25, p. 72, ll. 1-4). Thus, Dr. Oginsky testified that if Covid-19 is present in the home environment, it simply becomes the "highest probably site of contagion" transmission because of that attack rate. *Id.* at p. 72, ll. 5-8. Because there was no one in living in the home that had either tested positive for Covid-19 or shown symptoms of Covid-19 exposure prior to VG[Redacted] falling ill towards the end of May of 2020, Dr. Oginsky excluded the household as the site of VG's[Redacted] exposure/infection in this case. (Ex. 12, p. 96; Hrg. Trans., p. 72, ll. 13-19).

37. Concerning the likelihood that VG's[Redacted] contracted Covid-19 from his work environment, Dr. Oginsky testified that the public reporting databases, including the data reported by Colorado Department of Public Health and Environment (CDPHE), confirmed there was an outbreak at the employer's facility. (Hrg. Trans. p. 65, ll. 5-15). According to Dr. Oginsky, it was important to note that at the time the outbreak was declared, there were two Covid-19 cases that could be connected to the same physical location and that the timing of VG's[Redacted] acute illness, hospitalization and respiratory failure were consistent with an exposure around May 20, 2020 or after. (Hrg. Trans., p. 65, ll. 10-12; Ex. 12, p. 96). As noted by Dr. Oginsky, the outbreak

designation on May 29, 2020, does not imply that this was the start of infections/illness in Employer's facility, signifying instead that Covid-19 was present and circulating in the facility before the May 29, 2020 outbreak designation. Indeed, the evidence presented supports a finding that at least three residents and one staff member exhibited symptoms of Covid-19 prior to the outbreak designation prompting those residents to undergo PCR testing.[5] (Ex. 18, pp. 130-133). Every test for these three residents came back positive for the presence of Covid-19 and one resident was subsequently hospitalized and succumbed to his illness. *Id*. at p. 133.

38. Dr. Oginsky testified that the Covid-19 attack rate for VG[Redacted] work environment was approximately 30%, which was consistent with other healthcare environments as well as the "attack rate in a lot of common workplaces". (Hrg. Trans., pp. 68-69). Dr. Oginsky noted that while risk reduction strategies were implemented at the facility in an effort to limit the spread of the Covid virus, it would be false to "claim that [these] control measures [were] 100% effective". (Hrg. Trans., p. 66, ll. 2-21). Rather, Dr. Oginsky indicated that these risk reduction strategies may have been partially effective since such measures may have helped limit the spread of the disease to 35 cases in residents and 12 cases among staff members. Concerning the transmission of Covid-19 among staff members, including those adhering to safety protocols, wearing PPE and avoiding exposure to Covid-19 positive individuals, Dr. Oginsky testified that he was not really able to analyze whether these risk reductions strategies were effective. Id. at p. 67, ll. 4-14. Rather, all that could be discerned definitively was that there were "12 cases present in staff . . ., which was a much higher proportion that (sic) would have been present in the community at large". *Id*. Accordingly, Dr. Oginsky testified, "So regardless of [the] efficacy of controls and appropriateness of controls, there was spread of Covid-19 to staff members at [Employer's] facility". *Id*. at ll. 15-17. Indeed, Dr. Oginsky testified that the presence of Covid-19 in 30% of the residents and in 12-15 staff members supported a conclusion that there was "person-to-person" transmission within VG's[Redacted] workplace environment. *Id*. at p. 85, ll. 2-12.

39. Based upon his review of the available records/data, Dr. Oginsky concluded that VG's[Redacted] "acute (illness) presentation and time-course of his illness [was] consistent with an exposure window around the time that the outbreak was occurring at the facility. (Ex. 12, p. 97). Because the likelihood of coming in contact with a contagious person in the community was improbable at the time VG[Redacted] would have been exposed and because he had no household contacts who were ill with Covid-19 around the time he would have been exposed, Dr. Oginsky opined that the "highest probability environment for VG[Redacted] to acquire Covid-19 was the nursing facility where he worked". (Ex. 12, p. 97; Hrg. Trans. p. 72, ll. 13-25, p. 73, ll. 1-3). The testimony of Dr. Oginsky is unrebutted.

40. The ALJ credits the content of the medical records and the opinions of Dr. Oginsky, including his testimony that contagious individuals aren't recognized

[5] The evidence presented does not indicate whether the staff member exhibiting symptoms was tested for Covid-19.

immediately because symptoms may not manifest for up to 24 hours, to find that VG[Redacted] was probably exposed to and infected with Covid-19, either from a well appearing, but contagious resident or staff member in the workplace shortly before the outbreak designation at Employer's facility was announced. Moreover, the evidence presented persuades the ALJ that VG's[Redacted] subsequent illness and death was proximately caused by this workplace exposure and ensuing infection.

41. Based upon the evidence presented, the ALJ is convinced that the treatment VG[Redacted] received following his positive Covid-19 test result/diagnosis, including his in-patient hospital care, was causally related to his work-related Covid-19 infection. Moreover, the evidence presented persuades the ALJ that this care was reasonably necessary as an attempt to cure and relieve VG[Redacted] of the effects of this work-related occupational disease and otherwise preserve his life.

CONCLUSIONS OF LAW

Based upon the foregoing findings of fact, the ALJ draws the following conclusions of law:

Generally

A. The purpose of the Workers' Compensation Act of Colorado (Act), §§ 8-40-101, *et seq*., C.R.S., is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. C.R.S. § 8-40-102(1). In general, the claimant has the burden of proving entitlement to benefits by a preponderance of the evidence. C.R.S. § 8-43-201. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark,* 197 Colo. 306, 592 P.2d 792 (1979). The facts in a workers' compensation case must be interpreted neutrally, neither in favor of the rights of the claimant nor in favor of the rights of respondents. C.R.S. § 8-43-201.

B. Assessing weight, credibility and sufficiency of evidence in a workers' compensation proceeding is the exclusive domain of administrative law judge. *University Park Care Center v. Industrial Claim Appeals Office*, 43 P.3d 637 (Colo.App. 2002). Even if other evidence in the record may have supported a contrary inference, it is for the ALJ to resolve conflicts in the evidence, make credibility determinations, and draw plausible inferences from the evidence. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. See *Prudential Insurance Co. v. Cline*, 57 P.2d 1205 (Colo. 1936); *Bodensieck v. Industrial Claim Appeals Office*, 183 P.3d 684 (Colo. App. 2008); *Kroupa v. Industrial Claim Appeals Office*, 53 P.3d 1192 (Colo.App. 2002).

C. The weight and credibility to be assigned expert testimony is also a matter within the discretion of the ALJ. *Cordova v. Industrial Claim Appeals Office,* 55 P.3d 186 (Colo.App. 2002). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colorado Springs Motors, Ltd. v. Industrial Commission*, 441 P.2d 21 (Colo. 1968). In this case, the undersigned ALJ concludes that the unrebutted expert medical opinions of Dr. Oginsky are supported by the medical record, the available medical literature and public databases. Dr. Oginsky has extensive prior experience treating Covid-19 patients, establishing Covid-19 safety protocols and had the opportunity to draw conclusions after reviewing the entire medical record and available databases concerning the facility involved in this case. Accordingly, the ALJ concludes that Dr. Oginsky's opinions are credible and more convincing than the suppositions raised by Respondents based upon the testimony of DM[Redacted] and MN[Redacted]. While the ALJ is convinced that the testimony of DM[Redacted] and MN[Redacted] is sincere, the medical evidence concerning the transmission of Covid-19 coupled with the remaining opinions of Dr. Oginsky persuades the ALJ that VG[Redacted] probably contracted Covid-19 while working in Employer's facility and that his need for treatment and ultimately his death were related to that exposure.

D. In accordance with Section 8-43-215, C.R.S., this decision contains Specific Findings of Fact, Conclusions of Law and an Order. In rendering this decision the ALJ has made credibility determinations, drawn plausible inferences from the record, and resolved essential conflicts in the evidence. See *Davison v. Industrial Claim Appeals Office*, 84 P.3d 1023 (Colo. 2004). This decision does not address every item contained in the record; instead, incredible or implausible testimony or unpersuasive arguable inferences have been implicitly rejected. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office*, 5 P.3d 385 (Colo.App. 2000).

Compensability

E. To sustain her burden of proof concerning the compensable nature of VG's[Redacted] death, Claimant must establish, by a preponderance of the evidence, all the elements necessary to find a work related injury compensable, specifically that the death arose out of and in the course of employment. See generally*, Matter of Death of McLaughlin,* 728 P.2d 337 (Colo.App. 1986); *Gates Rubber Co. v. Industrial Commission,* 705 P.2d 6 (Colo.App. 1986); see also*, Deane Buick Co. v. Kendall, 160 Colo. 265, 417 P.2d 11 (1966).*

F. The phrases "arising out of" and "in the course of" are not synonymous and a claimant must meet both requirements for an injury to be compensable. *Younger v. City and* County of Denver, 810 P.2d 647, 649 (Colo. 1991); *In re Question Submitted by U.S. Court of Appeals,* 759 P.2d 17, 20 (Colo. 1988). The latter requirement refers to the time, place, and circumstances under which a work-related injury occurs. *Popovich v. Irlando,* 811 P.2d 379, 381 (Colo. 1991). An injury occurs "in the course of" employment when it takes place within the time and place limits of the employment relationship and during an activity connected with the employee's job-related functions.

In re Question Submitted by U.S. Court of Appeals, supra; Deterts v. Times Publ'g Co., 38 Colo. App. 48, 51, 552 P.2d 1033, 1036 (1976). Here, the evidenced presented persuades the ALJ that VG's[Redacted] alleged Covid-19 exposure and subsequent infection occurred within the Employer's facility during his working hours as he discharged his floor tech duties. Nonetheless, the question of whether VG's[Redacted] Covid-19 infection, subsequent illness and death arose out of his employment must be answered before his illness/death can be considered compensable.

G. The "arising out of" test is one of causation. It requires that the injury have its origins in an employee's work related functions, and be sufficiently related thereto so as to be considered part of the employee's service to the employer. *Horodyskyj v. Karanian*, 32 P.3d 470, 475 (Colo. 2001); *Madden v. Mountain West Fabricators, 977 P.2d 861* (Colo. 1993). Specifically, the term "arising out of" calls for an examination of the causal connection or nexus between the conditions and obligations of employment and the alleged injury. *Horodysky v. Karanian, supra*. The determination of whether there is a sufficient "nexus" or causal relationship between a claimant's employment and the injury is one of fact which the ALJ must determine based on the totality of the circumstances. *In Re Question Submitted by the United States Court of Appeals,* 759 P.2d 17 (Colo. 1988); *Moorhead Machinery & Boiler Co. v. Del Valle,* 934 P.2d 861 (Colo.App. 1996). As referenced above, proof by a preponderance of the evidence requires the proponent to establish the existence of a "contested fact is more probable than its nonexistence." *Page v. Clark, supra.* Whether Claimant sustained her burden of proof is a factual question for resolution by the ALJ. *City of Durango v. Dunagan*, 939 P.2d 496 (Colo.App. 1997). Here, Claimant alleges that VG[Redacted] was exposed to and infected with the Covid-19 virus while discharging his duties as a floor-tech for Respondent-Employer. According to Claimant, this exposure lead to a positive Covid-19 test result, subsequent systemic illness, including the development of Covid-19 pneumonia, hospitalization to treat his resultant condition(s) and ultimately his untimely death.

H. Based upon the evidence presented, the ALJ concludes that Claimant's claims are rooted in the legal principals surrounding the manifestation of an occupational disease rather than an accidental injury. An accidental injury is traceable to a particular time, place and cause. *Colorado Fuel & Iron Corp. v. Industrial Commission*, 154 Colo. 240, 392 P.2d 174 (1964); *Delta Drywall v. Industrial Claim Appeals Office*, 868 P.2d 1155 (Colo.App. 1993). In contrast, an occupational disease arises not from an accident, but from a prolonged exposure occasioned by the nature of the employment. *Colorado Mental Health Institute v. Austill*, 940 P.2d 1125 (Colo.App. 1997). The criteria for proving an occupational disease is set forth in C.R.S. § 8-40-201(14). An occupational disease is defined as:

> [A] disease which results directly from the employment or the conditions under which work was performed, which can be seen to have followed as a natural incident of the work and as a result of the exposure occasioned by the nature of the employment, and which can be fairly traced to the employment as a proximate cause

and which does not come from a hazard to which the worker would have been equally exposed outside of the employment.

I. Thus, in practice an occupational disease is an injury that results directly from the employment or conditions under which work was performed and can be seen to have followed as a natural incident of that work. Section 8-40-201(14), C.R.S.; *Climax Molybdenum Co. v. Walter*, 812 P.2d 1168 (Colo. 1991); *Campbell v. IBM Corporation*, 867 P.2d 77 (Colo.App. 1993). Evidence in a workers compensation claim regarding an occupational disease must establish a reasonable causal connection between the work and an occupational disease but need not establish it with "medical certainty." *Beaudoin Construction, Co. v. Industrial Commission*, 626 P.2d 711 (Colo. App. 1980). Expert opinion is neither necessary nor conclusive in proving causation of an occupational disease claim. *Rockwell International v. Turnbull*, 802 P.2d 1182 (Colo.App. 1990); *In re the of Death of Talbert*, 694 P2d 864 (Colo.App. 1984); *Meza v. ICAO*, 2013 COA 71, 303 P.3d 158 (Colo.App. 2013). In this case, Respondents contend that because VG's[Redacted] job functions were janitorial in nature and did not require him to work directly with or transfer Covid positive residents to the isolation unit, Claimant failed to prove that his illness/death can be seen to have followed as a natural incident of his work. Simply put, because there were no documented incidents of exposure between VG[Redacted] and a Covid positive person at work, Respondents assert that Claimant failed to establish a causal connection between VG's[Redacted] employment and his Covid-19 infection. In order for VG's[Redacted] Covid-19 infection and subsequent death to be compensable, Respondents argue that Claimant "should have to establish that there was contact with the residents or know (sic) positive employees just before he tested positive . . ." (Resp. Position Statement, p. 10).

J. Concerning Respondents' contention that there must be direct contact with an infected person, Dr. Oginsky convincingly testified that because of its aerosolized nature, Covid-19 transmission spreads more effectively and efficiently than other viruses, including influenza and rhinovirus, which spread by infectious droplets. Because it is buoyant, Covid-19 contagion can travel via the air directly into a person's airways and lungs from a distance. Hence the Centers for Disease Control (CDC) established a six foot per fifteen minute exposure rule as their time line for when a person may receive a large enough amount of contagion to be infected with Covid-19. (Hrg. Trans., p. 70, ll. 8-13, p. 74, ll. 17-24). For this reason, Dr. Oginsky testified that it is usually 'fruitless" and inappropriate to apply a system of direct transmission to analyzing a case of Covid-19 infection, because the spread of respiratory illnesses, including Covid-19 is often not traceable to a single event. (Hrg. Trans., p. 66, ll. 2-13). Indeed, Dr. Oginsky testified that "[i]t is rare in the case of respiratory illnesses to ever document a direct contact to contact to contact exposure chain. *Id.* at p. 66, ll. 19-21. Accordingly, the ALJ is not convinced that there must be direct contact with an infected person for a sufficient dose of Covid-19 virus to be transmitted to another person.

K. Contrary to the assertions of Respondents' Counsel, the evidence in this case supports a conclusion that VG's[Redacted] Covid-19 infection, more probably than not, arose out of his work in Employer' facility. Indeed, the evidence presented

establishes that the chances of VG[Redacted] having a community encounter with a contagious stranger was only 0.3% as compared to the 30% attack rate for VG[Redacted]work environment. Moreover, Dr. Oginsky noted that any such community encounter would have to involve a long enough exposure to transmit the virus to VG[Redacted], which Dr. Oginsky concluded was an “extremely low probability event” in the community environment. In contrast, the statistical data regarding the number of residents and staff testing positive for or exhibiting symptoms of a Covid-19 infection supports a reasonable conclusion that VG[Redacted] was working in a facility besieged with a “person-to-person” spread of Covid-19. Indeed, the evidence presented persuades the ALJ that despite enhanced cleaning protocols, universal precautions, stringent use of PPE and a complete lock down of residents and limited contact between staff members, transmission of the virus within Employer’s facility continued. So much so, that an outbreak designation was imposed on the facility by the health department of May 29, 2020.

L. Based upon the airborne transmission vector and the statistical opinions expressed by Dr. Oginsky, the ALJ is convinced that VG’s[Redacted] Covid-19 infection is, more probably than not, directly related to his presence in Employer’s facility to discharge his work duties. In other words, the ALJ is persuaded that VG’s[Redacted] Covid infection followed as a natural incident of his work in Employers facility and as a result of the exposure occasioned by the nature of his employment, he fell ill and died. Thus, his employment exposure is the proximate cause his illness and death, whether or not he had close direct contact with infected residents or staff members. Indeed, close personal contact does not appear necessary for transmission of the virus given its aerosolized nature, which is why the CDC was prompted to recommend distancing rules. The testimony of MN[Redacted] that VG[Redacted] did not have any contact with known Covid-19 positive persons provides Respondents no safe harbor to escape liability given the fact that contagious persons may be asymptomatic for up to 24 hours before the onset of symptoms, which simply means that contagious individuals are often not recognized before they infect someone else. Based upon the totality of the evidence, including the opinions of Dr. Oginsky and the testimony of MN’s[Redacted] that the facility houses a large number of people on a daily basis, the ALJ is convinced that VG[Redacted], probably came into contact with a well appearing, but contagious person (resident or staff) in the building for a sufficiently long enough period to be infected with Covid-19. He subsequently fell ill and ultimately died as a consequence of this infection. Accordingly, the ALJ is convinced that Claimant has proven that there is a sufficient "nexus" or causal relationship between VG’s[Redacted] employment and the Covid-19 infection leading to his illness and death.

M. In concluding that Claimant has established that VG[Redacted] suffered a compensable occupational disease causally related to his work for employer, the ALJ rejects any suggestion that VG[Redacted] was equally exposed to a Covid-19 hazard outside of his employment and that he may have contracted Covid from Claimant or someone living in his household. While the evidence presented supports a finding that Claimant was sick with gastritis and gastrointestinal issues, there is no persuasive evidence to support a find/conclusion that any member of VG’s[Redacted] household

was sick with Covid before, during or after he became ill and tested positive for Covid-19. Indeed, the suggestion advanced by Respondents that VG's[Redacted] may have contracted Covid from Claimant comes from testimony of MN[Redacted]. However, MN[Redacted] testified that VG[Redacted] informed her that Claimant was sick approximately two weeks before VG[Redacted] developed symptoms. Moreover, VG[Redacted] informed MN[Redacted] he was not sure what was making Claimant sick. (Hrg. Trans., p. 94, ll. 12-25, p. 95, ll. 1). Based upon this evidence, the ALJ finds Respondents' suggestion/conclusion that Claimant was ill with Covid and did not want to get tested is speculative and unconvincing.

Medical Benefits

N. Once a claimant has established a compensable work injury, he/she is entitled to a general award of medical benefits and respondents are liable to provide all reasonable and necessary medical care to cure and relieve the effects of the work injury. *Section 8-42-101, C.R.S.*; *Grover v. Industrial Commission*, 759 P.2d 705 (Colo. 1988); *Sims v. Industrial Claim Appeals Office*, 797 P.2d 777 (Colo. App. 1990). However, a claimant is only entitled to such medical benefits if the industrial injury is the proximate cause of his/her need for medical treatment. *Merriman v. Indus. Comm'n*, 210 P.2d 448 (Colo. 1949); *Standard Metals Corp. v. Ball,* 172 Colo. 510, 474 P.2d 622 (1970)*;* § 8-41-301(1)(c), C.R.S. In other words, the mere occurrence of a compensable injury does not require an ALJ to find that all subsequent medical treatment and physical disability was caused by the industrial injury. To the contrary, the range of compensable consequences of an industrial injury is limited to those that flow proximately and naturally from the injury. *Standard Metals Corp. v. Ball*, *supra*.

O. Where the relatedness, reasonableness, or necessity of medical treatment is disputed, the claimant has the burden to prove that the disputed treatment is causally related to the injury, and reasonably necessary to cure or relieve the effects of the injury. *Ciesiolka v. Allright Colorado, Inc*., W.C. No. 4-117-758 (ICAO April 7, 2003). The question of whether a particular medical treatment is reasonably necessary to cure and relieve a claimant from the effects of the injury is a question of fact. *City & County of Denver v. Industrial Commission*, 682 P.2d 513 (Colo.App. 1984). The question of whether the need for treatment is causally related to an industrial injury is also one of fact. *Walmart Stores, Inc. v. Industrial Claims Office,* 989 P.2d 521 (Colo.App. 1999). Here, the evidence presented persuades the ALJ that Claimant's hospitalization and subsequent intensive treatment was directly related to the ravages that his Covid-19 infection leveled on his body. Indeed, the evidence presented supports a finding that VG's[Redacted] Covid-19 infection caused him to develop pneumonia, hypoxia, sepsis and multiple organ failure. Moreover, the totality of the evidence presented establishes that Claimant's admission to the intensive care unit represented the last best resort to cure and relieve VG's[Redacted] of the ongoing effects of his infection. Consequently, the ALJ concludes VG's[Redacted] hospitalization and subsequent in-patient treatment was reasonable and necessary. Accordingly, Respondents shall, pursuant to C.R.S. § 8-42-101 (6)(a) and (b), reimburse such estate, widow, insurer or governmental program for the reasonable and necessary medical expenses incurred as a consequence of VG's[Redacted] hospitalization and in-patient Covid-19 treatment.

Claimant's Entitlement to Temporary Total Disability Benefits

P. Respondents concede that Temporary Total Disability (TTD) would be owed if Claimant established the compensable nature of VG's[Redacted] Covid infection, subsequent illness and death. In light of this concession and because the evidence presented otherwise supports a conclusion that VG[Redacted] suffered a compensable occupational disease leading to his hospitalization and inability to work between June 2, 2020 and his death on July 1, 2020, Claimant is entitled to TTD benefits for this time period.

Common Law Marriage

Q. As noted, Respondents confess that Claimant established that she is the surviving widow and statutory dependent of VG[Redacted]. (Resp. Position Statement, Finding of Fact, ¶ 13, p. 4). Even without such concession, the evidence presented supports a conclusion that Claimant and VG[Redacted] were common law married. Colorado has long recognized common law marriages. See *Taylor v. Taylor*, 50 P. 1049 (Colo.App. 1897). Since 1987, the pivotal case in Colorado outlining the requirements for establishing a common law marriage has been *People v. Lucero*, 747 P.2d 660 (Colo.1987). In *Lucero*, the Colorado Supreme Court stated that a common law marriage is established by mutual consent or agreement of the parties to be husband and wife, followed by a mutual and open assumption of a marital relationship. In doing so, it focused on cohabitation of the parties and their reputation in the community as the two primary factors to evaluate an intention to be married, although any evidence manifesting such an intention to establish a marriage could fulfill the burden of proof. *See Id.* at p. 665.

R. Recently the Colorado Supreme Court revisited the standard and refined the test to emphasize the parties' mutual agreement to enter into a marital relationship in the context of a trio of opinions issued on January 11, 2021. The primary case setting forth the Court's new standard was *Hogsett v. Neale*, 478 P.3d 713 (Colo. 2021). It elaborated on the new standard and need to review the totality of the circumstances in the case of *In re Estate of Yudkin*, 478 P.3d 732 (Colo. 2021).[6] In *Hogsett*, the Court modified the applicable test to acknowledge modern norms, which rendered the more traditional indicia of marriage no longer exclusive to marital relationships, i.e. those recognized by *Lucero* as typically indicative of a marital relationship because that indicia is often present in non-marital relationships currently. The new test established by *Hogsett*, while retaining elements from *Lucero*, is essentially that a common law marriage is "established by the mutual consent or agreement of the couple to enter the legal and social institution of marriage, manifested by conduct reflecting that agreement." *Hogsett*, 478 P.3d at 715. The *Hogsett* court elaborated that marriage represents "a deeply personal commitment to another human being . . . and the

[6] The third case, *In re Marriage of LaFleur and Pyfer*, 479 P.3d 869 (Colo. 2021), largely focused on the issue of whether same sex couples could prove the existence of a common law entered into prior to same sex marriages before Colorado legally recognized same sex marriages.

decision whether and whom to marry is among life's momentous acts of self-definition." *Id.* at p. 719, citing *Goodrige v. Dep't of Pub. Health*, 798 N.E.2d at 954-55 (2003). The core inquiry under this standard is whether the parties intended to enter into a truly marital relationship involving a committed, intimate relationship of mutual support and obligation. *Id.* at p. 715. The necessity to show an agreement to marry is absolute in this standard, although the Court retained the elements of *Lucero* that such an agreement could be inferred from the parties' conduct assessed within the context of the overall relationship. *Id.*

S. The *Hogsett* Court further elucidated factors which a Court should examine when necessary to infer an agreement to marry, including instances of shared financial responsibility such as leases, joint bills, filing joint tax returns, evidence of estate planning including wills, symbols of commitment (rings), the couples references to each other, and also the more traditional factors such as cohabitation, having children together, and use of surnames. *Id.* at pp. 722-725. However, it also noted the more important factors emphasized by *Lucero*, namely cohabitation, using each other's surnames, and having children together, were less decisive in modern times given the frequency with which those factors may be present in couples who both considered themselves married and not. *Id.* at pp. 722-723. The Supreme Court emphasized these points further in the *Yudkin* case, noting the purpose of a court's examination is to discover the intent of the parties to be married, not "test the couple's agreement to marry against an outdated marital ideal." *Yudkin*, 478 P.3d at 718.

T. In this case, the evidence establishes that Claimant and VG[Redacted] were in a long term personal relationship with a level of commitment mirrored the "momentous act of self-definition" the Colorado Supreme Court contemplated when deciding to refine the doctrine of common law marriage. The core query of *Hogsett* is to identify the existence of an intent to be married. Here, the evidence demonstrates that the relationship between Claimant and VG[Redacted] carried the attributes of a legally binding relationship. Indeed, they proceeded through a ceremony in the presence of their friends, wherein they expressed their desire to be considered husband and wife. They exchanged rings, purchased a home in joint tenancy and as the medical records demonstrate VG[Redacted] referred to Claimant as his spouse. Moreover, VG[Redacted] identified Claimant as the beneficiary on his life insurance policy, listing her as his wife. Finally, Claimant filed a joint tax return identifying VG[Redacted] as her husband following his death. From every aspect in which Claimant and VG[Redacted] had set up their lives, there were signs of an intent to enter into the legal institution of marriage. See *Sara Ortega v. Blue Star Holding Company*, W.C. No. 4-661-263-02 (ICAO, April 17, 2018). As noted in *Hogsett,* a common law marriage is "established by the *mutual* consent or *agreement* of the couple to enter the legal and social institution of marriage." Based upon the principles announced in *Hogsett* and *Yudkin*, the ALJ finds/concludes, as did the District Court Judge in the probate action, that there is sufficient evidence to prove the existence of a common law marriage in this case.

Death Benefits

U. The Workers' Compensation Act provides that spouses and the minor children (under the age of 18) of an injured worker who succumbs to his/her injuries are presumed to be wholly dependent and entitled to death benefits. C.R.S. § 8-41-501(1)(a) and (b). Section 8-41-503(1), C.R.S., provides: "Dependents and the extent of their dependency shall be determined as of the date of the injury to the injured employee, and the right to death benefits shall become fixed as of said date irrespective of any subsequent change in conditions except as provided in section 8-41-501(1)(c). Death benefits shall be directly payable to the dependents entitled thereto or to such person legally entitled thereto as the director may designate."

V. Section 8-42-115(1)(b), C.R.S., states: "(1) In case death proximately results from the injury, the benefits shall be in the amount and to the persons following: . . . (b) If there are wholly dependent persons at the time of death, the payment shall be in accordance with the provisions of § 8-42-114." If there are both persons wholly dependent and partially dependent, only those wholly dependent shall be entitled to compensation. § 8-42-119, C.R.S. In this case, Respondents acknowledge that Claimant is a dependent. (Resp. Position Statement, FOF ¶ 13, p. 4). The evidence presented fails to establish that there are other wholly or partially dependent persons. Accordingly, death benefits payments shall be made to Claimant, as VG[Redacted] surviving widow, pursuant to C.R.S. § 8-42-114 in the amount of "sixty-six and two-thirds percent of the deceased employee's average weekly wage . . . per week. (See, C.R.S. §§ 8-41-501, 8-42-114).

ORDER

It is therefore ordered that:

1. Claimant has established, by a preponderance of the evidence, that VG[Redacted] contracted a compensable Covid-19 infection arising out of and in the course and scope of his employment with the employer on June 2, 2020.

2. Claimant has established, by a preponderance of the evidence, that VG's[Redacted] need for hospitalization, treatment and subsequent death were causally related to his compensable Covid-19 infection.

3. Claimant has established, by a preponderance of the evidence, that the care VG[Redacted] received after his Covid-19 diagnosis was reasonable and necessary to cure and relieve him of the effects of said infection and that his need for care was related to this infection. Accordingly, Respondents shall reimburse Claimant, individually as Personal Representative of VG's[Redacted] estate, and/or any insurance carrier or governmental program that has paid for the reasonably necessary and related medical care received by VG[Redacted] at Penrose Hospital between June 2, 2020, and his death on July 1, 2020.

4. Claimant has established, by a preponderance of the evidence, that VG[Redacted] was temporarily totally disabled from June 2, 2020, until the date of his death on July 1, 2020. Accordingly, Respondents shall pay TTD benefits in the amount

of sixty-six and two-thirds percent of VG[Redacted] average weekly wage of $583.80 commencing June 2, 2020 and running through June 30, 2020.

5. Claimant has established, by a preponderance of the evidence, that she is the surviving widow and a dependent of VG[Redacted]. Accordingly, Respondents shall pay death benefits to Claimant pursuant to the provisions of C.R.S. §§ 8-41-501, 8-42-114 and 8-42-115, commencing July 1, 2020, and continuing thereafter until terminated pursuant to the provisions of C.R.S. § 8-42-120.

6. Insurer shall pay interest to Claimant at the rate of 8% per annum on all amounts of compensation not paid when due.

7. All matters not determined herein are reserved for future determination.

DATED: March 1, 2023

NOTE: If you are dissatisfied with the ALJ's order, you may file a Petition to Review the order with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the ALJ; and (2) That you mailed it to the above address for the **Denver Office of Administrative Courts**. You may file your Petition to Review electronically by emailing the Petition to Review to the following email address: oac-ptr@state.co.us. If the Petition to Review is emailed to the aforementioned email address, the Petition to Review is deemed filed in Denver pursuant to OACRP 26(A) and Section 8-43-301, C.R.S. If the Petition to Review is filed by email to the proper email address, it does not need to be mailed to the Denver Office of Administrative Courts. For statutory reference, see Section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. 5-160-157-001

STIPULATIONS

- Prior to hearing Respondents agreed that Claimant was entitled temporary total disability (TTD) benefits from the date of injury through his return to modified duty on January 29, 2021. Simply put, because the period of disability lasted longer than two weeks from the day Claimant left work as a consequence of the injury, Respondents conceded that Claimant was entitled to TTD pursuant C.R.S. § 8-42-103(1) (b) commencing December 25, 2020. According to Respondents' Counsel payment for the previously unpaid waiting period of time has been issued.

- The parties also stipulated and agreed that Claimant missed work on August 11, 2022 to attend the Division IME in Denver.

These stipulations were approved and accepted by the ALJ.

REMAINING ISSUES

I. Whether Claimant proved entitlement to temporary partial disability benefits the dates for which are outlined in Exhibit 12.

II. Whether Claimant proved that Respondents failed to timely pay medical benefits in violation of WCRP 16 and are liable for penalties pursuant to C.R.S. §§ 8-42-304(1) and 305 or under § 8-43-401(2)(a)

FINDINGS OF FACT

Based upon the evidence presented at hearing, the ALJ enters the following findings of fact:

1. Claimant is a 48 year old (DOB: 10/10/74) trash truck driver for Employer. He injured his low back on or about December 24, 2020. Claimant's job duties require driving a commercial trash truck and collecting and loading trash, grass clippings and "anything sitting outside". (Hrg. Trans., p. 22, ll. 3-8). Claimant would occasionally lift 50 pounds or more. *Id*. at p. 22, ll. 9-12. Approximately 2-3 weeks prior to the date of injury, Claimant was assigned to a truck that required him to repetitively ascend and descend three steps on the left side of the truck to complete his route. Previously, Claimant had to negotiate one step to enter and exit the cab of his truck. Claimant developed left lower back pain while running his route on December 24, 2020. Nonetheless, he was able to complete his work shift.

2. Liability for Claimant's injury was admitted and he proceeded to treat conservatively. Claimant was initially treated at UC Health but eventually came under

the care of Dr. Castrejon who has overseen Claimant's care. Chiropractic treatment provided no lasting relief. Diagnostic testing revealed a left S1 radiculopathy prompting administration of an S1-2 transforaminal epidural steroid injection that provided next to no relief. After a surgical evaluation that concluded with a recommendation for continued non-operative management, Claimant was offered a facet injection, which he declined. Claimant was ultimately placed at maximum medical improvement (MMI) and discharged from care by Dr. Miguel Castrejon with an 11% whole person impairment rating.

3. Claimant was initially evaluated by Dr. Castrejon on May 10, 2021 during which Dr. Castrejon imposed physical restrictions to include, sedentary work, allowance to sit, stand and walk as tolerated, no commercial driving, no lifting and limited bending/stooping. (Ex. 3, bates 018; Ex. 2, bates 011). Claimant was seen by Dr. Castrejon approximately once per month for several months before being placed at MMI on January 6, 2022, with a permanent lifting restriction of 50 pounds. (Ex. 3, bates 018-019; Ex. 2, bates 012). At the request of respondents, Claimant underwent a Division IME (DIME) with Dr. Bryan Alvarez on August 11, 2022 who opined claimant was not at MMI. (Ex. 3, bates 014, 022).

4. Claimant was off of work immediately following the injury and returned to work on modified duty on January 29, 2021. A December 13, 2022 General Admission of Liability (GAL) reflecting that TTD was paid from December 30, 2021 (sic) through January 28, 2021 is contained at Exhibit 5, bates 029. As noted, Respondents stipulated that Claimant was due TTD beginning December 25, 2020 and running through December 29, 2020, and payment for this period has been issued.

5. Claimant continues to work for [Redacted, hereinafter GL]. He testified that since his return to work he has missed several shifts to either attend medical appointments or because he was in too much pain from the work injury to report to work. Claimant compiled a list of missed time from work he asserts is due to his admitted industrial injury. The list is contained at Exhibit 12, bates 067 and allegedly contains those days Claimant missed work due to a medical appointment or because he was physically unable to work secondary to pain caused by his low back injury.

6. As noted, Respondents have paid for all missed time prior to claimant's return to work on January 29, 2021. Thus, the question of whether Claimant is entitled to temporary disability benefits for the dates listed on Exhibit 12 commences with the entry for February 26, 2021 and ends on September 5, 2022, the last entry on Exhibit 12. Concerning the dates between February 26, 2021 and September 5, 2022, Respondents confess that Claimant had medical appointments on February 26, 2021, March 1, 2021, May 3, 2021, August 3, 2021, March 3, 2022, and August 11, 2022. These six dates are highlighted in yellow on Exhibit 12. The appointments from these dates are corroborated by other evidence, specifically the DIME report of Dr. Alvarez and the billing records presented by Respondents at Exhibits 6-11. Except on two occasions, Claimant testified that his supervisors did not require him to return to work following his medical appointments. (Hrg. Trans., p. 25, ll. 4-10). During cross-

examination, Claimant reiterated that he would miss a full day of work to attend his doctor's appointments and denied any suggestion that he was taking time off of work to care for his girlfriend. (Hrg. Trans., p. 32, ll. 9-25, p. 33, ll1-2).

7. In addition to the six dates referenced above, Exhibit 12 contains 30 other days between February 26, 2021 and September 5, 2022, which Claimant asserts he missed from work to attend other medical appointments or because he was in too much pain from his injury to report for his shift. Indeed, Claimant testified that there were days he "couldn't even get up" because of his pain and for this reason, he called off work. (Hrg. Trans., p. 26, ll. 16-21). In contrast to the verified six dates mentioned above, there is no persuasive corroborating evidence tending to establish that any of the additional 30 days Claimant missed from work between February 26, 2021 and September 5, 2021, were related to his attendance at a medical appointment to cure and relieve him from the effects of his admitted industrial injury.

8. Claimant testified that if he was going to miss time from work to attend a medical appointment he would contact his supervisor, [Redacted, hereinafter DE], by phone and alert him of the appointment or show him the appointment card from the doctor's office. (Hrg. Trans., p. 24, ll. 11-20). Concerning those days where Claimant was purportedly in too much pain to report to work, he testified that he would call off work for the day, on the day, by reporting to DE[Redacted] that he could not work. (Hrg. Trans., p. 29, ll. 7-13). For scheduled days off, Claimant testified that he would call into in work the day before he wanted to take off and ask for the day off. *Id*. at p. 29, ll. 11-16.

9. [Redacted, hereinafter DW] testified as Employer's operations manager. DW[Redacted] explained Employer's paid time off (PTO) policy. According to DW[Redacted] PTO referred to time off that had been previously scheduled and approved. (Hrg. Trans., p. 65, ll. 22-25, p. 66, l. 1). Typically, scheduled PTO is requested two weeks prior to the requested day off. *Id*. at p. 66, ll. 2-4. Time off described as "Unscheduled – PTO" referred to PTO that was not requested prior to the day but rather was a call-off the day of. *Id.* at p. 65, ll. 22-25, p. 66, l. 1. DW[Redacted] testified that Respondents' Exhibit C constituted a time chart for Claimant that contained a "print out of [Claimant's] days off", including both his PTO and unscheduled time off. (Hrg. Trans., p. 67, ll. 10-14). According to DW[Redacted], the time chart at Respondents' Exhibit C also documented several dates coded as "Holiday Ineligible – Unpaid". According to DW[Redacted], when seen on Exhibit C (Claimant's Exhibit 12), Holiday Ineligible "means the employee called off either the day before the holiday, the day after the holiday, the day of the holiday or the make-up day". *Id*. at p. 67, ll. 15-20. In order to be paid for a holiday, DW[Redacted] explained that employees must "work the day before the holiday, the day after the holiday, and either the holiday or the make-up day for the holiday". *Id*. at p. 68, ll. 2-4. Respondents Exhibit C/Exhibit 12 demonstrates that Claimant was ineligible for holiday pay on Labor Day (9/5/22), Christmas Eve (12/24/21), Thanksgiving (11/25/21), and Monday July 5, 2021 (Independence Day Observed). Based upon the testimony of DW[Redacted], the ALJ

finds that Claimant's "ineligibility" was probably due to Claimant's not working the day before, the day after, the day of or the make-up day for the aforementioned dates.

10. Respondents' Exhibit C confirms that Claimant did not work the day before, the day after, the day of or a make-up day for any of these documented holidays. Indeed, Exhibit C documents that Claimant made use of unscheduled PTO either before or after the observed holidays in question. (See Ex. C, bates 012-013). While Claimant's Exhibit 12 seeks compensation for each of the holidays, it does not consistently seek compensation for each of the days before the scheduled holiday. Specifically, Exhibit 12 does not include a request for temporary disability benefits for September 4, 2022 or November 24, 2021. The ALJ infers from Claimant's Exhibit 12 and his withdrawal of his request for benefits related to June 18, 2022 that any dates Claimant missed which are not contained on Exhibit 12 are days which Claimant probably missed work for personal reasons. Because Claimant missed both September 4, 2022 and November 24, 2021, then it is more probably true than not that Claimant was not paid for Labor Day (9/5/22) and Thanksgiving Day (11/25/21) because he was ineligible for holiday pay on those dates.

11. There is also a code designated "Unscheduled – unpaid SE" which DW[Redacted] testified meant that Claimant was out of PTO time, i.e. PTO allowance. (Hrg. Trans., p. 68, ll. 5-8). Crediting DW's[Redacted] testimony, the ALJ finds that Claimant was probably out of PTO on September 20, 2021, August 31, 2021 and April 6, 2021 as listed in Exhibit 12. Accordingly, his time off work for these dates was probably unpaid. (Ex. 12, bates 067).

12. Exhibit 12 and Exhibit C contain scheduled PTO dates for August 11, 2022, August 10, 2022, March 3, 2022, March 2, 2022 and September 14, 2021. The ALJ finds these dates noteworthy because, per the testimony of DW[Redacted] and Claimant himself, they reflect days that Claimant requested off prior to missing the day itself, possibly as much as two weeks prior to each date for which PTO was taken. However, outside of August 11, 2022, there is no corroborating evidence establishing that the remaining dates reflect days on which Claimant had scheduled medical appointments. The explanation Claimant offered for the missed time from work on these dates was that he was in too much pain to report to for his shift on these days. Thus, the court must infer that claimant requested these days prior to taking the days off because claimant believed he *would be* in too much pain to report to work on those days. It strains credulity to believe that Claimant could be so prophetic to predict, perhaps days in advance, when his pain would reach levels that would preclude him from reporting to work. Based on a totality of the evidence presented, the ALJ finds Claimant's testimony that he took PTO on the days listed in Exhibit 12 because his was in too much pain to work incredible and unpersuasive.

13. Claimant testified that the time of day of his medical appointments varied. Some appointments occurred in the morning while others occurred in the afternoon. When asked why he was not able to report to work before or after his appointments, Claimant simply suggested that he was not required to return to work after his

appointment. Similarly, Claimant offered no evidence or any explanation for why he did not miss time from work for any of the other numerous appointments he had between December 24, 2020 and the January 6, 2022 MMI appointment. Per the Division IME report, Claimant had at least 30 other scheduled medical appointments for which no accountable time appears on either Exhibit C or Exhibit 12. Accordingly, the ALJ finds that Claimant either did not miss time from work while attending these other medical appointments or was not held accountable for the time that was missed to attend these appointments. Based upon the evidence presented, the ALJ is convinced that Claimant was probably not held accountable for minimal lost time related to attending scheduled medical appointments on days that he reported to work either before or after his appointments. Indeed, the evidence presented supports a finding that Claimant was only held accountable for those days on which he did not report for work at all. Because the evidenced presented supports a finding that Claimant was probably not required to return to work after his medical appointments and the parties stipulated that Claimant attended medical appointments related to his industrial injury on 2/26/21, 3/1/21, 5/3/21, 8/3/21, 3/3/22, and 8/11/22, the ALJ is persuaded that the lost time on each of these dates is related to the work injury.

14. Concerning the remaining dates from Exhibit C/Exhibit 12 for which Claimant requests payment of temporary disability benefits, the evidence presented supports a finding that Claimant was not eligible for holiday pay on Labor Day (9/5/22), Christmas Eve (12/24/21), Thanksgiving (11/25/21), and Monday July 5, 2021 (Independence Day Observed) probably because he did not work the day before, the day after, the day of or the make-up day for the aforementioned dates. The ALJ is not convinced that Claimant missed the aforementioned dates of work because he needed to attend a medical appointment or was simply in too much pain from his industrial injury to work. Rather, the ALJ is convinced that Claimant probably missed time on these dates and for the remaining dates identified in Claimant's Exhibit 12 for reasons unrelated to his work injury which is strikingly consistent with his attendance and missed time from work pre-dating the work injury.[1] (See Exhibit C, bates 012-015). Accordingly, the ALJ finds that Claimant has failed to prove that he missed work on 9/5/22, 8/31/22, 8/10/22, 3/18/22, 3/2/22, 2/3/22, 1/12/22, 1/11/22, 1/10,22, 1/5/22, 1/4/22, 1/3/22, 12,24,21, 12/23/21, 11/27/21, 11/25/21, 11/1/21, 9/20/21, 9/14/21, 8/31/21, 8/30/21 8/16/21, 8/13/21, 8/12/21, 8/11/21, 7/5/21, 7/4/21, 6/24/21, 4/6/21, or 3/22/21 because

[1] The Employer's policy regarding absenteeism is that an employee would receive a verbal warning after three occurrences within six months; one occurrence is an absence and tardy is a half occurrence. (Hrg. Trans., p. 68, ll. 10-14). If the action occurs two more times, the employee receives a written warning. *Id.* at p. 68, ll. 16-17. This can then progress to a second written warning, a final written warning, and then separation from employment. *Id.* at p. 68, ll. 17-20. DW[Redacted] acknowledged that [Redacted, hereinafter MG] had received warnings prior to his work-related injury for his attendance. (Hrg. Trans., p. 74, ll. 13-75:16; Ex. D at bates 017-019). Since the date of his injury, December 24, 2020, however, he has only received one written warning for an absence (February 10, 2021). Hrg. Trans., p. 76, ll. 6-9; Ex. D at bates 020, 021 (duplicates)). MG[Redacted] was written up three times beginning in early 2018 and up to August of 2019. He had no write ups for the rest of 2019 or at all in 2020. He had one additional write up after the work injury. The first written warning was January 12, 2018 for not using proper call off procedures. (Ex. D at bates 017). The second write-up was February 4, 2019 and was incorrectly noted as a first written warning. *Id.* at 018. The final write up prior to the work injury was August 20, 2019 for failure to report to work.

of the work injury either to attend medical appointments or because of symptoms related to his admitted injury.

15. As noted above, Claimant attended a DIME with Dr. Bryan Alvarez on August 11, 2022. Dr. Alvarez determined that MG[Redacted] was not at MMI. (Ex. 3, bates 014).

16. Claimant then returned to the office of Dr. Castrejon to see what other treatment options were available to him. (Hrg. Trans., p. 27, ll. 7-12). However, Dr. Castrejon declined to see Claimant due to what he considered overdue medical bills totaling $773.41 related to five dates of service—May 20, 2021, July 22, 2021, September 16, 2021, March 3, 2022, and April 26, 2022. (Hrg. Trans., p. 27, ll. 3-20). Claimant has been unable to make an appointment with Dr. Castrejon since. *Id.* at p. 27, ll. 15-20. Respondents had issued payments for each of the bills and provided explanations of benefits (EOBs) for the denied portions of the bills. (Exhibits E through J). Dr. Castrejon resubmitted each bill for payment in full on multiple occasions and declined to let Claimant schedule a follow up appointment until each bill was paid in full. The only difference between the resubmitted bills and the original bills were handwritten notes on the Health Insurance Claim (HCFA) forms asking respondents to pay the balance.

17. [Redacted, hereinafter RA] testified as a claims supervisor employed by Gallagher Bassett Services, the third-party administrator adjusting the instant claim on behalf of GL[Redacted] and Ace American Insurance. RA[Redacted] testified regarding the bill paying process and the handling of the outstanding bills received from Dr. Castrejon. RA[Redacted] explained that the billing process involved the providers sending bills to a specific address and that the billing department handles bills for claims from all over the country. The bill is then sent to the handling adjuster who reviews it to ensure that the necessary medical records are attached and that the billing is related to the claim. The adjuster then chooses an internal pay code for processing the bill which is then sent back to the billing department for payment pursuant to the fee schedule. The billing department determines the fee scheduled amount and then sends out payment along with an explanation of benefits (EOB). If a provider believes the billing department has erred and would like reconsideration, then the provider is given specific instructions on the EOB to submit additional documentation and a letter outlining the basis for appeal/reconsideration. In this case, RA[Redacted] did not receive any documents from Dr. Castrejon's office that specifically complied with how it stated reconsideration requests should be documented, but it is clear that Dr. Castrejon's office did provide handwritten statements regarding missing payments on the HIPAA forms submitted. Hrg. Trans., p. 57, ll. 13-18; Ex. 6). RA[Redacted] admitted that although the handwritten notes did not look like what he would expect to see in a reconsideration request, he did not have any problem understanding that Dr. Castrejon's office was claiming that additional unpaid balances were due and owing from the bills his office resubmitted. (Hrg. Trans., p. 61, ll. 3-9).

18. RA[Redacted] testified that he had worked as the adjuster on the subject claim off and on prior to March of 2022 due to staffing issues with the company. He acknowledged that Gallagher Basset had received multiple billings from Dr. Castrejon's office. Indeed, RA[Redacted] acknowledged that Dr. Castrejon's office sent a billing for date of service of May 20, 2021 to Respondents on June 9, 2021, with subsequent submissions on October 22, 2021 and November 17, 2021. Tr. at 36:1-7; (Ex. 7 at bates 040-044). There continues to be an outstanding balance of $117.84 on that billing (Ex. 6 at bates 038). Respondents originally paid only $39.01 for that appointment. *Id*.; Hrg. Trans., p. 36, ll. 17-24). RA[Redacted] also acknowledged that Respondents received a bill from Dr. Castrejon's office for a date of service of July 22, 2021 on at least September 22, 2021 and again on October 25, 2021. Tr. at 37:1-14; (Cl's Ex. 8 at 46-49). There remains an unpaid balance concerning this invoice according to Dr. Castrejon's office. (Hrg. Trans., p. 37 ll. 5-24, 40, ll. 2-5; Ex. 6 at bates 037).

19. RA[Redacted] acknowledged that Dr. Castrejon's office sent a bill for a date of service of September 16, 2021, which was received by Respondents on October 11, 2021. Hrg. Trans., p. 40, ll. 6-11; Ex. 9 at bates 051). The payment for that same date of service was not made for tizanidine until June 10, 2022. (Ex. G at bates 085). The final payment for the tramadol prescription was not paid until December 9, 2022. (Hrg. Trans. p. 42, ll. 17-25, p. 43, ll. 1-2).

20. RA[Redacted] acknowledged that Respondents received a billing for a date of service of March 3, 2022. (Hrg. Trans., p. 43, ll. 17-19). Of the total bill of $278.97, Respondents paid $168.44 in April of 2022, but did not pay the subsequent payment of $110.53 until October 18, 2022. (Hrg. Trans., p. 43, ll. 17-25, p. 44, ll. 1-5; Ex. 6 at bates 035). Finally, RA[Redacted] acknowledged that Respondents paid Dr. Castrejon's bill for the office visit of April 26, 2022, but failed to pay for the meloxicam prescription until November 18, 2022. (Hrg. Trans., p. 45, ll. 5-15; Ex. 6 at bates 034).

21. RA[Redacted] admitted that each late payment that was issued used the same codes that Dr. Castrejon's office had listed on their bills. (Hrg. Trans. p. 46, ll. 18-25, p. 47, l. 1). Regardless, RA[Redacted] suggested that the bills submitted had only been partially paid due to the fee schedule and the CPT code the provider used. RA[Redacted] explained that he was not a billing expert and did not know the fee scheduled amounts or the correct CPT codes for billing services. Nonetheless, it was his understanding that Dr. Castrejon's office was asking to be paid for the full amount of charges billed regardless of the fee schedule. RA[Redacted] also explained that as a supervisor, he had the ability to escalate payment issues and waive deadlines and errors with the codes if after discussion with the provider, he was able to determine that a particular bill should be paid. He explained that no one from Dr. Castrejon's office ever called him or the other adjusters to discuss the issue but rather continued to resubmit the same previously denied bills without the additional documentation requested on the EOBs. Consequently, the billing department continued to deny the bills as duplicates. RA[Redacted] testified that he eventually escalated the resubmitted bills for payment in October and November of 2022. He explained that he typically escalates bills once someone reaches out to him directly.

22. Claimant has withdrawn his request for penalties based on the date of service May 20, 2021. The remaining dates of service, however, only involve two different service codes for office visits (99214) and for various medications (99070), including meloxicam, tizanidine, tramadol, and gabapentin. The amount billed changes depending on whether the DOS was in 2021 or 2022, but the codes remain the same. Respondents' denials and payments of the submitted invoices are inconsistent and random. For example, the office visit for April 26, 2022 was paid in full on June 3, 2022 ($203.42) (Ex. I at bates 109), but the office visit for March 3, 2022 is only partially paid at $168.44. (Ex. H at bates 093). The office visit for September 16, 2021 was paid in full on November 2, 2021, but the office visit for July 22, 2021 has still not been paid. (Ex. 6 at bates 037).

23. The July 22, 2021 date of service was submitted for payment on July 29, 2021. (Ex. 8 at bates 046). The September 16, 2021 date of service was submitted for payment on October 5, 2021. (Ex. 9 at bates 051). The March 3, 2022 date service was submitted on March 17, 2022. (Ex. 6 at bates 035). The April 26, 2022 data service was submitted on the same date service was rendered. *Id.* All of the dates of service have been submitted again on numerous occasions, including specifically on October 19, 2022. *Id.* at bates 033.

CONCLUSIONS OF LAW

Based upon the foregoing findings of fact, the ALJ draws the following conclusions of law:

Generally

A. The purpose of the Workers' Compensation Act of Colorado is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. *Section 8-40-102(1), C.R.S.* Claimant must prove that she is a covered employee who suffered an injury arising out of and in the course of employment. *Section 8-41-301(1), C.R.S.; See, Faulkner v. Industrial Claim Appeals Office*, 12 P.3d 844 (Colo.App. 2000); *City of Boulder v. Streeb*, 706 P.2d 786 (Colo. 1985); *Pacesetter Corp. v. Collett*, *33 P.3d 1230* (Colo.App. 2001).

B. It is the ALJ's sole prerogative to assess the credibility of witnesses and the probative value of the evidence to determine whether a party has met its burden of proof. In addition to determining the sufficiency of the evidence presented, the ALJ evaluates the credibility and probative value of conflicting evidence, including competing experts and inconsistencies in a particular witness' testimony. *Johnson v. ICAO*, 973 P.2d 624, 626 (Colo.App. 1997). When determining credibility, the ALJ should consider the witness' manner and demeanor on the stand, means of knowledge, strength of memory, opportunity for observation, consistency or inconsistency of testimony and actions, reasonableness or unreasonableness of testimony and actions, the probability or improbability of testimony and actions, the motives of the witness, whether the

testimony has been contradicted by other witnesses or evidence, and any bias, prejudice or interest in the outcome of the case. *Colorado Jury Instructions, Civil*, 3:16.

C. In accordance with Section 8-43-215, C.R.S., this decision contains Specific Findings of Fact, Conclusions of Law, and an Order. In rendering this decision, the ALJ has made credibility determinations, drawn plausible inferences from the record, and resolved essential conflicts in the evidence. *See Davison v. Industrial Claim Appeals Office*, 84 P.3d 1023 (Colo. 2004). This decision does not specifically address every item contained in the record; instead, incredible or implausible testimony or unpersuasive arguable inferences have been implicitly rejected. *Magnetic Engineering, Inc. v. Industrial Clam Appeals Office,* 5 P.3d 385 (Colo.App. 2000).

Claimant's Entitlement to Temporary Disability Benefits

D. To establish entitlement to temporary disability benefits, the claimant must prove that the industrial injury has caused a "disability," and that he has suffered a wage loss which, "to some degree," is the result of the industrial disability. Section 8-42-103(1), C.R.S.; *S*ee *Liberty Heights at Northgate v. Industrial Claim Appeals Office*, 30 P.3d 872, 873 (Colo.App. 2001). A "disability," occurs when the medical condition limits the claimant's capacity to meet the demands of life's activities. *Baldwin Constr. Inc., V. Indus. Claim Appeals Office,* 937 P.2d 895, 897 (Colo.App. 1997). Claimant must prove both disability and wage loss or a loss in earning capacity to be entitled to temporary disability benefits. *Culver v. Ace Electric*, 971 P.2d 641 (Colo. 1999).

E. Whether the claimant has proved a disability, including proof that the injury has impaired the ability to perform the pre-injury employment, is a factual question for the ALJ. *Lymburn v. Symbios Logic*, 952 P.2d 831 (Colo.App. 1997). The ALJ has broad discretion in assessing the weight and sufficiency of the evidence to determine whether this burden has been satisfied. (*See Sena v. World of Sleep*, 173 Colo. 348, 478 P.2d 671 (1970); *Eisnach v. Industrial Commission*, 633 P.2d 502 (Colo.App. 1981).

F. As found here, Claimant's testimony regarding the reasons he lost time from work outside of those dates corroborated by the medical records is not credible. Indeed, Claimant's testimony was vague, non-specific, and in some cases contradicted by the documents. For example, Claimant testified that he had medical appointments on dates that were not corroborated by the medical records. In fact, Claimant testified that he requested time off on August 10, 2022 to attend a medical appointment with Dr. Castrejon despite indicating that he had not been able to return to Dr. Castrejon because of the claimed outstanding balances outlined above. Simply put, Claimant presented no persuasive evidence of a medical appointment on August 10, 2022 and the record submitted does not support the existence of such appointment. Similarly, Claimant initially testified that he missed work on June 18, 2022 due to his industrial injury. However, after evidence was presented establishing that he requested that day off for personal reasons, Claimant withdrew his request for temporary disability benefits for this date.

G. It is apparent from the evidence presented that outside those dates on which Claimant had a corroborated medical appointment, Claimant has no genuine recollection about why he missed any of the remaining specific dates listed on Exhibit 12. This is evidenced by foregoing as well as the fact that several holidays appear on this list. DW[Redacted] credibly testified that holiday pay was dependent on working the day before, the day of, the day after and a make-up day. Respondents' Exhibit C conclusively establishes that Claimant did not work the day before Labor Day in 2022 or the day before Thanksgiving in 2021. Claimant is not seeking benefits for the day before Labor Day or the day before Thanksgiving. Nevertheless, he contends that he did not work on Labor Day or Thanksgiving Day because of symptoms related to the work injury, when in fact he probably did not work those days because they were holidays.

H. Based upon the evidence presented, the ALJ agrees with Respondents that Claimant is simply asserting that any date for which he did not get paid after his work injury is related to the work injury unless there is proof to the contrary. This is not sufficient to prove his claim. Claimant has the burden of proving the lost time is related to the work injury. Respondents do not have the burden to prove the contrary. In this case, Respondents have presented evidence establishing that Claimant had a history of absenteeism prior to the work injury that closely resembles his absenteeism following the work injury. The evidence presented persuades the ALJ that outside of the six corroborated medical appointment dates listed on Exhibit 12, the remaining uncompensated lost time documented in Exhibit 12 probably represents time Claimant missed for personal reasons rather than time lost because of his work injury, which, as found above is consistent with extensive attendance issues that pre-date the work injury.

Claimant's Penalty Claim

I. The general penalty provision in § 8-43-304(1), C.R.S. sets forth four categories of conduct and authorizes the imposition of penalties when an employer or insurer: (1) violates any provision of the Act; (2) does any act prohibited by the Act; (3) fails or refuses to perform any duty lawfully enjoined within the time prescribed by the director or panel, for which no penalty has been specifically provided; or (4) fails, neglects, or refuses to obey any lawful order of the director or the Panel. *See Holliday v. Bestop, Inc*., 23 P.3d 700 (Colo. 2001); *Giddings v. Industrial Claim Appeals Office*, 39 P.3d 1211 (Colo.App. 2001). The limiting phrase contained in § 8-43-304(1), C.R.S., "for which no penalty has been specifically provided" modifies the first three categories, but does not modify the fourth category, which is disobeying a lawful order. *Holliday v. Bestop, Inc., supra; Pena v. Industrial Claim Appeals Office,* 111 P.3d 84 (Colo.App. 2004).

J. The term "order" as used in § 8-43-304(1), C.R.S. includes a rule or regulation. (*See* § 8-40-201(15), C.R.S.; *Holliday v. Bestop, Inc., supra; Paint Connection Plus v. Industrial Claim Appeals Office,* 240 P.3d 429 (Colo.App.

2010)(failure to comply with a procedural rule is a failure to obey an "order" within the meaning of § 8-43-304(1), C.R.S); *Spracklin v. Industrial Claim Appeals Office,* 66 P.3d 176 (Colo.App. 2002); *Pioneers Hospital of Rio Blanco County v. Industrial Claim Appeals Office,* 114 P.3d 97 (Colo.App. 2005). Accordingly, the ALJ has authority to assess penalties under the general penalty provision contained at § 8-43-304(1), C.R.S. for a violation of WCRP 16-10 rather than the specific penalty enumerated at C.R.S. § 8-43-401(2)(a). (*Holliday v. Bestop, Inc*. *supra* at 706-707; *See also*, *Jill Goss v. The Kroger Company*, W.C. No. 4-855-895-02 (ICAO, January 14, 2013). Under Rule 16-10(A), "All bills submitted by a provider are due and payable in accordance with the Medical Fee Schedule within 30 days after receipt by the payer, unless the payer provides timely and proper reasons (for denial) as set forth by section 16-102 or 3". In this case, the question presented is not whether the ALJ has the authority to impose penalties for a violation of WCRP 16-10(A) under the general penalty statute at C.R.S. § 8-43-304(1) but whether the evidence presented supports that a violation occurred.

K. The imposition of penalties under § 8-43-304(1) requires a two-step analysis. First, the ALJ must first determine whether the insurer's conduct constitutes a violation of the Act, a rule or an order. Second, the ALJ must determine whether any action or inaction constituting the violation was objectively unreasonable. The reasonableness of the insurer's action depends on whether it was based on a rational argument in law or fact. *Jiminez v. Industrial Claim Appeals Office,* 107 P.3d 965 (Colo. App. 2003); *Gustafson v. Ampex Corp.,* WC 4-187-261 (ICAO, Aug. 2, 2006). There is no requirement that the insurer know that its actions were unreasonable. *Pueblo School District No. 70 v. Toth,* 924 P.2d 1094 (Colo. App. 1996).

L. The question of whether the insurer's conduct was objectively unreasonable presents a question of fact for the ALJ. *Pioneers Hospital v. Industrial Claim Appeals Office,* 114 P.3d 97 (Colo. App. 2005); *See Paint Connection Plus v. Industrial Claim Appeals Office*, 240 P.3d 429 (Colo. App. 2010). In this case, Claimant contends that Respondents unreasonably denied payment of portions of Dr. Castrejon's invoices within 30 days of submission. Hence, Claimant asserts that Respondents violated WCRP 16-10(A) and are subject to penalties for the following time periods and amounts:

1. Respondents claim to have received the billing for the July 22, 2021 date of service on September 22, 2021. Payment was due under the Rule by October 22, 2021. The late payments on that bill run from October 23, 2021 until the date of hearing. The balance had still not been paid in full as of the hearing date. That represents 445 days of late payment for a requested penalty of $4,450.

   Concerning this claim, the evidence submitted establishes that Dr. Castrejon's office submitted a billing invoice to Insurer for services rendered on July 22, 2021 in the amount of $442.33. (Ex. F, at bates 050). This bill was fee scheduled and a check was issued to Dr. Castrejon's office in his business name CPRMC (Colorado Pain and Rehabilitation

Medical Center), Inc. on October 29, 2021 for $270.42. *Id.* at bates 055-056. Although Respondents assert that the billing was received September 22, 2021, information attached to the check sent to Dr. Castrejon reflects that the billing date was September 15, 2021. (Ex. F at bates 055). Crediting Respondents indication that the billing date was September 15, 2021, the initial payment and EBO denying payment for $123.87 on October 29, 2021 was fifteen (15) days past the 30 days allowed for under WCRP 16-10(A). As noted, the initial fee scheduled payment did not include an additional $123.87 for 90 units of "supplies and materials" on the grounds that the billed service had "NO ALLOWANCE IN FEE SCHEDULER/URC" and because the "BILLED PROCEDURE CODE HAS AN RBRVS STATUS INDICATOR B IDENTIFYING A BUNDLED CODE. SEPARATE PAYMENT IS NOT ALLOWED. *Id*. at bates 056. Based upon the evidence presented, the ALJ finds that this $123.87 charge probably represented provision of medication prescribed by Dr. Castrejon. Although initially denied, the $123.87 charge was subsequently paid on August 11, 2022, 293 days after the initial denial and 30 day payment period under WCRP 16-10(A) expired. *Id*. at bates 057-058. Resubmission of the billing for consideration of additional charges from this date of service generated additional EOBs without further payment based upon an explanation for the continued denial of payment. *Id*. at bates 060-071; See also, Ex. 6 at bates 037.

2. Respondents claim to have received the billing for September 16, 2021 on October 11, 2021. For the late payment on the tizanidine prescription, the penalty runs from November 11, 2021 to June 10, 2022 (212 days) for a penalty of $2,120.The payment for the tramadol from this date of service was not made until December 9, 2022, so the penalty for that late payment runs from November 11, 2021 until that day (394 days) for a requested penalty of $3,940.

   Concerning these claims, the record evidence establishes that Dr. Castrejon submitted a total of $396.96 in charges for the September 16, 2021 date of service. (Ex. G at bates 073). With a billing date of October 5, 2021, Respondents fee scheduled the invoice and issued an EOB and a check to Dr. Castrejon for $171.36 on November 2, 2021. *Id*. at bates 073, 083-084. Accordingly, initial payment was made within the time period provided for by WCRP 16-10(A). While neither of the charges for Claimant's medications of $149.35 and $75.65 were included in payment to Dr. Castrejon for the same reasons as noted on the October 29, 2021 EOB, the November 2, 2021 EOB clearly denied payment for the additional charges and explained why those charges were denied. (See Ex. G at bates 84). Similar to the billing from July 22, 2021, the cost of one of Claimant's work-related medications from September 16, 2021 was eventually paid on June 10, 2022, 212 days after the initial denial and the 30 day payment period under WCRP 16-10(A) expired. (Ex. G at bates

085-086).[2] However, the $75.65 charge for Claimant's other medication was consistently denied in subsequent EOBs issued after resubmission of the billing. *Id.*; See also, Ex. 6, at bates 036. Following both the initial and subsequent denials, the $75.65 charge for this medication was ultimately processed and paid on December 9, 2022, 394 days after the 30 day payment period under WCRP 16-10(A) expired. (Hrg. Trans. p. 42, ll. 17-25). RA[Redacted] explained that the cost of this medication was only paid recently because the bill was either "sent back to Gallagher Bassett for review and reconsideration or [he] escalated [it] into [his] billing office". *Id.* at p. 43, ll. 3-8. Nonetheless, the evidence presented supports a finding that the initial billing for the $149.35 and $75.65 was initially denied by EOB on November 2, 20921 within the 30 day period allowed for by WCRP 16-10(A) given that the billing was received on October 5, 2021. (Ex. G at bates 083).

3. Claimant contends that the record supports that the March 3, 2022 date of service was received on March 17, 2022. Because payment for the $112.11 charges associated with this date of service were not paid until October 18, 2022, Claimant contends that penalties must be imposed from April 17, 2022 until October 18, 2022 (185 days) for a requested penalty of $1,850.

   Concerning this claim, the evidence presented establishes that Dr. Castrejon submitted two E-billing invoices for a March 3, 2022 date of service. (Ex. H at bates 088). The charges associated with this E-billing totaled $280.55 and $112.11 respectively. *Id*. The billing for $280.55 was received on March 17, 2022. (Ex. H at bates 093). This bill was fee scheduled and a check was issued to CPRMC, Inc. (Dr. Castrejon) in the fee scheduled amount of $168.44 on April 4, 2022. Thus, initial payment for this billing was made and an EOB issued within the window of time provided for under WCRP 16-10(A). Despite the indication that the charges for $112.11 were also received March 17, 2022, this billing was not paid and the initial EOB from April 4, 2022 makes no reference to a denial of the $112.11 charge. (Ex. H at bates 094). Dr. Castrejon's office requested additional payment indicating that the office did not have a "PPO with any insurance". (Ex. 6, at bates 035). Dr. Castrejon's resubmission of the $112.11 billing invoice generated multiple EOBs dated 8/26/2022, 10/7/2022, 11/1/2022 and 11/22/2022 indicating that a denial had already been recommended for the reasons outlined in the explanation codes included on the EBO. As noted, the initial EOB issued in connection with the March 3, 2022 date of service does not include a denial for the $112.11 charges. Despite the EOBs surrounding the March 3, 2022 charges for $112.11, RA[Redacted] testified that a fee scheduled payment in the amount of $110.53 was ultimately paid in connection with

[2] The total charge of $149.35 was reduced (fee scheduled) by $101.39 lowering the payment to Dr. Castrejon to $47.96. (Ex. G at bates 086).

this billing. (Hrg. Trans., p. 44, ll. 1-5). Payment was made on the October 18, 2022. *Id.* According to RA[Redacted], he did not know why the billing wasn't paid or if he was the one who escalated the billing to get it paid. *Id*. at p. 44, ll. 15-25. Nevertheless, this billing was fee scheduled and paid. Id. at p. 44, l. 25, p. 45, ll. 1-4. Payment of the fee scheduled $112.11 billing invoice occurred 185 days after the 30 day payment period under WCRP 16-10(A) expired.

4. Claimant contends that the record supports that the April 26, 2022 day of service was sent to Respondents on that same date. Because the charges for this date of service were not paid until October 8, 2022, Claimant asserts a penalty from May 27, 2022 until October 8, 2022 (166 days) for a penalty of $1,660.

Concerning this claim, the ALJ is persuaded that Dr. Castrejon submitted a billing invoice to Gallagher Bassett totaling $352.77, which billing included a charge of $149.35 for Meloxicam, one of Claimant's work-related medications. (Ex. I at bates 104, 110). This bill was received on May 16, 2022, and a check was issued to Dr. Castrejon in the fee scheduled amount of $203.42 on June 3, 2022. (Ex. I at bates 109). The EOB attached to Dr. Castrejon's June 3, 2022 check denied payment for the $149.35 for Claimant's Meloxicam. *Id*. at bates 110. Accordingly, the evidence presented supports a finding that the initial payment and the denial of the charges for the Meloxicam was timely based on the time period provided by WCRP 16-10(A). Following the initial billing, Dr. Castrejon's office resubmitted the billing with the indication that they had received payment for the office visit but not the Meloxicam. (Ex. 6 at bates 034). Subsequent EOBs issued 8/17/2022, 11/7/2022 and 11/25/2022 provided an explanation for the continued denial of payment. (Ex. I at bates 112-116, 118). Nonetheless, RA[Redacted] testified that the prescription for Meloxicam was paid on November 18, 2022. (Hrg. Trans., p. 45, ll. 5-15). RA[Redacted] testified that non-payment of the prescription was compounded by Dr. Castrejon's failure to write a reconsideration letter explaining why the billing for the Meloxicam should be paid. (Hrg. Trans., p. 45, ll. 16-26, p. 46, ll. 1-22).

M. Respondents contend that the facts presented do not support a violation of WCRP 16-10(A). With exception of the fifteen (15) day late payment of the July 22, 2021 billing invoice and the late payment of the $112.11 invoice from March 3, 2022, the ALJ agrees. WCRP 16-10-2 identifies grounds for denying medical bills for non-medical reasons including missing medical documentation and unrecognized or improper CPT codes. As noted above, with the exception of the July 22, 2021 and March 3, 2022 invoices, each of the bills at issue was timely processed and fee scheduled after receipt. Moreover, Respondents issued an EOB for each billing explaining the reductions in the bills based on fee scheduled limitations and problems

with the CPT codes. Each of the EOBs issued contained code 5721 as a basis and the following statement in all caps:

> TO AVOID DUPLICATE BILL DENIAL FOR ALL RECONSIDERATIONS/ADJUSTEMENTS/ADDITIONAL PAYMENT REQUESTS SUBMIT A COPY OF THIS EOR OR CLEAR NOTATION"

Each EOB also contained a State Specific EOB Message which read as follows:

> Do not resubmit bills for the same dates of services, as listed on this EOR, or they will be considered as duplicates. If any portion of this explanation/payment is being contested or corrected, pursuant to Rule 16(11)(D)(1), within 60 days the following items must be submitted for reconsideration; a copy of the original or corrected bill, a copy of this EOR, a letter that clearly identifies that this is a request for reconsideration with the specific item(s) being contested and with clear persuasive reasons for contesting each item, as well as any additional information as requested in this notice.

N. In this case, RA[Redacted] testified that Dr. Castrejon's office repeatedly submitted bills for the same dates of service without providing the additional information requested by the original EOBs or subsequent EOBs. As stated in each of the original EOBs, the subsequent billings were repeatedly denied as duplicates by the billing department. Per RA[Redacted], additional payments were not processed until he began communicating directly with the billing department advising that these resubmissions were in fact attempts to appeal the earlier denials. There is no allegation that Respondents did not timely deny each of the resubmitted bills. Rather, Claimant's allegation is that the billing department erred in its fee scheduled calculations to the fee schedule and should have paid the bills in full at the request of Dr. Castrejon. Claimant did not present any convincing evidence to support this allegation. In asserting that Respondents had not paid the bills in full pursuant to the fee schedule, Claimant relied entirely on the fact that Dr. Castrejon's office continued to resubmit the bills for payment. However, a review of the resubmitted bills from Dr. Castrejon's office does not prove that the billing department had indeed erred in their application of the fee schedule to Dr. Castrejon's bills. (See Ex. 6). None of the notes from Dr. Castrejon's office referred to the fee schedule or any of the CPT codes. Instead, Dr. Castrejon's office repeatedly asked for payment of the unpaid balance with no reference to or any discussion about the fee schedule or the explanation of benefits that had been provided.

O. The fact that Dr. Castrejon's office continued to resubmit the same bills asking for additional payment does not prove that the office was entitled to payment in full or to any additional payment pursuant to the fee schedule. It merely proves that Dr. Castrejon's office was asking for additional payment. It was Claimant's burden to prove that additional payment was in fact due pursuant to the fee schedule concerning the billing in question. Here, Claimant failed to carry that burden, with exception of the July 22, 2021 and March 3, 2022 late payments as noted above, by failing to present

persuasive evidence regarding the proper fee scheduled amounts for the services billed by Dr. Castrejon. In this case, RA[Redacted] testified that he was not a billing expert and did not know the fee scheduled amounts for the services billed by Dr. Castrejon. No one from Dr. Castrejon's office testified or offered any opinions regarding the proper fee scheduled amounts for the services billed. Claimant did not testify regarding the fee schedule nor did he present any billing experts, a representative of the Division of Workers Compensation, or any other testimony to prove that the third party (Gallagher Bassett) billing department had not properly applied the fee schedule to each of its denials. Because Respondents timely provided payment and EOBs outlining what was being paid and why concerning the invoices from September 16, 2021, March 3, 2022 (with exception of the $112.11 charges) and April 26, 2022, Claimant has failed to prove that Respondents violated WCRP 16-10(A) for the medical charges associated with these dates of service. The fact that additional bills were resubmitted does not negate the initial denial. The fact that RA[Redacted] escalated bills for payment at later dates does not change the analysis. Indeed, the ALJ agrees with Respondents that RA's[Redacted] decision to escalate the bills for additional payments in October and November of 2022 after the application for penalties was filed proves only that he was attempting to resolve the issue. Nonetheless, the ALJ finds that the totality of the evidence presented supports a conclusion that Respondents did not timely pay the billing invoice associated with the medical billing from July 22, 2021 nor did they timely deny or pay the billing associated with the $112.11 charge for Claimant's Meloxicam within the time prescribed by WCRP 16-10(A).

P. Based upon the evidence presented, the reasons RA[Redacted] cited for the failure to timely deny or pay the aforementioned bills fails to convince the ALJ that that failure was objectively reasonable. Indeed, RA[Redacted] simply testified he was not a billing expert, that he did not know the fee scheduled amount of the services billed and did not know why some of the bills were not paid. Any suggestion that RA's[Redacted] testimony supports a conclusion that failure to timely pay the above referenced medical bills was objectively reasonable is unpersuasive. To the contrary, the evidence presented persuades the ALJ that the failures to pay or denials are based on inconsistent and often contradictory reasons. Respondents contended at times that an amount requested was in excess of the fee schedule, but later turned around and paid that exact amount for that same bill or a later bill with the same code. As important here, the ALJ concludes that no reasonable insurer would ignore resubmitted bills, claiming that they were not submitted in the proper format. This is particularly true where, as here, the adjuster had no problem understanding what was still outstanding and unpaid from Dr. Castrejon's March 3, 2022 billing invoice. The fact that the unpaid medical bills have prevented the Claimant from seeing Dr. Castrejon for treatment following a DIME examination concluding that he was not at MMI persuades the ALJ that Claimant has suffered specific and serious harm from Respondents' actions and inactions. Accordingly, the ALJ concludes that Respondents violated WCRP 16-10(A) by failing to pay the July 22, 2021 billing timely and by failing to deny or pay the March 3, 2022 billing from Dr. Castrejon's office in the amount of $122.11. Because Respondents' actions in failing to pay or deny the billing invoices for July 22, 2021 and March 3, 2022 has, in part, resulted in Claimant's inability to secure additional timely

treatment from Dr. Castrejon, the ALJ is convinced that the effect of Respondents' conduct/violation amounts to a delay or denial of medical treatment for Claimant. Indeed, Claimant convincingly testified that he cannot access care based upon Respondents failure to timely pay Dr. Castrejon's bills. Accordingly, the ALJ is convinced that the imposition of penalties in this case is appropriate under the general penalty statute enumerated at C.R.S. § 8-43-304(1) rather than under C.R.S. § 8-43-401(2)(a). (*See*, *Jill Goss v. The Kroger Company*, W.C. No. 4-855-895-02 (ICAO, January 14, 2013; *Pamela Ringler v. King Soopers, Inc.,* W.C. No. 4-121-888-11 (ICAO, March 13, 2013)(Claimant's failure to seek penalties on any conduct outside of the penalty available under C.R.S. § 8-43-401(2)(a) limited the available penalty to eight percent of the withheld medical benefit).

Q. "The imposition of penalties under § 8-43-304(1) is mandatory if there has been a violation and the violation was not reasonable under an objective standard." *Castro v. FBG Service Corporation*, W.C No. 4-739-748(ICAO Dec. 31, 2008). *See also, Armbruster v. Rocky Mountain Cardiology,* W.C. No. 4-447-502 (ICAO Feb. 24 2003). *aff'd by Rocky Mountain Cardiology v. ICAO,* 94 P.3d 1182 (Colo. App. 2004). When, as here, the evidence supports a conclusion that Respondents knew the rule and did not present any convincing arguments that their actions did not violate the rule, the record compels the conclusion that Respondents knew or should have known that their failure to timely pay or deny the July 22, 2021 and March 3, 2022 billing violated the WCRP 16-10(A). As a result, the ALJ would err as a matter of law if he refused to impose a penalty. *Varga v. A1 Sewer Master Mountain Water,* W.C. No. 4-508-548 (ICAO July 1, 2004). "Negligence, as opposed to recklessness and other standards of conduct, connotes an objective standard measured by the reasonableness of the insurer's action and does not require knowledge that the conduct was unreasonable." *CCIA v. ICAO,* 907 P.2d 676, 678 (Colo. App. 1995). As noted, RA's[Redacted]justifications for the late payment are not objectively reasonable. An adjuster's "mistaken beliefs" and "poor handling procedures" are not predicated on a rational argument based on law or fact, and thus are not reasonable. *Diversified Veterans Corporate Center v. Hewuse,* 942 P.2d 1312, 1314 (Colo. App. 1997). As such, penalties must be assessed in this case.

R. The Colorado Supreme Court has adopted the "gross disproportionality" test for determining whether a regulatory fine violates the Excessive Fines Clause. *Colorado Dept. of Labor & Empl. v. Dami Hospitality, LLC*, *supra* (hereinafter *Dami Hospitality*). In Concluding that corporations were protected from the imposition of excessive fines pursuant to the Eighth Amendment, the Court provided:

> In sum, we hold that the Eighth Amendment does protect corporations from punitive fines that are excessive. The appropriate test to apply in assessing whether a regulatory fine violates the Excessive Fines Clause is the "gross disproportionality" test. In assessing proportionality, a court should consider whether the gravity of the offense is proportional to the severity of the penalty, considering whether the fine is harsher than fines for comparable offenses in this jurisdiction or than fines for the same offense in other jurisdictions. In considering the severity of the penalty, the

> ability of the regulated individual or entity to pay is a relevant consideration. And the proportionality analysis should be conducted in reference to the amount of the fine imposed for each offense, not the aggregated total of fines for many offenses.

Dami Hospitality, *Id.* at 103.

S. Concerning the penalties (fine) imposed in this case, the ALJ is mindful that C.R.S. § 8-43-304(4) provides that, "Any employer or insurer… [that] fails, neglects, or refuses to obey any lawful order (including a rule or regulation) made by the director or panel or any judgment or decree made by any court as provided by the articles shall be subject to such order being reduced to judgment by a court of competent jurisdiction and shall also be punished by a fine of not more than one thousand dollars per day for each offense….". The statute specifically authorizes an ALJ to assess up to $1,000 per day in penalties against any party that fails to adhere to a regulation or rule of procedure. Asserting that Respondents established no legitimate justification for failing to timely pay Claimant's medical bills, which is precluding Claimant's ability to obtain medical treatment through Dr. Castrejon's office, Claimant contends that he has been forced to endure additional hardship as he needs further treatment to attain MMI. The ALJ is not convinced that Claimant's cited hardship arises to the level for imposition of the maximum penalty allowed for by statute. Indeed, the evidence presented persuades the ALJ that the limited violations in this case support the imposition of a $10.00/day penalty as suggested by Claimant.

T. The purpose of penalties is to address ongoing conduct. The ALJ finds and concludes that the delay in payment or denial of the medical billing involved in this case results from isolated, albeit unreasonable conduct, which billing was ultimately paid through the involvement of RA[Redacted]. Nonetheless, it is actionable to deter future like violations. In this case, a penalty of $10.00 per day is not grossly disproportionate to the harm or risk of harm caused by each day of Respondents failure to pay or deny the charges associated with Dr. Castrejon's July 22, 2021 and March 3, 2022, i.e. the $121.11 billing invoices. Simply put, the fine is proportional to the offending conduct and appropriate under the circumstances presented.

ORDER

It is therefore ordered that:

1. Claimant's request for payment of temporary disability benefits is GRANTED in part as follows:

a. Respondents shall pay temporary total disability (TTD) benefits from 12/25/20 through 12/29/20, pursuant to the stipulation of the parties;

b. Respondents shall pay temporary partial disability (TPD) benefits for Claimant's lost work time to attend medical appointments on 2/26/2021, March 1, 2021, May 3, 2021 August 3, 2021 March 3, 2022 and August 11, 2022;

c. Claimant's request for payment of temporary disability benefits associated with the remaining dates listed in Exhibit 12 is denied and dismissed.

2. Claimant established by a preponderance of the evidence that Respondents violated WCRP 16-10(A) by failing to timely pay Dr. Castrejon's July 22, 2021 billing invoice and by failing to deny or pay Dr. Castrejon's March 3, 2022 billing invoice in the amount of $112.11. Accordingly, Respondents shall pay penalties at a rate of $10.00 per day for these violations, pursuant to §§ 8-43-304(1) and 8-43-305, C.R.S. in the following amounts:

a. 7/22/2021: For the fifteen (15) days between October 15, 2021, when payment was due and October 29, 2021, when payment was made - $150.00 (15 days × $10.00/day = $150.00).

b. 3/3/2022: For the 185 days between April 17, 2022, when payment and or denial of the billing was due and October 18, 2022, when payment was made - $1,850.00 (185 days × $10.00/day = $1,850.00).

c. Claimant's remaining penalty claims are denied and dismissed.

3. Pursuant to § 8-43-304(1) the penalty assessed is apportioned between Claimant and the Colorado uninsured employer fund created in § 8-67-105. Fifty percent (50%) of the penalty assessed shall be paid to Claimant and the remaining fifty percent of the penalty assessed shall be paid to the Colorado uninsured employers fund.

4. Respondents shall pay interest to Claimant at the rate of 8% per annum on all amounts of benefits and compensation not paid when due.

5. All matters not determined herein are reserved for future determination.

DATED: March 20, 2023

/s/ Richard M. Lamphere

Richard M. Lamphere
Administrative Law Judge
Office of Administrative Courts
2864 S. Circle Drive, Suite 810
Colorado Springs, CO 80906

NOTE: If you are dissatisfied with the ALJ's order, you may file a Petition to Review the order with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail, as

long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the ALJ; and (2) That you mailed it to the above address for the **Denver Office of Administrative Courts**. You may file your Petition to Review electronically by emailing the Petition to Review to the following email address: oac-ptr@state.co.us. If the Petition to Review is emailed to the aforementioned email address, the Petition to Review is deemed filed in Denver pursuant to OACRP 26(A) and Section 8-43-301, C.R.S. If the Petition to Review is filed by email to the proper email address, it does not need to be mailed to the Denver Office of Administrative Courts. For statutory reference, see Section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. WC 5-092-107-003

ISSUE

1. Whether Respondent established by a preponderance of the evidence that Claimant received an overpayment of permanent partial disability (PPD) benefits for which Respondent is entitled to repayment.

2. If Respondent is entitled to repayment, what are the terms of repayment?

FINDINGS OF FACT

Based on the evidence presented at hearing, the ALJ makes the following findings of fact:

1. Claimant suffered a compensable injury on November 8, 2018.

2. Claimant reached maximum medical improvement (MMI) on September 28, 2020, and was given a 17% whole person impairment rating. Claimant's whole person impairment rating corresponds to an award of PPD benefits of $57,249.54. Due to the cap on indemnity benefits, Claimant is only entitled to $39,806.82 in PPD benefits. (Ex. A).

3. Following the date of injury, and until March 13, 2021, Respondent paid Claimant temporary total disability (TTD) benefits and temporary partial disability (TPD) benefits totaling $64,141.88. (Ex. A and Ex. C).

4. On June 9, 2021, Respondent filed a Final Admission of Liability (FAL). The FAL states, "[t]here has been an overpayment in indemnity benefits in the amount of $12,821.86. Overpayment will be taken as a credit against any applicable future benefits." (Ex. A). Claimant filed an Application for Hearing on June 18, 2021, endorsing, among other things, the issue of "alleged overpayment," but the parties canceled the August 25, 2021 hearing.[1]

5. The ALJ finds that Respondent knew of the $12,821.86 overpayment of TTD benefits on June 9, 2021.

6. Two days later, on June 11, 2021, Respondent paid Claimant $20,315.48 in PPD benefits for the period of September 26, 2020 to June 14, 2021. (Ex. C). There is no

[1] Although not included in the evidentiary record submitted by the parties, the ALJ takes judicial notice of the Office of Administrative Courts' files related to this claim. *See Habteghrigis v. Denver Marriott Hotel*, W.C. No. 4-528-385 (ICAO March 31, 2006) ("A court can take judicial notice of its own records and files."). Respondent's contention that the Court may not take administrative notice of these facts is without merit.

evidence in the record that Respondent attempted to recover the known $12,821.86 TTD overpayment, by offsetting it against the PPD payment as provided in the June 9, 2021 FAL.

7. Between June 15, 2021 and July 26, 2021, Respondent paid Claimant an additional $13,183.98 in PPD benefits. Respondent paid Claimant $9,927.30 on June 25, 2021, $1,085.56 on June 25, 2021, $1,085.56 on July 9, 2021 and $1,085.56 on July 23, 2021. (Ex. C). There is no evidence in the record that Respondent attempted to recover the known $12,821.86 TTD overpayment, by offsetting it against any of these PPD payments as provided in the June 9, 2021 FAL. In total, Respondent paid Claimant $33,499.46 in PPD benefits between June 11, 2021 and July 26, 2021.

8. On August 3, 2021, Respondent filed an Amended FAL. The Amended FAL stated, "[t]here has been an overpayment in indemnity benefits in the amount of $12,821.86. Overpayment will be taken as a credit against any applicable future benefits."[2] (Ex. A).

9. Claimant did not object to the Amended FAL, nor did he file an Application for Hearing.

10. [Redacted, hereinafter LV] is a claims adjuster for [Redacted, hereinafter SC]. She credibly testified that the $12,821.86 overpayment noted in the FAL and Amended FAL reflected TTD payments made to Claimant after he returned to work.

11. After issuance of the Amended FAL, Respondent paid Claimant an additional $14,112.28 in PPD benefits. Respondent issued thirteen separate payments of $1,085.56 to Claimant between August 9, 2021 and January 6, 2022. There is no evidence in the record that Claimant ever attempted to recover the $12,821.86 TTD overpayment by offsetting it against any of these payments.

12. In total, Respondent paid Claimant $47,611.74 in PPD benefits between June 11, 2021 and January 26, 2022, when Claimant was only entitled to $39,806.82 in PPD benefits per the statutory cap.

13. The ALJ finds that Respondent overpaid Claimant $7,804.92 in PPD benefits.

14. Respondent filed an Application for Hearing on August 16, 2022, seeking "recovery of ***overpaid PPD benefits***." (emphasis added). In Claimant's Response to the Application for Hearing, Claimant asserted that the issues to be heard at hearing were "alleged overpayment by Respondents to Claimant of ***Permanent Partial Benefits***; effect of agreement of resolution." (emphasis added).

15. Claimant testified that he never had any conversations with LV[Redacted] or Respondent regarding any alleged overpayments. Claimant further testified that when

---

[2] Respondent paid Claimant $64,141.88 in indemnity benefits, but Claimant was only supposed to be paid $51,320.02. This resulted in a $12,821.26 overpayment ($64,141.88 - $51,320.02).

he returned to work, he did not realize he was still being paid TTD benefits. The ALJ finds Claimant's testimony to be credible.

16. Claimant credibly testified that he currently works for Employer, and his average weekly wage is $1,000.00 per week. He testified that if required to make payments, he could afford payments of $100.00 to $200.00 per month at the most.

CONCLUSIONS OF LAW

Generally

The purpose of the Workers' Compensation Act of Colorado, § 8-40-101, *et seq*., C.R.S. is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. *See* § 8-40-102(1), C.R.S. Claimant shoulders the burden of proving entitlement to benefits by a preponderance of the evidence. *See* § 8-43-201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 592 P.2d 792 (Colo. 1979). The facts in a workers' compensation case must be interpreted neutrally; neither in favor of the rights of the claimant, nor in favor of the rights of respondents; and a workers' compensation claim shall be decided on the merits. § 8-43-201, C.R.S.

Assessing weight, credibility, and sufficiency of evidence in a Workers' Compensation proceeding is the exclusive domain of the ALJ. *Univ. Park Care Ctr. v. Indus. Claim Appeals* Office, 43 P.3d 637 (Colo. App. 2001). Even if other evidence in the record may have supported a contrary inference, it is for the ALJ to resolve conflicts in the evidence, make credibility determinations, and draw plausible inferences from the evidence. *Id*. at 641. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *Prudential Insur. Co. v. Cline*, 57 P.2d 1205 (Colo. 1936); *Bodensieck v. Indus. Claim Appeals Office*, 183 P.3d 684 (Colo. App. 2008).

The ALJ's factual findings concern only evidence and inferences found to be dispositive of the issues involved; the ALJ has not addressed every piece of evidence or every inference that might lead to conflicting conclusions and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Eng'g, Inc. v. Indus. Claim Appeals Office*, 5 P.3d 385 (Colo. App. 2000).

Overpayment

Pursuant to § 8–43–303(1) C.R.S., upon a prima facie showing that the claimant received an overpayment in benefits, the award shall be reopened solely as to overpayments and repayment shall be ordered. No such reopening shall affect the earlier award as to moneys already paid except in cases of fraud or overpayment. *Id*. Prior to January 1, 2022, the Act, defined "overpayment" as "money received by a claimant that

exceeds the amount that should have been paid, or which the claimant was not entitled to receive." § 8-40-201 (15.5), C.R.S. (2021). The General Assembly amended the statute (effective January 1, 2022) and removed this language. The statute now includes "money paid in error or inadvertently in excess of an admission or order that exists at the time that the benefits are paid to a claimant," as an overpayment. *Id.*

Respondent bears the burden of proving, by a preponderance of the evidence, that Claimant received an overpayment, and that Respondent is entitled to recovery of that overpayment. *Denver v. Indus. Claim Appeals Office*, 58 P.3d 1162, 1164-1165 (Colo. App. 2002). As found, Respondent proved by a preponderance of the evidence that Claimant received an overpayment of $7,804.92 in PPD benefits. (Findings of Fact ¶ 13).

Respondent is seeking to recover a total overpayment of $20,626.78 (PPD benefits of $7,804.92 and TTD benefits of $12,821.86). Respondent's Application for Hearing, however, specifically states Respondent is seeking recovery of the overpayment of PPD benefits. Rule 12(A) of the OACRP states, "[i]ssues for hearing shall be listed in the Application for Hearing, the Response to the Application for Hearing, or may be added before the hearing date is confirmed by written notice to the OAC and the opposing party. After the hearing date is confirmed, issues may only be added by written agreement of the parties or order of a judge or designee clerk for good cause shown." Here, the Application for Hearing and the Response both note that the issue for hearing involved the alleged overpayment of PPD benefits. No other issues, particularly as related to TTD benefits, were added before the hearing.

Even if the overpayment of TTD benefits had been at issue, which it was not, Respondent would have been barred from seeking such recovery by the statute of limitations. Section 8-42-113.5(b.5)(I) of the Colorado Revised Statutes states "[a]fter the filing of a final admission of liability, except in cases of fraud, any attempt to recover an overpayment shall be asserted within one year after the time the requester knew of the existence of the overpayment." As the Court of Appeals held, "the term 'attempt' in section 8-42-113.5(1)(b.5)(I) cannot be a mere assertion of an overpayment; it must include some effort to regain the overpayment." *Peoples v. Indus. Claim Appeals Office*, 457 P.3d 143, 148 (Colo. App. 2019). An assertion in the FAL simply provides notice to the claimant of the overpayment. *Id.*

Here, Respondent filed an FAL on June 9, 2021, and provided notice to Claimant of the $12,821.86 overpayment of TTD benefits. As found, Respondent knew of the overpayment of TTD benefits on June 9, 2021. (Findings of Fact ¶ 5). Respondent filed an amended FAL on August 6, 2021, and again provided notice of the $12,821.86 overpayment of TTD benefits. Respondent acknowledged in the FAL and the Amended FAL that the overpayment of TTD benefits would be taken as a credit against any future benefits. Despite multiple opportunities, Respondent did not attempt to recover the overpayment. Respondent issued eighteen separate PPD payments between June 11, 2021 and January 26, 2022, but never offset the TTD overpayment that Respondent knew of on June 9, 2021. (Findings of Fact ¶¶ 6, 7, and 11). Thus, even if the recovery of the TTD overpayment had been endorsed in the August 16, 2022, Application for Hearing, the one-year statute of limitations to recover the overpayment would have run.

Claimant's contention that recovery of an overpayment is barred because the Amended FAL closed the issue of overpayment and Respondent did not file a petition to reopen, is without merit. As addressed in *Cooper v. Safeway, Inc*., W.C. 4-539-747 (ICAO Nov. 19, 2003), "[n]othing in § 8-43-303 mandates the filing of a formal petition to reopen in order to confer jurisdiction on an ALJ to determine whether there has been an overpayment. Rather, the filing of a petition to reopen is a procedural mechanism designed to facilitate the process of adjudicating requests to reopen. While courts have held the procedural rules governing the filing of petitions to reopen may be enforced, they have not held such rules erect jurisdictional barriers to adjudicating reopenings where the rules have not been complied with." (Citing *Lewis v. Scientific Supply Co.*, 897 P.2d 905 (Colo. App. 1995)). The failure to file a petition to reopen does not deprive the ALJ of jurisdiction to hear this matter.

Denver v. Indus. Claim Appeals Office 21CA0275 (Colo. App. 2021) does not require a different result. After an admission becomes final, a party may not seek increased or decreased benefits without reopening the proceedings. Respondent, however, is not seeking to either increase or decrease Claimant's benefits. Claimant's benefits, as admitted in the Amended FAL, remain unchanged. The evidence demonstrates Claimant, by no fault of his own, received money in excess of the benefits to which he is entitled. The excess payments are by definition, overpayments, and not "benefits." Thus, the alleged overpayment does not become "final."

As found, Respondent is entitled recover from Claimant the overpayment of PPD benefits in the amount of, $7,804.92.

Repayment

Under § 8-43-303(1), C.R.S., upon a finding of an overpayment, an order of repayment is mandatory. When the parties are unable to agree upon a repayment schedule, the ALJ is empowered, pursuant to § 8-43-207(q), C.R.S., to conduct hearings to "[r]equire repayment of overpayments." The Colorado Court of Appeals held the ALJ has discretion to fashion a remedy with regard to overpayments. *See Simpson v. Indus. Claim Appeals Office*, 219 P.3d 354 (Colo. App. 2009), *rev'd on other grounds Benchmark/Elite, Inc. v. Simpson*, 232 P.3d 777 (Colo. 2010). Further, the ALJ has the authority to determine the terms of repayment and the ALJ's schedule for recoupment will not be disturbed absent an abuse of discretion. *See Louisiana Pacific Corp. v. Smith*, 881 P.2d 456 (Colo. App. 1994).

Claimant credibly testified at hearing that the most he can afford to pay toward an overpayment is $100.00 - $200.00 per month. The ALJ finds that requiring Claimant to make substantial payments would impose a financial hardship. The ALJ concludes Claimant is able to make payments of $100.00 per month without sustaining significant financial hardship.

ORDER

It is therefore ordered that:

1. Claimant received an overpayment of PPD benefits in the amount of, $7,804.92 and Respondent is entitled to repayment of that amount.

2. Claimant shall repay the overpayment at the rate of $100.00 per month, until satisfied.

3. All matters not determined herein are reserved for future determination.

If you are dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

Denver, Colorado, 80203

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. WC 3-707-077-003

ISSUES

1. Did Respondents prove by a preponderance of the evidence that they can terminate the general maintenance medical admission in the Final Admission of Liability (FAL)?

2. Is Claimant entitled to change her authorized treating physician (ATP) to Sander Orent, M.D.?

3. Did Claimant prove by a preponderance of the evidence that numerous, specific medical benefits are reasonable, necessary and related to her July 14, 1983 work injury as maintenance treatment? The specific benefits include:

   a. Pain management and treatment;
   b. Authorization for walk-in tub;
   c. Authorization for the following prescribed medications: folic acid, folate, D#-1000, Movantik, Cynaocobalamin injections, Alprazolam, Toradol, Magnesium oxide, Narcan, Lyriaca, Tizanidine, and Tolterodine;
   d. Authorization for membership at recreational center for water-based exercises;
   e. Evaluation and treatment at National Jewish Health for sleep apnea;
   f. Payment to Dr. Schaeffer for additional EMG testing;
   g. Ongoing botox injections;
   h. Physical therapy;
   i. Payment for treatment at Valley View Hospital October 2021, Sterling Regional Medical Center for December 2021, Pioneer Medical Center October 2021, and Banner Health May 2021; and
   j. Completion of proposed dental implant procedures.

4. Did Claimant prove by a preponderance of the evidence that Respondents have violated § 8-43-404(10)(b), C.R.S.? If so, what penalty, if any, should be ordered?

FINDINGS OF FACT

Based on the evidence presented at hearing, the ALJ makes the following findings of fact:

1. Claimant is a 71 year-old female who suffered an admitted injury on July 14, 1983. The admitted workers' compensation claim is currently on an FAL, dated February 6, 2018, admitting for permanent total disability and maintenance medical benefits. (Ex. OO).

2. Claimant's mechanism of injury, which occurred nearly 40 years ago, involved leaning over to pick up a bottle, and feeling a pain in her lower back when she stood up. Over the last 40 years, Claimant has received extensive medical care that has been approved by Insurer.

3. Claimant was placed at MMI on March 26, 1985, by James Reese, M.D. Dr. Reese diagnosed Claimant with chronic lumbar muscle strain. He provided a two percent partial disability for lumbar spine. (Ex. X).

4. On April 14, 1985, Claimant had a CT scan of her back that reflected a new, moderate, and central left-sided disc bulge at L5-S1. (Ex. X). The claim was reopened, and Claimant was later placed at MMI on September 10, 1991. After failure of vocational rehabilitation, Claimant asserted she was permanently and totally disabled, and this was admitted. (Ex. QQ).

5. Claimant has had numerous surgeries including a L4-5 decompression and fusion in 1988, and a L3-S1 fusion anteriorly and posteriorly in 1993 with a bone growth stimulator. She underwent physical therapy for years. Claimant subsequently began a course of pain management with providers at Denver Pain Management.

6. Claimant had an intrathecal morphine pump from 1994 to 2010. In addition to the intrathecal pump, Claimant received numerous injections, and was prescribed opiates. When the pump was removed, her providers prescribed her Fentanyl and Actiq.

7. In 2013, Shay Bess, M.D. performed a removal of Claimant's posterior segmentation of instrumentation, exploration of fusion mass with confirmed fusion L3-S1, T3 through the sacrum, pelvis posterior spinal fusion, T3-sacrum pelvis posterior segmental instrumentation, posterior pelvic fixation other than sacrum, transforaminal lumbar inner body fusion L2-3 and insertion of inner body implant L2-3. (Ex. A).

8. Kristin Mason, M.D. began treating Claimant on January 25, 2016 and served as her ATP. Dr. Mason specializes in physical medicine and rehabilitation. (Dep. Tr. 4:23-24). She conducted a new patient evaluation, and noted Claimant was initially injured on July 14, 1983, and developed low back pain and decreased capacity to lift. She further noted Claimant's complex medical history including a laminotomy in 1988, cervical and lumbar fusion in 1993, multiple pain pumps, and a long fusion from T3 to sacrum for scoliosis. Claimant's previous physician who managed her chronic pain, lost his medical license. Dr. Mason described Claimant as a "complex long term chronic pain patient." At the first appointment, Dr. Mason discussed her desire to reduce Claimant's medications, and stagger her benzodiazepines and pain medications. (Ex. M)

9. Dr. Mason completed a comprehensive record review on February 18, 2016. She concluded Claimant presented with an exceedingly complex situation with significant chronic multifactorial pain and an extensive procedural history. (Ex. M).

10. Dr. Mason evaluated Claimant on June 27, 2016. She noted Claimant's three falls within a week, and her general increased pain. Dr. Mason opined that Claimant's

"function is a problem but . . . she would not function at all if she did not have pain medications available to her." (Ex. M.).

11. Over the next several years, Dr. Mason regularly evaluated Claimant, and she gradually decreased Claimant's pain medications. Dr. Mason routinely checked the Prescription Drug Monitoring Program (PDMP) to ensure Claimant was not getting medications from other physicians, and Claimant complied with random urine drug screens.

12. In May 2017, Dr. Mason ordered a sleep study for Claimant, and formally referred her to neurosurgeon, Bernard Guiot, M.D., for an evaluation. (Ex. M). Dr. Guiot recommended C4-T4 fusion to treat junctional kyphosis at T4 and a pseudarthrosis at C5-6. Dr. Mason assessed Claimant as having psychologic and physical dependence to opiates for chronic pain, anxiety and sleep apnea. (Ex. M).

13. In November 2017, Claimant and Dr. Mason discussed whether Dr. Mason trusted Claimant. Dr. Mason explained that she did not trust anyone completely with respect to opiates. Dr. Mason told Claimant she did not feel Claimant was addicted, but definitely had ongoing psychologic and physical dependence on the opiates. (Ex. M.).

14. In April 2018, Dr. Mason and Claimant discussed Claimant's planned oral surgery, and subsequent pain management. They discussed the complexity of pain management post-op. (Ex. M). In the summer of 2018, Claimant received her lower implant, and a temporary upper denture. (Ex. M).

15. In February 2019, Claimant was hospitalized for a pulmonary embolus. Dr. Mason saw Claimant on March 25, 2019. She was concerned about the amount of opiates Claimant was taking, particularly given her pulmonary situation. Claimant and Dr. Mason discussed going through an inpatient detoxification program to get her off of her current medication and potentially on something like Suboxone. Claimant was open to the idea. (Ex. M).

16. Kathy McCranie, M.D., is a physician advisor for Insurer. She has worked in this position since 1996. (Vol. I Tr. 126:8-14). On March 26, 2019, Dr. McCranie conducted an Independent Medical Examination (IME) at the request of Insurer. Dr. McCranie is board certified in physical medicine and rehabilitation. (Vol. I. Tr. 40:14-16). Claimant provided Dr. McCranie a summary of her injury and treatment. Dr. McCranie conducted a physical examination of Claimant. She opined that Claimant's mechanism of injury did not cause her cervical issues, so any treatment for Claimant's cervical issues, was not work-related. Dr. McCranie recommended that Claimant transition from physical therapy to an independent exercise program, and continue tapering her opioid medications. (Ex. A).

17. Insurer asked Dr. Mason to review Dr. McCranie's IME. Dr. Mason reviewed the IME, and noted she had been weaning Claimant's medication. With respect to Claimant, Dr. Mason felt that with "a patient with this sort of chronicity, the best means to treat this level of psychologic dependence is likely a structured inpatient program. . . . [Claimant] is

frail enough physically that she would need to do tapering of opioid medications and more specifically the benzodiazepines in an inpatient setting." (Ex. M).

18. At Claimant's April 22, 2019 appointment with Dr. Mason, Claimant expressed her displeasure with the IME report. They discussed Dr. McCranie's recommendation of inpatient detoxification. Claimant was very resistant to this because she felt she had "too many painful procedures coming up to even think about lower amounts of medication." Dr. Mason continued to reduce Claimant's medications. She noted in Claimant's medical record, "I feel fairly strongly that it won't be possible to fully wean her off of the medication as an outpatient, and I have been encouraging a medical detox program for appropriate monitoring, given her medical frailty." (Ex. M)

19. Dr. Mason examined Claimant on May 20, 2019. She noted Claimant was quite angry still about Dr. McCranie's IME, and perseverated on the IME. Dr. Mason discussed inpatient detoxification and transitioning to Suboxone. She told Claimant that her pain levels hovered at 8 or 9 regardless of what medications they tried. Claimant agreed to try weaning down the Oxycodone. (Ex. M).

20. Over the next couple of months, Dr. Mason continued to wean Claimants' medications. Claimant continued to refuse to go to an inpatient detoxification facility. Dr. Mason routinely told Claimant that they could not continue having the same heated discussions regarding tapering her medications. (Ex. M).

21. At Claimant's February 11, 2020 appointment, Dr. Mason suggested Claimant consult with Dr. Gellrick because she may be able to do an outpatient Suboxone transition. Claimant had an appointment scheduled with Dr. Gellrick for some time in March. Claimant, however, ended up hospitalized with bacterial pneumonia, from March 15-19, 2020, so she had to cancel her appointment with Dr. Gellrick. Dr. Mason advised Claimant to reschedule the appointment. (Ex. M).

22. Dr. Mason began having telehealth visits with Claimant due to Covid. At her May 22, 2020 visit, Dr. Mason noted Claimant had not yet rescheduled her appointment with Dr. Gellrick. Claimant looked into inpatient treatment programs, but did not wish to go in that direction. (Ex. M).

23. Throughout 2020 and early 2021, Dr. Mason conducted telehealth visits with Claimant. After being fully vaccinated, Claimant saw Dr. Mason for an in-person appointment on May 3, 2021. Her subsequent appointments, however, were virtual visits.

24. In October 2021, Claimant and her husband went to Meeker, Colorado to go camping with family. Claimant testified they had been camping for a day when she began getting ill. Claimant thought she was developing a urinary tract infection. She was rushed to Pioneer Medical Center (Pioneer), and subsequently airlifted to Valley View Medical Center (Valley View). Claimant testified that she became quite ill, and had no memory for almost two weeks. (Vol. II Tr. 32:3-33:2).

25. Dr. Fauchet contacted Dr. Mason on October 8, 2021, to alert her that Claimant had been airlifted to Valley View with pulmonary emboli, confusion and hypoxemia. Dr.

Fauchet was concerned about the opioids Claimant was taking, so he transitioned her to Suboxone. He gave Claimant a 28-day prescription of Suboxone.

26. Claimant credibly testified she tried to fill the prescription for Suboxone, but Insurer did not authorize the prescription, and she could not afford it. (*Id.* at 33:4-7). She returned to her relatives' house in Meeker. Claimant testified she became sick and went into withdrawals. (*Id*. at 33:4-17). She was transported by ambulance back to Pioneer, and while there, Claimant was given opioids.

27. After Claimant was discharged from Pioneer, she filled prescriptions for Oxycontin and Oxymorphone that Dr. Mason had written previously. (Vol. II Tr. 33:21-34:1).

28. Claimant had a telehealth visit with Dr. Mason on November 1, 2021. Prior to the appointment, Dr. Mason reviewed the PDMP and saw that Claimant filled her previously written prescriptions for Oxymorphone and Oxycontin on October 13, 2021 and October 14, 2021, respectfully. There was no record of Claimant filling her Suboxone prescription, and Claimant never contacted Dr. Mason or Insurer to alert them to the fact she could not fill her Suboxone prescription. Claimant told Dr. Mason that when she was re-hospitalized at Pioneer, they put her back on her usual pain medications. Claimant also told Dr. Mason she did not remember much from either of the hospital stays. Dr. Mason told Claimant she needed to review the medical records from Valley View and Pioneer, but she was seriously considering discharging her as a patient for her failure to communicate. Dr. Mason was unwilling to write any other prescriptions for pain medications until she was able to review the medical records. Dr. Mason offered to facilitate an immediate admission to a medical detoxification facility, but Claimant was not interested. (Ex. M).

29. After reviewing the medical records from Valley View and Pioneer, and after speaking with Claimant, Dr. Mason decided to discharge Claimant from her care. Dr. Mason did not feel Claimant had been honest with her regarding the events in October. Dr. Mason noted Claimant "has been a difficult patient to manage under previous circumstances and I feel at this point that it is dangerous for her to continue on her medications, which is what she would like to do, and I no longer feel comfortable being her treating physician. I did go ahead and write a referral to inpatient detox which is the only care I am willing to offer her further for her safety." This record was copied to Claimant's counsel. (Ex. M).

30. On November 4, 2021, Dr. Mason wrote the following to Claimant: "it is clear that they transitioned you to Suboxone and that is what you were supposed to be on. You instead chose to resume taking your medications and fill[ed] the previously written prescription from me against medical advice. I am therefore formally discharging you from my practice effective November 8, 2021. My only recommendation for you at this point is that you be admitted to an inpatient detoxification facility. Your cardiopulmonary and renal issues may get unsafe for you to continue on opiate pain medication. I have written that referral and we will send it to Pinnacol for authorization." (Ex. M). Dr. Mason did not recommend a specific detoxification facility.

31. The ALJ finds Dr. Mason discharged Claimant from her practice for nonmedical reasons effective November 8, 2021. The ALJ further finds Dr. Mason began recommending an inpatient detoxification program for Claimant as far back as March 2019.

32. [Redacted, hereinafter LJ] is a complex claims representative for Insurer. LJ[Redacted] took over Claimant's claim in February 2019. (Dep. Tr. 4:5-8). LJ[Redacted] received Dr. Mason's November 4, 2021 medical record discharging Claimant as a patient, the letter Dr. Mason sent to Claimant, and the prescription for inpatient detoxification, on November 8, 2021, via fax. None of these documents were sent via certified mail. (Vol. I 190:2-192:9).

33. The ALJ finds Insurer had notice, on November 8, 2021, that Dr. Mason discharged Claimant as a patient.

34. LJ[Redacted] credibly testified that when she received the materials from Dr. Mason, she spoke with the medical case manager assigned to the claim, [Redacted, hereinafter HW]. LJ[Redacted] and HW[Redacted] agreed that inpatient detoxification treatment should be authorized. According to the claim notes, the "clock [was] ticking" before Claimant ran out of her medications. LJ[Redacted] noted it was "going to be VERY VERY difficult" to find a new ATP for Claimant. (Ex. RR).

35. LJ[Redacted] called Claimant's counsel on November 8, 2021, and left a message confirming Insurer would authorize inpatient detoxification, but if Claimant refused to go, they could discuss possibly settling the claim. (Vol. I Tr. 192:5-193:8).

36. The ALJ finds that Insurer notified Claimant, through her counsel, on November 8, 2021, that inpatient detoxification was authorized.

37. Claimant's counsel and LJ[Redacted] exchanged voicemail messages on December 1 and 2, 2021. They finally spoke on December 16, 2021. Claimant's counsel asked if Insurer had found Claimant a new ATP and LJ[Redacted] answered that she had not even tried. When LJ[Redacted] asked whether Claimant was going to inpatient detoxification, Claimant's counsel said she did not want to go. LJ[Redacted] asked Claimant's counsel about Dr. Gellrick, who Dr. Mason noted might be an option to take over Claimant's care. Claimant's counsel told LJ[Redacted] that Dr. Gellrick was likely not an option because she was too far away. (Vol. I Tr. 200:2-23 and Ex. RR).

38. Claimant had previously agreed to see Dr. Gellrick. As found, she had an appointment with Dr. Gellrick in March 2019, but had to cancel because she was hospitalized. Claimant never rescheduled the appointment with Dr. Gellrick. There is no objective evidence in the record that Dr. Gellrick was too far away to serve as Claimant's ATP.

39. On December 28, 2021, Respondents' counsel wrote to Claimant's counsel confirming that Dr. Mason's referral for inpatient medication detoxification was pre-approved, and she provided the contact information for three facilities: Centennial Peaks

Hospital, Detox Center of Colorado, and Rocky Mountain Detox. The direction was to "contact one of the facilities and arrange for [Claimant's] admission." (Ex. 9).

40. LJ[Redacted] testified that she did not contact any of the three facilities listed in the December 28, 2021 letter until January 28, 2022, a month later. LJ[Redacted] testified that she tried contacting the facilities at this time because Claimant was unable to get into any of the facilities listed in the December 28, 2021 letter. (Vol. I Tr. 207:13-25).

41. According to Insurer's records, Rocky Mountain Detox was the only facility, as of December 27, 2021 that had a bed available and would be able to admit Claimant. (Dep. Tr. 18:23-21:5 and 30:3-31:6). LJ[Redacted] credibly testified that the referral to a detoxification facility was an urgent need. (*Id.* at 23:3-7)

42. The ALJ finds that Insurer did not contact any of the detoxification facilities until December 27, 2021, nearly two months ***after*** Dr. Mason discharged Claimant and referred her to inpatient detoxification, which was an urgent need. The ALJ finds that as of December 28, 2021, only one of the facilities listed in the December 28, 2021 letter had been contacted and had a bed for Claimant.

43. On January 6, 2022, Respondents filed a Petition to Terminate Claimant's medical benefits because Claimant refused to submit to inpatient detoxification treatment. (Ex. LL). LJ[Redacted] credibly testified that the intent of filing the Petition was "to get [Claimant] to complete the recommendations that Dr. Mason had – had given her." (Vol. I Tr. 209:1-5).

44. On February 2, 2022, LJ[Redacted] wrote to Claimant re: "**URGENT – Admission scheduled for February 4, 2022."** The letter explained that Insurer had coordinated Claimant's admission to Rocky Mountain Detox, an inpatient detoxification facility. (Ex. RR). LJ[Redacted] testified that Insurer considers Rocky Mountain Detox to be Claimant's ATP. (Dep. Tr. 33:2-6). LJ[Redacted] further testified that she has never spoken with a doctor at Rocky Mountain Detox. (Vol. I Tr. 209:22-25).

45. The ALJ finds that Rocky Mountain Detox is not an appropriate ATP, and Insurer has not provided Claimant with a new ATP since November 8, 2021, when Dr. Mason discharged Claimant from her practice for nonmedical reasons.

46. Claimant never went to Rocky Mountain Detox despite the referral from Dr. Mason and Insurer's authorization. Instead, Claimant eventually ran out of her medications.

47. Claimant testified the last time she had any pain medications was in November 2021. She further testified that her functioning level has decreased since that time, and she goes from her bed to couch and back. She testified she cannot sit for long periods of time because of the pain, and she can no longer cook or clean. (Vol. II. Tr. 30:8-17).

48. Claimant testified that in October 2021, when she was on pain medications, she was not functioning as well as when she had been on higher doses. Claimant testified she lost quite a bit of function when she was taken off of physical therapy, and when her

medication doses were decreased. Claimant could, however, do some cooking and cleaning in October 2021. (Vol. II Tr. 29:13-21).

49. On March 9, 2022, Sander Orent, M.D., virtually evaluated Claimant for purposes of a new patient consultation. Dr. Orent is an expert in occupational and environmental medicine and internal medicine. He testified that Claimant's attorney requested he become Claimant's ATP and take over her care. The virtual evaluation entailed Dr. Orent taking a detailed history from Claimant. He did not review the thousands of pages of medical records nor did he examine Claimant prior to issuing an opinion. (Vol. II, Tr. 55:25-56:18).

50. In rendering his opinion, Dr. Orent relied primarily on the history Claimant provided to him, regardless of its veracity. For example, in his report, Dr. Orent described Claimant's 1988 surgery as a "sham fusion where she was never actually fused. . . . it was discovered that even though [the surgeon] took a piece of her hip bone from her hip, he never actually fused her spine. Apparently, there were incisions made both anterior and posteriorly, but the fusion had never happened." (Ex. 15). There is no evidence in the record Claimant had a "sham fusion" in 1988.

51. Based on his interview of Claimant, Dr. Orent recommended referring her to Dr. Wakeshima, a pain management specialist, to consider the resumption of pain medications. He opined Claimant needed a repeat EMG nerve conduction study and imaging of her T3 area. Dr. Orent also concluded Claimant needed to see an orthopedist and a neurologist. (Ex. 15).

52. On March 30, 2022, Dr. McCranie received additional medical records, and Dr. Orent's report. Insurer asked her to address multiple issues, including, but not limited to, Dr. Orent's recommendations. (Vol. I Tr.126:8-14). Dr. McCranie opined that there was no need for a change in ATP. She reasoned that Dr. Mason recommended inpatient detoxification, but Claimant refused the treatment. Dr. McCranie said "[o]piod management was the only treatment that had been reasonably related to the work injury, however, opioid use is no longer indicated for [Redacted, hereinafter KL]. While an inpatient detoxification program would be work-related, if KL[Readacted] refuses this treatment, she does not require other ongoing work-related treatment." (Ex. A).

53. Dr. McCranie testified that none of the medical care and treatment Claimant received from 1986 to present is related to the admitted injury in 1983. (Vol. I. Tr. 182:14-19). Further, she testified that there is no causal connection between Claimant's use of opiates and her 1983 injury. (*Id.* at 101:8-17).

54. While Dr. McCranie has completed a comprehensive review of Claimant's voluminous medical records, she has only examined Claimant on one occasion, four years ago. The ALJ finds Dr. McCranie's opinion to be credible, but not persuasive.

55. Dr. Orent recommended several referrals and courses of treatment for Claimant. (Ex. 15). Dr. Orent, however, has never physically examined Claimant, and he has only

reviewed limited medical records. (Vol. II Tr. 80:11-13). Based on these facts, the ALJ does not find Dr. Orent's opinion persuasive.

56. The only physician who has extensive personal experience with Claimant is Dr. Mason. She was deposed, and credibly testified Claimant needs ongoing medical care for her July 14, 1983 injury. Dr. Mason further testified she discharged Claimant as a patient because she no longer felt comfortable prescribing medications to her, but felt after Claimant detoxed off of the opiates, she would need some form of medication management. (Dep. Tr. 9:20-10:12). The ALJ finds Dr. Mason's testimony to be credible and persuasive as she is the only physician who actively treated Claimant for a significant amount of time.

57. The ALJ finds that Rocky Mountain Detox is not an appropriate ATP, and Insurer never designated a physician to serve as Claimant's ATP following Dr. Mason's decision to discharge Claimant for nonmedical reasons, effective November 8, 2021.

58. Claimant has not had an ATP since November 8, 2021. The ALJ finds that Claimant needs maintenance medical care. The ALJ further finds that Claimant needs an ATP to examine her and determine what maintenance medical care is needed.

59. The ALJ does not find Dr. Orent's recommendations for Claimant's maintenance medical care to be persuasive as he has not physically examined Claimant, nor has he reviewed her extensive medical records. His opinion is primarily based upon what Claimant reported to him.

60. There is no objective evidence in the record that Claimant sent written notice to Respondents, via certified mail, pursuant to § 8-43-404(10)(b), C.R.S., notifying Respondents that Claimant needed a new ATP. Accordingly, the ALJ finds that Respondents did not violate § 8-43-404(10)(b).

CONCLUSIONS OF LAW

Generally

The purpose of the Workers' Compensation Act of Colorado, § 8-40-101, *et seq*., C.R.S. is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. *See* § 8-40-102(1), C.R.S. Claimant shoulders the burden of proving entitlement to benefits by a preponderance of the evidence. *See* § 8-43-201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 592 P.2d 792 (Colo. 1979). The facts in a workers' compensation case must be interpreted neutrally; neither in favor of the rights of the claimant, nor in favor of the rights of respondents; and a workers' compensation claim shall be decided on the merits. § 8-43-201, C.R.S.

Assessing weight, credibility, and sufficiency of evidence in a Workers' Compensation proceeding is the exclusive domain of the ALJ. *Univ. Park Care Ctr. v.*

Indus. Claim Appeals Office, 43 P.3d 637 (Colo. App. 2001). Even if other evidence in the record may have supported a contrary inference, it is for the ALJ to resolve conflicts in the evidence, make credibility determinations, and draw plausible inferences from the evidence. *Id*. at 641. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *Prudential Insur. Co. v. Cline*, 57 P.2d 1205 (Colo. 1936); *Bodensieck v. Indus. Claim Appeals Office*, 183 P.3d 684 (Colo. App. 2008). The weight and credibility to be assigned expert testimony is a matter within the discretion of the ALJ. *Cordova v. Indus. Claim Appeals Office*, 55 P.3d 186 (Colo. App. 2002). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colo. Springs Motors, Ltd. v. Indus. Comm'n*, 441 P.2d 21 (Colo. 1968).

The ALJ's factual findings concern only evidence and inferences found to be dispositive of the issues involved; the ALJ has not addressed every piece of evidence or every inference that might lead to conflicting conclusions and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Eng'g, Inc. v. Indus. Claim Appeals Office*, 5 P.3d 385 (Colo. App. 2000).

Petition to Terminate Benefits

Respondents seek to withdraw their admission for maintenance medical benefits. Section 8-43-201(1) of the Colorado Revised Statutes states: "the claimant in a workers' compensation claim shall have the burden of proving entitlement to benefits by a preponderance of the evidence;…and a party seeking to modify an issue determined by a general or final admission, a summary order, or a full order shall bear the burden of proof for any such modification." Thus, Respondents must prove by a preponderance of evidence that maintenance medical benefits are not reasonable, necessary, or related to the original work injury in 1983.

As found, Dr. Mason treated Claimant, and served as her ATP from January 25, 2016 until November 8, 2021. When Dr. Mason discharged Claimant as a patient for nonmedical reasons, she recommended medical detoxification treatment, and Insurer authorized the treatment. Dr. Mason had been recommending detoxification treatment since March 2019. Dr. Mason credibly testified she discharged Claimant as a patient because she was not comfortable continuing to prescribe Claimant medications, particularly in light of Claimant's cardiopulmonary and renal issues. Dr. Mason also credibly testified that Claimant would need some form of medication management after she detoxed off of the opiates. As found, Claimant has not had any opiates since November 2021.

Dr. McCranie testified that no maintenance medical care is reasonable, necessary or related to Claimant's injury in 1983. As found, Dr. McCranie evaluated Claimant on one occasion, four years ago, and she completed an extensive record review. While Dr.

McCranie is credible, she does not have the personal experience of treating Claimant that Dr. Mason has. As found, Dr. McCranie's opinion is not persuasive.

The ALJ credits Dr. Mason's opinion and finds that even though Claimant has not had any opioid medications since November 2021, she still needs some form of medication management, and ongoing maintenance medical care. Based on the totality of the evidence, Respondents have not met their burden of proof to support the termination of benefits.

Designation of New ATP and Penalties

As found, Dr. Mason discharged Claimant as a patient, for nonmedical reasons effective November 8, 2021, and referred Claimant to inpatient detoxification treatment. As found, Claimant had notice on November 8, 2021 that Dr. Mason discharged her as a patient, and Insurer authorized inpatient detoxification treatment. LJ[Redacted] credibly testified that inpatient detoxification treatment was ***urgent***. Despite the urgent need for care, none of the parties acted urgently.

LJ[Redacted] credibly testified that as of December 16, 2021, she had not even tried to find a new ATP for Claimant. Insurer was aware that Claimant was going to run out of her medication, and LJ[Redacted] noted it would be difficult to find another ATP to treat Claimant. Dr. Mason suggested that Claimant treat with Dr. Gellrick. There is no evidence in the record, however, that Insurer ever attempted to contact Dr. Gellrick. Insurer takes the position that Rocky Mountain Detox is Claimant's ATP. Insurer had not spoken with a physician at Rocky Mountain Detox, they simply confirmed that a bed was available for Claimant, nearly two months after Dr. Mason discharged Claimant for nonmedical reasons. As found, Respondents did not designate a new ATP for Claimant despite her urgent need for care.

LJ[Redacted] credibly testified she left a voicemail message for Claimant's counsel on November 8, 2021. Claimant's counsel and LJ[Redacted] exchanged voicemail messages on December 1 and 2, 2021, but did not speak until December 16, 2021. There is no objective evidence in the record as to why Claimant's counsel and LJ[Redacted] did not speak until December 16, 2021 – over a month from the date Dr. Mason discharged Claimant from her practice.

As found, Insurer did not have a location, with an available bed, until December 27, 2021. Insurer, however, did not make arrangements for admission to Rocky Mountain Detox until February 4, 2022, nearly four months after Dr. Mason discharged Claimant as a patient. As found, Rocky Mountain Detox is not an appropriate ATP. The ALJ finds that Respondents did not designate a new ATP for Claimant after Dr. Mason discharged her as a patient, even though they knew that Claimant was in urgent need of medical care, and would run out of the medications she had been on for 30 years.

Claimant, however, exacerbated the situation by refusing to go to inpatient detoxification. Claimant knew Dr. Mason had been recommending inpatient detoxification

for years. She also had notice by November 8, 2021, that this treatment was authorized by Insurer.

It is undisputed that Dr. Mason notified Insurer on November 8, 2021, via facsimile, that she was discharging Claimant as a patient. Section 8-43-404(10)(a) of the Colorado Revised Statutes provides that when an ATP "discharges an injured employee from medical care for nonmedical reasons when the injured employee requires medical treatment to cure or relive the effects of the work injury, then the physician shall, within three business days from the refusal or discharge, provide written notice of the refusal or discharge by certified mail, return receipt requested, to the injured employee and the insurer or self-insured employer. The notice must explain the reason for the refusal or discharge and must offer to transfer the injured employee's medical records to any new authorized physician upon receipt of a signed authorization to do so from the injured employee." As found, Dr. Mason discharged Claimant for nonmedical reasons. Claimant provided notice of the discharge to Insurer via facsimile, not certified mail.

Respondents argue that § 8-43-404(10)(a), C.R.S., does not apply because Claimant has no more need for medical treatment that is reasonable, necessary, or related to the admitted work injury. Respondents assert that Claimant failed to follow the one recommendation made by Dr. Mason, her ATP, to go to inpatient detoxification. Respondents rely on the opinion of Dr. McCranie that none of Claimant's medical treatment since 1986 is related to Claimant's work injury. Dr. Mason testified, however, that Claimant would need medical management following the inpatient detoxification. As found, Dr. Mason's opinion with respect to Claimant's need for ongoing medical maintenance is credible and persuasive. Dr. Mason treated Claimant for nearly six years and has the most familiarity with her. The ALJ finds that Claimant continues to require medical maintenance.

It is undisputed that Dr. Mason sent her notice of discharge via facsimile, and not via certified mail. As found, Insurer had notice on November 8, 2021 that Dr. Mason discharged Claimant as a patient and recommended inpatient detoxification treatment. But Claimant's arguments about the application of § 8-43-404(10)(b), C.R.S., and designating Dr. Orent as Claimant's ATP are misplaced. The statute requires that before Claimant can select a new ATP, ***Claimant***, must first notify Respondents of the need for a new physician through written notice sent via certified mail. *See Greenberg v. Mtn. Capital Partners*, W.C. No. 5-095-740-009 (ICAO Sept. 8, 2021). The notice, ***from Claimant***, must include language that the ATP discharged claimant for nonmedical reasons when the claimant requires medical treatment, and that there is no other authorized physician willing to provide medical care. § 8-43-404(10)(b), C.R.S. Insurer, upon receiving such notice, has 15 days to designate a new ATP. If Insurer fails to do this, then the injured employee can select an ATP. Here, there is no objective evidence in the record that Claimant provided such a notice to Insurer to trigger this statute. Claimant has failed to prove by a preponderance of the evidence that Respondents violated § 8-43-404(10)(b), C.R.S. Claimant is not entitled to penalties.

To the extent Claimant wants to designate Dr. Orent as her ATP pursuant to § 8-43-404(5)(a)(VI)(A), C.R.S., there is no evidence in the record that Claimant ever

completed “a form prescribed by the Director” seeking such relief. While Dr. Orent’s March 9, 2022 report was forwarded to Respondents, this is not sufficient to comply with the requirements of § 8-43-404(5)(a)(VI)(A), C.R.S.

As found, Claimant requires maintenance medical treatment. Currently, Claimant does not have an ATP. As found, Dr. Orent’s recommendations regarding medical maintenance are not persuasive because Dr. Orent did not physically examine Claimant, nor did he comprehensively review her medical records. Claimant failed to prove by a preponderance of the evidence that Dr. Orent’s recommended medical treatment is reasonable, necessary and related to Claimant’s admitted work injury.

The Parties are to confer and decide upon a new ATP for Claimant. The designated ATP will personally examine Claimant and make recommendations regarding maintenance medical care.

ORDER

It is therefore ordered that:

1. Respondents are not allowed to withdraw the general admission for maintenance medical care under this claim.

2. Claimant’s request for a change of ATP to Dr. Orent is denied.

3. Claimant’s request for treatment, as set forth in Dr. Orent’s March 9, 2022 report, is denied,

4. The parties are to confer, and within 21 days, designate an ATP to treat Claimant.

5. Claimant’s new ATP will personally examine Claimant and make recommendations regarding medical maintenance treatment.

6. Claimant’s claim for penalties is denied and dismissed.

7. All matters not determined herein are reserved for future determination.

If you are dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED: March 22, 2023

Victoria E. Lovato
Administrative Law Judge
Office of Administrative Courts
1525 Sherman Street, 4th Floor
Denver, Colorado, 80203

ISSUES

I. Whether Claimant proved by a preponderance of the evidence she was injured in the course and scope of her employment with Employer on April 20, 2022.

II. If the claim is found compensable, whether Claimant proved by a preponderance of the evidence she is entitled to medical benefits that are reasonably necessary and related to the injury for Concentra and their referral providers.

STIPULATIONS

The parties stipulated to holding the issues of average weekly wage and temporary disability benefits in abeyance.

The parties further stipulated that Claimant was not requesting payment for unauthorized medical care at Mountain View Pain Specialists.

FINDINGS OF FACT

Based on the evidence presented at hearing, the ALJ enters the following findings of fact:

1. Claimant was employed by Employer as a full time Child Welfare Social Worker and was 41 years old at the time of the hearing. Claimant's job required her to perform personal visits in the community to make assessments for child abuse and neglect. She had been working for Employer since April 2014. She also worked the "after hours" hotline, where a Social Worker would have to respond to emergencies. Her last day working for Employer was July 8, 2022, as she had put in her notice on June 20, 2022 due to the way she had been treated by Employer following the accident. She would generally spend three days a week in the field conducting visits in family homes, in schools or in the community, and two days in the office finalizing her findings in her reports.

2. Claimant had no prior history of neck, mid-back or low back conditions and had no medical treatment. She had not missed worked for any medical conditions prior to the work accident. Neither was she under any restrictions, was not taking any medications and had no problems performing the job duties assigned by Employer.

3. On April 20, 2022 Claimant was within the course and scope of her employment, driving from a home visit, responding to an emergency, when she was stopped at a stop light with her foot on the break, in the southbound lane on Broadway at the Evans intersection. Another motor vehicle rear-ended her vehicle at approximately

11:35 a.m. Claimant did not see the other vehicle before the accident happened. Claimant stated that she had been wearing her seatbelt at the time of the accident. She was also looking towards the right, outside her right drivers' window when the accident occurred. There was some damage to her rear bumper caused by the accident and had to have the damage repaired. Her air bag did not deploy at the time of the accident.

4. Claimant immediately reported her accident on the "ouch line" and requested medical attention as she felt immediate tension and pain following the accident. She injured her neck, mid-back and low back in the accident. She stated she felt immediate tightness in the middle of her neck and pain that started in her mid-back and into her low back. She was referred to Concentra Medical Center for medical care related to the incident. She did not continue onto her next client appointment and did not finish out her work day on the day of her accident. She stated she was seen the same day at Concentra, they provided Tylenol and a muscle relaxer that helped with the back pain. They also prescribed physical therapy, which worsened her condition, and they placed her on restrictions of four hours, desk duty only. She was not able to perform her regular job because that required her to be out in the community making visits.

5. Claimant was forced to use her personal time off because workers' compensation was not paying for the part time work lost wages. Further, after several weeks of treatment with the Concentra providers, she had to resort to seeing medical providers at Mountain View Pain Specialists for chiropractic treatment, dry needling and physical therapy. She also developed hip pain radiating from the low back, post concussive symptoms, memory loss, headaches and brain fog following the accident of April 20, 2022.

6. Claimant contacted Denver Health initially and a triage report was issued on April 20, 2022 at 12:30 p.m. Claimant reported she was sitting at a stop light when a car hit her from behind. She reported middle to lower back pain and neck pain when turning from side to side. She further reported mid-back pain into the bilateral hips and mid back pain with movement. Claimant was instructed to immediately be seen due to back and neck pain after motor vehicle accident (MVA). The report noted that Claimant chose to be seen at Concentra South.

7. Claimant was seen at Concentra by Stephen Danahey, M.D., on April 20, 2022. He documented Claimant's history of sitting at a red light and that the car behind her rear-ended her car with onset of middle to lower back pain with moderate neck pain when she would turn her head from side to side. He documented physical examination findings of muscular tenderness and did not note any cervical or lumbar radicular signs or symptoms. He noted tenderness present in the cervical spine at the right trapezius muscle and left trapezius muscles, tenderness in the level T1-T12 of the thoracic spine and at the L1-L5 levels of the lumbar spine. Dr. Danahey concluded that Claimant had sustained a bilateral trapezius muscular strain as well as a strain of the thoracic spine and lumbar spine regions. He recommended medication including acetaminophen and cyclobenzaprine. He also recommended initiation of physical therapy. Dr. Danahey noted that objective findings were consistent with the work related mechanism of injury.

8. Claimant started with physical therapy immediately at Concentra with Bethany Lubacz on April 20, 2022, including cold packs to the cervical spine and

therapeutic exercises. She recommended claimant be seen three times a week for two weeks.

9. Claimant returned to Dr. Danahey on April 25, 2022 who noted a similar focal exam as previously and assessed both cervical and lumbar strains, providing Claimant with limitations of sedentary work of no more than 4 hours a day. He noted that X-rays of the cervical spine were normal.

10. On May 2, 2022 Respondent file a Notice of Contest.

11. Claimant then transferred to physical therapy with Ron Reznichky. On May 4, 2022 Mr. Reznichky documented that Claimant stated she went to her private PCP to get help. She was instructed to continue physical therapy and was educated on expectations following a whiplash injury. Claimant reported she was becoming impatient with how long it was taking for her cervical pain to resolve. She also was experiencing increased frequency of headaches. He noted she was progressing slower than expected, though was demonstrating significantly improved ROM of cervical spine, with continued to complains of left sided pain. He noted she was educated on prognosis of whiplash injury following MVA and how it different recovery was from person to person. She was reassured that she was healing and heading in the right direction.

12. On May 12, 2022 Mr. Reznichky noted that Claimant was progressing slower than expected and was questioning the plan of care (POC) involving progressive loading of core musculature and progressing in functional activities. Mr. Reznichky noted that she was frustrated with delayed healing. He documented that most pain was with end range of motion and that Claimant had a hyper-lordotic posture with pain across the lumbosacral junction. He recommended Claimant continue with the therapy treatment plan.

13. Claimant was evaluated by Physician Assistant Felicia Turner on May 13, 2022. Ms. Turner documented Claimant's report of moderate discomfort to her neck, thoracic back and lower back. On examination of the cervical spine, there were findings of tenderness in the C7 region as well as in the right-sided trapezius and left-sided trapezius musculature of the cervical spine. In the lumbar spine, there were findings of tenderness in the L4 through S1 region with mild motion limitations in all planes of motion. Ms. Turner recommended further diagnostic evaluation to include MRI scans of Claimant's cervical and lumbar spine regions. She noted that objective findings were consistent with her work related mechanism of injury.

14. Claimant was seen at Stanley Lake Massage Therapy on May 19, 2022 with a history consistent with her testimony. She presented with moderate tenderness of the lumbar spine with moderate palpation, tender in the iliocostal muscles of the right greater than the left, tenderness in the bilateral piriformis and quadratus femoris.

15. A lumbar spine MRI was done on May 20, 2022, and was interpreted by Eduardo Seda, M.D. Dr. Seda described mild bilateral degenerative joint changes at the L5-S1 level. In particular, Dr. Seda noted that at L5-S1, there were mild bilateral findings of joint hypertrophy with small joint effusions.

16. Records from Mountain View Pain Center included records from Jonathan Edelman, FNP-C starting on May 17, 2022. Claimant reported a MVA on April 20, 2022,

and subsequently developed onset post-concussive symptoms of brain-fog and memory loss, headaches, cervical pain radiating into her left shoulder, thoracic pain, and lumbar pain radiating to her hips. Claimant reported her headaches occurred from prolonged sitting, and that her head felt heavy on her shoulders which triggered the headaches she was having up to 5 times a week. Her cervical pain extended down into her left shoulder, her thoracic pain was diffuse and sore, and her lumbar pain was her most bothersome complaint, a sharp pain that was felt with prolonged sitting and standing, and was disturbing her sleep. Nurse Edelman noted tenderness on palpation of the cervical spine, cervical paraspinals on the left and right, thoracic spine and lumbar spine. He also found on testing that Claimant had bilateral positive straight leg tests, and facet loading tests but negative FABERs on the left and positive on the right. He recommended a multi-modal treatment approach of chiropractic care, physical therapy and massage therapy.

17. Chiropractic records authored by Kimberlea Stonewerth, D.C. of Mountain View Pain Center showed treatment was initiated on May 20, 2022 and physical therapy was initiated as well and continued with Nicole Uncapher. When Claimant initiated this treatment, her pain levels in her spine was in the range of 8-9/10 as documented by Dr. Stonewerth.

18. PA Turner noted on June 2, 2022 that Claimant continued to have neck and back pain. She stated that Claimant had not had her cervical MRI due to anxiety so she prescribed a tablet of lorazepam to take when she went in for the MRI. On exam, she documented a normal exam except for tenderness in the C7 cervical spine level, and right trapezius muscle and left trapezius muscle, with mild limitation of motion to the right and left. She noted tenderness present at the L4-S1 of the lumbar spine with mild limitations of motion in all planes. She recommended restrictions of no driving, working only 4 hours per day and to change positions often. She referred Claimant for a physiatry evaluation.

19. The MRI of the cervical spine was completed on June 4, 2022 and read by Michael Kershen, M.D. He noted findings of mild multilevel degenerative changes with associated mild to moderate spinal stenosis and no more than mild neural foraminal stenosis.

20. On June 15, 2022 John Aschberger, M.D., a physical medicine and rehabilitation specialist (physiatrist) evaluated Claimant pursuant to Ms. Turner’s referral. He documented the history of the MVA, Claimant's course of care and persistence of both cervical and lumbar spine symptoms. On examination, he found Claimant's cervical spine was tight with right lateral flexion pulling at the left trapezius and that Spurling's maneuver was negative for any radiated symptoms. Dr. Aschberger documented muscular tightness involving the left trapezius musculature with a trigger point at the infraspinatus without radiation. He noted no tenderness in the midline thoracic spine. In the lumbar spine, Dr. Aschberger documented physical examination findings of mild increases in irritation at the right low back with facet loading but negative on the left side. Dr. Aschberger documented that there were no radicular signs or symptoms and he concluded that elements of the lumbar spine examination suggested potential irritation at the right sacral sulcus and involving the facet joints. Dr. Aschberger endorsed a continuing course of chiropractic care along with a core stability program. He noted that anti-inflammatory medications would be reasonable though would have to be monitored

due to her hypertension. He recommended that Claimant continue in this course of care and that if she did not make gains, "she is a candidate to consider corticosteroid injection at the lower lumbar facet and sacroiliac area."

21. On June 17, 2022 Claimant was evaluated by PA Turner of Concentra who continued to document that Claimant reported back and neck pain, though improving neck pain. Ms. Turner noted that massage therapy was helping and that the treatment of chiropractic care and physical therapy she had obtained on her own were helping. She noted that Dr. Aschberger had agreed chiropractic care and occupational therapy would be beneficial. PA Turner noted she would place the referrals that day.[1]

22. Under the review of systems, PA Turner listed Claimant's continuing joint pain, back pain, neck pain, joint swelling, joint stiffness and night pain. On exam she noted tenderness in the C7 level of the cervical spine, right and left trapezius muscles, and slow lateral rotation. Ms. Turner noted tenderness present in the lumbar spine but palpation was normal with mild limitations for ROM but otherwise an unremarkable exam. She continued to assess cervical strain, lumbar strain, thoracic spine strain, and bilateral trapezius strain.

23. PA Turner made a referral for chiropractic care and another for physical therapy, recommending the providers at Mountain View Pain. Lastly, she referred Claimant for further massage therapy and noted that objective findings were consistent with history and/or work-related mechanism of injury. She emphasized that Claimant was working modified duty but that she would advance from 4 hours to 8 hours a day but no work related driving and to change positions often, noting Claimant was not at maximum medical improvement (MMI).

24. Claimant was evaluated by Taylor Robertson, PA-C at Mountain View Pain Specialists on June 20, 2022. PA Robertson noted Claimant's cervical pain was primarily axial in nature and extended into the left and right shoulder, described as a dull intermittent ache. Claimant's thoracic pain was also axial in nature and intermittent. Claimant's lumbar pain was a constant dull ache, axial in nature and extended into her hips bilaterally. He diagnosed cervicalgia, lumbar degenerative disc disease, other low back pain, muscle spasms of neck, and thoracic back pain and muscle spasm. PA Robertson noted that Claimant had multilevel disc bulges in the cervical spine. PA Robertson recommended a trial of cervical trigger point injections (TPIs) and if she did not respond to continued conservative therapies would recommend reconsideration for cervical epidural steroid injections (ESI). She also recommended TPIs of the lumbar paraspinals and glutes.

25. Claimant was reassessed at Concentra by Nancy Strain, D.O. on July 8, 2022 through a telemedicine visit. Dr. Strain documented Claimant's report that she had improvement in neck and back pain in the course of her care at Mountain View Pain and that massage therapy was also helping. She provided updated work restrictions of up to an 8 hour day but still no work related driving and should change positions often. She recommended a continuing course of care and noted that she would make the appropriate referrals. She noted that diagnosis continued to be cervical, thoracic and lumbar strains

[1] The specific referrals were not in evidence.

as well as bilateral trapezius strains. She noted that objective findings were consistent with the history and work related mechanism of injury.

26. Dr. Danahey, Dr. Aschberger and Dr. Strain as well as PA Turner all concluded that Claimant's objective findings were consistent with her work related mechanism of injury of April 20, 2022.

27. At some point in time, an Accident Information form was completed with the Colorado Department of Revenue, Division of Motor Vehicles.

28. Multiple photos of Claimant's vehicle were taken at some point in time as well, showing slight damage to the rear bumper, which was repaired for $2,772.54.

29. Allison Fall, M.D. conducted an Independent Medical Examination (IME) of Claimant on September 8, 2022. Dr. Fall obtained a history of the mechanism of the accident consistent with Claimant's testimony and a history of the medical treatment, including that she was initially seen a Concentra and prescribed physical therapy, which she believed was worsening her symptoms, which was later stopped and changed to a medical massage treatment. Claimant later found another pain management practice were she was prescribed chiropractic care and dry needling, which helped improve her symptoms. Claimant listed low back, neck, left shoulder and mid back pain symptoms and denied that she had any prior conditions.

30. Dr. Fall described Claimant as a well-developed, well-nourished, obese female that was short in her answers and had a somewhat defensive manner and flat affect. Her examination of Claimant was within normal limits with diffuse tenderness along the entire spine from cervical to lumbar midline spine and a pulling sensation of the cervical spine with flexion. Dr. Fall opined that Claimant did not sustain an injury on April 20, 2022. She stated that if Claimant "did sustain an injury which at most would have been a mild muscular strain which would resolve without treatment with the passage of time, then she would be at maximum medical improvement with zero impairment."

31. On October 11, 2022 Appaji Panchangam, Ph.D. prepared a 58 page Vehicle Accident Reconstruction and Biomechanical Analysis at Respondent's request regarding the April 20, 2022 MVA. He noted that **"**Rimkus was retained to reconstruct the accident to determine the dynamics of the Lincoln and to evaluate the motions, forces, and mechanisms sustained by the driver of the Lincoln in relation to the injuries claimed by" Claimant. After analyzing all the data provided, including the photographs, the vehicle history, the CDR[2] report, the forces and speed of the impact as well the impact on the body, Dr. Panchangam concluded that Claimant's vehicle sustained a forward-directed speed change (delta-V) of less than 5 miles per hour (mph) due to the rear end impact, that transient cervical muscle strains, although unlikely, could not be ruled out but that lumbar muscle strains was unlikely from the mechanics of the accident. He noted that Claimant's bodily movements would have been well within physiological limits. Therefore, intervertebral disc herniations, spinal sprains, and upper-extremity sprains were not consistent with resulting dynamics of the accident. He opined that the loads that the cervical spinal tissues of the driver would have undergone would be within levels that

[2] CDR stands for Crash Data Retrieval and includes a program to retrieve the electronic crash information or non-impact information from a vehicle. It is a program provided by [Redacted, hereinafter BL].

these tissues would undergo during routine activities of daily living in which tissue damage was reasonably not expected. He noted that the mechanism for acute intervertebral disc herniations, in the absence of bony fractures or ligament tears, is combined hyperflexion and compression and that there were no mechanisms from accident that could account for structural injuries to Claimant's cervical spine or lumbar spine or to result in degenerative changes to those anatomic regions. He further concluded that Claimant's head accelerations in the subject accident were far below the accelerations associated with mild traumatic brain injury (mTBI) or concussion and the accident did not present a mechanism for asymmetric loading or meaningful internal motion that could cause a hip strain. He highlighted a study of multiple test subjects that were advised they had been in a MVA but were only subjected to a simulation with negligible force and reported subsequent symptoms, without a trigger, concluding that it was possible that Claimant fell within this category.

32. John Hughes, M.D. conducted an IME at Claimant's request on November 23, 2022. Dr. Hughes took a history and reviewed the medical records available. He noted that Claimant related she continued to be symptomatic. Her pain diagram outlined dorsal spinal pain across the back of her cervical spine and lumbar spine. She reported neck pain was "aching… it comes and goes" and had a magnitude of severity of 1/10. She noted that she was given a water pillow prescription by her clinicians that had been quite helpful for her neck pain. With respect to low back pain, Claimant noted she had an aching quality and made it difficult to get back into a normal routine as she sustained "setbacks." She noted a magnitude of pain of 4/10 for the lumbar spine.

33. On exam Dr. Hughes found hypertonicity in the bilateral posterior trapezius, a slight difference in lateral cervical spine range of motion. He noted bilateral erector spinae hypertonicity in the lumbar spine that releases well with walking in place and a negative straight leg test. Dr. Hughes assessed cervical spine sprain/strain, ("nearly resolved over a course of physical and chiropractic treatment"), with some residual left-sided posterior trapezius hypertonicity that measurably decreases right lateral flexion of the cervical spine, and lumbar spine sprain/strain with residual right-sided lumbar facet joint arthropathy, meriting additional treatment as recommended by Dr. Aschberger in his report of June 15, 2022. Following review of Dr. Panchangam's report, he noted from Claimant's physical examination that she had findings consistent with those noted by Dr. Aschberger on June 15, 2022. He concluded that when he performed his examination, he had not yet reviewed Dr. Aschberger's report, and it appeared they had concordant clinical findings supporting consistency of Claimant's injuries, which meant that these findings are more likely than not stemming from objective pathologies; and in his opinion that they stemmed from the motor vehicle collision of April 20, 2022.

34. Dr. Hughes went to on to state as follows:

> In the cervical spine, consistency is noted in reduced right lateral flexion of the cervical spine consistent with that noted by Dr. Aschberger on June 15, 2022 in conjunction with left-sided trapezius hypertonicity. Consistency is also noted in the lumbar spine with reduced right lateral flexion noted today at 14 degrees with positive right-sided facet loading findings also noted by Dr. Aschberger on June 15, 2022.

> [Claimant] underwent lumbar spine MRI scan evaluation on May 20, 2022. This was done one month after the motor vehicle collision. As noted by Dr. Seda; "at L5-S1, there were mild bilateral findings of joint hypertrophy with small joint effusions." These joint effusions are probably traumatic in etiology and consistent with [Claimant]'s current clinical findings of facet joint arthritis.
>
> It is my opinion that [Claimant] is not yet at maximum medical improvement (MMI). She should continue in treatment essentially as recommended by Dr. Aschberger in his report of June 15, 2022. [Claimant] may be a candidate for interventional spine care directed to her right-sided lumbar spine facet joint pathology. This treatment was also suggested by Dr. Aschberger in his report of June 15, 2022. Given the information currently available to me, it appears probable that [Claimant] will completely resolve her cervical spine injuries. She really has minimal objective pathology in the cervical spine and subjectively, she notes pain that "comes and goes" and has a magnitude today of 1/10.
>
> In contrast, [Claimant]'s lumbar spine has been more problematic. She notes decreases in pain levels from 8-9/10 down to 4/10; however, findings noted by Dr. Aschberger on June 15, 2022 have persisted. I believe her lumbar spine will require additional prescriptive medical care in accordance with the Colorado Division of Worker's Compensation Lumbar Spine Medical Treatment Guidelines.
>
> I do agree with Dr. Panchangam that [Claimant] was involved in a low energy motor vehicle collision. I disagree with him that [Claimant] could not have sustained injuries as a result of this collision. It seems clear to me and all of [Claimant]'s attending medical providers that she has sustained injuries meriting medical treatment. It is also clear that [Claimant] is responding positively to medical treatment rendered to date.

Ultimately, Dr. Hughes opined that Claimant sustained cervical and lumbar spine injuries on April 20, 2022, that the medical evaluations and treatment to date all appeared to be reasonable, necessary and related to this particular work-related motor vehicle collision, that she was not at MMI and should continue in treatment as had been recommended by Dr. Aschberger on June 15, 2022.

35. Dr. Panchangam testified at hearing as an expert in biomechanical and biomedical engineering and vehicle accident reconstruction. He reviewed information provided including the inspection of the vehicle and analyzed the information to extrapolate and determine the severity of the accident as it related to the parameters of the vehicle, how the conditions would have affected a typical driver in the Lincoln that Claimant was driving, and, finally, assessing whether the Claimant's diagnosed injuries were consistent with what would be expected with the typical driver in that particular setting.

36. Dr. Panchangam obtained information for similar accidents and damage to comparable vehicles from the National Highway Traffic Safety Administration and obtained the information from the Claimant's damaged vehicle control module or EDR[3], which recorded no events as it did not meet the threshold requirements of 5 miles per

[3] EDR stands for "event data recorder" and is also known as an ACM (Association for Computing Machinery), which measures the severity of a crash and determines whether or not to deploy airbags or safety devices or seat belt pretensioners.

hour. He concluded that Claimant's vehicle was not going faster than 5 miles per hour following the impact from being stationary. Dr. Panchangam also analyzed the structure of the bumper and the force that was absorbed by the bumper structures to calculate the Delta V, the velocity, to increase the accuracy of the final conclusion. He had little information regarding the damage to the vehicle that hit the Lincoln other than it was drivable following the accident.

37. Once Dr. Panchangam analyzed the severity of the accident, he turned to the bio-mechanics to deduce how the body of the driver in the Lincoln would move upon impact. He explained that upon impact the body, including the torso and the neck, would compress into the seat back and head rest for about 150 milliseconds, then rebound forward proportionally to the force impacting the vehicle. He stated that the force backwards and the subsequent force forward is minimized by activation of the neck muscles, which could cause whiplash and stretch the muscle tissue. In his opinion, this did not occur to Claimant. He further stated that the sheering force of the impact to the spine was not significant enough to cause the Claimant's cervical spine injuries. He further opined, based on the analysis of the data, that there would be a very remote possibility of a concussion or mild traumatic brain injury caused by the MVA. Lastly, he stated that the compression forces to the back is minimal both in backward motion into the contoured seat and forward at the speed the vehicle was moving upon impact.

38. Dr. Panchangam deferred to Claimant's providers with regard to the diagnosis of lumbar and cervical strains caused by the MVA. He stated that patients know when they have pain and know when to seek treatment and care. He also stated that he would defer to a physician to diagnose what the patient was suffering from, what the cause of the particular injury that was causing the symptoms as well as what treatment needed to be provided.

39. Allison Fall, M.D. testified on behalf of Respondent as an expert Level II accredited physician and expert in physical medicine and rehabilitation. She reviewed the available medical records, took a history from Claimant and from the intake Claimant completed. Claimant reported the accident consistent with her hearing testimony and the medical records from her initial visit at Concentra. She conducted a physical examination of the cervical spine and lumbar spine, including palpating the muscles, looking at range of motion, and asking about her symptoms. Claimant complained of pain along the midline of the cervical spine and pain right in the center of her low back. The side to side bending showed some restrictions but did not increase Claimant's symptoms. In general, Dr. Fall stated that all provocative maneuvers were negative and her neurological examination of the arms and legs were normal.

40. Dr. Fall stated that she looked at the facts when making her causation analysis, including mechanism of the injury, whether it was biologically plausible that the mechanism of injury led to the documented diagnosis, looking at the records, seeing what the other providers had found on their examinations, what the imaging had shown, how Claimant responded to treatments, looking at psycho-social factors that may be playing a role and then, history taking and examination in reaching her conclusion

41. Further, Dr. Fall stated that she reached the same conclusions as Dr. Panchangam without having the benefit of the calculation of forces or the lack of a

recorded event on the vehicle control module, that it was unlikely that there were any musculoskeletal injuries sustained as a result of the MVA but even if there had been, they would have been mild muscular strains. Dr. Fall stated that neck strains and trapezius strains were consistent with rear-end MVAs though lumbar spine strains were not typical. She noted that she was familiar with Dr. Danahey as she had previously practiced with him. She noted that Dr. Danahey had diagnosed multiple strains including the thoracic and lumbar spine strain, prescribed medications and physical therapy, which were reasonable treatments considering Claimant's reported symptoms and believed Dr. Danahey treated Claimant appropriately on April 20, 2022, following the MVA. She had also practiced with Dr. Aschberger for over 20 years in the same specialty. While she believed that the treatment provided and offered by Dr. Aschberger was controversial, it was appropriate given Claimant's ongoing complaints. Dr. Fall conceded that there were no facts or medical records indicating that Claimant had any preexisting conditions related to her neck and back.

42. As found, Claimant was within the course and scope of her employment when she was involved in a low impact motor vehicle accident on April 20, 2022 while returning from a home visit. As found, Claimant credibly testified that she was injured as a consequence of the accident, injuring her neck, bilateral trapezius areas and low back as a consequence of the work related accident. This is supported by the medical records of the authorized treating providers from Concentra, including Dr. Aschberger, Dr. Danahey, Dr. Stain, PA Ron Reznichky and PA Turner. It is further supported by the records of providers at Mountain View Pain Specialists. These listed providers were more credible and persuasive than the contrary opinion of Dr. Fall.

43. While Dr. Panchangam clearly explained his theory regarding the probability of injury during this type of MVA, it is also clear that Claimant was the exception to his scenario as she injured both her cervical spine and lumbar spine, despite the failure of the control module or EDR to record the accident. While this ALJ agrees that the accident was not a significantly violent accident, it was sufficient to injure Claimant, who was asymptomatic prior to the MVA and injury.

44. As found, Claimant reported the injuries to Employer immediately and was seen immediately at Concentra after she contacted Employer's "Ouch" line and was directed to Concentra. Dr. Hughes was also persuasive in his opinion that Claimant sustained cervical and lumbar spine injuries on April 20, 2022, that the medical evaluations and treatment to date were reasonable, necessary and related to this particular work-related motor vehicle collision, that Claimant was not at MMI and should continue in treatment essentially as had been recommended by Dr. Aschberger on June 15, 2022

45. Testimony and evidence inconsistent with the above findings is either not credible and/or not persuasive.

CONCLUSIONS OF LAW

A. Generally

The purpose of the "Workers' Compensation Act of Colorado" is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of any litigation. Section 8-40-102(1), C.R.S. (2021). The facts in a Workers' Compensation case are not interpreted liberally in favor of either the rights of the injured worker or the rights of the employer. Section 8-43-201, *supra*. A Workers' Compensation case is decided on its merits. Section 8-43-201, *supra*.

The ALJ's factual findings concern only evidence that is dispositive of the issues involved. This decision does not specifically address every item contained in the record and the ALJ has not addressed every piece of evidence that might lead to a conflicting conclusion. The ALJ has specifically rejected evidence contrary to the above findings as not credible or unpersuasive. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office*, 5 P.3d 385 (Colo. App. 2000). In general, the claimant has the burden of proving entitlement to benefits by a preponderance of the evidence, including the causal relationship between the work related injury and the medical condition for which Claimant is seeking benefits. Sec. 8-43- 201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not, *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979). Claimant is not required to prove causation by medical certainty. Rather it is sufficient if the claimant presents evidence of circumstances indicating with reasonable probability that the condition for which they seeks medical treatment resulted from or was precipitated by the industrial injury, so that the ALJ may infer a causal relationship between the injury and need for treatment. See *Industrial Commission v. Riley*, 165 Colo. 586, 441 P.2d 3 (1968).

In deciding whether a party has met the burden of proof, the ALJ is empowered "to resolve conflicts in the evidence, make credibility determinations, determine the weight to be accorded to expert testimony, and draw plausible inferences from the evidence." See *Bodensieck v. ICAO*, 183 P.3d 684 (Colo. App. 2008). The ALJ determines the credibility of the witnesses. *Arenas v. ICAO*, 8 P.3d 558 (Colo. App. 2000). Assessing weight, credibility and sufficiency of evidence in a workers' compensation proceeding is the exclusive domain of administrative law judge. *University Park Care Center v. Industrial Claim Appeals Office*, 43, P.3d 637 (Colo. App. 2001). The weight and credibility assigned to evidence is a matter within the discretion of the ALJ. *Cordova v. ICAO*, 55 P.3d 186 (Colo. App. 2002). The same principles for credibility determinations that apply to lay witnesses apply to expert witnesses as well. See *Burnham v. Grant*, 24 Colo. App. 131, 134 P. 254 (1913); see also *Heinicke v. ICAO*, 197 P.3d 220 (Colo. App. 2008). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colorado Springs Motors, Ltd. v. Industrial Commission*, 441, P.2d 21 (Colo. 1968).

The fact finder should consider, among other things, the consistency, or inconsistency of the witness's testimony and actions, the reasonableness, or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness, whether the testimony has been contradicted, and bias, prejudice, or interest. See *Prudential Ins. Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); *Kroupa v. Industrial Claim Appeals Office*, 53 P.3d 1192 (Colo. App. 2002). A workers' compensation case is decided on its merits. Sec. 8-43-201, C.R.S.

B. Compensability

To receive compensation or medical benefits, a claimant must prove they are a covered employee who suffered an injury arising out of and in the course of employment. Section 8-41-301(1); *Faulkner v. Industrial Claim Appeals Office*, 12 P.3d 844 (Colo. App. 2000). The claimant must also prove by a preponderance of the evidence that the injury or occupational disease was proximately caused by the performance of such service. Section 8-41-301(1)(b) & (c), C.R.S. The question of whether the claimant met the burden of proof is one of fact for determination by the ALJ. *City of Boulder v. Streeb*, 706 P.2d 786 (Colo. 1985).

An "accident" is defined under the Act as an "unforeseen event occurring without the will or design of the person whose mere act causes it; an unexpected, unusual or undersigned occurrence." Section 8-40-201(1), C.R.S. In contrast, an "injury" refers to the physical trauma caused by the accident and includes disability. *City of Boulder v. Payne*, 162 Colo. 345, 426 P.2d 194 (1967); *see also*, §8-40-201(2). Consequently, a "compensable" injury is one which requires medical treatment or causes disability. *Id*.; *Aragon v. CHIMR, et al.*, W.C. No. 4-543-782 (ICAO Sept. 24, 2004). No benefits are payable unless the accident results in a compensable "injury." § 8-41-301, C.R.S.

There is no presumption that injuries which occur in the course of a worker's employment arise out of the employment. *Finn v. Industrial Commission*, 165 Colo. 106, 437 P.2d 542 (1968). Rather, it is the claimant's burden to prove by a preponderance of the evidence that there is a direct causal relationship between the employment and the injuries. Section 8-43-201, C.R.S.; *Ramsdell v, Horn*, 781 P.2d 150 (Colo. App. 1989). The determination of whether there is a sufficient nexus or causal relationship between a Claimant's employment and the injury is one of fact and one that the ALJ must determine based on the totality of the circumstances. *In Re Question Submitted by the United States Court of Appeals,* 759 P.2d 17 (Colo. 1988); *Moorhead Machinery & Boiler Co. v. Del Valle*, 934 P.2d 861 (Colo. App. 1996).

The existence of a preexisting medical condition does not preclude the employee from suffering a compensable injury where the industrial aggravation is the proximate cause of the disability or need for treatment. *See H & H Warehouse v. Vicory*, 805 P.2d 1167 (Colo. App. 1990); *see also Subsequent Injury Fund v. Thompson*, 793 P.2d 576 (Colo. App. 1990). A work related injury is compensable if it "aggravates accelerates or combines with "a preexisting disease or infirmity to produce disability or need for treatment. *See H & H Warehouse v. Vicory, supra.* If a direct causal relationship exists between the mechanism of injury and resultant disability, the injury is compensable if it caused a preexisting condition to become disabling. *Duncan v. Industrial Claim Apps. Office*, 107 P.3d 999 (Colo. App. 2004). However, there must be some affirmative causal connection beyond a mere assumption that the asserted mechanism of injury was sufficient to have caused an aggravation. *Brown v. Industrial Commission*, 447 P.2d 694 (Colo. 1968). It is not sufficient to show that the asserted mechanism could have caused an aggravation, but rather Claimant must show that it is more likely than not that the mechanism of injury did, in fact, cause an aggravation. *Id*. Further, when a claimant experiences symptoms while at work, it is for the ALJ to determine whether a subsequent

need for medical treatment was caused by an industrial aggravation of the pre-existing condition or by the natural progression of the pre-existing condition. *In re Cotts,* W.C. No. 4-606-563 (ICAP, Aug. 18, 2005).

Pain is a typical symptom from the aggravation of a pre-existing condition, and if the pain triggers the claimant's need for medical treatment, the claimant has suffered a compensable injury. *Merriman v. Industrial Commission*, 210 P.2d 448 (Colo. 1949); *Dietrich v. Estes Express Lines*, W.C. No. 4-921-616-03 (September 9, 2016). But the mere fact that a claimant experiences symptoms at work does not necessarily mean the employment aggravated or accelerated the pre-existing condition. *Finn v. Industrial Commission*, 437 P.2d 542 (Colo. 1968); *Cotts v. Exempla*, W.C. No. 4-606-563 (August 18, 2005). Rather, the ALJ must determine whether the need for treatment was the proximate result of an industrial aggravation or is merely the direct and natural consequence of the pre-existing condition. *F.R. Orr Const. v. Rinta,* 717 P.2d 965 (Colo. App. 1985); *Carlson v. Joslins Dry Goods Company*, W.C. No. 4-177-843 (March 31, 2000).

Claimant was within course of her employment as she was engaged in performing her duties as a Child Welfare Worker for Employer, returning from an assignment visiting a family on April 20, 2022 when the motor vehicle accident occurred. This job required Claimant to drive from location to location visiting family and community members regarding the families she was investigating. While in the course of performing those duties, Claimant was rear-ended by another vehicle. While the motor vehicle accident was not specifically violent, as found, it was sufficient to cause injuries to Claimant's cervical spine and low back as described by her treating providers at Concentra as well as Dr. Hughes. Claimant credibly testified that prior to the April 20, 2022 work related accident, she had no medical problems involving her cervical and lumbar spine. She reported her injuries immediately to her Employer, she was sent to Concentra and attended by Concentra, who diagnosed cervical, thoracic and lumbar spine injuries. Dr. Hughes was more credible than Dr. Fall. Dr. Hughes reviewed Dr. Fall and Dr. Panchangam reports and opined that the MVA of April 20, 2022 was the cause of Claimant's cervical and lumbar spine injuries. Claimant credibly testified that she had not preexisting symptoms prior to the April 20, 2022 work-related accident, despite the MRIs showing degenerative changes. As found, those asymptomatic degenerative changes were aggravated by the MVA of April 20, 2022. Claimant proved that she was within the course and scope of her employment with Employer on April 20, 2022 when she incurred injuries which were proximately caused by the MVA and for which she required medical attention, including treatment, specifically causing disability as Claimant was limited in her employment immediately following the work-related injuries. From the totality of the evidence, Claimant has shown by a preponderance of the evidence that the injuries to her lumbar spine, cervical spine and thoracic spine were more likely than not caused by her work related accident of April 20, 2022.

C. Medical benefits

Respondents are liable for authorized medical treatment reasonably necessary to cure and relieve an employee from the effects of a work-related injury. Section 8-42-101,

C.R.S.; *Sims v. Industrial Claim Appeals Office*, 797 P.2d 777 (Colo. App. 1990). Nevertheless, the right to workers' compensation benefits, including medical benefits, arises only when an injured employee establishes by a preponderance of the evidence that the need for medical treatment was proximately caused by an injury arising out of and in the course of the employment. Sec. 8-41-301(1)(c), C.R.S.; *Faulkner v. Industrial Claim Apps. Office,* 12 P.3d 844, 846 (Colo. App. 2000). Claimant must establish the causal connection with reasonable probability but need not establish it with reasonable medical certainty. *Ringsby Truck Lines, Inc. v. Industrial Commission*, 491 P.2d 106 (Colo. App. 1971); *Industrial Commission v. Royal Indemnity Co.,* 236 P.2d 293 (1951). A causal connection may be established by circumstantial evidence and expert medical testimony is not necessarily required. *Industrial Commission v. Jones*, 688 P.2d 1116 (Colo. 1984); *Industrial Commission v. Royal Indemnity Co., supra*, 236 P.2d at 295-296. All results flowing proximately and naturally from an industrial injury are compensable. See *Standard Metals Corp. v. Ball,* 172 Colo. 510, 474 P.2d 622 (1970).

Claimant has proven by a preponderance of the evidence that she is entitled to all reasonable and necessary medical treatment related to the motor vehicle accident of April 20, 2022. This is supported by the Concentra records and Dr. Hughes' opinion that it was more likely than not that the treatment provided as well as the treatment recommended by Dr. Aschberger were reasonably necessary and related to the work related injury and accident of April 20, 2022.

It is clear that the Concentra providers and their referrals are authorized medical providers. The records in evidence are also clear that Claimant chose to go on her on to Mountain View Pain Center. It was not until June 17, 2022 that PA Turner made the first referral to Mountain View Pain Center for chiropractic care. It is presumed that Ms. Turner made an independent medical determination that the treatment she was referring Claimant to was appropriate under the circumstance. Therefore, any care at Mountain View Pain Center before June 17, 2022 was not authorized care and Respondents are not liable for that care.

ORDER

IT IS THEREFORE ORDERED:

1. Claimant sustained compensable work related injuries on April 20, 2022.

2. Respondents shall pay for reasonably necessary and related medical care as recommended by her Concentra providers as well as their referrals for physical therapy, chiropractic, medications and diagnostic testing, including Dr. Aschberger.

3. All matters not determined here are reserved for future determination.

If you are dissatisfied with the ALJ's order, you may file a Petition to Review the order with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service;

otherwise, the ALJ's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the ALJ; and (2) That you mailed it to the above address for the **Denver Office of Administrative Courts**. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED this 13th day of March, 2023.

Denver, CO 80203

ISSUES

I. Whether Claimant has shown by a preponderance of the evidence that he is entitled to temporary total disability benefits beginning March 5, 2022 to the present and continuing until terminated by law.

II. Whether Respondents have shown by a preponderance of the evidence that Claimant is responsible for his termination from employment with the Employer of injury and his subsequent employer.

STIPULATIONS OF THE PARTIES

The parties stipulated that Claimant's average weekly wage was $1080.00 which is based on 40 hours per week and $27.00 per hour.

The parties further stipulated that, if Claimant is entitled to temporary disability benefits, those benefits would start form March 5, 2022 through the present and continuing until terminated by law.

FINDINGS OF FACT

Based on the evidence presented at hearing, the ALJ enters the following findings of fact:

1. Claimant worked as an iron worker and welder, including bent plate and installing all the detail work, for Employer beginning in May 2021. The bent plate and angles could weight up to 120 lbs. and Claimant would have to move them and put them in place. He was also installing stair rails that would weight approximately 30 to 40 lbs.

2. On October 11, 2021, while lifting one of the bent plate to put it on his shoulder, Claimant felt a pop in his low back and a felt a strain in his groin area and into his stomach. He thought it might be a hernia, and did not give the pop in his low back any thought. The following day, his back was in pain. He continued working despite the throbbing, needling pain in his low back, though he did have his coworkers help with putting the bent plate in place due to his back pain.

3. Claimant stated that he had seen Dr. Corson, who provided work restrictions of 15 lbs. maximum lifting. He stated that he provided his Employer the paperwork from his medical providers with the 15 lbs. restriction. Specifically he provided the paperwork to his supervisor and his foreman. Despite the restrictions, he testified continued to work, lifting the welder, which weighed approximately 100 lbs. and the bent plate or angles which were also heavy. He spoke to his employer about a modified duty job, but since the work needed to get done, he continued working his normal job though had some help.

4. The first time Claimant was placed on restrictions was on October 20, 2021 by Dr. Corson, approximately 9 days following his work injury, and included the 15 lbs. restriction. His restrictions continued through December 7, 2021 when Dr. Zimmerman evaluated Claimant.

5. Claimant testified that he left his employment with Employer because his back hurt and they kept having him do work outside of his restrictions. He let his foreman, [Redacted, hereinafter MM] know he was leaving as of December 22, 2021 in the afternoon. He testified that he left Employer both because of his back injury and because he was unable to receive his cortisone injection as recommended by Dr. Zimmerman. He stopped seeing the workers' compensation providers in December 2021 because he was under the impression that his workers' compensation benefits terminated when he left his position.

6. Claimant stated that he went to work for another company, [Redacted, hereinafter TI], performing work welding. Initially he was not doing any work lifting heavy things because they had carts that would hold the materials and the job was within his work restrictions. He testified that he left the job at TI[Redacted] because of back pain. When Claimant called in to work and told TI[Redacted] about his back, he stated his employer did not like the fact that he had back problems. He left this job on or about March 4, 2022.

7. Between December 2021 and October 2022, Claimant did not attend any medical appointments. He returned to see Dr. Rubio on October 17, 2022.

8. Claimant answered interrogatories on September 22, 2022 and represented that he answered them to the best of his ability. However, one of the questions asked was whether he had secured any employment since leaving Employer and Claimant answered that he had not, which was clearly incorrect since he was immediately employed by TI[Redacted] as a welder on December 23, 2021.

9. Claimant conceded that [Redacted, hereinafter LU] sent him for a pre-employment physical on December 22, 2021 at 8:21 a.m. to Concentra South, and that the same day in the afternoon he gave notice to Employer that he would not be returning to work for Employer.

10. Claimant was initially seen at Concentra by Ron Rasis, PA, on October 11, 2021 complaining of abdominal pain, groin pain and testicular pain. He documented that Claimant was lifting a 280 lb. piece of metal, straddling the metal, bent over to lift and as he was lifting he felt acute pain, pulling and tearing sensation into his right testicle and right lower abdomen. PA Rasis examined Claimant and failed to palpate any herniations, but noted that Claimant had abdominal tenderness in the suprapubic area and in the right lower quadrant. Mr. Rasis ordered an ultrasound and requested Claimant return following the evaluation. He diagnosed strain of the groin and persistent pain in the testicle. Claimant was returned to regular work.

11. On October 13, 2021 PA Rasis ordered an MRI of the lumbar spine and the pelvis. He diagnosed groin strain and lumbar strain.

12. Respondent Employer filed a First Report of Injury on October 13, 2021 noting that Claimant was lifting a metal plate and felt a shooting pain from his groin and down his leg.

13. PA Rasis reevaluated Claimant on October 20, 2021 for ongoing lower back aching pain, stiffness and radiation of pain down his right leg to his 3rd toe, burning pain in the right inguinal region into his right testicle. PA Rasis documented Claimant stated that he was being asked to lift heavy objects at work which were beyond his ability due to his back pain. He diagnosed lumbar strain and right groin strain. He discussed the new restrictions of 15 lbs., a trial of Lidoderm for his back pain, treatment for ROM, modalities, and myofascial release.

14. On November 8, 2021 PA Rasis documented that Claimant was working modified duty. However, he also stated that Claimant was not working due to fear of re-injury.[1] On exam he found an abnormal lordosis of the spine and tenderness of the lumbar spine. He continued the restrictions.

15. Claimant was again attended by PA Rasis on November 15, 2021, reporting ongoing midline lower back pain, soreness, limited tolerance to trunk flexion and intermittent groin pain. He was still awaiting an MRI. He had tenderness in the lumbar spine, bilateral paraspinals and had right sided muscle spasm. He continued with the restriction of 15 lbs. lifting. He returned to PA Rasis on November 29, 2021 with similar complaints, though continued with the tenderness of the lumbar spine, but no muscle spasms were detected. Restrictions remained the same.

16. Claimant was provided a Designated Provider List on November 16, 2021, which was signed by Claimant on November 17, 2021, marking Concentra Medical Centers. On the same day Claimant signed the acceptance of modified employment.

17. The MRI report was issued by Clinton Anderson, M.D. on November 18, 2021. He noted that Claimant has a transitional lumbar anatomy at L5, disc desiccation and mild disc space narrowing between L1-L5 and degenerative changes. There was a moderate disc bulge at L4-L5 with a small superimposed central disc protrusion, moderate right sided neuroforaminal narrowing without compression and mild left sided neural foraminal narrowing without compression.

18. Fredric Zimmerman, D.O. evaluated Claimant on December 7, 2021. He took a history consistent with Claimant's testimony. Claimant continued to complain of constant low back pain. Dr. Zimmerman noted that the abdominal and groin pain were slowly improving. The lumbar spine pain only had moderate improvement with treatment of physical therapy, though Claimant reported that the dry needling alleviated temporarily the muscle spasms. He reviewed the medical records, including the MRI. Dr. Zimmerman diagnosed lumbar displaced disk with evidence of annular tear/disc bulge on MRI and a combination of flexion and extension based back pain. He provided a Medrol Dosepak to treat the inflammation around the annulus, cyclobenzaprine and recommended scheduling an L5 transforaminal epidural steroid injection for both diagnostic and therapeutic purposes.

19. Physical therapy continued at Concentra through December 21, 2021. Scott Rendell, P.T. noted Claimant continued with symptoms, was awaiting authorization for injections, and was provided dry needling, exercises and manual therapy.

---

[1] However, PA Rasis also noted that Claimant was not working due to fear of re-injury within the same report.

20. On December 22, 2021 a Craft Termination PAN was completed for [Redacted, hereinafter LR]. It noted Claimant Voluntarily Quit but the reason was for "Job Abandonment."

21. John Raschbacher, M.D. performed an independent medical examination (IME) of Claimant on September 20, 2022 at Respondents' request. Dr. Raschbacher took a history of the injury, his symptoms, medical treatment, and reviewed the medical records through December 7, 2021. On examination he found a normal deep tendon reflexes at the ankles and knees, a one inch and one quarter calf circumference difference with the left side atrophied compared to the right, no lumbar tenderness, normal lordosis, negative pseudorotation, slight positive Patrick's test right greater than left, negative straight leg test, and normal vascular, sensory and motor sensation of the lower extremities. He had a significant loss of range of motion but no inguinal findings.

22. Dr. Raschbacher noted Claimant reported stable symptoms and persistent discomfort at the low back. His MRI findings were fairly modest, with some changes at L4-5, but only a small disc protrusion. At that time, he may have had some neuroforaminal encroachment on the right, but there was no nerve root compression. He opined that the MRI did not explain, medically, the persistence of symptomatology he was reporting. He suggested potentially a repeat MRI to see if he had any new or different anatomy at the lumbar spine. He opined Claimant did not have any findings that clearly explained the persistence of his symptomatology or his reported inability to work. He stated that Claimant was not an appropriate candidate for injection or for surgery unless new evidence was found. He further stated that additional application of medical resources is unlikely to cause subjective resolution of his reported symptomatology. Dr. Raschbacher's final medical opinion was that Claimant was at MMI as of the date of the IME and did not have a clear ratable impairment or clear basis for restricting physical activity.

23. On October 17, 2022 Dr. Cynthia Rubio evaluated Claimant for low back pain, who was reporting both numbness and tingling at times. Claimant reported mid-lumbar pain everyday - 24/7, had a hard time sleeping, pain when walking, sitting, laying down, and driving. She noted that Claimant saw Dr. Zimmerman who suggested ESI, were apparently not approved by insurance and had no medical intervention/treatment since December 2021. Claimant reported that testicular pain was less frequent although he still noted intermittent throbbing pain. Discussed and reviewed MRI with degenerative changes although there was L4-5 disc pathology which may have been contributing to Claimant's right testicular pain. Dr. Rubio discussed treatment options including doing nothing, prescribing medications, physical therapy, chiropractic or acupuncture treatment and finally potential interventional pain procedures. On exam, Dr. Rubio noted that Claimant had loss of range of motion and tenderness to palpation in the paralumbar areas bilaterally. Otherwise, the exam was negative including Waddell signs. Dr. Rubio made referrals to physical therapy, Dr. Zimmerman and provided temporary restrictions of 20 lbs. lifting and up to 40 lbs. pushing and pulling.

24. TI's[Redacted] employment file for Claimant contained an Employee Status Sheet for Claimant showing that he had been hired as a journeyman welder on December 23, 2021 at the rate of pay of $33.00 per hour, which was $6.00 more per hour than he was earning with Employer. The referral from LU[Redacted] was issued on December

22, 2021, and certified that Claimant had taken a core class of fall protection pursuant to OSHA regulations. He completed paperwork for TI[Redacted] on December 23, 2021, including an Employer Status Sheet, Federal I-9 form, Designated Provider List, Safety Training Acknowledgement form, a Harness, Beamer[2] and Twin Retractable Issue and Use Agreement forms, and an Emergency Contact Form.

25. On February 21, 2022 Claimant received a second warning from TI[Redacted] due to attendance issues. On February 22, 2022 TI[Redacted] issued an Employee Warning Notice stating that Claimant was leaving early almost every day and not showing up at least once a week.[3] The TI[Redacted] Employee Terminated form shows Claimant was formally terminated from his employment on February 23, 2022 for attendance issues as "Employee leaves early almost every day he is here," noting that the final incident that cause the discharge being that he "left early again on 2/22/22."

26. Payroll records from TI[Redacted] show one payment of $83.50 for the week ending December 30, 2021. This ALJ infers that these initial wages were for the Safety Training which took place on December 23, 2021. Thereafter, from pay period January 7, 2022 through March 4, 2022, claimant continued to earn regular wages in a total amount of $10,466.50. Claimant testified that when he answered the interrogatories he completely forgot about the TI[Redacted] work he had done. This is not credible.

27. Once Claimant had hired an attorney, in approximately July 2022, he then found out that his workers' compensation benefits were not terminated but that he could return to see his authorized providers.

28. The LR[Redacted] Human Resources (HR) Director testified on behalf of Respondents. She worked for Employer for 30 years. She handled everything that fell under the HR wheelhouse, including compliance, benefits, and employee relations. She noted that Claimant was hired by Employer on May 17, 2021 as an ironworker apprentice.[4] The HR Director also stated that she dealt with a lot of work related injuries for Employer. She stated that the company offers modified duty to employees who were injured and that Claimant was notified that Employer would accommodate any and all work restrictions. In fact, Employer provided a formal offer for modified of employment to Claimant, which he accepted on November 17, 2021 and Claimant was supposed to be working that modified duty while he was under restrictions. The offer specifically noted that he was offered regular duty work with no lifting over 15 lbs. The HR Director stated that at no time did Claimant report to the HR Director work restrictions were not being followed by his supervisor. While Claimant testified that he did report the violation to the HR Director, he could not provide a date or time period in which the call or calls took place. As found the HR Director is more credible than Claimant in this matter.

29. Claimant testified that he spoke with his supervisor and was insulted in response. He stated that Employer did nothing to accommodate his restrictions.

---

[2] An anchor for attachment to construction I-beams that then is attach to the twin retractable lead to a harness to prevent falls.

[3] This is not clear that this is the correct date since Claimant worked for TI[Redacted] from December 23, 2021 through March 4, 2022.

[4] Someone learning to be a journeyman ironworker.

30. Dr. Raschbacher testified by deposition on October 7, 2022 at Respondents' request as a Level II accredited occupational medicine expert. Claimant reported low back pain that was throbbing sometimes spreading to the right or the left side of the spine and sometimes would go into the buttocks. He noted that Claimant would take an ibuprofen every other day and that if he stood or sat for greater than 15 minutes, his pain would increase.

31. Dr. Raschbacher stated that Claimant underwent medical care which included physical therapy, dry needling and medications. Dr. Raschbacher noted that Claimant was placed on work restrictions of 15 lbs. lifting and to his knowledge Claimant was never taken off of those restrictions. He reviewed Claimant's medical records which included the MRI performed on November 18, 2021, which he did not consider had significant findings other than the unusual bony formation of the sacrum as a big shield-type of bone and some minimal other findings of disk bulging, disk protrusion and stenosis without impingement.

32. On exam, Dr. Raschbacher found no tenderness in the lumbar spine, though a slightly positive Patrick's test and limited range of motion, a negative straight leg test. He concluded that there really was not a good objective or physiological basis for Claimant's ongoing complaints of low back pain. He believed Claimant had reached MMI as of the time of his examination on September 20, 2022 without any impairment because, based on his opinion, Claimant had no objective findings that correlated to his subjective complaints of pain.

33. Upon cross examination, Dr. Raschbacher noted that lifting type injuries like Claimant were a common mechanism of injury for the low back injuries, including sometimes causing some pain into the inguinal area. He agreed that Claimant's MRI showed a moderate disk bulge, but denied that this was a significant finding.

34. As found, Claimant was under work restrictions placed on him by his authorized treating physicians as of October 20, 2021. His restrictions continued at least through December 7, 2021 and there are not records that contradict this. In fact, when Claimant returned to his ATPs in October 2022, his restrictions were continued

35. However, as found, Claimant's separation from employment with Employer on December 22, 2021 was due to finding a job which paid $6.00 more per hour, not because of his back complaints. As found, Claimant did not report to the HR Director for Employer that Employer was not complying with his work restrictions as the HR Director was more credible than Claimant in this matter. Claimant made a volitional decision in leaving Employer's employment. Further, as found, Claimant was responsible for his termination at TI[Redacted] for failure to comply with company attendance policies and not due to his low back injury. As Claimant committed volitional acts in leaving both his employment with Employer and with TI[Redacted] Claimant's right to temporary disability benefits is severed.

36. Testimony and evidence inconsistent with the above findings is either not credible and/or not persuasive.

CONCLUSIONS OF LAW

A. Generally

The purpose of the "Workers' Compensation Act of Colorado" is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of any litigation. Section 8-40-102(1), C.R.S. (2021). The facts in a Workers' Compensation case are not interpreted liberally in favor of either the rights of the injured worker or the rights of the employer. Section 8-43-201, *supra*. A Workers' Compensation case is decided on its merits. Section 8-43-201, *supra*.

The ALJ's factual findings concern only evidence that is dispositive of the issues involved. This decision does not specifically address every item contained in the record and the ALJ has not addressed every piece of evidence that might lead to a conflicting conclusion. The ALJ has specifically rejected evidence contrary to the above findings as not credible or unpersuasive. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office*, 5 P.3d 385 (Colo. App. 2000). In general, the claimant has the burden of proving entitlement to benefits by a preponderance of the evidence, including the causal relationship between the work related injury and the medical condition for which Claimant is seeking benefits. Sec. 8-43- 201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not, *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979). Claimant is not required to prove causation by medical certainty. Rather it is sufficient if the claimant presents evidence of circumstances indicating with reasonable probability that the condition for which they seeks medical treatment resulted from or was precipitated by the industrial injury, so that the ALJ may infer a causal relationship between the injury and need for treatment. See *Industrial Commission v. Riley*, 165 Colo. 586, 441 P.2d 3 (1968).

In deciding whether a party has met the burden of proof, the ALJ is empowered "to resolve conflicts in the evidence, make credibility determinations, determine the weight to be accorded to expert testimony, and draw plausible inferences from the evidence." See *Bodensieck v. ICAO*, 183 P.3d 684 (Colo. App. 2008). The ALJ determines the credibility of the witnesses. *Arenas v. ICAO*, 8 P.3d 558 (Colo. App. 2000). Assessing weight, credibility and sufficiency of evidence in a workers' compensation proceeding is the exclusive domain of administrative law judge. *University Park Care Center v. Industrial Claim Appeals Office*, 43, P.3d 637 (Colo. App. 2001). The weight and credibility assigned to evidence is a matter within the discretion of the ALJ. *Cordova v. ICAO*, 55 P.3d 186 (Colo. App. 2002). The same principles for credibility determinations that apply to lay witnesses apply to expert witnesses as well. See *Burnham v. Grant*, 24 Colo. App. 131, 134 P. 254 (1913); see also *Heinicke v. ICAO*, 197 P.3d 220 (Colo. App. 2008). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colorado Springs Motors, Ltd. v. Industrial Commission*, 441, P.2d 21 (Colo. 1968).

The fact finder should consider, among other things, the consistency, or inconsistency of the witness's testimony and actions, the reasonableness, or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness, whether the testimony has been contradicted, and bias, prejudice, or interest. See *Prudential Ins. Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); *Kroupa v. Industrial Claim Appeals Office*, 53 P.3d 1192 (Colo. App. 2002). A workers' compensation case is decided on its merits. Sec. 8-43-201, C.R.S.

B. Temporary Total Disability Benefits and Termination for Cause

To prove entitlement to Temporary Total Disability (TTD) benefits, a claimant must prove that the industrial injury caused a disability lasting more than three work shifts, that he left work as a result of the disability, and that the disability resulted in an actual wage loss. *See* Sections 8-42-(1)(g), 8-42-105(4); *Anderson v. Longmont Toyota,* 102 P.3d 323 (Colo. 2004); *City of Colorado Springs v. Industrial Claim Appeals Office,* 954 P.2d 637 (Colo. App. 1997). Section 8-42-103(1)(a) requires the claimant to establish a causal connection between a work-related injury and a subsequent wage loss in order to obtain TTD benefits. The term "disability" connotes two elements: (1) medical incapacity evidenced by loss or restriction of bodily function; and (2) impairment of wage earning capacity as demonstrated by claimant's inability to resume his or her prior work. *Culver v. Ace Electric*, 971 P.2d 641, 649 (Colo. 1999). The impairment of earning capacity element of disability may be evidenced by a complete inability to work, or by restrictions which impair the claimant's ability effectively and properly to perform his or her regular employment. *Ortiz v. Charles J. Murphy & Co.*, 964 P.2d 595, 597 (Colo. App. 1998) (citing *Ricks v. Industrial Claim Appeals Office*, P.2d 1118 (Colo. App. 1991)). Because there is no requirement that a claimant must produce evidence of medical restrictions, a claimant's testimony alone is sufficient to demonstrate a disability. *Lymburn v. Symbios Logic,* 952 P.2d 831, 833 (Colo. App. 1997).

The termination statutes, Sections 8-42-105(4) and 8-42-103(1)(g), C.R.S. both provide that in cases "where it is determined that a temporarily disabled employee is responsible for termination of employment, the resulting wage loss shall not be attributable to the on-the-job injury." However, even if a claimant is terminated for cause, post-separation TTD benefits are available if the industrial injury contributed to some degree to the subsequent wage loss. *Liberty Heights at Northgate v. Industrial Claim Appeals Office*, 30 P.3d 872, 873 (Colo. App. 2001); see also *Gilmore v. ICAO*, 187 P.3d 1129 (Colo. App. 2008).

The respondents must prove that a claimant was terminated for cause or was responsible for the separation from employment by a preponderance of the evidence. *Gilmore v. Industrial Claim Appeals Office*, 187 P.3d 1129, 1132 (Colo. App. 2008). To establish that a claimant was responsible for termination, the respondents must show the claimant performed a volitional act or otherwise exercised "some degree of control over the circumstances which led to the termination." *Colorado Springs Disposal v. Industrial Claim Appeals Office*, 5 P.3d 1061, 1062 (Colo. App. 2002); *Padilla v. Digital Equipment Corp*., 902 P.2d 414 (Colo. App. 1995); *Velo v. Employment Solutions Personnel*, 988 P.2d 1139 (Colo. App. 1988). The concept of "volitional conduct" is not necessarily related to culpability, but instead requires the exercise of some control or choice in the circumstances leading to the discharge. *Richards v. Winter Park Recreational Association*, 919 P.2d 983 (Colo. App. 1996). The ALJ must consider the totality of the circumstances to determine whether the claimant was responsible for her termination. *Knepfler v. Kenton Manor*, W.C. No. 4-557-781 (March 17, 2004).

Here, it is clear that Claimant was still under restrictions of 15 lbs. lifting throughout December 2021 and he continued to have a 20 lbs. lifting restriction on October 20, 2022. Claimant alleged his supervisor or Employer were requiring him to work beyond his work

restrictions. However, the HR Director for Employer credibly testified that she was not advised that Claimant's restrictions were not being observed on the job. Employer provided a modified job offer on November 16, 2021, which Claimant signed the following day. Claimant had been working under the same restrictions since October 20, 2021, almost a month before he signed the form sent to him by the HR Director with the offer of modified employment. While Claimant testified that he had communicated the violation of his restriction to the HR Director, Claimant's testimony in this regard is not credible. Bolstering this are the facts that 1) Claimant failed to disclose in his discovery responses that he had subsequent employment, 2) he underwent a drug screening at 8:21 a.m. on December 22, 2021, before he tendered his resignation, 3) he was undergoing a safety class with his subsequent employer, TI[Redacted], the following day, on December 23, 2023, 4) TI[Redacted] was offering Claimant a significantly higher wage. All of these facts shed light onto Claimant's true purpose in leaving Employer, which was more likely than not due to his own convenience or benefit and not due to any violation of his restrictions. Respondents have shown, by a preponderance of the evidence that it was more likely than not Claimant was responsible for his termination and subsequent wage loss as his resignation was volitional.

Claimant argues that he was not responsible for his termination of employment on March 4, 2022[5] from TI[Redacted]. However, the facts are tenuous at best. Claimant was not credible with regard to his termination of employment with Employer and offered little evidence other than his own testimony that he left when he could not perform his job due to back pain. The TI[Redacted] termination documents, however, speak for themselves. Claimant was terminated due to multiple instances of leaving the work site early without permission. This is also a volitional act by Claimant. There was no documentation or credible evidence tendered showing that he notified the TI[Redacted] HR office of his ongoing medical problems, or requested accommodations, or other indication that there was some communication with his supervisor showing he was having difficulty performing his job at TI[Redacted]. Respondents have shown, by a preponderance of the evidence that it was more likely than not Claimant was responsible for his termination from TI[Redacted] and subsequent wage loss as his termination was caused by his own volitional acts of leaving his work early without permission.

ORDER

IT IS THEREFORE ORDERED:

1. Claimant's claim for temporary disability benefits from March 4, 2022 is denied and dismissed.

2. All matters not determined here are reserved for future determination.

[5] The termination may have been February 22, 2022 based on the TI[Redacted] termination document but Claimant testified he worked at TI[Redacted] until March 4, 2022 and was seeking temporary disability benefits beginning March 5, 2022.

If you are dissatisfied with the ALJ's order, you may file a Petition to Review the order with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the ALJ; and (2) That you mailed it to the above address for the **Denver Office of Administrative Courts**. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED this 15th day of March, 2023.

By: _____
Administrative Law Judge
1525 Sherman Street, 4th Floor
Denver, CO 80203

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. WC 5-121-045-003

ISSUES

The hearing in this matter was set on the issues of overcoming the Division IME, conversion of the shoulder impairment, medical benefits after MMI (Maximum Medical Improvement), overpayment and recovery of overpayment. Respondent conceded the issue of medical benefits after MMI, clarifying the position taken on the Final Admission of Liability dated August 16, 2022. It was previously unclear as to whether the Final Admission admitted for medical benefits after MMI. Counsel for Respondent indicated that Respondent did admit for those benefits.

The issues remaining for determination are:

- Did Claimant overcome the DIME's determination of MMI by clear and convincing evidence?
- Did Claimant prove by a preponderance of the evidence the 10% right shoulder extremity rating should be "converted" to the 6% whole person equivalent?
- Did Respondent prove an overpayment of $5,349.00 and that Claimant is liable for repayment of the overpayment?
- Disfigurement.

FINDINGS OF FACT

1. Claimant was employed by Respondent on October 12, 2019 as a correctional officer/supervisor in food service and supervised inmate cooks at the correctional facility in Cañon City, Colorado. On that date, at approximately 6:00 a.m. she went to the freezer to get vegetables with two inmates. There was ice on the floor that she noticed as she entered the freezer. She stepped over the ice. As she was leaving the freezer, she was stepping over the ice and started to fall when her shoe caught the edge of the ice. She tried to catch herself, but fell on her right side. The claim was admitted.

2. Claimant sought treatment immediately at CCOM/Emergicare in Cañon City. She testified that they took an X-ray and the Nurse Practitioner put her knee in a brace and her arm in a brace. She continued to wear the right arm brace until the end of November. According to the initial report from Centura Orthopedics, she was diagnosed with right shoulder strain and contusion of the right knee.

3. Following the initial visit, Claimant had physical therapy for her leg but not for her shoulder. She did not receive physical therapy for her shoulder until later.

4. Claimant did have MRI's in February of 2020 for her shoulder and hip. The shoulder MRI on February 13, 2020 showed mild degenerative changes in the right AC

joint. The shoulder was otherwise negative. The MRI report of the hip showed inflammation of the adductor magnus at the ischial attachment; possible partial-thickness tearing of the semitendinousus and long head of the biceps femoris on the ischial tuberosity; mild geater trochanteric bursitis and anterior superior labral tear with CAM type femoroacetabular impingement. After the MRI's were performed Claimant was referred out for physical therapy for the hip only. After conservative treatment was unsuccessful, she underwent surgery for the hip in June 2020. Following surgery, Claimant resumed physical therapy for the hip.

5. A second incident occurred when Claimant returned to work following the surgery. She attempted to lift a 20 pound box and when she turned while holding it, her hip "popped". After additional imaging, the Claimant underwent a second hip surgery in March, 2021. Following this second surgery, she underwent months of physical therapy for the right hip and leg.

6. Following the shoulder MRI, Claimant did not receive treatment for her shoulder complaints until October, 2021 when she complained of pain in her shoulder. Prior to that, all treatment was focused on the right hip and leg. Following her complaints about her shoulder pain, she was referred for twelve sessions of massage therapy. Eventually, she also received three to four visits of physical therapy for her shoulder.

7. Claimant's authorized treating physician, Mr. Quackenbush, P.A. eventually referred her to Dr. Reiter for an impairment rating. Claimant was unaware of the purpose of the visit to Dr. Reiter. Dr. Reiter saw Claimant on March 11, 2022 and determined that Claimant was at MMI with a 16% of the right lower extremity rating for the hip. He stated that the whole person impairment rating, if converted was 6% whole person, as applicable. He concluded that the Claimant was at MMI as of the date of the visit, March 11, 2022. Dr. Reiter did not provide a rating for her shoulder. At the time of the rating, the Claimant continued to have pain in her shoulder.

8. At the time of MMI and continuing, the Claimant cannot perform activities that she previously did, including playing the fiddle, taking wet laundry out of the washing machine, sweeping, mopping or vacuuming. She can no longer work on cars, she has trouble picking up anything and she has lost a lot of strength in her right shoulder. Claimant's inability to perform these activities is due to pain and loss of strength in her right shoulder. Claimant testified that her shoulder pain is in her shoulder including the collarbone area, down into her armpit area as well as the rear aspect of the right shoulder area. Claimant testified at hearing that she feels a knot in the muscles of her upper back. At the hearing, Claimant's counsel described where the Claimant was pointing to on her body as she testified, which corresponded to her testimony.

9. Following the MMI determination and impairment rating, Claimant underwent a Division Sponsored IME (DIME) with Dr. Polanco. At the time of the evaluation, she did tell Dr. Polanco about her ongoing shoulder symptoms.

10. Dr. Polanco determined that the Claimant reached MMI on March 11, 2022. He determined that the Claimant had a 10% impairment rating to her right upper extremity,

which converted to 6% whole person and a 21% impairment rating to her right lower extremity which converted to 8% whole person.[1] Dr. Polanco did take a history from the Claimant that she experienced pain in her right shoulder and a tingling sensation on the back of her arm, 7 to 8 out of 10 on the pain scale, but did not provide any indication that she was not at MMI for all conditions.

11. Dr. Rook performed an IME on September 20, 2022. He took a history from the Claimant that included the details of her injury and her subsequent treatment. He did document her treatment to her right hip including the two surgeries. With respect to treatment to the Claimant's shoulder, he did take a history of the massage therapy that was provided. He also documented that after the MRI of the shoulder did not show surgical pathology, the Claimant's orthopedist at the time, Dr. Minihane had no further treatment recommendations.

12. With respect to treatment for Claimant's shoulder, there is a discrepancy between Dr. Rook's statement that "she has not had any physical therapy for her right shoulder since the on-the-job injury" and the testimony the Claimant gave at the hearing. She testified that she received three to four sessions of physical therapy after the massage therapy. Dr. Rook opined that the Claimant was not at MMI for the shoulder since she had not been provided the treatment as outlined in the Shoulder Medical Treatment Guidelines. However, he does not opine that Dr. Polanco's determination that Claimant is at MMI is clearly in error. His opinion that "Dr. Polanco erroneously stated that this patient had reached maximum medical improvement when in fact she has not received any treatment for her right shoulder dating back to her occupational injury" is not based on information that is entirely accurate. He does acknowledge in his narrative that she received massage therapy. That constitutes treatment despite his conclusory statement to the contrary. He is also mistaken about the Claimant's lack of physical therapy sessions based on Claimant's testimony. He incorrectly assumes that Claimant had no physical therapy for his shoulder. Whether that treatment would have changed his opinion is unknown. In any event, I view Dr. Rook's statement as to Claimant not being at MMI to be a mere difference of opinion with that of Dr. Polanco's determination of MMI.

13. Claimant also underwent an IME with Dr. Bernton on January 12, 2023 at the request of Respondents. With respect to Claimant's right shoulder, he notes that the MRI of the shoulder did not demonstrate the presence of structural injury to the shoulder. He also states that the degenerative changes in the AC joint were not caused by the occupational injury. Finally, he stated that the record does not reflect treatable work-related conditions are present in the right shoulder requiring further workup and evaluation. However, he did provide a range of motion impairment rating for the right shoulder of 13%.

14. Claimant testified that she told Dr. Bernton of her shoulder symptoms during his IME and also told Dr. Rook of her shoulder symptoms at the time of his IME.

---

[1] Although the DIME examiner's summary sheet refers to impairment of the left lower extremity, it is clear from the narrative that the impairment rating given was to the right lower extremity.

15. Following the DIME report of Dr. Polanco, a Final Admission of Liability (FAL) dated August 16, 2022 was filed. With respect to the overpayment asserted, the notations attached to the FAL (Respondent's Exhibit E, p. 41) indicate that the total indemnity paid was $99,422.41 and the indemnity cap was $94,330.19, resulting in an overpayment of $4,376.60. There was no attachment to the FAL which substantiated the payments listed in the FAL, supporting the payment total asserted in that pleading. The Respondent did provide a detailed payment history for indemnity at the time of hearing which showed a different payment amount of $100,706.01. (Respondent's Exhibit F).

CONCLUSIONS OF LAW

A. Claimant did not overcome the determination of MMI by clear and convincing evidence

A DIME's determination regarding MMI is binding unless overcome by clear and convincing evidence. Section 8-42-107(8)(b) and (c). The clear and convincing standard also applies to the DIME's determination of which impairments were caused by the work accident. *Egan v. Industrial Claim Appeals Office*, 971 P.2d 664 (Colo. App. 1988). The party challenging a DIME's whole person rating must demonstrate it is "highly probable" the determination is incorrect. *Cordova v. Industrial Claim Appeals Office*, 55 P.3d 186 (Colo. App. 2002); *Qual-Med, Inc. v. Industrial Claim Appeals Office*, 961 P.2d 590 (Colo. App. 1998). A party meets this burden if the evidence contradicting the DIME physician is "unmistakable and free from serious or substantial doubt." *Leming v. Industrial Claim Appeals Office*, 62 P.3d 1015 (Colo. App. 2002). A "mere difference of medical opinion" does not constitute clear and convincing evidence. *E.g., Gutierrez v. Startek USA, Inc.*, W.C. No. 4-842-550-01 (March 18, 2016).

Claimant's argument that she is not at MMI is based on the assertion that she had little evaluation and treatment for her shoulder condition over the course of her claim. Counsel for Claimant noted in his argument at hearing that Claimant treatment prior to MMI was primarily for her symptomatic hip injury. By the time she was approaching MMI, she did start receiving therapy for her shoulder. However, she still had pain in her shoulder in the range of 4 to 7 out of ten. Despite the ongoing pain, she was placed at MMI and did not even receive a rating for her shoulder injury from the rating physician, Dr. Reiter. Claimant further argues that Dr. Polanco erred by determining that she was at MMI despite the fact that she had a recognized shoulder injury, warranting a rating but he gave no consideration of ongoing treatment to improve her condition. However, it appears from Dr. Polanco's Division IME report that he considered the treatment for the shoulder, as documented, to be appropriate and that Claimant was at MMI for that condition. Dr. Polanco's determination of MMI is supported by the medical record and is credible. Dr. Rook's opinion to the contrary is a mere difference of opinion that does not rise to the level of proof that Dr. Polanco's opinion on MMI is clearly erroneous.

B. Claimant proved whole person impairment to her right shoulder.

When evaluating whether a claimant has sustained scheduled or whole person impairment, the ALJ must determine "the situs of the functional impairment." This refers to the "part or parts of the body which have been impaired or disabled as a result of the industrial accident," and is not necessarily the site of the injury itself. *Strauch v. PSL Swedish Healthcare System*, 917 P.2d 366, 368 (Colo. App. 1996). The schedule of disabilities refers to the loss of "an arm at the shoulder." Section 8-42-107(2)(a). If the claimant has a functional impairment to part(s) of his body other than the "arm at the shoulder," they have suffered a whole person impairment and must be compensated under § 8-42-107(8).

There is no requirement that functional impairment take any particular form, and "pain and discomfort which interferes with the claimant's ability to use a portion of the body may be considered 'impairment' for purposes of assigning a whole person impairment rating." *Martinez v. Albertson's LLC*, W.C. No. 4-692-947 (June 30, 2008). Referred pain from the primary situs of the initial injury may establish proof of functional impairment to the whole person. *E.g., Latshaw v. Baker Hughes, Inc.*, W.C. No. 4-842-705 (December 17, 2013); *Mader v. Popejoy Construction Co., Inc.*, W.C. No. 4-198-489 (August 9, 1996). Although the opinions of physicians can be considered when determining this issue, the ALJ can also consider lay evidence such as the claimant's testimony regarding pain and reduced function. *Olson v. Foley's*, W.C. No. 4-326-898 (September 12, 2000).

Pain and limitation in the scapular area can functionally impair an individual beyond the arm. *E.g. Steinhauser v. Azco, Inc.*, W.C. No. 4-808-991 (January 11, 2012) (pain and muscle spasm in scapular and trapezial musculature warranted whole person impairment); *Franks v. Gordon Sign Co.*, W.C. No. 4-180-076 (March 27, 1996) (supraspinatus attaches to the scapula, and is therefore properly considered part of the "torso," rather than the "arm"). However, the mere presence of pain in a part of the body beyond the schedule does not automatically represent a functional impairment or require a whole person conversion. *Newton v. Broadcom, Inc.*, W.C. No. 5-095-589-002 (July 8, 2021).

As found, Claimant proved she suffered functional impairment not listed on the schedule. Claimant credibly described pain and associated functional limitation in areas proximal to her arm. Claimant testified as to her functional limitations with her shoulder. She struggles with activities of daily living due to her shoulder, including, but not limited to, mopping, turning a wrench, and vacuuming. Claimant testified feeling she currently felt a knot in the musculature of her upper back. She also indicated visually that the knot was slightly proximal to the shoulder. The preponderance of persuasive evidence shows Claimant's functional impairment extends beyond her "arm at the shoulder."

Claimant proved she suffered whole person impairment to her right shoulder. Claimant's testimony as to her limitations in functioning and anatomic pain adequately demonstrates that her impairment extends beyond the extremity.

C. Impairment

Claimant has argued in her proposed order that the most reliable ratings in the record are those of Dr. Rook. Dr. Rook assigned 18% for the right upper extremity, 19% for the right knee and 27% for the hip. The Claimant further argues that the DIME doctor erred in his failure to include the knee in his impairment ratings. The ALJ specifically rejects Claimant's implicit argument that Dr. Polanco clearly erred in the amount of his impairment rating or his decision not to include the knee in the impairment rating, notwithstanding Dr. Rook's opinions to the contrary. Claimant has failed to sustain her burden of proof that Dr. Polanco clearly erred with respect to the amount of impairment or the decision not to include the knee in the ratings.

D. Disfigurement

Claimant has a visible disfigurement to the body consisting of a limp due to her hip surgeries. Claimant has sustained a serious permanent disfigurement to areas of the body normally exposed to public view, which entitles Claimant to additional compensation. Section 8-42-108(1). I determine that she is entitled to $1,500 based on her disfigurement.

E. Overpayment and repayment of overpayment.

Section 8-40-201(15.5) defines an overpayment as:

> [M]oney received by a claimant that exceeds the amount that should have been paid, or which the claimant was not entitled to receive, or which results in duplicate benefits because of offsets that reduce disability or death benefits payable . . . . For an overpayment to result, it is not necessary that the overpayment exist at the time the claimant received disability or death benefits . . . .

Respondent has the burden to prove Claimant received an overpayment. *City and County of Denver v. Industrial Claim Appeals Office*, 58 P.3d 1162 (Colo. App. 2002).

Respondent has proven an overpayment of $5,349. The Final admission shows a total amount owed of $95,357.01. The third-party administrator's records show that the amount paid totals $101,706.01. The difference between the two results in an overpayment of $5,349.00. Although the overpayment on the Final Admission is less than asserted at hearing, the records submitted into evidence do support the revised overpayment amount and are credible, despite the discrepancy with the amount asserted in the Final admission of Liability. [2]

[2] Respondent has asserted an overpayment based on the difference between the indemnity due of $95,045.81 (Respondent Exhibit E, p. 41) and the indemnity paid of $100,706.01 (Respondent Exhibit F, p.43) for a total overpayment of $5,349.00. The Respondent is not asserting an overpayment based on the difference between the cap of $94,330.19 and the amount paid, as asserted in Exhibit F, and the ALJ does not consider that with respect to the overpayment issue before the Court.

Claimant has presented no credible evidence to the contrary. Based on the documentary evidence provided by the Respondent, the Respondent has proven by a preponderance of the evidence the amount of overpayment. Neither party provided any evidence regarding the rate of the repayment, which could include immediate repayment of the entire overpayment. In its position statement, Respondent argues that "Claimant has the ability to repay Respondent its overpayment in the amount of $5,349.00"[3] However, the argument does not rely upon any specific evidence presented at hearing. As such, the ALJ is without evidence to make that determination. If the parties are unable to agree as to the rate of repayment, they may set the matter for hearing on that issue.

ORDER

It is therefore ordered that:

1. Claimant's request to overcome the DIME's determination that the Claimant is at maximum medical improvement is denied and dismissed.

2. Respondent shall pay Claimant PPD benefits based on a 6% whole person rating for Claimant's shoulder.

3. Respondent may take credit for any indemnity benefits previously paid to Claimant in connection with this claim up to the applicable combined indemnity cap for the date of injury.

4. Insurer shall pay Claimant $1,500 for disfigurement. Insurer shall be given credit for any amount previously paid for disfigurement in connection with this claim.

5. Claimant shall repay the overpayment of $5,349.00 at an amount to be agreed upon by the parties. If the parties are unable to agree as to the rate of repayment, they may set the matter for hearing on that issue.

6. Respondent shall pay Claimant statutory interest of 8% per annum on all compensation not paid when due.

7. All issues not decided herein are reserved for future determination.

If you are dissatisfied with this order, you may file a Petition to Review with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on the certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail by sending it to the above address for the **Denver Office of Administrative Courts** within twenty (20) days after mailing or

[3] However, Respondent also asserts in the conclusion of its position statement that "It is fair and reasonable for Claimant to repay the overpayment to Respondent in set monthly installments until the overpayment of $5,349.00 is paid in full beginning the date after the Order so ordering becomes final." Based on this, Respondent does not dismiss that the repayment may be made in installments.

service of the ALJ's order. In the alternative, you may file your Petition to Review electronically by email to the following email address: oac-ptr@state.co.us. If the Petition to Review is timely served via email, it is deemed filed in Denver pursuant to OACRP 26(A) and § 8-43-301, C.R.S. If the Petition to Review is filed by email to the proper email address, it need not also be mailed to the Denver Office of Administrative Courts. For statutory reference, see § 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: https://oac.colorado.gov/resources/oac-forms

DATED: March 20, 2023

Office of Administrative Courts

ISSUES

Whether the claimant has demonstrated, by a preponderance of the evidence, that in November 2021 he suffered an injury arising out of and in the course and scope of his employment with the employer.

If the claim is found compensable, whether the claimant has demonstrated, by a preponderance of the evidence, that the treatment he received at Glenwood Medical Associates was reasonable medical treatment necessary to cure and relieve the claimant from the effects of the work injury.

FINDINGS OF FACT

1. The employer operates a [Redacted, hereinafter GC]. The claimant worked for the employer as a part-time cashier.

2. The claimant testified regarding an incident that occurred in early November 2021.[1] The claimant described an incident in which he was removing a five gallon container of liquid fertilizer from a shelf. The claimant testified that he could not reach the handle of the container while sliding it off the shelf. The container slipped to the left and the claimant reached with his right hand to hold the container against the shelving. As a result, the claimant asked his coworker, [Redacted, hereinafter MG], to assist him with the container. The claimant further testified that he immediately felt pain in his right upper back. The claimant ultimately completed his shift that day and was then scheduled to be off for the next two days. The claimant testified that during those two days off, his upper back continued to be sore.

3. The claimant's coworker, MG[Redacted] testified at the hearing. MG[Redacted] testified that he did not assist the claimant with the container. It is MG's[Redacted] recollection that he observed the claimant move a container of liquid fertilizer by the handle and placed it on the ground. MG[Redacted] further testified that he did not observe the claimant engaging in any pain behaviors after that incident.

4. Sometime in November 2021, the claimant made the employer owner, [Redacted, hereinafter PK], aware that he was experiencing back pain. The claimant asked PK[Redacted] to allow him to avoid heavy lifting while at work. PK[Redacted] allowed this behavioral

[1] All materials filed with the Colorado Division of Workers' Compensation (DOWC) identify the date of injury as November 6, 2021. However, at hearing, it would appear that the incident occurred on November 3, 2021. For the sake of consistency the ALJ will identify the incident as occurrin in early November 2021.

accommodation. No formal report was made of the November 2021 incident. The claimant was not referred to any medical provider by PK[Redacted].

5. The claimant first attempted to seek medical treatment related to the early November 2021 incident on December 20, 2021. On that date, the claimant sought treatment at Glenwood Medical Associates (GMA). However, the claimant was running a fever at that time and was not seen. It was on December 30, 2021 that the claimant was seen by Dr. Coya Lindberg at GMA. On that date, the claimant described a mechanism of injury that mirrored his hearing testimony. The claimant also reported continuing pain in his right thoracic area. Dr. Lindberg diagnosed a muscular strain and ordered x-rays. In addition, Dr. Lindberg referred the claimant to physical therapy.

6. Thoracic spine x-rays were taken on December 30, 2021. The x-rays showed normal alignment, mild degenerative disc disease, with no acute findings.

7. On January 10, 2022, the claimant returned to Dr. Lindberg. In the medical record of that date, Dr. Lindberg identified the claimant's diagnosis as a right thoracic strain. Dr. Lindberg continued to recommend physical therapy. The claimant was to return in three weeks for follow-up. However, the claimant has not returned to Dr. Lindberg.

8. On February 4, 2022, the claimant filed a Worker's Claim for Compensation regarding the early November 2021 incident.

9. On February 10, 2023, a First Report of Injury or Illness was completed regarding the early November 2021 incident. The preparer of that document is identified as "IW & DOWC". The ALJ finds that these acronyms are for the "injured worker" and the "Division of Workers' Compensation".

10. The claimant underwent physical therapy with Keith Mccarroll with Peak Performance. The physical therapy records indicate that the claimant was seen between the dates of February 21, 2021 and April 11, 2022. The claimant testified that physical therapy assisted with his back symptoms.

11. On January 11, 2023, the claimant attended an independent medical examination (IME) with Dr. F. Mark Paz. In connection with the IME, Dr. Paz reviewed the claimant's medical records, obtained a history from the claimant, and performed a physical examination. On January 19, 2023, Dr. Paz issued an IME report and opined that Dr. Lindberg's diagnosis of thoracic strain was related to the early November 2021 incident and that strain had resolved by the date of the IME. Dr. Paz's testimony was consistent with his IME report. However, after hearing the testimony of the employer witnesses, Dr. Paz had concerns regarding whether the early November 2021 incident occurred. As a result, Dr. Paz intimated that perhaps the claimant had not in fact suffered a thoracic strain at work.

12. The ALJ credits the claimant's testimony and finds that he did feel some manner of pain in his right upper back while at work in early November 2021. However, the ALJ also finds that the onset of that pain does not rise to the level of an injury. The ALJ finds that the claimant has failed to demonstrate that it is more likely than not that he suffered an injury causing disability and/or necessitating medical treatment. In reaching this factual conclusion, the ALJ notes that the claimant did not seek medical treatment until December 20, 2021, more than six weeks after the incident. The ALJ finds that although an incident occurred, it did not rise to the level of being an injury.

CONCLUSIONS OF LAW

1. The purpose of the Workers' Compensation Act of Colorado is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of any litigation. Section 8-40-102(1}, C.R.S. A claimant in a Workers' Compensation claim has the burden of proving entitlement to benefits by a preponderance of the evidence. Section 8-43-201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probable than not. *Page v. Clark,* 197 Colo. 306, 592 P.2d 792 (1979). The facts in a Workers' Compensation case are not interpreted liberally in favor of either the rights of the injured worker or the rights of the employer. Section 8-43-201, *supra.* A Workers' Compensation case is decided on its merits. Section 8-43-201, *supra.*

2. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability} of the testimony and action; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *See Prudential Insurance* Co. *v. Cline,* 98 Colo. 275, 57 P.2d 1205 (1936); CJI, Civil 3:16.

3. The ALJ's factual findings concern only evidence that is dispositive of the issues involved. The ALJ has not addressed every piece of evidence that might lead to a conflicting conclusion and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office,* 5 P.3d 385 (Colo. App. 2000).

4. A compensable industrial accident is one that results in an injury requiring medical treatment or causing disability. The existence of a pre-existing medical condition does not preclude the employee from suffering a compensable injury where the industrial aggravation is the proximate cause of the disability or need for treatment. *See H & H Warehouse v. Vicory,* 805 P.2d 1167 (Colo. App. 1990); see a/so *Subsequent Injury Fund v. Thompson,* 793 P.2d 576 (Colo. App. 1990). A work related injury is compensable if it "aggravates accelerates or combines with a preexisting disease or infirmity to produce disability or need for treatment." *See H & H Warehouse v. Vicory, supra.*

5. As found, the claimant has failed to demonstrate, by a preponderance of the evidence, that in early November 2021 he suffered an injury arising out of and in the course and scope of his employment with the employer. As found, the early November 2021 incident did not rise to the level of an injury resulting in disability and/or necessitating medical treatment. Therefore, the ALJ concludes that the claimant did not suffer a compensable injury.

ORDER

It is therefore ordered that the claimant's claim related to an early November 2021 alleged injury, is denied and dismissed.

Dated March 16, 2023.

Cassandra M. Sidanycz
Administrative Law Judge
Office of Administrative Courts
222 S. 6th Street, Suite 414
Grand Junction, Colorado 81501

If you are dissatisfied with the ALJ's order, you may file a Petition to Review the order with the **Denver Office of Administrative Courts,** 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after service of the order, as indicated on the certificate of mailing or service; otherwise, the ALJ's order will be final. Section 8-43-301(2), C.R.S. and OACRP 26. You may access a petition to review form at: https://oac.colorado.gov/resources/oac-forms.

You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the ALJ; and (2) That you mailed it to the above address for the **Denver Office of Administrative Courts.** You may file your Petition to Review electronically by emailing the Petition to Review to the following email address: **oac-ptr@state.co.us.** If the Petition to Review is emailed to the aforementioned email address, the Petition to Review is deemed filed in Denver pursuant to OACRP 26(A) and Section 8-43-301, C.R.S. If the Petition to Review is filed by email to the proper email address, it does not need to be mailed to the Denver Office of Administrative Courts.

In addition, it is recommended that you send an additional copy of your Petition to Review to the Grand Junction OAC via email at oac-gjt@state.co.us.

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. 5-189-008-003

ISSUES

- Did Claimant prove he suffered an injury while performing services for pay for Respondent?
- Did Respondent prove Claimant was an independent contractor?
- What is Claimant's average weekly wage ("AWW")?
- Did Claimant prove entitlement to TTD benefits from September 23, 2021 through March 23, 2022?
- The parties stipulated Dr. Mark Porter is the primary ATP if the claim is compensable. The parties further stipulated the treatment Claimant received for his injury was reasonably needed.
- Did Claimant prove Respondent should be penalized for failure to carry workers' compensation insurance?
- Did Respondent prove Claimant willfully violated a safety rule?
- Did Respondent prove Claimant was responsible for termination of employment?

FINDINGS OF FACT

1. Respondent is a marijuana farm, owned and operated by [Redacted, hereinafter PM].

2. Claimant worked for Respondent as a general laborer since the summer of 2018. He performed general landscape duties such as pulling weeds, digging holes, maintaining fences, basic greenhouse repairs and maintenance, and occasionally unloading deliveries.

3. In addition to his general labor duties, Claimant sporadically operated a de-stemming machine called a "bucker." Marijuana plants are fed into the bucker, which uses rollers or wheels to pull the plant through the machine and separate buds from stems.

4. On September 20, 2021, Claimant was operating the bucker when the machine became jammed. Claimant flipped the power switch and went around to the rear of the machine to dislodge the jam. When he loosened the clog, the machine began operating in reverse. It grabbed his glove and pulled his hand into the rollers. Claimant's wife also works for Employer and was standing a few feet away when Claimant's hand was pulled into the machine. She quickly switched off the machine and Claimant pulled

his hand out. Claimant suffered severe lacerations to his right hand and a dislocated right index finger.

5. Witnesses at hearing expressed confusion about how the machine resumed operating because Claimant believed he turned it off. The bucker's power switch is a three-position rocker or toggle switch, which operates in a FORWARD ➔ OFF ➔ REVERSE pattern. When the machine jammed, Claimant probably inadvertently switched it past the OFF position to the REVERSE position. Once the jam was loosened, the bucker suddenly started operating in reverse. Because Claimant was on the back side of the machine, the reverse motion pulled his hand into the rollers and caused the injury.

6. Claimant's hand was bleeding and obviously injured. PM[Redacted] helped Claimant wrap his hand and then drove him to the nearby volunteer fire department, where he hoped to find emergency medical personnel. No EMTs were available, so [Redacted, hereinafter MP] drove Claimant to the Parkview Medical Center emergency department.

7. MP[Redacted] exchanged text messages with PM[Redacted] when she and Claimant arrived at Parkview. PM[Redacted] stated, "Him saying he got hurt on the job is going to fuck me." MP[Redacted] replied, "He's not filling out the paperwork for it so you should be good." PM[Redacted] responded, "I appreciate that I really do." When asked at hearing about his texts, PM[Redacted] testified, "I figured I was going to have to pay for medical and stuff like that. . . . I just thought, he got hurt on the job, I'd probably have to."

8. The ER intake documentation identifies Claimant's "Employer" as "[Redacted, hereinafter DF]," and Claimant's occupation as "labor." Claimant reported "he was using a weed bucker that got jammed with debris. He attempted to clear the debris with his right hand." The ER physician observed large lacerations to the right index and middle fingers. The index finger PIP joint was dislocated, with associated disruption of the collateral ligament. The ER physician consulted the on-call hand surgeon, who recommended thorough irrigation, wound closure, and an external splint. The ER physician sutured the wounds, placed Claimant's fingers in a splint and wrapped the hand and wrist in a bandage. Claimant was discharged and advised to follow up with a hand surgeon. He was not given any specific work restrictions.

9. Claimant saw Dr. Mark Porter, a hand surgeon, on September 28, 2021. He described "mild" aching pain in the injured fingers, made worse by movement and lifting. His pain that date was 0/10. Examination showed lacerations to the right index and middle fingers, and some laxity of the radial collateral ligament of the index finger. Dr. Porter diagnosed complex lacerations and a sprain of the radial collateral ligament. He "buddy taped" Claimant's injured fingers and recommended continued icing and splinting until a follow up appointment in one week. Dr. Porter did not discuss no work restrictions.

10. Claimant returned to Dr. Porter on October 5, 2021. He reported 0/10 pain and was using no pain medication other than NSAIDs. Physical examination was unremarkable. Dr. Porter removed Claimant's sutures and recommended he continue with NSAIDs and buddy taping for one more month. No work restrictions were assigned.

11. Claimant pursued no additional treatment for seven months. On May 2, 2022, Dr. Porter referred him to occupational therapy and imposed work restrictions of no lifting over 35 pounds and no fine manipulation or keyboarding with the right hand. The basis for these restrictions is unclear, as no corresponding report of an office visit or telehealth appointment was offered into evidence.

12. Claimant had an initial OT evaluation on June 13, 2022. His condition appeared to have deteriorated since his last documented appointment with Dr. Porter. Claimant stated his fingers were very painful and he could not grip or catch objects. He also described "shooting" right wrist pain and limited range of motion. The therapist thought Claimant would benefit from OT.

13. There is no question Claimant was injured while performing tasks integral to Employer's business. PM[Redacted] conceded Claimant was paid for his time. Accordingly, Claimant proved the factual predicates for a determination that he was an "employee."

14. Employer is defending the claim on the theory that Claimant was an "independent contractor." Employer failed to prove Claimant was an independent contractor. There is no persuasive evidence Claimant was customarily engaged in an independent trade or business related to landscaping, maintenance, or marijuana farming. He performed those tasks exclusively for Employer. Claimant was paid personally in cash, and not in the name of any business. Claimant was paid on an hourly basis rather than a fixed or contract rate. Employer provided all tools and other equipment Claimant needed to perform his work, including gloves, shovels, wheelbarrows, post-hole diggers, a concrete mixer, and the bucking machine that caused the injury. Employer presented no 1099s, independent contractor agreements, or other corroborating documentation at hearing, despite alleging that "all" workers at the farm are independent contractors. PM[Redacted] alleged Claimant "was getting W-9s," but testified, "I don't have a copy with me." PM's[Redacted] testimony on this point not credible. Given the importance of any such evidence to its defense, the ALJ would expect such supportive documentation would have been offered into evidence if it existed. The ALJ also notes that IRS Form W-9 is the Request for Taxpayer Identification Number and Certification form,[1] and not used to report any payments to vendors. The Form 1099 is used to report payments to non-employees for services rendered.[2] PM's[Redacted] apparent lack of familiarity with standard IRS forms used for independent contractors belies the assertion that Employer operates its business solely using independent contractors. Finally, PM's[Redacted] text exchange with MP[Redacted] after the accident indicates his awareness that Claimant was an employee and not an independent contractor.

15. Employer paid Claimant exclusively in cash, at the end of each day. As a result, there are no paystubs, cancelled checks or direct deposit advices to establish Claimant's AWW.

---

[1] 26 CFR § 31.3406(h)-3.
[2] 26 CFR § 1.6041-1(2).

16. Claimant and MP[Redacted] testified Claimant was paid $20 per hour for general "labor," and $17 per hour while running the bucking machine. PM[Redacted] testified he paid Claimant $17 per hour for all work and could not recall ever paying $20 per hour.

17. Claimant is alleging an AWW of $1,560, which equates to 78 hours per week at $20 per hour. Claimant presented no bank statements or other documentation of income. Claimant filed no income tax returns and there is no persuasive evidence he paid any income taxes. Claimant testified his earnings were always below the income threshold at which a tax return is required. This is inconsistent with his alleged AWW equating to more than $6,240 per month. Claimant also worked "under the table" for other employers and filed no tax returns for those wages either.

18. Claimant's only evidence regarding his alleged AWW consists of his and MP's[Redacted] testimony. Claimant offered conflicting testimony regarding his typical work schedule. He first testified he averaged 12 hours of work each week. He then testified he worked approximately 50-60 hours per week. Finally, he testified he worked 12 hours per day 5-6 days per week, which would be 60-72 hours each week. MP[Redacted] compounded the inconsistency by testifying they each worked 12 hours per day, 6-7 days per week (72-84 hours). Both Claimant and MP[Redacted] testified that neither of them "ever" earned less than $1,000 per week ($2,000 total). Neither Claimant nor MP's[Redacted] testimony regarding their alleged earnings is credible. Claimant failed to prove his AWW is $1,560. Claimant failed to prove any specific AWW by a preponderance of the evidence.

19. Employer maintained a rudimentary "record" of Claimant's wages, consisting of a handwritten list of hours Claimant worked each day. Employer had no time clock and relied on Claimant to track the number of hours he worked. At the end of each shift, PM[Redacted] wrote down the hours Claimant said he worked, and paid him accordingly. The handwritten list shows a total of 261.5 hours over the 262-day period from January 1, 2021 through September 19, 2021 (the day before the accident).[3] Assuming an hourly rate of $17 as testified by PM[Redacted], this equates to an AWW of $118.77 (261.5 x $17 = $4,445.50 ÷ 262 = $16.97 x 7 = $118.77).

20. Claimant and MP[Redacted] testified Claimant tried to work two days after the accident but could not continue because of his injury. PM[Redacted] testified Claimant was off work for approximately one week and returned to work on September 29, 2021, using primarily his left hand. PM's[Redacted] testimony is consistent with the handwritten record of hours, which shows Claimant worked three hours on September 29. This return-to-work date is plausible because it coincides with Claimant's initial appointment with Dr. Porter on September 28. Employer's wage record shows Claimant subsequently worked on October 1, 2, 5, 9, 11, 14, 16, 18, and 19, 2021.

[3] Claimant had only worked a few minutes before the accident on September 20, 2021 and was not paid for any time that day.

21. Claimant texted PM[Redacted]October 21, 2021 that he had an appointment at the DMV. PM[Redacted] asked Claimant "are you coming in after?" and Claimant replied, "Yeah, if you need us to." But he did not report to work that day. On October 22, Claimant texted he was unavailable because his father was having surgery. On October 25, Claimant texted he was having car trouble. And on October 30, 2021, Claimant texted his vehicle was still inoperable and "we are going to fix it when our checks come in . . . from the state [in] 7-14 days." The ALJ infers the text messages were intended to advise Employer why Claimant would not be coming to work those days.

22. At hearing, Claimant and MP[Redacted] denied having a DMV appointment in October 2021. However, PM[Redacted] retrieved Claimant's text message from his phone during his testimony. Claimant also denied that his father had a medical appointment or that he was waiting on a benefit check to repair his vehicle. Again, PM[Redacted] retrieved the text messages from his phone during the hearing to refute Claimant's testimony.

23. Claimant never returned to work for Employer after October 19, 2021.

24. The preponderance of persuasive evidence shows Claimant missed work as a direct and proximate result of the work accident from September 20 through September 28, 2021. Claimant is entitled to TTD from September 23 through September 28, 2021, accounting for the statutory three-day "waiting period."

25. Claimant's eligibility for TTD terminated on September 29, 2021 because he returned to work.

26. Claimant failed to prove he left work on or after October 19, 2021 because of the industrial injury. Claimant stopped reporting to work for personal reasons unrelated to the injury, including lack of transportation. Accordingly, Claimant failed to prove entitlement to TTD from September 29, 2021 through March 23, 2022.

27. Because Claimant failed to prove entitlement to TTD after September 28, 2021, Employer's defense that he was "responsible for termination" is moot.

28. PM[Redacted] testified Claimant was instructed not to unclog the bucker if it became jammed. He testified Claimant was told to ask a supervisor, [Redacted, hereinafter DC], for help. If DC[Redacted] was not available, Claimant could ask PM[Redacted] for help. Claimant denied every receiving such instructions. Employer produced no documentation, testimony of other witnesses (such as DC[Redacted]), or other persuasive evidence to corroborate the alleged "safety rule." Employer failed to prove Claimant willfully violated a safety rule.

CONCLUSIONS OF LAW

A. Claimant was an employee rather than an independent contractor.

Section 8-40-202(2)(a) provides that "any individual who performs services for pay for another shall be deemed to be an employee . . . unless such individual is free from

control and direction in the performance of the service . . . [and] is customarily engaged in an independent trade, occupation, profession, or business related to the service performed." The claimant has the initial burden to prove they suffered an injury while performing services for another for pay. If the claimant carries that burden, the burden shifts to the employer to prove the claimant was an independent contractor. *Cordova v. Artistry Drywall*, W.C. No. 4-653-327 (April 10, 2006). The Act creates a balancing test to overcome the statutory presumption of employment and establish independence. *Nelson v. Industrial Claim Appeals Office*, 981 P.2d 210 (Colo. App. 1998). Section 8-40-202(2)(b)(II) sets forth several factors the General Assembly considers particularly "important" in distinguishing employees from independent contractors. *Industrial Claim Appeals Office v. Softrock Geological Services Inc*., 325 P.3d 560, 565 (Colo. 2014). No single factor is dispositive, and the determination must be based on the totality of evidence. *Id*.

After considering the totality of circumstances, including the factors enumerated in § 8-40-202(2)(b)(II), the ALJ concludes Claimant was an employee at the time of his accident. Some of the most significant factors are: (1) Claimant was not "customarily engaged in an independent trade or business." He had no business related to landscape maintenance or other farming activities, and never performed similar services for anyone else. (2) Employer paid Claimant an hourly rate rather than a fixed or contract rate. (3) Employer paid Claimant personally and not in the name of any business. (4) Employer never sent Claimant a 1099 or other appropriate tax documentation consistent with being an independent contractor. (5) Employer has no independent contractor agreements or similar documentation to corroborate the assertion that Claimant and "all" its employees are independent contractors. (6) Employer provided all tools Claimant needed to complete his work. (7) Claimant's tasks for each day were dictated by Employer and there is no persuasive evidence Claimant had any control over the work assignments. (8) There is no persuasive evidence of any limitation on Employer's ability to terminate Claimant's services at will. (9) PM[Redacted] admitted he was "fucked" if Claimant reported the injury as work-related.

Claimant was not "contracted" to perform any specific job or series of jobs but was hired on an open-ended basis to perform whatever tasks Employer had available on a given day. Claimant reported to work at Employer's farm with no prior negotiations about cost or the scope of work and was paid $17 per hour for the work he was assigned that day. This arrangement is far more akin to an employer-employee relationship than an independent contractor situation.

PM[Redacted] was clearly motivated to avoid the taxes, insurance cost, and other requirements associated with having employees. And no doubt Claimant was content to receive wages in cash with no withholding or reporting. But the parties' mutual willingness to avoid payroll taxes and other employment-related obligations it is not dispositive of whether Claimant was, in fact, an independent contractor. The preponderance of persuasive evidence shows Claimant was Employer's "employee."

B. Claimant's AWW is $118.77

Section 8-42-102(2), C.R.S. provides that compensation is payable based on the employee's average weekly earnings "at the time of the injury." The statute sets forth several computational methods for workers paid on an hourly, salary, per diem basis, etc. But § 8-42-102(3) gives the ALJ wide discretion to "fairly" calculate the employee's AWW in any manner that seems most appropriate under the circumstances. The objective of AWW calculation is to arrive at a "fair approximation" of the claimant's actual wage loss and diminished earning capacity because of the industrial injury. *Campbell v. IBM Corp*., 867 P.2d 77 (Colo. App. 1993).

As found, Claimant failed to prove his AWW is $1,560. In fact, Claimant failed to prove any specific AWW by a preponderance of the evidence. Arguably, this would result in an AWW of zero. However, Employer confessed an AWW of $118.77, which is a reasonable interpretation of the handwritten wage record. Given the absence of any persuasive evidence to the contrary, the ALJ accepts Employer's proposed AWW of $118.77 as the most appropriate calculation under the circumstances.

C. Claimant is entitled to TTD benefits from September 23, 2021 through September 28, 2021

A claimant is entitled to TTD benefits if the injury causes a disability, the disability causes the claimant to leave work, and the claimant misses more than three regular working days. *PDM Molding, Inc. v. Stanberg*, 898 P.2d 542 (Colo. 1995). The claimant must establish a causal connection between a work-related injury and the wage loss to obtain TTD benefits. *Id*. The term disability connotes two elements: (1) medical incapacity evidenced by loss or restriction of bodily function, and (2) impairment of wage-earning capacity as demonstrated by claimant's inability to resume his prior work. *Culver v. Ace Electric*, 971 P.2d 641 (Colo. 1999). Impairment of earning capacity may be evidenced by a complete inability to work, or by restrictions that impair the claimant's ability effectively and properly to perform her regular employment. *Ortiz v. Charles J. Murphy & Co.*, 964 P.2d 595 (Colo. App. 1998). A claimant need not present formal restrictions from a physician to establish entitlement to TTD benefits but can rely on any competent evidence to establish disability and associated wage loss. *Savio House v. Dennis*, 665 P.2d 141 (Colo. App. 1983).

No TTD benefits are payable for the first three days of an injury-related wage loss unless the total period of disability exceeds two weeks. Section 8-42-103(1)(a), (b).

As found, Claimant proved he is entitled to TTD benefits commencing September 23, 2021. He suffered a significant hand injury on September 20, 2021 that required him to leave work immediately and pursue emergent medical attention. Claimant was not paid for any work on September 20 because the injury happened shortly after he started his shift. After being discharged from the ER, Claimant reasonably required some brief period of convalescence while waiting for the orthopedic follow up. He returned to work on September 29, which is less than two weeks after the injury. Therefore, he is eligible for TTD from September 23, 2021 through September 28, 2021.

D. Claimant failed to prove entitlement to TTD after September 28, 2021

Once commenced, TTD benefits "shall continue" until the occurrence of an event enumerated in § 8-42-105(3)(a)-(d). One such terminating event is a return to "regular or modified employment," which in this case occurred on September 29, 2021.

Because his eligibility for TTD ceased when he returned to work, Claimant has the burden to reestablish entitlement to any subsequent period of TTD. Claimant's last day of work was October 19, 2021. As found, Claimant failed to prove he left work on or after October 19, 2021 because of the industrial injury. He stopped working for personal reasons unrelated to the injury, including lack of transportation. Accordingly, Claimant failed to prove entitlement to TTD from September 29, 2021 through March 23, 2022.

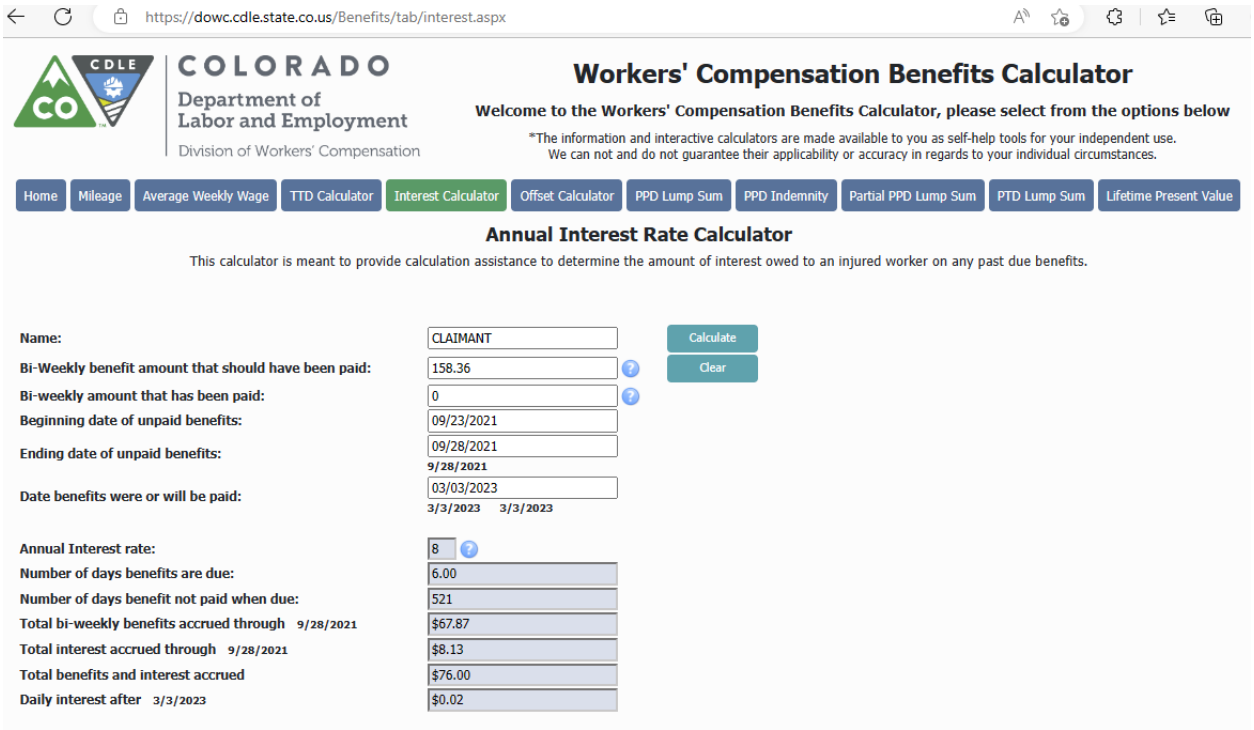
E. Respondent failed to prove Claimant willfully violated a safety rule

Section 8-42-112(1)(b) provides that an injured worker's indemnity benefits shall be reduced by 50% if the injury results from the willful failure to obey a reasonable safety rule adopted by the employer. The term "willful" means "with deliberate intent." *Bennett Properties Co. v. Industrial Commission*, 437 P.2d 548 (Colo. 1968). A claimant's conduct is "willful" if they intentionally performed the forbidden act or recklessly disregarded the duty to the employer. *Sayers v. American Janitorial Service, Inc*. 425 P.2d 693 (Colo. 1967). A safety rule need not be formally adopted or in writing to be effective. *Lori's Family Dining, Inc. v. Industrial Claim Appeals Office*, 907 P.2d 715 (Colo. App. 1995). Reduction of benefits under § 8-42-112(1)(b) is an affirmative defense that the respondents must prove by a preponderance of the evidence. *Id*.

Employer failed to prove Claimant willfully violated a safety rule. Although PM[Redacted] alleged a verbal rule against trying to clear a jam from the bucker, Claimant denied being told of any such rule. Employer produced no documentation, testimony of other witnesses (such as DC[Redacted]), or other persuasive evidence to substantiate the alleged safety rule. The only evidence on this point is PM's[Redacted] testimony. Given his obfuscations regarding Claimant's status as an employee, the ALJ is disinclined to credit PM's[Redacted] uncorroborated testimony to establish the existence of a safety rule.

F. Total TTD and statutory interest owed

Employers or insurers must pay statutory interest of 8% per annum on all benefits not paid when due. Section 8-43-410(2), C.R.S. Claimant's AWW of $118.77 corresponds to a TTD rate of $79.18 per week. Employer owes Claimant $67.87 for six days of TTD from September 23 through September 28, 2021 ($79.18 x 6/7 = $67.87). Employer also owes $8.13 in interest from September 23, 2021 through March 3, 2023. Interest will continue to accrue at the rate of $0.02 per day until the past-due TTD is paid. The accrued interest and ongoing daily interest were calculated using the Division of Workers' Compensation Benefits Calculator, which is available on the Division's website. https://dowc.cdle.state.co.us/Benefits/tab/interest.aspx



G. Penalty for failure to insure

Section 8-43-408(5) provides,

> In addition to any compensation paid or ordered . . . an employer who is not in compliance with the insurance provisions of [the Act] at the time an employee suffers a compensable injury or occupational disease shall pay an amount equal to twenty-five percent of the compensation or benefits to which the employee is entitled to the Colorado uninsured employer fund created in section 8-67-105.

The penalty for failure to insure only applies to indemnity benefits; it does not apply to medical benefits. *Industrial Commission v. Hammond*, 77 Colo. 414, 236 P. 1006 (1925); *Jacobson v. Doan*, 319 P.2d 975 (Colo. 1957); *Wolford v. Support, Inc.*, W.C. No. 4-155-231 (February 13, 1998). Although the ALJ is not aware of a case directly on point, statutory interest is not properly considered "compensation or benefits" within the meaning of 8-43-408(5). Interest is a statutory right intended to secure claimants the present value of benefits to which they are entitled by creating an equitable remedy for the lost time value of money during the accrual period. *Subsequent Injury Fund v. Trevethan*, 809 P.2d 1098 (Colo. App. 1991).

Employer has been ordered to pay Claimant $67.87 in TTD benefits. Twenty-five percent (25%) of the compensation awarded is $16.97.

H. Payment to Division trustee or a bond to secure payment of benefits

Employer was not insured for workers' compensation liability at the time of Claimant's injury. Under § 8-43-408(2), Employer must pay to the trustee of the Division of Workers' Compensation ("Division") an amount equal to the present value of all unpaid compensation or benefits, computed at 4% per annum. In the alternative, Employer may file a bond with the Division signed by two or more responsible sureties approved by the Director or by some surety company authorized to do business in Colorado. Employer may contact the Division trustee for assistance with its obligations in this regard. The total compensation, penalties, and interest Ordered herein is $92.97. The Division trustee may be contacted via telephone through the Division's customer service line at 303-318-8700, or via email to Gina Johannesman gina.johannesman@state.co.us. The Division can also help Employer calculate medical payments owed under the fee schedule.

ORDER

It is therefore ordered that:

1. Claimant's injury on September 20, 2021 is compensable.

2. Dr. Mark Porter is Claimant's primary authorized treating physician.

3. Employer shall cover reasonably necessary treatment from authorized providers to cure and relieve the effects of Claimant's injury, including Parkview Medical Center on September 20, 2021 and Dr. Mark Porter on and after September 29, 2021.

4. No medical bills were submitted at hearing, so no specific order for payment of medical expenses can be entered.

5. Claimant's average weekly wage is $118.77.

6. Employer shall pay Claimant $67.87 in TTD benefits from September 20, 2021 through September 28, 2021.

7. Employer shall pay Claimant $8.11 in statutory interest accrued through March 3, 2023 on past-due TTD. Interest will continue to accrue at the rate of $0.02 per day until the past-due TTD is paid in full.

8. Claimant's request for TTD benefits from September 29, 2021 through March 23, 2022 is denied and dismissed.

9. Employer's request for a 50% reduction in indemnity benefits for violation of a safety rule is denied and dismissed.

10. Employer shall pay $16.97 to the Colorado Uninsured Employer Fund. The check shall be payable to the Division of Workers' Compensation, 633 17th Street, 9th Floor, Denver, CO 80202, Attention Iliana Gallegos, Revenue Assessment Officer.

11. Employer shall notify the Division of Workers' Compensation and Claimant's attorney of payments made pursuant to this order.

12. In lieu of the direct payments set forth above, the Employer shall:

a. Deposit $92.97 with the Division of Workers' Compensation, as trustee, to secure payment of all unpaid compensation and benefits awarded. The check shall be payable to and sent to the Division of Workers' Compensation, 633 17th Street, Suite 900, Denver, Colorado 80202, Attention: Gina Johannesman, Trustee Special Funds Unit; or

b. File a surety bond in the amount of $92.97 with the Division of Workers' Compensation within ten (10) days of this order:

(1) Signed by two or more responsible sureties who have received prior approval of the Division of Workers' Compensation; or

(2) Issued by a surety company authorized to do business in Colorado.

The bond shall guarantee payment of the compensation, penalties and benefits awarded.

13. Filing any appeal, including a petition to review, shall not relieve Employer of the obligation to pay the designated sum to the Claimant, to the trustee or to file the bond as required by paragraph 11(b) above. Section 8-43-408(2), C.R.S.

14. Any interest that may accrue on a cash deposit shall be paid to the parties receiving distribution of the principal of the deposit in the same proportion as the principal, unless an agreement or Order authorizing distribution provides otherwise.

15. If Employer fails to pay the Claimant indemnity and/or medical benefits as ordered herein, Employer shall pay an additional 25% penalty to the Colorado Uninsured Employer Fund of the Colorado Division of Workers' Compensation, pursuant to § 8-43-408 (6), C.R.S.

16. All issues not decided herein are reserved for future determination.

If you are dissatisfied with this order, you may file a Petition to Review with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on the certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail by sending it to the above address for the **Denver Office of Administrative Courts** within twenty (20) days after mailing or service of the ALJ's order. In the alternative, you may file your Petition to Review electronically by email to the following email address: oac-ptr@state.co.us. If the Petition to Review is timely served via email, it is deemed filed in Denver pursuant to OACRP 26(A) and § 8-43-301, C.R.S. If the Petition to Review is filed by email to the proper email address, it need not also be mailed to the Denver Office of Administrative Courts. For

statutory reference, see § 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: https://oac.colorado.gov/resources/oac-forms

ISSUES

- Did Claimant prove he contracted COVID-19 on or about January 12, 2022 because of work-related exposure?
- What is Claimant's average weekly wage (AWW)?
- Did Claimant prove entitlement to TTD on or after January 12, 2022?
- Did Respondents prove Claimant was responsible for termination of his employment?
- Did Claimant prove treatment by Dr. Carl Swendsen was authorized and reasonably needed to cure and relieve the effects of his compensable injury?
- Did Claimant prove the COVID-19 aggravated his pre-existing pancreatitis?

FINDINGS OF FACT

1. Claimant worked as the Activity Director at Employer's nursing home. His duties primarily involved designing and implementing activity programs for the residents. He also ran a vending "cart" and engaged in "one-to-ones" with residents, performing activities such as playing games, reading, or simply holding their hands. Claimant was initially hired in 2011. He left the company in approximately 2016 because of a family medical situation. He was rehired by Employer in 2019 and remained employed until his termination on February 4, 2022.

2. Claimant contracted COVID-19 in January 2022. The threshold question in this case is whether the COVID exposure probably occurred at work.

3. The nursing home was in "outbreak" status according the CDHPE from December 27, 2021 through March 31, 2022.

4. Employer had several COVID-19 safety protocols in effect in late 2021 and early 2022. Employees were tested for COVID-19 when they reported to work each day. Employees were required to wear masks in all common areas, and frequently wore goggles and face shields. Residents of the nursing home were "encouraged" but not required to wear masks. Some residents wore masks consistently, but many did not. The residents generally had serious end-stage health issues, including dementia, and many had difficulty wearing their masks properly even when they remembered to do so. And some residents simply refused to wear masks at all. No resident was ever forced to wear a mask because, as Claimant and [Redacted, hereinafter ML] noted, "this isn't a prison" and "they have rights."

5. Claimant had close personal interactions with numerous residents during a typical shift, which the ALJ infers were commonly within the 6-foot "social distancing" recommended by public health officials during the pandemic.

6. Claimant worked closely with his assistant, [Redacted, hereinafter TH], on a daily basis. They shared an office, which Claimant referred to as a "pod." Claimant and TH[Redacted] routinely removed their PPE in their pod, which was allowed under Employer's policies.

7. TH[Redacted] tested positive for COVID-19 on December 26, 2021. Claimant had last been in close contact with TH[Redacted] the day before (December 25). TH[Redacted] stayed home four days and returned to work on December 30, 2021.

8. Claimant worked double shifts while TH[Redacted] was out with COVID, and continued working extended shifts until his positive COVID test on January 12.

9. Claimant started feeling ill on January 11, 2022. He felt feverish when he awoke on January 12, but his home thermometer registered 99.9 degrees, which was apparently within Employer's acceptable range. However, his temperature registered 103 degrees when he got to work. A rapid test was positive for COVID and Claimant was sent home.

10. Two or three other individuals at Employer's facility contracted COVID-19 between December 26, 2021 and January 12, 2022.

11. Claimant maintained a restricted and isolated lifestyle in late 2021 and early 2022 to minimize his risk of contracting COVID-19. He primarily ordered groceries online for delivery, and his wife did the remainder of any shopping in brick-and-mortar stores. They disinfected groceries and other items before bringing them into the house. Claimant avoided crowded locations and situations. His public contact was even more limited after December 26, 2021 because of his busy work schedule.

12. There is no persuasive evidence that any other member of Claimant's household was exposed to or contracted COVID shortly before or after January 12. Nor is there persuasive evidence Claimant had contact with anyone outside of work known to have COVID. Claimant's adult son was ill with COVID on December 27, 2022. However, there is no persuasive evidence Claimant was physically in contact with his son around that time period.

13. Dr. Carlos Cebrian performed an IME for Respondents on November 10, 2022. Dr. Cebrian opined it is not medically probable Claimant contracted COVID from a work-related exposure. He noted Claimant was last exposed to TH[Redacted] on December 25, 2021 and did not develop symptoms of COVID until January 11. This 17-day period is outside the maximum incubation period of COVID-19. Dr. Cebrian emphasized that Claimant generally wore masks and eye protection at work. He stated there was no specific prolonged exposure to anyone diagnosed with COVID while Claimant was at work, within the COVID incubation period. He opined the most common

exposures to COVID-19 are from close household contact. Dr. Cebrian concluded Claimant's risk of exposure to COVID-19 was "equal in and out of the workplace."

14. Dr. Cebrian's opinion that Claimant was equally exposed to the risk of contracting COVID-19 outside of work is not persuasive.

15. Claimant proved he probably contracted COVID-19 from exposure at work.

16. Employer provided no list of designated providers despite knowledge Claimant had contracted COVID. Claimant's employment file contains a designated provider list from his original hire date in 2011. The document references only two providers, which does not comply with the current statutory requirement to provide a list of at least four providers. Moreover, there is no persuasive evidence that Claimant recalled the nearly 11-year-old document when he contracted COVID in January 2022.

17. After testing positive for COVID-19, Claimant spoke with his PCP, Dr. Yang, by telephone. Dr. Yang did not want Claimant to come in, because he had active COVID. No treatment was offered and no record of the telephone conversation was created. The ALJ finds this brief telephone contact insufficient to constitute Claimant's "selection" of a treating physician.

18. Claimant quarantined for five days after his positive COVID test. He then took preplanned annual leave for several days. There is no persuasive evidence Claimant traveled or participated in any "recreational" activities during his leave. Based on Claimant's credible description of the ongoing effects of COVID, the ALJ infers Claimant probably used his annual leave to rest and convalesce.

19. Claimant proved he left work because of his injury on January 12, 2022 and suffered an injury-related wage loss.

20. Claimant returned to work on January 26, 2022. By that date, his symptoms had improved and he was no longer considered infectious per CDC guidelines. However, Claimant credibly testified he still felt "ill" despite the relative improvement. He could not move around as well as before and received help from coworkers completing tasks. Claimant's testimony in this regard is corroborated Dr. Swendsen's February 3, 2022 medical report stating he was "feeling very weak, having a hard time doing his job." Also on February 3, Claimant texted TH[Redacted] that his medical situation was "pretty rough" and that he had discussed a medical leave with his doctor. Additionally, at the time of his termination, Claimant was given the option of taking FMLA leave, which implies Employer knew he was continuing to have medical issues affecting his ability to work.

21. Claimant proved the injury caused reduced efficiency and impaired his ability to perform his regular work after he returned to work on January 26, 2022.

22. Claimant was suspended without pay[1] on January 29, and terminated on February 2, 2022. The termination arose out of a conflict between Claimant and a co-worker, [Redacted, hereinafter TP], on January 29. When Claimant arrived at work that morning, he noticed flyers had been posted in common areas regarding a planned event. Claimant was concerned about allowing outsiders into the facility because of COVID, and upset that the activity had been set up without his knowledge or input. Claimant took down the flyers. Later that afternoon, Claimant questioned TP[Redacted] about the flyers. TP[Redacted] had apparently posted the flyers at the behest of Claimant's supervisor, [Redacted, hereinafter LJ].

23. TP[Redacted] later complained to LJ[Redacted] that she felt intimidated and harassed during the conversation with Claimant. LJ[Redacted] obtained statements from two other employees, neither of whom testified at hearing. LJ[Redacted] also texted and spoke to Claimant, who stated he had asked TP[Redacted] about the flyers, and she told him to discuss it with LJ[Redacted]. Claimant said he ended the interaction because TP[Redacted] was "very defensive."

24. LJ[Redacted] suspended Claimant the evening of January 29, and terminated him on February 2, 2022. The facility's acting HR Director, [Redacted, hereinafter KL], testified Claimant was terminated for violation of Employer's policy against "discrimination, harassment, and retaliation." The sole basis for the termination was the incident with TP[Redacted]; any previous performance issues had "nothing to do with" Claimant's firing.

25. Claimant and TP[Redacted] have substantially different perceptions of their encounter on January 29. TP[Redacted] did not testify at hearing but her written statement was admitted without objection. TP[Redacted] stated Claimant approached her and "pressed the issue." TP[Redacted] "felt he was coming off aggressive, demanding answers from me." TP[Redacted] alleged "he was close to me and made me feel surrounded and extremely uncomfortable." She claimed she tried to end the conversation but he continued to pursue her about it. TP[Redacted] felt embarrassed by the incident.

26. For his part, Claimant denied that he was aggressive or demanding. Claimant testified he simply asked TP[Redacted] about the flyers, and she became "aggravated" and "defensive." Claimant denied raising his voice, using foul language, or crowding TP[Redacted]. Claimant testified he was confused and surprised by TP's[Redacted] reaction and did not understand why she had gotten so upset.

27. Claimant presented the testimony of [Redacted, hereinafter MO], a former resident of the facility, to corroborate his version of the events. MO[Redacted] witnessed the interaction between Claimant and TP[Redacted]. MO[Redacted] testified TP's[Redacted] written description of the incident was "not at all" consistent with her

[1] The parties did not submit wage records showing the exact date Claimant was last paid. However, Claimant's February 2, 2022 text message to "[Redacted, hereinafter md]" states he was told he would not be paid during the suspension if he was "found guilty." Because Claimant was ultimately terminated for the same incident that triggered the suspension, the ALJ infers his pay was stopped effective January 30, 2022.

recollection. She testified Claimant spoke to TP[Redacted] "in a normal tone of voice, not threatening, or aggressive or anything like that." MO[Redacted] disagreed that Claimant "followed" TP[Redacted] to her desk, "because she didn't go anywhere. She was at her desk already."

28. MO's[Redacted] testimony is credible.

29. Respondents failed to prove Claimant was responsible for termination of his employment.

30. Claimant has a longstanding history of pancreatitis. The medical records document treatment for pancreatitis dating to 2012. The initial records show pancreatitis attacks approximately yearly. They were managed primarily by pain medication. In 2016, Claimant's pancreatitis attacks became more frequent.

31. Claimant started treatment with Dr. Carl Swendsen, a gastroenterologist, in September 2018. At the time, Dr. Swendsen discussed a Whipple procedure, but Claimant did not believe his condition was bad enough to warrant such a drastic option.

32. Claimant was hospitalized overnight on August 31, 2020 for acute pancreatitis. Claimant was offered a celiac plexus block, but he declined. He had another attack in February 2021, and this time he agreed to a celiac block. The block was helpful and relieved the pancreatitis for approximately 6 months. Claimant had another pancreatitis attack in August 2021, which resolved within a week.

33. Claimant has been seeing a pain management nurse, Brent Persons, since February 2021 for pain related to pancreatitis and shoulder issues. Mr. Persons uses an unfortunate template for his electronic medical records which includes numerous repetitive "cloned" entries. The format of Mr. Persons' records severely limits their usefulness in tracking the ebb and flow of Claimant's symptoms over time. For instance, Mr. Persons' January 7, 2022 report stated Claimant was "in acute pancreatitis last visit" which had subsequently improved in the interim. But the corresponding note from the prior appointment (December 10, 2021) simply said Claimant's "medications are working and he would like to keep it the same," with no mention of any pancreatitis flare. Mr. Persons' records are given little weight.

34. Claimant saw Dr. Swendsen on February 3, 2022. Dr. Swendsen noted Claimant's recent case of COVID-19 was "much worse in regards to symptoms" than a previous bout in November 2020. Claimant felt he was "losing weight, feeling very weak, having a hard time doing his job." Dr. Swendsen recommended a repeat celiac plexus block, and hoped recurrent blocks every 6 months would keep the symptoms under control. He also recommended an upper endoscopy and magnetic resonance cholangiopancreatography (MRCP). This appointment with Dr. Swendsen represents the exercise of Claimant's right to select his treating physician.

35. The celiac block was performed on March 9, 2022.

36. Claimant saw Dr. Swendsen's PA-C, Courtney Frerichs, on April 21, 2022. Claimant reported an increase in his average pain level and no benefit from the celiac block. Claimant stated his overall symptoms had increased since the recent COVID and wondered if COVID had caused him to become more "sensitive."

37. The most recent treatment record in evidence is a June 14, 2022 appointment with Dr. Swendsen. Claimant felt a lot of his ongoing issues were related to COVID. He reported fatigue, headaches, "feeling foggy," and periodic "mini attacks" of pancreas pain. He was also having diarrhea, gas, cramping, and distention after eating. Dr. Swendsen thought Claimant's symptoms "sounded more like IBS-D than I've heard from him in the past." Dr. Swendsen recommended medications and indicated he would consider another celiac block if Claimant were not improved by the next visit.

38. Dr. Miguel Castrejon performed an IME for Claimant on November 7, 2022. Claimant reported needing additional pain medication since contracting COVID in January 2022. He described daily fatigue that limited his activities. He was having difficulty walking ¼ mile because of the fatigue. He also reported frequent headaches, decreased concentration, and frequent gastrointestinal distress. Dr. Castrejon reviewed Claimant's medical records in detail, including records of his pre- and post-COVID pancreatitis treatment. Dr. Castrejon also performed a medical literature search regarding any association between pancreatitis and COVID, as well as the effect of COVID on pre-existing pancreatitis. He found literature supporting an association between acute pancreatitis and COVID-19. Dr. Castrejon concluded, "it is my professional opinion that a relationship exists between the exposure to COVID and the 'new' development not only of gastrointestinal but also physical symptoms which have become quite debilitating and fairly unresponsive to treatment. The literature surrounding the relationship of COVID to the development of acute, and chronic, pancreatitis, as well as the aggravating effects upon pre-existing chronic pancreatitis cannot be ignored."

39. Respondents' IME, Dr. Cebrian, disagreed that COVID had any effect on Claimant's pre-existing pancreatitis. Dr. Cebrian opined Claimant's abdominal symptoms after his diagnosis of COVID-19 were very similar to the complaints and need for treatment he had for several years. Dr. Cebrian also disagreed that medical literature supported a causal connection between COVID and worsening pancreatitis. Although he did not think the COVID was work-related, even if it were, Claimant was at MMI with no impairment, no restrictions, and no need for treatment as of January 18, 2022.

40. Dr. Castrejon's opinions are credible and more persuasive than the contrary opinions offered by Dr. Cebrian.

41. Claimant proved the evaluations and treatment provided by and through Dr. Swendsen from February 3, 2022 through June 14, 2022 were reasonably needed to cure and relieve the effects of his compensable injury.

42. Claimant proved the work-related COVID-19 caused at least a temporary exacerbation of his pre-existing pancreatitis.

43. Claimant proved his injury contributed at least in part to his wage loss commencing January 30, 2022.

44. Claimant was a salaried employee, earning $45,000 per year on the date of injury. Claimant's AWW is $865.39, calculated by dividing his annual salary by 52 weeks ($45,000 ÷ 52 = $865.39).

CONCLUSIONS OF LAW

A. Compensability

To receive compensation or medical benefits, a claimant must prove they are a covered employee who suffered an injury arising out of and in the course of employment. Section 8-41-301(1); *Faulkner v. Industrial Claim Appeals Office*, 12 P.3d 844 (Colo. App. 2000); *Pacesetter Corp. v. Collett*, *33 P.3d 1230* (Colo. App. 2001). The claimant must prove entitlement to benefits by a preponderance of the evidence. *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979).

Claimant proved he probably contracted COVID-19 from exposure at work. Dr. Cebrian's opinion that Claimant was at least equally exposed to the risk of contracting COVID outside of work is not persuasive. Claimant spent the vast majority of his waking hours at work between December 26, 2021 and January 11, 2022. His work required frequent close contact with numerous individuals, many of whom were not wearing masks or taking other precautions. There were at least three individuals at Claimant's workplace who had COVID-19 in the 17 days before he became sick. Thereafter, the nursing home remained in outbreak status until March 31, 2022, which indicates COVID continued to spread through the facility for weeks after Claimant became infected. By contrast, Claimant had no known contact with anyone infected with COVID outside of work in the two weeks before he became ill. No one in Claimant's household contracted COVID around that time. Claimant maintained a restricted and isolated lifestyle in December 2021 and January 2022 which minimized his exposure to members of the public outside of work. Although Claimant's adult son had COVID on December 27, there is no persuasive evidence Claimant was in contact with his son. In fact, the ALJ infers Claimant would have avoided his son while he had COVID, given Claimant's anxiety over contracting COVID himself and passing it to the nursing home residents. In any event, any contact with his son before December 27 would have been outside the incubation period, according to Dr. Cebrian.

B. Average weekly wage

Section 8-42-102(2), C.R.S. provides that compensation is payable based on the employee's average weekly earnings "at the time of the injury." The statute sets forth several computational methods for workers paid on an hourly, salary, per diem basis, etc. But § 8-42-102(3) gives the ALJ wide discretion to "fairly" calculate the employee's AWW in any manner that is most appropriate under the circumstances. The entire objective of AWW calculation is to arrive at a "fair approximation" of the claimant's actual wage loss and diminished earning capacity because of the industrial injury. *Campbell v. IBM Corp*., 867 P.2d 77 (Colo. App. 1993).

Claimant advocates dividing his annual salary by 52 weeks to determine his AWW. Claimant's proposed methodology is reasonable, and Respondents offered no competing calculation or argument regarding AWW. Claimant's AWW is $865.39, with a corresponding TTD rate of $576.93 ($45,000 ÷ 52 = $865.39 x 2/3 = $576.93)

C. TTD benefits from January 12 through January 25, 2022

Claimant was disabled and suffered an injury-related wage loss from January 12, 2022 through January 25, 2022. Employer sent Claimant home based on his positive COVID test, so there is no reasonable dispute that Claimant left work on January 12 because of the injury. Thereafter, he was required to stay home for at least five days, which exceeds the minimum requirement of three shifts.

Once commenced, TTD benefits continue until one of the terminating events enumerated in § 8-42-105(3). In this case, Claimant's eligibility for TTD ended when he returned to work on January 26, 2022. Section 8-42-105(3)(b).

D. TTD benefits commencing January 30, 2022

Claimant seeks resumption of TTD benefits after his suspension. Respondents dispute Claimant's entitlement to TTD on two grounds. First, Respondents deny that Claimant was "disabled" after he returned to work on January 26. Second, Respondents argue TTD is barred because Claimant was responsible for termination of his employment.

A claimant is entitled to TTD benefits "in case of temporary total disability lasting more than three working days' duration." Section 8-42-105(1). Proof of "disability" is a threshold requirement for an award of TTD benefits. *PDM Molding, Inc. v. Stanberg*, 898 P.2d 542 (Colo. 1995). The concept of disability incorporates "medical incapacity" and "loss of wage earnings" proximately caused by the injury. *Montoya v. Industrial Claim Appeals Office*, 488 P.2d 314 (Colo. App. 2018). "Medical incapacity" does not necessarily mean complete inability to work, but can also be shown by reduced efficiency in the performance of regular job duties. *E.g., Ricks v. Industrial Claim Appeals Office*, 809 P.2d 1118 (Colo. App. 1991). A work injury need not be the sole cause of a wage loss; a disabled claimant is entitled to TTD benefits if the injury contributed "to some degree" to their wage loss. *PDM Molding, Inc. v. Stanberg, supra*. A claim for TTD benefits does not require formal work restrictions or expert opinions, but can be supported by any form of competent and persuasive evidence, including the claimant's testimony. *Savio House v. Dennis*, 665 P.2d 141 (Colo. App. 1983).

As found, Claimant proved the injury caused reduced efficiency and impaired his ability to perform his regular work on and after January 26, 2022. Claimant credibly testified he still felt "ill" when he went back to work despite the relative improvement from the initial onset of COVID. He could not move around as well as before and received help from coworkers. Claimant's testimony in this regard is corroborated by Dr. Swendsen's February 3, 2022 medical report stating he was "feeling very weak, having a hard time doing his job." Also on February 3, Claimant texted TH[Redacted] that his medical situation was "pretty rough" and that he had discussed a medical leave with his doctor. Additionally, at the time of his termination, Claimant was given the option of taking FMLA leave, which implies Employer knew he was continuing to have medical issues affecting his ability to work.

Claimant also proved the work injury contributed "to some degree" to his wage loss after his termination. The persuasive evidence shows Claimant continued to suffer symptoms and associated limitations that reasonably limited his ability to sustain work, including severe fatigue, weakness, headaches, "foggy" thinking, pancreatic pain, and chronic diarrhea. On June 14, 2022, Dr. Swendsen noted Claimant wanted to work but was "fully disabled." Similarly, Dr. Castrejon considered Claimant "temporarily totally disabled."

E. Claimant was not responsible for termination

Respondents argue they are not liable for TTD after Claimant stopped working on January 29, 2022 because Claimant was responsible for termination of his employment.

Sections 8-42-103(1)(g) and 8-42-105(4)(a) provide:

> In cases where it is determined that a temporarily disabled employee is responsible for termination of employment, the resulting wage loss shall not be attributable to the on-the-job injury.

The "termination statutes" are an affirmative defense to a claim for temporary disability benefits. The respondents must prove by a preponderance of the evidence the claimant was terminated for cause or was responsible for the separation from employment. *Gilmore v. Industrial Claim Appeals Office*, 187 P.3d 1129, 1132 (Colo. App. 2008). This requires proof that the claimant performed a "volitional act" or otherwise exercised "some degree of control over the circumstances which led to the termination." *Colorado Springs Disposal v. Industrial Claim Appeals Office*, 58 P.3d 1061, 1062 (Colo. App. 2002); *Padilla v. Digital Equipment Corp*., 902 P.2d 414 (Colo. App. 1995); *Velo v. Employment Solutions Personnel*, 988 P.2d 1139 (Colo. App. 1988). The concept of "volitional conduct" is not necessarily related to culpability, but instead requires the exercise of some control or choice in the circumstances leading to the discharge. *Richards v. Winter Park Recreational Association*, 919 P.2d 983 (Colo. App. 1996). The ALJ must consider the totality of the circumstances to determine whether the claimant was responsible for their termination. *Knepfler v. Kenton Manor*, W.C. No. 4-557-781 (March 17, 2004).

Respondents failed to prove Claimant was responsible for termination of employment. The sole basis for Claimant's termination was the interaction between Claimant and TP[Redacted] on January 29, 2022. TP's[Redacted] written statement indicates she personally felt uncomfortable and embarrassed. But Claimant cannot be said to have acted "volitionally" if he had no reasonable basis to anticipate his co-worker's subjective reaction. Respondents presented insufficient persuasive evidence to prove that Claimant engaged in harassment, retaliation, discrimination, or any other behavior prohibited by Employer's policies. Respondents offered no sworn testimony of any witness with firsthand personal knowledge of the incident. By contrast, Claimant disputed TP's[Redacted] account at hearing, and his testimony was corroborated by MO[Redacted]. No reasonable employee would expect to be terminated for the interaction

described by Claimant and MO[Redacted]. Respondents failed to prove Claimant performed a volitional act he should reasonably have expected to lead to his termination.

F. Right of selection

Under § 8-43-404(5), the employer has the right to choose the treating physician in the first instance. The employer must tender medical treatment "forthwith," or the right of selection passes to the claimant. *Rogers v. Industrial Claim Appeals Office*, 746 P.2d 565 (Colo. App. 1987). To properly exercise its right of selection, the employer must give the claimant a list of at least four providers from which he can choose. Section 8-43-404(5)(a)(I)(A). The effectiveness of a pre-injury designation by the employer turns on whether it gave the claimant actual notice of the employer's designated providers "at the time of the injury." *Trujillo v. Oppenheimer Management Corp*., W.C. 4-143-750 (August 9, 1993). In resolving this question, the ALJ may consider factors such as the nature of the notice given by the employer, how recently the notice was provided, and the claimant's individual capacity to recall the notice. *Jones v. Weld County Government*, W.C. No. 4-176-234 (December 8, 1996).

Claimant proved he had the right to select his own treating physician. Employer provided Claimant no list of designated providers despite knowing he had contracted COVID. Claimant's employment file contains a designated provider list from his original hire date in 2011. The document references only two providers, and therefore does not comply with the current statutory requirement to provide a list of at least four providers. Moreover, there is no persuasive evidence that Claimant recalled the nearly 11-year-old document when he contracted COVID in January 2022.

G. Claimant selected Dr. Swendsen

A claimant "selects" a physician when he demonstrates by words or conduct that he has chosen a physician to treat the injury. *Squitieri v. Tayco Screen Printing*, W.C. No. 4-421-960 (September 18, 2000).

The persuasive evidence shows Claimant selected Dr. Swendsen as his ATP. Although Claimant initially contacted his PCP, Dr. Yang by telephone, he was not offered an appointment because of his active COVID. Dr. Yang offered no treatment and made no record of the telephone conversation. There is no persuasive evidence Claimant ever saw Dr. Yang for any issues related to the January 2022 COVID diagnosis. A claimant does not "fully exercise" the right of selection unless the chosen physician is willing to treat the industrial injury. *Ruybal v. University Health Sciences Center*, 768 P.2d 1259 (Colo. App. 1988). The brief telephone contact with Dr. Yang was insufficient to constitute Claimant's "selection" of a treating physician.

Dr. Swendsen was the first physician Claimant saw after contracting COVID, and he continued to follow up with Dr. Swendsen's office thereafter. These factors persuasively demonstrate that Claimant selected Dr. Swendsen as his ATP.

H. Medical treatment

The respondents are liable for medical treatment reasonably necessary to cure and relieve the effects of an industrial injury. Section 8-42-101(1)(a); *Snyder v. Industrial Claim Appeals Office*, 942 P .2d 1337 (Colo. App. 1997). However, the mere occurrence of a compensable injury does not compel the ALJ to find that all subsequent treatment was causally related to the injury. *Snyder v. City of Aurora*, 942 P.2d 1337 (Colo. App. 1997); *McIntyre v. KI, LLC*, W.C. No. 4-805-040 (July 2, 2010). Where the respondents dispute the claimant's entitlement to medical benefits, the claimant must prove that an injury directly and proximately caused the condition for which they are seeking benefits. *Wal-Mart Stores, Inc. v. Industrial Claim Appeals Office*, 989 P.2d 251 (Colo. App. 1999); *Snyder v. Industrial Claim Appeals Office*, 942 P.2d 1337 (Colo. App. 1997).

Dr. Swendsen treated Claimant on and after February 3, 2022 for ongoing symptoms related at least in part to COVID-19. Claimant proved the evaluations and treatment provided by and through Dr. Swendsen from February 3, 2022 through June 14, 2022 were reasonably needed to cure and relieve the effects of his compensable injury.

Claimant proved he suffered at least a temporary aggravation of his pancreatis, which caused a need for treatment and contributed to his temporary disability. Claimant repeatedly described worsened symptoms to Dr. Swendsen starting with the February 3, 2022 appointment, which he attributed at least partially to COVID. Dr. Castrejon cited medical literature showing an association between COVID and pancreatitis. After reviewing Claimant's history in detail, Dr. Castrejon opined Claimant's increased symptoms were causally related to COVID-19. Dr. Castrejon's opinions are credible and more persuasive than the contrary opinions offered by Dr. Cebrian.

Claimant argues the COVID "permanently" aggravated his pancreatitis. But a determination of whether the aggravation is "permanent" is premature at this time. No ATP has opined that Claimant is at MMI, and the ALJ has no jurisdiction to determine permanency. Additionally, the only post-COVID pancreatitis treatment documented in the record consists primarily of evaluations, diagnostic testing, and conservative treatments. It is therefore unnecessary, and would be inappropriate, to make findings and conclusions regarding the full extent of any aggravation, or speculate about other treatment that might be recommended in the future.

ORDER

It is therefore ordered that:

1. Claimant's claim for workers' compensation benefits is compensable.

2. Claimant's average weekly wage is $865.39, with a corresponding TTD rate of $576.93.

3. Insurer shall pay Claimant TTD benefits at the rate of $576.93 per week from January 12, 2022 through January 25, 2022, and from January 30, 2022 until terminated by law.

4. Insurer shall pay Claimant statutory interest of 8% per annum on all compensation not paid when due.

5. Respondents' defense that Claimant was responsible for termination of his employment is denied and dismissed.

6. Dr. Carl Swendsen is Claimant's ATP.

7. Insurer shall cover medical treatment reasonably needed to cure and relieve the effects of Claimant's compensable injury, including but not limited to evaluations and treatment provided by and through Dr. Swendsen from February 3, 2022 through June 14, 2022.

8. All issues not decided herein are reserved for future determination.

If you are dissatisfied with this order, you may file a Petition to Review with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on the certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail by sending it to the above address for the **Denver Office of Administrative Courts** within twenty (20) days after mailing or service of the ALJ's order. In the alternative, you may file your Petition to Review electronically by email to the following email address: oac-ptr@state.co.us. If the Petition to Review is timely served via email, it is deemed filed in Denver pursuant to OACRP 26(A) and § 8-43-301, C.R.S. If the Petition to Review is filed by email to the proper email address, it need not also be mailed to the Denver Office of Administrative Courts. For statutory reference, see § 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: https://oac.colorado.gov/resources/oac-forms

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. WC 5-193-443-003

ISSUES

1. Whether Claimant has established by a preponderance of the evidence that he suffered compensable industrial injuries during the course and scope of his employment with Employer on January 3, 2022.

2. Whether Claimant has demonstrated by a preponderance of the evidence that he is entitled to reasonable, necessary and causally related medical benefits for his January 3, 2022 industrial injuries.

3. Whether Claimant has established by a preponderance of the evidence that he is entitled to receive Temporary Total Disability (TTD) benefits for the period January 4, 2022 until terminated by statute.

4. Whether Respondents have demonstrated by a preponderance of the evidence that Claimant was responsible for his termination from employment under §§8-42-105(4) & 8-42-103(1)(g) C.R.S. (collectively "termination statutes") and is thus precluded from receiving TTD benefits after February 22, 2022.

STIPULATIONS

The parties agreed to the following:

1. If Claimant suffered compensable injuries while working for Employer, Concentra Medical Centers is the designated provider.

2. Claimant earned an Average Weekly Wage (AWW) of $1,346.15.

3. Any entitlement to TTD benefits will be offset by Claimant's receipt of unemployment benefits.

FINDINGS OF FACT

1. Claimant is a 53-year-old male who began working for Employer as a Building Engineer on November 11, 2021. He was responsible for building operations including electrical, plumbing and HVAC services. Claimant's job duties required lifting up to 50 pounds, crawling, kneeling, squatting and climbing.

2. On January 3, 2022 Claimant was at work pushing a cart up a hill transporting a large HVAC box. He slipped on ice and fell in somewhat of a "superman" position. Claimant struck his left knee on the ground and twisted his left hip. Because the accident occurred later in the day, he reported the incident to Employer's Assistant Property Manager [Redacted, hereinafter HN].

3. HN[Redacted] testified that on January 3, 2022 Claimant stated he had injured his left knee while moving boxes. She noted that Claimant reported the incident to her because she was the only person in the office. HN[Redacted] asked Claimant whether he wanted to complete an incident report, but he declined. Claimant recounted that he had a "bad knee," which he had previously injured, and there was no need for an incident report. Claimant planned to drive home, apply an ice pack and place a brace on his left knee.

4. Claimant has not worked for Employer since January 3, 2022. Employer placed Claimant on medical leave after the injuries.

5. On January 4, 2022 Claimant visited the Littleton Adventist Emergency Department for treatment. Claimant reported left lower back and left leg pain after he slipped and fell at work on the previous day. Claimant explained that when he fell on ice his left knee flexed and he landed on his left hip. He remarked that he has subsequently experienced numbness in his entire left leg as well as his left gluteal area. Physical examination showed no swelling or deformity. Claimant also exhibited normal range of left knee motion. An x-ray of the left knee noted that there was no acute bony abnormality.

6. On February 10, 2022 Claimant visited Thomas J. Corson, D.O at Concentra Medical Centers for an evaluation. He reported that on December 25, 2021 he was pushing a large load of AC filters on a dolly at work and slipped on ice. The momentum of the cart forced him to twist and land on his knees. Claimant injured his left leg from ankle to thigh. His hip was also sore with numbing pain. Dr. Corson assessed Claimant with a left hip strain, left knee strain and radicular pain of the left lower extremity. He determined that Claimant's work-related diagnoses included the following: (1) left hip strain; (2) left knee strain; and (3) radicular pain of the left lower extremity. Dr. Corson assigned work restrictions of no lifting, carrying or pushing/pulling in excess of 15 pounds. He also directed Claimant to sit 50% of the time, not use ladders and limit his use of stairs.

7. Employer's Human Resource Specialist [Redacted, hereinafter KL] testified at the hearing in this matter. Her job duties involved general human resource needs including recruiting, Worker's Compensation, payroll and performance management. KL[Redacted] noted that Employer initiated Claimant's background check on October 29, 2021. She explained that because of the COVID pandemic there were delays in completing background checks. The partial background check was not finished until December 1, 2022.

8. KL[Redacted] explained that on December 8, 2020 she spoke to Claimant about offenses that had been revealed on his partial criminal background check. A December 8, 2020 e-mail documented the conversation. Notably, the results revealed guilty pleas to the felonies of first degree forgery and theft by taking, and a nolo contendere plea to the misdemeanor of theft/shoplifting. KL[Redacted] sought court documentation from Claimant regarding the felony convictions and instructed him about how to dispute the misdemeanor. In the December 8, 2020 discussion with Claimant, KL[Redacted] recorded that he attributed the felonies to his association with his girlfriend

and denied the misdemeanor. KL[Redacted] asked Claimant whether there were any other items that might appear on the finalized background check and he replied "no."

9. On January 10, 2022 KL[Redacted] received an e-mail from [Redacted, hereinafter KS] stating that Claimant's background check had been completed and some discrepancies had been identified. In addition to the offenses delineated in the initial background check, the completed document revealed a misdemeanor theft by taking conviction with a disposition date of March 26, 2014. There was also a felony cocaine possession conviction and the misdemeanor of possession and use of drug related objects with disposition dates of July 28, 2015. The finalized check further revealed a felony cocaine possession conviction and the misdemeanor of possession of drug related objects with dispositions dated September 19, 2016. Finally, the background check showed a felony probation violation with a disposition date of August 28, 2017.

10. KL[Redacted] received the completed background check on January 12, 2022. She testified that, although Claimant had denied additional criminal activities would be revealed on the completed background check, the document reflected cocaine convictions. In fact, the completed background check showed two felonies and misdemeanors related to possession of cocaine and drug related objects, along with an additional felony for a probation violation.

11. KL[Redacted] subsequently engaged in e-mail correspondence with KS[Redacted] and [Redacted, hereinafter AL]. Based on the discussions, KS[Redacted] sent Claimant an adverse action letter on February 10, 2022. On February 22, 2022 [Redacted hereinafter KM] sent an e-mail to Claimant terminating his employment with Employer. She remarked that the termination was based on the contents of the background check because it was "not clear by our standards." KL[Redacted] elaborated that Claimant's termination was predicated on the extent of the offenses in the background check and his failure to disclose the cocaine convictions when asked if the completed background check would reveal any other offenses.

12. Claimant testified that the February 22, 2022 e-mail did not contain any specific reason for his termination from employment. He explained that he discussed the circumstances surrounding his cocaine conviction in the meeting with KL[Redacted] on December 8, 2020. Claimant remarked that it was his understanding that his explanation about the cocaine conviction was acceptable to Employer. Notably, Claimant denied a history of any felonies besides those related to cocaine. However, despite Claimant's testimony, his criminal history reveals felony forgery, felony theft by taking, and a felony probation violation. Claimant explained that the felony forgery charge was a conviction that was not supposed to be on his record. Furthermore, Claimant justified failing to mention the forgery conviction by stating that he only informed Employer of the most current charge on his record.

13. Claimant subsequently continued to receive treatment through Concentra. On February 25, 2022 he reported worsening left knee symptoms. After conducting a physical examination, Dr. Corson noted that, because Claimant's problems had been continuing for two months, it was imperative to reach a diagnosis. He referred Claimant

for a left knee MRI to determine whether any surgical pathology was present and avoid any further delay in treatment. Dr. Corson maintained that Claimant's objective findings were consistent with a work-related mechanism of injury.

14. On March 11, 2022 Claimant underwent a left knee MRI at Invision Sally Jobe and returned to Concentra for an evaluation. He reported that his symptoms were unchanged. Claimant continued to suffer constant aching pain in the left lateral hip, left buttock and left thigh. The left knee MRI revealed "a small 5 mm nondisplaced bony fracture fragment with adjacent bone marrow edema and soft tissue edema." The radiologist commented the fracture was not visualized on the prior radiographs from January 4, 2022, but the finding was age indeterminate and could be acute or subacute. David W. Hnida, D.O. concluded that Claimant's objective findings were consistent with a work-related mechanism of injury.

15. On March 22, 2022 Claimant underwent an orthopedic evaluation with Cary Motz, M.D. at Concentra. Claimant reported that on January 3, 2022 he landed directly on his left knee at work. He immediately experienced left knee and hip pain. Dr. Motz remarked that the left knee MRI had revealed a nondisplaced distal pole patella fracture with no internal derangement. He commented that the fracture was the source of Claimant's discomfort with stairs and kneeling. Furthermore, Claimant's left hip had some trochanteric bursitis that was not surprising because of limping. Dr. Motz was optimistic that Claimant's symptoms would improve, but considered a possible steroid injection into the trochanteric bursa. He remarked that Claimant's objective findings were consistent with a work-related mechanism of injury.

16. On April 26, 2022 Claimant returned to Dr. Hnida at Concentra for an examination. He reported that his left knee symptoms were much worse and he was experiencing significant difficulties with stairs. Claimant commented that he was also starting to suffer right knee pain and instability to the point where he has fallen several times. After performing a physical examination, Dr. Hnida assessed Claimant with a left patella fracture, left hip strain and trochanteric bursitis of the left hip. He referred Claimant for physical therapy. Dr. Hnida reiterated that Claimant's objective findings were consistent with a work-related mechanism of injury.

17. On June 14, 2022 Claimant visited Dr. Motz at Concentra for an examination. Claimant reported significant improvement in his left knee pain after a steroid injection five weeks earlier. After conducting a physical examination, Dr. Motz diagnosed Claimant with the following: (1) left knee healed inferior pole patellar fracture; (2) patellofemoral pain; and (3) mild, persistent left trochanteric bursitis of the left hip. He recommended physical therapy but a date of Maximum Medical Improvement (MMI) was unknown. Dr. Motz maintained that Claimant's objective findings were consistent with a work-related mechanism of injury.

18. Claimant's work restrictions have remained in effect throughout the duration of his medical treatment with Concentra. His restrictions include no lifting, carrying or pushing/pulling in excess of 15 pounds. He was also directed to sit 50% of the time, not use ladders and limit his use of stairs. Claimant testified that he has been unable to

perform his job duties of heavy lifting, crawling, kneeling, squatting, and climbing beginning January 3, 2022 through the date of hearing in this matter.

19. On July 20, 2022 Claimant underwent an independent medical examination with Allison Fall, M.D. Claimant recounted that he was pushing a cart up a hill with a large HVAC box on top when he slipped on ice and fell in somewhat of a superman position. His left knee struck the ground and his left hip twisted. Dr. Fall reviewed Claimant's medical records and conducted a physical examination. She assessed Claimant with the following: (1) left knee pain with grade 4 degenerative changes at the lateral tibial plateau and nondisplaced distal patellar pole fracture; (2) left hip muscular pain; and (3) occasional low back pain. She noted that Claimant's subjective complaints outweighed objective findings. Dr. Fall explained that she was unable to determine whether Claimant's bony abnormality at the distal pole of the patella was caused by the January 3, 2022 work incident because it was not visualized on initial x-rays. She was unable to state within a reasonable degree of medical probability that any of Claimant's complaints were caused by his work activities on January 3, 2022.

20. On November 8, 2022 the parties conducted the pre-hearing evidentiary deposition of Dr. Fall. She testified that the x-ray of Claimant's left knee taken on January 4, 2022 did not identify any bony abnormalities or fractures at the distal pole of the patella. Dr. Fall further remarked that the x-ray was sensitive enough to pick up a fracture if it had been present on January 4, 2022.

21. Dr. Fall explained that Claimant's January 4, 2022 physical examination at Littleton Adventist Hospital showed no swelling. If Claimant had suffered a fracture on January 3, 2022, then swelling would have been present. Claimant's physical examination was also not consistent with an acute injury or a distal pole patella fracture. Dr. Fall commented that Claimant's objective findings simply did not support a work-related injury and he does not require any additional medical treatment. She summarized that, based on the absence of x-ray findings, lack of swelling or tenderness on physical examination, and Claimant's ability to extend his knee on January 4, 2022, his patellar fracture must have occurred after January 4, 2022.

22. Claimant has established it is more probably true than not that he suffered compensable injuries during the course and scope of his employment with Employer on January 3, 2022. Initially, on January 3, 2022 Claimant was at work pushing a cart up a hill transporting a large HVAC box. He slipped on ice and fell in somewhat of a "superman" position. Claimant struck his left knee on the ground and twisted his left hip. On January 4, 2022 Claimant visited the Littleton Adventist Emergency Department for treatment. Although Claimant reported left lower back and left leg pain after he slipped and fell on ice at work on the previous day, a physical examination showed no swelling or deformity. Furthermore, an x-ray of the left knee noted there was no acute bony abnormality.

23. After Claimant received additional treatment through Concentra, on February 25, 2022 Dr. Corson ordered an MRI to determine whether any surgical pathology was present and avoid any further delay in treatment. The left knee MRI revealed "a small 5 mm nondisplaced bony fracture fragment with adjacent bone marrow

edema and soft tissue edema." The radiologist commented the fracture was not visualized on the prior radiographs from January 4, 2022, but the finding was age indeterminate and could be acute or subacute.

24. On July 20, 2022 Dr. Fall conducted an independent medical examination of Claimant and was unable to determine whether the bony abnormality at the distal pole of the patella was caused by the January 3, 2022 work incident. She reasoned that the bony abnormality was not visualized on initial x-rays. Dr. Fall concluded that she was unable to state within a reasonable degree of medical probability that any of Claimant's complaints were caused by his work activities on January 3, 2022. She subsequently testified that Claimant's January 4, 2022 physical examination was also inconsistent with an acute injury or a distal pole patella fracture. Dr. Fall thus summarized that, based on the absence of x-ray findings, lack of swelling or tenderness on physical examination, and Claimant's ability to extend his knee at the Littleton Adventist Emergency Department, his patellar fracture must have occurred after January 4, 2022.

25. Despite Dr. Fall's testimony, the record is replete with evidence that Claimant likely suffered compensable injuries during the course and scope of his employment with Employer on January 3, 2022. Initially, despite minor date discrepancies, the record reflects that Claimant has consistently maintained he sustained injuries to his left hip and knee as a result of a slip and fall on ice at work while he was using a dolly to push a large load of AC filters. Moreover, the Concentra medical records reveal that Claimant's treating physicians have attributed Claimant's injuries to his slip and fall. Specifically, Drs. Corson, Motz and Hnida all persuasively emphasized that Claimant's objective findings were consistent with a work-related mechanism of injury. Notably, the preceding physicians were aware of the absence of x-ray findings of a pole patellar fracture on January 4, 2022. However, because the subsequent MRI revealed a nondisplaced distal pole patella fracture, the Concentra physicians attributed the injury to Claimant's slip and fall at work. Based on Claimant's consistent account of his mechanism of injury, the MRI revealing a left knee nondisplaced distal pole patella fracture and the persuasive medical opinions of Drs. Corson, Motz and Hnida, Claimant likely suffered injuries at work on January 3, 2022. Claimant's work activities aggravated, accelerated or combined with his pre-existing condition to produce a need for medical treatment.

26. Claimant has demonstrated that it is more probably true than not that he is entitled to reasonable, necessary and causally related medical benefits for his January 3, 2022 industrial injuries. His medical treatment at Littleton Adventist Emergency Department, Concentra and Invision Sally Jobe was designed to address the work injuries he sustained on January 3, 2022. Claimant specifically underwent examinations, physical therapy, injections and diagnostic testing to assess and treat the effects of his industrial injuries. All of Claimant's medical treatment was reasonable and necessary to cure or relieve the effects of his work injuries. Accordingly, Respondents are financially responsible for all of Claimant's reasonable, necessary and causally related medical benefits for his January 3, 2022 industrial injuries.

27. Claimant has proven that it is more probably true than not that he is entitled to receive Temporary Total Disability (TTD) benefits for the period January 4, 2022 until

terminated by statute. The record reveals that Claimant's January 3, 2022 industrial injuries caused a disability lasting more than three work shifts, he left work as a result of the disability and the disability resulted in an actual wage loss. The record reveals that Claimant suffered injuries as a result of his slip and fall at work that impaired his ability to effectively and properly perform his regular employment.

28. Claimant's work restrictions have remained in effect throughout the duration of his medical treatment with Concentra. His restrictions include no lifting, carrying or pushing/pulling in excess of 15 pounds. He was also directed to sit 50% of the time, not use ladders and limit his use of stairs. Claimant credibly testified that he has been unable to perform his job duties including heavy lifting, crawling, kneeling, squatting, and climbing beginning January 3, 2022 through date of hearing. He has not returned to work for Employer and has not earned income from any other source since the slip and fall. Accordingly, Claimant is entitled to receive TTD benefits for the period January 3, 2022 until terminated by statute.

29. Although Claimant has established that he is entitled to receive TTD benefits, Respondents have demonstrated that it is more probably true than not that he was responsible for his termination from employment under the termination statutes. Claimant is thus precluded from receiving TTD benefits after February 22, 2022. Initially, on December 8, 2021 KL[Redacted] spoke to Claimant about offenses that had been revealed on his partial criminal background check. Notably, the results reflected guilty pleas to the felonies of first degree forgery and theft by taking, and a nolo contendere plea to the misdemeanor of theft/shoplifting. KL[Redacted] sought court documentation from Claimant regarding the felony convictions and instructed him about how to dispute the misdemeanor. In the December 8, 2020 discussion with Claimant, KL[Redacted] recorded that he attributed the felonies to his association with his girlfriend and denied the misdemeanor. KL[Redacted] asked Claimant whether there were any other items that might appear on a completed background check and he replied "no."

30. KL[Redacted] received the completed background check on January 12, 2022. She testified that, although Claimant had denied that any additional criminal activities would be revealed on the completed background check, the document reflected cocaine convictions. In fact, the finalized background check showed two felonies and misdemeanors related to possession of cocaine and drug related objects, along with an additional felony for a probation violation. Claimant explained that he discussed the circumstances surrounding his cocaine conviction in the meeting with KL[Redacted] on December 8, 2020. He denied a history of any felonies besides those related to cocaine. Despite Claimant's testimony, his criminal history reveals felony forgery, felony theft by taking, and a felony probation violation.

31. On February 22, 2022 Claimant was terminated from employment with Employer. The termination was based on the contents of the background check because it was "not clear by our standards." KL[Redacted] credibly elaborated that Claimant's termination was predicated on the extent of the offenses in the background check and his failure to disclose the cocaine convictions when asked if the completed background check would reveal any other offenses. Although Claimant stated that he disclosed his cocaine

charges to Employer on December 8, 2021, the record reveals that Employer was unaware of the convictions until a later date. Specifically, KL[Redacted] credibly explained that she was unaware of the cocaine charges on December 8, 2021 and did not receive information about the offenses until January 12, 2022. The extent of Claimant's criminal history and failure to disclose that additional criminal activities would be revealed on the completed background check reflects that he precipitated his employment termination by a volitional act that he would have reasonably expected to cause the loss of employment. Under the totality of the circumstances Claimant committed a volitional act or exercised some control over his termination from employment. Respondents has thus demonstrated that it is more probably true than not that Claimant is precluded from receiving TTD benefits for the period February 23, 2022 until terminated by statute.

CONCLUSIONS OF LAW

1. The purpose of the "Workers' Compensation Act of Colorado" (Act) is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of any litigation. §8-40-102(1), C.R.S. A claimant in a Workers' Compensation claim has the burden of proving entitlement to benefits by a preponderance of the evidence. §8-42-101, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979); *People v. M.A.*, 104 P.3d 273, 275 (Colo. App. 2004). The facts in a Workers' Compensation case are not interpreted liberally in favor of either the rights of the injured worker or the rights of the employer. §8-43-201, C.R.S. A Workers' Compensation case is decided on its merits. §8-43-201, C.R.S.

2. The Judge's factual findings concern only evidence that is dispositive of the issues involved; the Judge has not addressed every piece of evidence that might lead to a conflicting conclusion and has rejected evidence contrary to the above findings as unpersuasive. *See Magnetic Engineering, Inc. v. ICAO,* 5 P.3d 385, 389 (Colo. App. 2000).

3. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *See Prudential Insurance Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); CJI, Civil 3:16 (2007).

Compensability

4. For a claim to be compensable under the Act, a claimant has the burden of proving that he suffered a disability that was proximately caused by an injury arising out of and within the course and scope of employment. §8-41-301(1)(c) C.R.S.; *In re Swanson,* W.C. No. 4-589-645 (ICAO, Sept. 13, 2006). Proof of causation is a threshold requirement that an injured employee must establish by a preponderance of the evidence before any compensation is awarded. *Faulkner v. Indus. Claim Appeals Off.,* 12 P.3d 844,

846 (Colo. App. 2000); *Singleton v. Kenya Corp.,* 961 P.2d 571, 574 (Colo. App. 1998). The question of causation is generally one of fact for determination by the Judge. *Faulkner,* 12 P.3d at 846.

5. A pre-existing condition or susceptibility to injury does not disqualify a claim if the employment aggravates, accelerates or combines with the pre-existing condition to produce a need for medical treatment. *Duncan v. Indus. Claim Appeals Off.,* 107 P.3d 999, 1001 (Colo. App. 2004). A compensable injury is one that causes disability or the need for medical treatment. *City of Boulder v. Payne*, 162 Colo. 345, 426 P.2d 194 (1967); *Mailand v. PSC Indus. Outsourcing LP*, W.C. No. 4-898-391-01, (ICAO, Aug. 25, 2014).

6. The mere fact a claimant experiences symptoms while performing work does not require the inference that there has been an aggravation or acceleration of a pre-existing condition. *See Cotts v. Exempla, Inc.,* W.C. No. 4-606-563 (ICAO, Aug. 18, 2005). Rather, the symptoms could represent the "logical and recurrent consequence" of the pre-existing condition. *See F.R. Orr Construction v. Rinta,* 717 P.2d 965 (Colo. App. 1985); *Chasteen v. King Soopers, Inc.*, W.C. No. 4-445-608 (ICAO, Apr. 10, 2008). As explained in *Scully v. Hooters of Colorado Springs,* W.C. No. 4-745-712 (ICAO, Oct. 27, 2008), simply because a claimant's symptoms arise after the performance of a job function does not necessarily create a causal relationship based on temporal proximity. The panel in *Scully* noted that "correlation is not causation," and merely because a coincidental correlation exists between the claimant's work and his symptoms does not mean there is a causal connection between the claimant's injury and work activities.

7. As found, Claimant has established by a preponderance of the evidence that he suffered compensable injuries during the course and scope of his employment with Employer on January 3, 2022. Initially, on January 3, 2022 Claimant was at work pushing a cart up a hill transporting a large HVAC box. He slipped on ice and fell in somewhat of a "superman" position. Claimant struck his left knee on the ground and twisted his left hip. On January 4, 2022 Claimant visited the Littleton Adventist Emergency Department for treatment. Although Claimant reported left lower back and left leg pain after he slipped and fell on ice at work on the previous day, a physical examination showed no swelling or deformity. Furthermore, an x-ray of the left knee noted there was no acute bony abnormality.

8. As found, after Claimant received additional treatment through Concentra, on February 25, 2022 Dr. Corson ordered an MRI to determine whether any surgical pathology was present and avoid any further delay in treatment. The left knee MRI revealed "a small 5 mm nondisplaced bony fracture fragment with adjacent bone marrow edema and soft tissue edema." The radiologist commented the fracture was not visualized on the prior radiographs from January 4, 2022, but the finding was age indeterminate and could be acute or subacute.

9. As found, on July 20, 2022 Dr. Fall conducted an independent medical examination of Claimant and was unable to determine whether the bony abnormality at the distal pole of the patella was caused by the January 3, 2022 work incident. She reasoned that the bony abnormality was not visualized on initial x-rays. Dr. Fall concluded

that she was unable to state within a reasonable degree of medical probability that any of Claimant's complaints were caused by his work activities on January 3, 2022. She subsequently testified that Claimant's January 4, 2022 physical examination was also inconsistent with an acute injury or a distal pole patella fracture. Dr. Fall thus summarized that, based on the absence of x-ray findings, lack of swelling or tenderness on physical examination, and Claimant's ability to extend his knee at the Littleton Adventist Emergency Department, his patellar fracture must have occurred after January 4, 2022.

10. As found, despite Dr. Fall's testimony, the record is replete with evidence that Claimant likely suffered compensable injuries during the course and scope of his employment with Employer on January 3, 2022. Initially, despite minor date discrepancies, the record reflects that Claimant has consistently maintained he sustained injuries to his left hip and knee as a result of a slip and fall on ice at work while he was using a dolly to push a large load of AC filters. Moreover, the Concentra medical records reveal that Claimant's treating physicians have attributed Claimant's injuries to his slip and fall. Specifically, Drs. Corson, Motz and Hnida all persuasively emphasized that Claimant's objective findings were consistent with a work-related mechanism of injury. Notably, the preceding physicians were aware of the absence of x-ray findings of a pole patellar fracture on January 4, 2022. However, because the subsequent MRI revealed a nondisplaced distal pole patella fracture, the Concentra physicians attributed the injury to Claimant's slip and fall at work. Based on Claimant's consistent account of his mechanism of injury, the MRI revealing a left knee nondisplaced distal pole patella fracture and the persuasive medical opinions of Drs. Corson, Motz and Hnida, Claimant likely suffered injuries at work on January 3, 2022. Claimant's work activities aggravated, accelerated or combined with his pre-existing condition to produce a need for medical treatment.

Medical Benefits

11. Respondents are liable for authorized medical treatment that is reasonable and necessary to cure or relieve the effects of an industrial injury. §8-42101(1)(a), C.R.S.; *Colorado Comp. Ins. Auth. v. Nofio*, 886 P.2d 714, 716 (Colo. 1994). A pre-existing condition or susceptibility to injury does not disqualify a claim if the employment aggravates, accelerates, or combines with the pre-existing condition to produce a need for medical treatment. *Duncan v. Indus. Claim Appeals Off.,* 107 P.3d 999, 1001 (Colo. App. 2004). The question of whether a particular disability is the result of the natural progression of a pre-existing condition, or the subsequent aggravation or acceleration of that condition, is itself a question of fact. *University Park Care Center v. Indus. Claim Appeals Off.*, 43 P.3d 637 (Colo. App. 2001). Finally, the determination of whether a particular treatment modality is reasonable and necessary to treat an industrial injury is a factual determination for the ALJ. *In re Parker*, W.C. No. 4-517-537 (ICAO, May 31, 2006); *In re Frazier,* W.C. No. 3-920-202 (ICAO, Nov. 13, 2000).

12. Section 8-41-301(1)(c), C.R.S. requires that an injury be "proximately caused by an injury or occupational disease arising out of and in the course of the employee's employment." Thus, the claimant is required to prove a direct causal relationship between the injury and the disability and need for treatment. However, the industrial injury need not be the sole cause of the disability if the injury is a significant,

direct, and consequential factor in the disability. *See Subsequent Injury Fund v. Indus. Claim Appeals Off.,* 131 P.3d 1224 (Colo. App. 2006); *Joslins Dry Goods Co. v. Indus. Claim Appeals Off.,* 21 P.3d 866 (Colo. App. 2001).

13. As found, Claimant has demonstrated by a preponderance of the evidence that he is entitled to reasonable, necessary and causally related medical benefits for his January 3, 2022 industrial injuries. His medical treatment at Littleton Adventist Emergency Department, Concentra and Invision Sally Jobe was designed to address the work injuries he sustained on January 3, 2022. Claimant specifically underwent examinations, physical therapy, injections and diagnostic testing to assess and treat the effects of his industrial injuries. All of Claimant's medical treatment was reasonable and necessary to cure or relieve the effects of his work injuries. Accordingly, Respondents are financially responsible for all of Claimant's reasonable, necessary and causally related medical benefits for his January 3, 2022 industrial injuries.

Temporary Total Disability Benefits

14. To prove entitlement to Temporary Total Disability (TTD) benefits a claimant must demonstrate that the industrial injury caused a disability lasting more than three work shifts, he left work as a result of the disability, and the disability resulted in an actual wage loss. *See* §8-42-105, C.R.S.; *Anderson v. Longmont Toyota,* 102 P.3d 323 (Colo. 2004); *City of Colorado Springs v. Indus. Claim Appeals Off.,* 954 P.2d 637 (Colo. App. 1997). Section 8-42-103(1)(a) requires the claimant to establish a causal connection between a work-related injury and a subsequent wage loss in order to obtain TTD benefits. The term "disability" connotes two elements: (1) medical incapacity evidenced by loss or restriction of bodily function; and (2) impairment of wage earning capacity as demonstrated by claimant's inability to resume his or her prior work. *Culver v. Ace Electric*, 971 P.2d 641, 649 (Colo. 1999). The impairment of earning capacity element of disability may be evidenced by a complete inability to work, or by restrictions that impair the claimant's ability effectively and properly to perform his or her regular employment. *Ortiz v. Charles J. Murphy & Co.*, 964 P.2d 595, 597 (Colo. App. 1998) (*citing Ricks v. Indus. Claim Appeals Off.*, P.2d 1118 (Colo. App. 1991)). Because there is no requirement that a claimant must produce evidence of medical restrictions, a claimant's testimony alone is sufficient to demonstrate a disability. *Lymburn v. Symbios Logic,* 952 P.2d 831, 833 (Colo. App. 1997). TTD benefits shall continue until the first occurrence of any of the following: (1) the employee reaches MMI; (2) the employee returns to regular or modified employment; (3) the attending physician gives the employee a written release to return to regular employment; or (4) the attending physician gives the employee a written release to return to modified employment, the employment is offered in writing and the employee fails to begin the employment. §8-42-105(3)(a)-(d), C.R.S.

15. As found, Claimant has proven by a preponderance of the evidence that he is entitled to receive TTD benefits for the period January 4, 2022 until terminated by statute. The record reveals that Claimant's January 3, 2022 industrial injuries caused a disability lasting more than three work shifts, he left work as a result of the disability and the disability resulted in an actual wage loss. The record reveals that Claimant suffered

injuries as a result of his slip and fall at work that impaired his ability to effectively and properly perform his regular employment.

16. As found, Claimant's work restrictions have remained in effect throughout the duration of his medical treatment with Concentra. His restrictions include no lifting, carrying or pushing/pulling in excess of 15 pounds. He was also directed to sit 50% of the time, not use ladders and limit his use of stairs. Claimant credibly testified that he has been unable to perform his job duties including heavy lifting, crawling, kneeling, squatting, and climbing beginning January 3, 2022 through date of hearing. He has not returned to work for Employer and has not earned income from any other source since the slip and fall. Accordingly, Claimant is entitled to receive TTD benefits for the period January 3, 2022 until terminated by statute.

Responsible for Termination

17. Under the termination statutes in §8-42-105(4) C.R.S and §8-42-103(1)(g) C.R.S. a claimant who is responsible for his or her termination from regular or modified employment is not entitled to TTD benefits absent a worsening of condition that reestablishes the causal connection between the industrial injury and wage loss. *Gilmore v. Indus. Claim Appeals Off.*, 187 P.3d 1129, 1131 (Colo. App. 2008). The termination statutes provide that, in cases where an employee is responsible for his termination, the resulting wage loss is not attributable to the industrial injury. *In re of Davis*, W.C. No. 4-631-681 (ICAO, Apr. 24, 2006). A claimant does not act "volitionally" or exercise control over the circumstances leading to his termination if the effects of the injury prevent him from performing his assigned duties and cause the termination. *In re of Eskridge,* W.C. No. 4-651-260 (ICAO, Apr. 21, 2006). Therefore, to establish that the claimant was responsible for his termination, the respondents must demonstrate by a preponderance of the evidence that the claimant committed a volitional act, or exercised some control over his termination under the totality of the circumstances. *See Padilla v. Digital Equipment*, 902 P.2d 414, 416 (Colo. App. 1994). An employee is thus "responsible" if he precipitated the employment termination by a volitional act that he would reasonably expect to cause the loss of employment. *Patchek v. Dep't of Public Safety,* W.C. No. 4-432-301 (ICAP, Sept. 27, 2001).

18. As found, although Claimant has established that he is entitled to receive TTD benefits, Respondents have demonstrated by a preponderance of the evidence that he was responsible for his termination from employment under the termination statutes. Claimant is thus precluded from receiving TTD benefits after February 22, 2022. Initially, on December 8, 2021 KL[Redacted] spoke to Claimant about offenses that had been revealed on his partial criminal background check. Notably, the results reflected guilty pleas to the felonies of first degree forgery and theft by taking, and a nolo contendere plea to the misdemeanor of theft/shoplifting. KL[Redacted] sought court documentation from Claimant regarding the felony convictions and instructed him about how to dispute the misdemeanor. In the December 8, 2020 discussion with Claimant, KL[Redacted] recorded that he attributed the felonies to his association with his girlfriend and denied the misdemeanor. KL[Redacted] asked Claimant whether there were any other items that might appear on a completed background check and he replied "no."

19. As found, KL[Redacted] received the completed background check on January 12, 2022. She testified that, although Claimant had denied that any additional criminal activities would be revealed on the completed background check, the document reflected cocaine convictions. In fact, the finalized background check showed two felonies and misdemeanors related to possession of cocaine and drug related objects, along with an additional felony for a probation violation. Claimant explained that he discussed the circumstances surrounding his cocaine conviction in the meeting with KL[Redacted] on December 8, 2020. He denied a history of any felonies besides those related to cocaine. Despite Claimant's testimony, his criminal history reveals felony forgery, felony theft by taking, and a felony probation violation.

20. As found, on February 22, 2022 Claimant was terminated from employment with Employer. The termination was based on the contents of the background check because it was "not clear by our standards." KL[Redacted] credibly elaborated that Claimant's termination was predicated on the extent of the offenses in the background check and his failure to disclose the cocaine convictions when asked if the completed background check would reveal any other offenses. Although Claimant stated that he disclosed his cocaine charges to Employer on December 8, 2021, the record reveals that Employer was unaware of the convictions until a later date. Specifically, KL[Redacted] credibly explained that she was unaware of the cocaine charges on December 8, 2021 and did not receive information about the offenses until January 12, 2022. The extent of Claimant's criminal history and failure to disclose that additional criminal activities would be revealed on the completed background check reflects that he precipitated his employment termination by a volitional act that he would have reasonably expected to cause the loss of employment. Under the totality of the circumstances Claimant committed a volitional act or exercised some control over his termination from employment. Respondents has thus demonstrated that it is more probably true than not that Claimant is precluded from receiving TTD benefits for the period February 23, 2022 until terminated by statute.

ORDER

1. Claimant suffered compensable injuries on January 3, 2022 during the course and scope of his employment with Employer.

2. Respondents are financially responsible for payment of Claimant's reasonable and necessary medical expenses for the treatment of his industrial injuries.

3. Claimant shall receive TTD benefits for the period January 4, 2022 until February 22, 2022.

4. Claimant earned an AWW of $1,346.15.

5. Claimant's entitlement to TTD benefits shall be offset by his receipt of unemployment benefits.

6. Because Claimant was responsible for his termination from employment, he is precluded from receiving TTD benefits after February 22, 2022.

7. Any issues not resolved in this order are reserved for future determination.

If you are a party dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman Street, 4th Floor, Denver, Colorado, 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. *For statutory reference, see section 8-43-301(2), C.R.S. (as amended, SB09-070). For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a form for a petition to review at https://oac.colorado.gov/resources/oac-forms*.

ISSUES

1. Whether Claimant has proven by a preponderance of the evidence that he suffered an occupational disease in the form of Carpal Tunnel Syndrome (CTS) to his right wrist during the course and scope of his employment with Employer.

2. Whether Claimant has demonstrated by a preponderance of the evidence that he suffered an acute injury to his right wrist on April 15, 2021 during the course and scope of his employment with Employer.

FINDINGS OF FACT

1. Claimant is a 61-year-old male who works for Employer as a Facility Maintenance Mechanic. His job duties primarily involve building maintenance and HVAC repairs.

2. Claimant explained that on April 15, 2021 he was helping to remove materials from the roof of Employer's facility in preparation for a roofing project. He was using a dolly to move metal frames from a higher to lower level of the roof. When he was pushing the dolly down a ramp, he developed pain and numbness in his right wrist.

3. On April 16, 2021 Claimant completed a Workers' Compensation Notice. He reported that on the previous day, he was removing debris from Employer's roof in order to prepare for a roofing project. While transporting heavy metal in a cart Claimant experienced sharp twinges of pain in his right hand.

4. On April 16, 2021 Claimant visited personal medical provider Michael Schmitz, M.D. at Kaiser Permanente for an evaluation. He reported right wrist pain. Claimant noted that "he has been having on/off symptoms for over a year, and states that in the last 2-3 months has gotten worse at night. Affects his 1st-3rd fingers. Has purchased braces and have been somewhat affective." After a physical examination, Dr. Schmitz assessed Claimant "with a 2 month history of worsening right wrist pain concerning for carpal tunnel syndrome." He remarked that Claimant exhibited obvious features of right Carpal Tunnel Syndrome (CTS), including positive Phalen and Tinel signs, as well as atrophy of the thenar muscle. Dr. Schmitz placed Claimant in a right wrist brace and referred him for an EMG. The report contains no mention of work activities, lifting heavy objects or sharp pain.

5. On April 19, 2021 Claimant visited Authorized Treating Physician (ATP) John Raschbacher, M.D. at Midtown Occupational Medicine for an evaluation. Claimant reported that he had been developing digital numbness in his right hand for the past week. He did not describe any traumatic incident, heavy lifting or sharp pain. Dr. Raschbacher noted that Claimant had no symptoms before the April 15, 2022 event. After reviewing

Claimant's work history and conducting a physical examination, Dr. Raschbacher determined that Claimant's work activities caused him to develop right CTS. He referred Claimant to hand surgeon Thomas Mordick, II, M.D. for an evaluation.

6. On April 29, 2021 Claimant visited Dr. Mordick for an evaluation. He reported that, while carrying heavy buckets of material for a roofing project on April 15, 2021, he developed pain and numbness in his right hand. After conducting a physical examination, Dr. Mordick assessed Claimant with right wrist CTS and recommended nerve conduction studies. Based on Claimant's typical job duties as an HVAC worker, Dr. Mordick determined that he "probably qualifies for work-related [CTS], although a Job Demands Analysis [JDA] would be needed to make a formal decision regarding that."

7. On May 25, 2021 Claimant underwent electrodiagnostic studies of his right upper extremity with Eric Hammerberg, M.D. The findings were compatible with a diagnosis of severe right CTS. There was no evidence of cervical radiculopathy.

8. On June 15, 2021 Carlton M. Clinkscales, M.D. performed a records review of Claimant's claim. After considering Claimant's history, Dr. Clinkscales responded to the specific interrogatory of whether lifting heavy items on April 15, 2021 would have caused Claimant to develop CTS. His answer was "[m]aybe." Dr. Clinkscales noted that CTS is generally an overuse problem, but it can be associated with an acute incident. He explained that "severe" CTS is usually "a condition of more longstanding duration," but could be related to Claimant's April 15, 2021 work incident. He sought additional records from Kaiser to determine whether Claimant had pre-existing symptoms, a prior EMG, or previous surgical recommendations. Dr. Clinkscales noted that Claimant "claims no prior treatment and no prior recommendations, but some effort for confirmation would certainly be appropriate." He also requested a JDA before making a causation determination.

9. Throughout the remainder of 2021 Claimant continued to receive treatment from Dr. Raschbacher. Dr. Raschbacher maintained that the nature of Claimant's work activities caused him to develop right CTS. He cautioned that the longer Claimant's nerve was compressed, the less likelihood of a complete recovery.

10. On July 7, 2021 Respondent filed a Notice of Contest. Respondents specifically sought further investigation regarding the compensability of Claimant's claim.

11. On November 9, 2021 [Redacted, hereinafter JA] completed a JDA for the position of Facilities Maintenance Mechanic at Employer's facility. JA[Redacted] noted that Claimant is primarily responsible for maintenance of a variety of equipment and uses a number of different tools. Claimant spent about 90%-95% of his workday performing preventative maintenance and repairs on various machines in Employer's facility. The JDA also specified that Claimant spent about 5%-10% of his workday performing computer work.

12. Relying on the Colorado Division of Workers' Compensation *Medical Treatment Guidelines* (*Guidelines*), JA[Redacted] not find evidence of any Primary or Secondary Risk Factors involved in Claimant's job duties. JA[Redacted] conducted

specific studies calculating the amount of time Claimant spent performing each of his job duties. In considering Primary Risk Factors involving Force and Repetition/Duration involving six hours of lifting 10 pounds three times or more per minute, JA[Redacted] calculated that Claimant spent 2:49:06 during an eight-hour work shift engaging in the activity. She also determined that Claimant spent 2:33:36 during an eight-hour workshift using hand tools weighing two pounds or more. Finally, JA[Redacted] concluded that Claimant spent only 1:33:48 using a mouse each day.

13. Relying on the Primary and Secondary Risk Factors delineated in the *Guidelines*, JA[Redacted] explained that Claimant did not satisfy the requisite force and repetition/duration requirements to demonstrate a cumulative trauma condition. Claimant also did not exhibit the requisite Awkward Posture & Repetition/Duration, engage in computer work or use hand held vibratory tools for the thresholds enumerated in the *Guidelines*. Claimant also did not work in a cold environment.

14. After reviewing the JDA Dr. Mordick authored a note on November 23, 2021. He agreed that Claimant did not meet any risk factors for the development of a cumulative trauma condition "let alone any specific to carpal tunnel syndrome." Dr. Mordick thus concluded that Claimant's CTS was not likely work-related and should be treated through private health insurance.

15. On December 5, 2022 Dr. Clinkscales authored a letter after reviewing additional medical records. He remarked that, in his June 15, 2021 records review, he agreed it was possible Claimant's right CTS was related to his work activities. Although Dr. Clinkscales initially agreed with Dr. Raschbacher's impression that Claimant's CTS might be work-related, he concluded that the JDA "does not support work-relatedness in this particular case." He specified that the JDA did not identify any risk factors to support a cumulative trauma disorder based on the *Guidelines*.

16. On December 6, 2021 Claimant returned to Dr. Raschbacher for an evaluation. Dr. Raschbacher authored an addendum note stating that a JDA had been performed. After remarking that he was familiar with JDA's, Dr. Raschbacher maintained that Claimant's work activities caused him to develop right CTS.

17. On February 4, 2022 Claimant underwent a right CTS release through his private insurance.

18. Claimant testified at the hearing in this matter. He remarked that he experienced numbness and tingling in his right wrist after the April 15, 2021 incident, but denied ever previously experiencing similar symptoms. However, on cross-examination, Respondent's counsel presented Claimant with the Kaiser record dated April 16, 2021. The Kaiser document reflects that Claimant reported a one-year history of right wrist symptoms, including the purchase of splints, and his condition had worsened over the prior two to three months. Claimant responded that he "forgot" he had visited Kaiser. Further, he explained that the symptoms prior to April 15, 2021 only occurred at night when his wrists roll inward.

19. Claimant has failed to prove it is more probably true than not that he suffered an occupational disease in the form of CTS to his right wrist during the course and scope of his employment with Employer. A review of his job duties, the medical records and the persuasive opinions of Drs. Mordick and Clinkscales reflect that Claimant's job duties lacked the requisite duration, force or repetition to cause a cumulative trauma condition.

20. In her JDA JA[Redacted] noted that Claimant is primarily responsible for maintaining a variety of equipment and uses a number of different tools in Employer's primary facility. JA[Redacted] conducted specific studies calculating the amount of time Claimant spent performing each of his job duties. Relying on the Primary and Secondary Risk Factors delineated in the *Guidelines*, JA[Redacted] explained that Claimant did not satisfy the requisite force and repetition/duration requirements to demonstrate a cumulative trauma condition. Claimant also did not exhibit the requisite Awkward Posture & Repetition/Duration, engage in computer work or use hand held vibratory tools for the thresholds enumerated in the *Guidelines*.

21. After reviewing the JDA Dr. Mordick explained that Claimant did not meet any risk factors for a cumulative trauma injury, "let alone any specific to carpal tunnel syndrome." Dr. Mordick thus concluded that Claimant's CTS was not likely work-related and should be treated through private health insurance. Similarly, Dr. Clinkscales concluded that the JDA "does not support work-relatedness in this particular case." He specified that the JDA did not identify any risk factors to support a cumulative trauma disorder based on the *Guidelines*.

22. In contrast, Dr. Raschbacher remarked that Claimant's work activities caused him to develop right CTS. However, Dr. Raschbacher's report does not reveal whether he considered the JDA or even requested to review the report. In contrast, the record reflects that Drs. Mordick and Clinkscales performed a proper causation analysis pursuant to the *Guidelines*. A review of Claimant's job duties, in conjunction with the persuasive opinions of Drs. Mordick and Clinkscales, demonstrates that Claimant did not engage in forceful and repetitive activity for an amount of time that meets the threshold for a cumulative trauma condition. Claimant thus likely did not develop right CTS while working for Employer. His employment activities did not cause, intensify, or to a reasonable degree, aggravate his condition.

23. Claimant has failed to demonstrate that it is more probably true than not that he suffered an acute injury to his right wrist on April 15, 2021 during the course and scope of his employment with Employer. Initially, Claimant asserts that on April 15, 2021 he developed pain and numbness in his right wrist while removing debris from the roof of Employer's facility. Claimant subsequently visited ATP Dr. Raschbacher and reported that he had been developing digital numbness at the right hand for the past week. He did not describe any traumatic incident, reference heavy lifting or mention sharp pain. Dr. Raschbacher diagnosed Claimant with work-related right CTS and referred him to Dr. Mordick for an evaluation.

24. Dr. Mordick initially determined that Claimant's severe, right CTS probably constituted a work-related condition but sought a JDA to make a final determination.

Similarly, Dr. Clinkscales initially reasoned that Claimant's heavy lifting on April 15, 2021 might have caused severe CTS. He noted that CTS is generally an overuse problem, but it can be associated with an acute incident. He also explained that "severe" CTS is usually "a condition of more longstanding duration." Dr. Clinkscales also sought a JDA to assess causation. The record thus reveals that Drs. Mordick and Clinkscales were aware of Claimant's potential injury while lifting heavy materials on April 15, 2021, but did not determine that he suffered an acute injury. Instead, both physicians requested a JDA to ascertain whether Claimant's work activities over time caused him to develop severe CTS.

25. After reviewing the JDA, Dr. Mordick concluded that Claimant's right wrist CTS was not caused by his work activities for Employer. Although Dr. Clinkscales initially agreed with Dr. Raschbacher that Claimant's CTS might be work-related, he also determined the JDA "does not support work-relatedness in this particular case." Drs. Mordick and Clinkscales thus exercised medical judgment to reject a causal connection between Claimant's work activities and his development of severe right CTS. Importantly, Claimant's CTS was not caused by either an acute event on April 15, 2021 or through repetitive work exposure.

26. Claimant denied any prior right wrist symptoms to Dr. Raschbacher. He also testified that he experienced numbness and tingling in his right wrist after the April 15, 2021 incident, but denied ever previously experiencing similar symptoms. However, on cross-examination, Respondent's counsel presented Claimant with a Kaiser record dated April 16, 2021. The Kaiser document reflects that Claimant reported a one-year history of right wrist symptoms that had worsened over the prior two to three months. Accordingly, based on the medical records, persuasive medical opinions of Drs. Mordick and Clinkscales, and inconsistent statements about the development of right wrist pain, Claimant has failed to demonstrate that he suffered an acute right wrist injury while working for Employer on April 15, 2021. Claimant's work activities on April 15, 2021 did not aggravate, accelerate or combine with his pre-existing condition to produce a need for medical treatment. His claim for Workers' Compensation benefits is thus denied and dismissed.

CONCLUSIONS OF LAW

1. The purpose of the "Workers' Compensation Act of Colorado" (Act) is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of any litigation. §8-40-102(1), C.R.S. A claimant in a Workers' Compensation claim has the burden of proving entitlement to benefits by a preponderance of the evidence. §8-42-101, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979); *People v. M.A.*, 104 P.3d 273, 275 (Colo. App. 2004). The facts in a Workers' Compensation case are not interpreted liberally in favor of either the rights of the injured worker or the rights of the employer. §8-43-201, C.R.S. A Workers' Compensation case is decided on its merits. §8-43-201, C.R.S.

2. The Judge's factual findings concern only evidence that is dispositive of the issues involved; the Judge has not addressed every piece of evidence that might lead to a conflicting conclusion and has rejected evidence contrary to the above findings as unpersuasive. *See Magnetic Engineering, Inc. v. ICAO,* 5 P.3d 385, 389 (Colo. App. 2000).

3. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *See Prudential Insurance Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); CJI, Civil 3:16 (2007).

Occupational Disease

4. The test for distinguishing between an accidental injury and an occupational disease is whether the injury can be traced to a particular time, place and cause. *Campbell v. IBM Corp.*, 867 P.2d 77, 81 (Colo. App. 1993). "Occupational disease" is defined by §8-40-201(14), C.R.S. as:

> [A] disease which results directly from the employment or the conditions under which work was performed, which can be seen to have followed as a natural incident of the work and as a result of the exposure occasioned by the nature of the employment, and which can be fairly traced to the employment as a proximate cause and which does not come from a hazard to which the worker would have been equally exposed outside of the employment.

5. A claimant is required to prove by a preponderance of the evidence that the alleged occupational disease was directly or proximately caused by the employment or working conditions. *Wal-Mart Stores, Inc. v. Indus. Claim Appeals Off.,* 989 P.2d 251, 252 (Colo. App. 1999). Moreover, §8-40-201(14), C.R.S. imposes proof requirements in addition to those required for an accidental injury by adding the "peculiar risk" test; that test requires that the hazards associated with the vocation must be more prevalent in the work place than in everyday life or in other occupations. *Anderson v. Brinkhoff*, 859 P.2d 819, 824 (Colo. 1993). A claimant is entitled to recovery only if the hazards of employment cause, intensify, or, to a reasonable degree, aggravate the disability for which compensation is sought. *Id.* Where there is no evidence that occupational exposure to a hazard is a necessary precondition to development of the disease, the claimant suffers from an occupational disease only to the extent that the occupational exposure contributed to the disability. *Id.*

6. Rule 17, Exhibit 5 provides an algorithm for evaluating Cumulative Trauma Conditions (CTC) pursuant to the *Guidelines*. In addressing applicability, the *Guidelines* note that "CTC's of the upper extremity comprise a heterogeneous group of diagnoses which include numerous specific clinical entities including disorders of the muscles, tendons and tendon sheaths, nerves, joints and neurovascular structures." W.C.R.P. Rule

17, Exhibit 5, p. 6. In determining a diagnosis when performing a cumulative trauma analysis the *Guidelines* delineate specific musculoskeletal conditions and peripheral nerve disorders. Nevertheless, the *Guidelines* provide that "[l]ess common cumulative trauma conditions not listed specifically in these Guidelines are still subject to medical causation assessment." W.C.R.P. Rule 17, Exhibit 5, p. 21.

7. The *Guidelines* include a Primary Risk Factor Definition Table for Force and Repetition/Duration. The Table requires six hours of two pounds of pinch force or 10 pounds of hand force three or more times per minute. Other Primary Risk Factors involving Force and Repetition/Duration include six hours of lifting 10 pounds in excess of 60 times per hour and six hours of using hand tools weighing two pounds or more. An additional Primary Risk Factor category is Awkward Posture and Repetition/Duration. The factor requires four hours of wrist flexion greater than 45 degrees, extension greater than 30 degrees or ulnar deviation greater than 20 degrees, six hours of elbow flexion greater than 90 degrees, four hours of supination/pronation with task cycles 30 seconds or less or awkward posture for at least 50% of a task cycle. Finally, another Primary Risk Factor in the category of computer work involves mouse use in excess of four hours per day. Secondary Risk Factors require three hours of two pounds of pinch force or 10 pounds of hand force three or more times per minute. Other Secondary Risk Factors involving Force and Repetition/Duration include three hours of lifting 10 pounds greater than 60 times per hour and three hours of using hand tools weighing two pounds or more. Finally, Secondary Risk Factors for Awkward Posture and Repetition/Duration include three hours of elbow flexion greater than 90 degrees and three hours of supination/pronation with a power grip or lifting. If neither Primary nor Secondary Risk Factors are present, the *Guidelines* provide that "the case is probably not job related."
W.C.R.P. Rule 17, Exhibit 5, p. 24.

8. The *Guidelines* specify that "good" but not "strong" evidence that occupational risk factors cause CTS include a combination of force, repetition, and vibration, or a combination of repetition and force for six hours, or a combination of repetition and forceful tool use with awkward posture for six hours, or a combination of force, repetition, and awkward posture. There is also "good" evidence that the combination of two pounds of pinch or 10 pounds of hand force three times or more per minute for three hours causes CTS. "Some" evidence of occupational risk factors for the development of CTS include wrist bending or awkward posture for four hours, mouse use more than four hours, and a combination of cold and forceful repetition for six hours. Notably, there is good evidence that repetition alone for six hours or less is not related to the development of CTS. W.C.R.P. Rule 17, Exhibit 5, pp. 28-29.

9. As found, Claimant has failed to prove by a preponderance of the evidence that he suffered an occupational disease in the form of CTS to his right wrist during the course and scope of his employment with Employer. A review of his job duties, the medical records and the persuasive opinions of Drs. Mordick and Clinkscales reflect that Claimant's job duties lacked the requisite duration, force or repetition to cause a cumulative trauma condition.

10. As found, in her JDA JA[Redacted] noted that Claimant is primarily responsible for maintaining a variety of equipment and uses a number of different tools in Employer's primary facility. JA[Redacted] conducted specific studies calculating the amount of time Claimant spent performing each of his job duties. Relying on the Primary and Secondary Risk Factors delineated in the *Guidelines*, JA[Redacted] explained that Claimant did not satisfy the requisite force and repetition/duration requirements to demonstrate a cumulative trauma condition. Claimant also did not exhibit the requisite Awkward Posture & Repetition/Duration, engage in computer work or use hand held vibratory tools for the thresholds enumerated in the *Guidelines*.

11. As found, after reviewing the JDA Dr. Mordick explained that Claimant did not meet any risk factors for a cumulative trauma injury, "let alone any specific to carpal tunnel syndrome." Dr. Mordick thus concluded that Claimant's CTS was not likely work-related and should be treated through private health insurance. Similarly, Dr. Clinkscales concluded that the JDA "does not support work-relatedness in this particular case." He specified that the JDA did not identify any risk factors to support a cumulative trauma disorder based on the *Guidelines*.

12. As found, in contrast, Dr. Raschbacher remarked that Claimant's work activities caused him to develop right CTS. However, Dr. Raschbacher's report does not reveal whether he considered the JDA or even requested to review the report. In contrast, the record reflects that Drs. Mordick and Clinkscales performed a proper causation analysis pursuant to the *Guidelines*. A review of Claimant's job duties, in conjunction with the persuasive opinions of Drs. Mordick and Clinkscales, demonstrates that Claimant did not engage in forceful and repetitive activity for an amount of time that meets the threshold for a cumulative trauma condition. Claimant thus likely did not develop right CTS while working for Employer. His employment activities did not cause, intensify, or to a reasonable degree, aggravate his condition.

Acute Injury

13. For a claim to be compensable under the Act, a claimant has the burden of proving that he suffered a disability that was proximately caused by an injury arising out of and within the course and scope of employment. §8-41-301(1)(c) C.R.S.; *In re Swanson,* W.C. No. 4-589-645 (ICAO, Sept. 13, 2006). Proof of causation is a threshold requirement that an injured employee must establish by a preponderance of the evidence before any compensation is awarded. *Faulkner v. Indus. Claim Appeals Off.,* 12 P.3d 844, 846 (Colo. App. 2000); *Singleton v. Kenya Corp.,* 961 P.2d 571, 574 (Colo. App. 1998). The question of causation is generally one of fact for determination by the Judge. *Faulkner,* 12 P.3d at 846.

14. A pre-existing condition or susceptibility to injury does not disqualify a claim if the employment aggravates, accelerates or combines with the pre-existing condition to produce a need for medical treatment. *Duncan v. Indus. Claim Appeals Off.,* 107 P.3d 999, 1001 (Colo. App. 2004). A compensable injury is one that causes disability or the need for medical treatment. *City of Boulder v. Payne*, 162 Colo. 345, 426 P.2d 194 (1967).

Soto-Carrion v. C & T Plumbing, Inc., W.C. No. 4-650-711 (ICAO, Feb. 15, 2007); *Mailand v. PSC Industrial Outsourcing LP*, W.C. No. 4-898-391-01, (ICAO, Aug. 25, 2014).

15. The mere fact a claimant experiences symptoms while performing work does not require the inference that there has been an aggravation or acceleration of a preexisting condition. *See Cotts v. Exempla, Inc.,* W.C. No. 4-606-563 (ICAO, Aug. 18, 2005). Rather, the symptoms could represent the "logical and recurrent consequence" of the pre-existing condition. *See F.R. Orr Construction v. Rinta,* 717 P.2d 965 (Colo. App. 1985); *Chasteen v. King Soopers, Inc.*, W.C. No. 4-445-608 (ICAO, Apr. 10, 2008). As explained in *Scully v. Hooters of Colorado Springs,* W.C. No. 4-745-712 (ICAO, Oct. 27, 2008), simply because a claimant's symptoms arise after the performance of a job function does not necessarily create a causal relationship based on temporal proximity. The panel in *Scully* noted that "correlation is not causation," and merely because a coincidental correlation exists between the claimant's work and his symptoms does not mean there is a causal connection between the claimant's injury and work activities.

16. The provision of medical care based on a claimant's report of symptoms does not establish an injury but only demonstrates that the claimant claimed an injury. *Washburn v. City Market*, W.C. No. 5-109-470 (ICAO, June 3, 2020). Moreover, a referral for medical care may be made so that the respondent would not forfeit its right to select the medical providers if the claim is later deemed compensable. *Id.* Although a physician provides diagnostic testing, treatment, and work restrictions based on a claimant's reported symptoms, it does not follow that the claimant suffered a compensable injury. *Fay v. East Penn Manufacturing Co., Inc.*, W.C. No. 5-108-430-001 (ICAO, Apr. 24, 2020); *cf. Snyder v. Indus. Claim Appeals Off.*, 942 P.2d 1337, 1339 (Colo. App. 1997) ("right to workers' compensation benefits, including medical payments, arises only when an injured employee initially establishes, by a preponderance of the evidence, that the need for medical treatment was proximately caused by an injury arising out of and in the course of the employment"). While scientific evidence is not dispositive of compensability, the ALJ may consider and rely on medical opinions regarding the lack of a scientific theory supporting compensability when making a determination. *Savio House v. Dennis*, 665 P.2d 141 (Colo. App. 1983); *Washburn v. City Market*, W.C. No. 5-109-470 (ICAO, June 3, 2020).

17. As found, Claimant has failed to demonstrate by a preponderance of the evidence that he suffered an acute injury to his right wrist on April 15, 2021 during the course and scope of his employment with Employer. Initially, Claimant asserts that on April 15, 2021 he developed pain and numbness in his right wrist while removing debris from the roof of Employer's facility. Claimant subsequently visited ATP Dr. Raschbacher and reported that he had been developing digital numbness at the right hand for the past week. He did not describe any traumatic incident, reference heavy lifting or mention sharp pain. Dr. Raschbacher diagnosed Claimant with work-related right CTS and referred him to Dr. Mordick for an evaluation.

18. As found, Dr. Mordick initially determined that Claimant's severe, right CTS probably constituted a work-related condition but sought a JDA to make a final determination. Similarly, Dr. Clinkscales initially reasoned that Claimant's heavy lifting on

April 15, 2021 might have caused severe CTS. He noted that CTS is generally an overuse problem, but it can be associated with an acute incident. He also explained that "severe" CTS is usually "a condition of more longstanding duration." Dr. Clinkscales also sought a JDA to assess causation. The record thus reveals that Drs. Mordick and Clinkscales were aware of Claimant's potential injury while lifting heavy materials on April 15, 2021, but did not determine that he suffered an acute injury. Instead, both physicians requested a JDA to ascertain whether Claimant's work activities over time caused him to develop severe CTS.

19. As found, after reviewing the JDA, Dr. Mordick concluded that Claimant's right wrist CTS was not caused by his work activities for Employer. Although Dr. Clinkscales initially agreed with Dr. Raschbacher that Claimant's CTS might be work-related, he also determined the JDA "does not support work-relatedness in this particular case." Drs. Mordick and Clinkscales thus exercised medical judgment to reject a causal connection between Claimant's work activities and his development of severe right CTS. Importantly, Claimant's CTS was not caused by either an acute event on April 15, 2021 or through repetitive work exposure.

20. As found, Claimant denied any prior right wrist symptoms to Dr. Raschbacher. He also testified that he experienced numbness and tingling in his right wrist after the April 15, 2021 incident, but denied ever previously experiencing similar symptoms. However, on cross-examination, Respondent's counsel presented Claimant with a Kaiser record dated April 16, 2021. The Kaiser document reflects that Claimant reported a one-year history of right wrist symptoms that had worsened over the prior two to three months. Accordingly, based on the medical records, persuasive medical opinions of Drs. Mordick and Clinkscales, and inconsistent statements about the development of right wrist pain, Claimant has failed to demonstrate that he suffered an acute right wrist injury while working for Employer on April 15, 2021. Claimant's work activities on April 15, 2021 did not aggravate, accelerate or combine with his pre-existing condition to produce a need for medical treatment. His claim for Workers' Compensation benefits is thus denied and dismissed.

ORDER

Based upon the preceding findings of fact and conclusions of law, the Judge enters the following order:

Claimant's claim for Workers' Compensation benefits is denied and dismissed.

If you are a party dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman Street, 4th Floor, Denver, Colorado, 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. *For statutory reference, see section 8-43-301(2), C.R.S. (as amended, SB09-070). For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a form for a petition to review at https://oac.colorado.gov/resources/oac-forms*.

DATED: February 14, 2023.

ISSUES

1. Whether the doctrines of issue preclusion, claim preclusion and law of the case bar Claimant from litigating whether the Veteran's Affairs Medical Center is an authorized provider.

3. Whether Claimant has established by a preponderance of the evidence that the Veteran's Affairs Medical Center is an authorized provider.

FINDINGS OF FACT

1. Claimant is an 88-year-old male. On June 12, 2014 he suffered an admitted industrial injury while working for Employer. Specifically, while using wire cutters to cut electric wire, Claimant felt a pop in his right chest wall. While at home several weeks later, Claimant was walking downstairs, missed a step, and twisted his left knee.

2. Claimant received treatment at different medical facilities following his work injury. Some of Claimant's treatment was related to his industrial injury and some was not. He treated at the Veteran's Affairs Medical Center (VA) in October or November, 2014.

3. In April 2015 Claimant underwent a left knee total knee replacement (TKR). Following the TKR, Claimant fell and suffered ischemic strokes of the bilateral cerebellum. After a series of hospitalizations, Claimant ultimately had a wound in the left proximal lower leg near the medial tibia.

4. On July 30, 2019 Claimant was diagnosed with a MSSA infection and underwent an above-knee right leg amputation at Sky Ridge Medical Center. Claimant subsequently pursued medical care and treatment through the VA with regard to his prosthesis and prosthesis training prior to Respondent's admission of liability for the right leg amputation.

5. On March 2, 2020 Claimant underwent a follow-up Division Independent Medical Examination (DIME) with Kristin Mason, M.D. She determined that the amputation was related to Claimant's work-related TKR and he had not reached Maximum Medical Improvement (MMI).

6. On April 7, 2020 Respondent filed an Amended General Admission of Liability (GAL). The GAL acknowledged responsibility for medical benefits as well as Temporary Total Disability (TTD) benefits arising from the amputation.

7. On July 9, 2020 the parties proceeded to a hearing before Administrative Law Judge (ALJ) Timothy Nemechek at the Office of Administrative Courts. The issue at

the hearing involved whether Claimant had proven by the preponderance of the evidence that the treatment he received at the VA was authorized.

8. Subsequent to the hearing before ALJ Nemechek, Dr. Wakeshima made multiple referrals for Claimant to obtain prosthetic treatment through the VA. For example, on July 16, 2020 Claimant visited Dr. Wakeshima for a video evaluation. Dr. Wakeshima commented that Claimant was progressing with his prosthesis training through the VA. He explained that he had received a letter from Respondent's counsel dated March 25, 2020 requesting names of referrals in Workers' Compensation matters for physical therapy and prosthesis training. Dr. Wakeshima responded that, "if this is not being authorized to be performed to the [VA] (which is the preferred route) I would then recommend Hanger Orthodics and Prosthesis for prosthesis and Spaulding Rehabilitation or Swedish for prosthetic treating." He also noted that Claimant was attempting to have physical therapy for prosthesis training continued at the VA. Dr. Wakeshima believed treatment through the VA would be medically reasonable if it could be accomplished under Claimant's Workers' Compensation claim.

9. In his July 16, 2020 report Dr. Wakeshima detailed that Claimant has had excellent progress with prosthetic training through the physical therapy department at the VA. Dr. Wakeshima thus wrote Claimant a specific order for physical therapy through the VA. He also requested authorization for Claimant's prosthesis through the VA. Dr. Wakeshima detailed that Claimant had been working with the VA and was very comfortable continuing treatment. Moreover, he remarked that the VA has "significant experience with prosthetic limbs, including the elderly population and therefore should be able to set [Claimant] up with the lightest and most straightforward prosthesis for his above-knee amputation as recommended on Dr. Mason's DIME." Therefore, Dr. Wakeshima wrote Claimant "specific orders for physical therapy and prosthesis to be performed/made through the VA Medical Center. I have previously not written patient any orders for prosthetic training and prosthesis to Hanger orthotics or Spaulding rehab as this was a second choice and the primary and preferred choice is to have this accomplished through the VA Medical Center." Finally, on July 20, 2021 Dr. Wakeshima made a separate referral to the VA for an above knee amputation prosthesis "to be accomplished under his Workers' Compensation claim."

10. On August 28, 2020 ALJ Nemechek issued a Summary Order. He determined that Claimant failed to satisfy his burden of proof for payment of benefits to the VA. ALJ Nemechek specifically found in paragraph 20 of the Summary Order that there was no evidence that ATP Dr. Wakeshima referred Claimant to the VA. He also determined in paragraph 21 that there was insufficient evidence to conclude that Claimant's care at the VA was within the normal progression of medical treatment.

11. On December 9, 2021 Claimant returned to Dr. Wakeshima for an examination. Dr. Wakeshima noted that he had written a referral to the VA "to specifically address whether [Claimant] will need a new socket and document its cost as this replacement socket would be related to his work injury, and should be covered by Workers' Compensation." In a separate authorization request, Dr. Wakeshima reiterated that he referred Claimant to the VA to assess whether he required a new socket or

modifications to his prosthesis. He then asked the VA to document approximate costs and forward the request for authorization to Claimant's Workers' Compensation carrier.

12. On January 29, 2022 Dr. Wakeshima authored a note in response to a letter from Respondent's counsel. He remarked that he attended a SAMMS conference with the attorneys for both parties on January 1, 2022. Dr. Wakeshima noted that he submitted a referral directly to the VA prosthetic clinic on January 29, 2022. He specifically documented in the referral that the prosthesis might be covered under Workers' Compensation. Dr. Wakeshima also inquired in the referral whether Claimant required a new socket or further modifications to his prosthesis. He asked the VA to document estimated costs and forward the request for authorization to Claimant's Workers' Compensation carrier.

13. On February 10, 2022 Claimant again visited Dr. Wakeshima for a video appointment. Dr. Wakeshima further recounted the discussion at the SAMMS conference about authorized treatment through the VA. He explained that Claimant's attorney had informed him at the SAMMS conference that treatment at the VA would be authorized with a referral. However, Respondent's adjuster sent an e-mail to Dr. Wakeshima's office denying treatment through the VA. The adjuster specified that the VA does not work with Workers' Compensation carriers or follow Workers' Compensation statutes. She documented that Claimant should be referred for prosthesis care to a provider who accepts and treats patients under Workers' Compensation.

14. On March 10, 2022 Claimant again had a video appointment with Dr. Wakeshima. Dr. Wakeshima recounted that, although it had been difficult to acquire progress notes from the VA, Claimant's son was able to obtain them through the patient portal and could forward them. Notably, Dr. Wakeshima commented that there was now a formal request for prosthetic treatment through the VA. Nevertheless, he again remarked that the adjuster had previously stated Respondent would not work with the VA for Workers' Compensation claims.

15. On November 3, 2022 Claimant presented for a follow-up DIME with Dr. Mason. Dr. Mason determined that Claimant reached MMI on November 3, 2022 and assigned permanent impairment. Maintenance recommendations included prosthetic evaluation and adjustment. Dr. Mason remarked Claimant "is comfortable with VA Hospital. I would not necessarily change his treating providers at this point, but do agree that the comp carrier should be financially responsible for that treatment. I agree with Dr. Wakeshima continuing to follow him…"

16. The doctrines of issue preclusion, claim preclusion and law of the case do not bar Claimant from litigating whether the VA is an authorized provider. Initially, Claimant received treatment at different medical facilities following his work injury. Some of Claimant's care was related to his industrial injury and some was not. He began treating at the VA in October or November, 2014. On July 9, 2020 the parties proceeded to a hearing before ALJ Nemechek on whether Claimant had proven by the preponderance of the evidence that the treatment he received at the VA for his industrial injuries was authorized. On August 28, 2020 ALJ Nemechek issued a Summary Order. He specifically

found in paragraph 20 that there was no evidence that ATP Dr. Wakeshima referred Claimant to the VA. He also determined in paragraph 21 that there was insufficient evidence to conclude that Claimant's care at the VA was within the normal progression of medical treatment.

17. Subsequent to the hearing before ALJ Nemechek, Dr. Wakeshima made multiple referrals for Claimant to obtain prosthetic treatment through the VA. For example, on July 16, 2020 Dr. Wakeshima wrote Claimant "specific orders for physical therapy and prosthesis to be performed/made through the VA Medical Center. I have previously not written patient any orders for prosthetic training and prosthesis to Hanger orthotics or Spaulding rehab as this was a second choice and the primary and preferred choice is to have this accomplished through the VA Medical Center." Moreover, on December 9, 2021 Dr. Wakeshima noted that he had written a referral to the VA "to specifically address whether [Claimant] will need a new socket and document its cost as this replacement socket would be related to his work injury, and should be covered by Workers' Compensation." Moreover, on March 10, 2022 Dr. Wakeshima commented that there was now a formal request for prosthetic treatment through the VA. Dr. Wakeshima's preceding comments reflect that the record is replete with referrals to the VA for Claimant's prosthetic care subsequent to the hearing before ALJ Nemechek.

18. Relying on issue and claim preclusion as well as the law of the case doctrine, Respondent contends that ALJ Nemechek's determinations in his August 20, 2020 Summary Order preclude Claimant from asserting that he was referred to the VA for treatment. However, the issue sought to be precluded is not identical to an issue actually determined in the prior proceeding because Dr. Wakeshima's numerous referrals to the VA occurred after ALJ Nemechek's Summary Order. The legal and factual matters for determination of whether the VA was authorized changed when Dr. Wakeshima explicitly referred Claimant for prosthetic care at the VA. Respondent has thus failed to establish the first prong of issue preclusion. Moreover, claim preclusion does not apply because, based on Dr. Wakeshima's referrals, the claims for relief are not identical. Accordingly, Claimant is not barred from litigating the issue of whether he was referred to the VA for treatment.

19. Claimant has established it is more probably true than not that the VA is an authorized provider. In contrast, Respondent contends that Dr. Wakeshima did not exercise his independent medical judgment in making referrals to the VA but instead made the referrals because Claimant obtained treatment at the VA both before and after the Summary Order. However, the record contains ample evidence to support that Dr. Wakeshima used his independent medical judgment concerning the referrals to the VA. The record is replete with evidence that Dr. Wakeshima did not refer Claimant to the VA for nonmedical reasons. Because Claimant did not engage in manipulative behavior and Dr. Wakeshima exercised independent decision-making, the referrals occurred in the normal progression of authorized care.

20. In his July 16, 2020 report Dr. Wakeshima detailed that Claimant has had excellent progress with prosthetic training through the physical therapy department at the VA. Dr. Wakeshima thus wrote Claimant a specific order for physical therapy and

requested authorization for Claimant's prosthesis through the VA. He detailed that Claimant had been working with the VA and was very comfortable continuing treatment. Moreover, Dr. Wakeshima remarked that the VA has "significant experiences with prosthetic limbs, including the elderly population and therefore should be able to set [Claimant] up with the lightest and most straightforward prosthesis for his above-knee amputation as recommended on Dr. Mason's DIME." Furthermore, on January 29, 2022 Dr. Wakeshima noted that he submitted a referral directly to the VA prosthetic clinic. He specifically documented in the referral that the prosthesis might be covered under Workers' Compensation. Dr. Wakeshima also inquired in the referral whether Claimant required a new socket or further modifications to his prosthesis. He asked the VA to document estimated costs and forward the request for authorization to Claimant's Workers' Compensation carrier. On March 10, 2022 Dr. Wakeshima recounted that, although it had been difficult to acquire progress notes from the VA, Claimant's son was able to obtain them through the patient portal and could forward them. Notably, Dr. Wakeshima sought to review Claimant's progress notes to provide appropriate care and recommendations.

21. Simply because Claimant requested ATP Dr. Wakeshima for a referral because he was comfortable with care at the VA does not mean the referrals were outside the scope of the normal progression of treatment. Instead, the preceding chronology reflects that Dr. Wakeshima exercised his independent medical judgment in referring Claimant to the VA. Notably, there is substantial evidence in the record that Dr. Wakeshima accommodated Claimant's request for a referral to the VA based on his professional determination that further evaluation and treatment from the VA was appropriate. Dr. Wakeshima specified that the VA had significant experience with prosthetic limbs for the elderly population and could obtain the lightest and most straightforward prosthesis for Claimant. The VA thus became authorized as a result of ATP Dr. Wakeshima's referrals in the normal course of treatment.

CONCLUSIONS OF LAW

1. The purpose of the "Workers' Compensation Act of Colorado" (Act) is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of any litigation. §8-40-102(1), C.R.S. A claimant in a Workers' Compensation claim has the burden of proving entitlement to benefits by a preponderance of the evidence. §8-42-101, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979); *People v. M.A.*, 104 P.3d 273, 275 (Colo. App. 2004). The facts in a Workers' Compensation case are not interpreted liberally in favor of either the rights of the injured worker or the rights of the employer. §8-43-201, C.R.S. A Workers' Compensation case is decided on its merits. §8-43-201, C.R.S.

2. The Judge's factual findings concern only evidence that is dispositive of the issues involved; the Judge has not addressed every piece of evidence that might lead to a conflicting conclusion and has rejected evidence contrary to the above findings as

unpersuasive. *See Magnetic Engineering, Inc. v. ICAO,* 5 P.3d 385, 389 (Colo. App. 2000).

3. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *See Prudential Insurance Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); CJI, Civil 3:16 (2007).

Claim Preclusion, Issue Preclusion and Law of the Case

4. Claim and issue preclusion are affirmative defenses that must be pled and proven by the party seeking to apply the doctrines. *Bristol Bay Prods., LLC v. Lampack*, 312 P.3d 1155, 1164 (Colo. 2013). Although issue preclusion was created as a judicial doctrine, it has been extended to administrative proceedings, where it "may bind parties to an administrative agency's findings of fact or conclusions of law." *Sunny Acres Villa, Inc. v. Cooper*, 25 P.3d 44, 47 (Colo. 2001); see *Holnam v. Indus. Claim Appeals Off.,* 159 P.3d 795 (Colo. App. 2006*)*.

5. Issue preclusion is broader than claim preclusion in that it applies to a cause of action different from that involved in the original proceeding. However, issue preclusion is narrower than claim preclusion because it does not apply to matters that could have been litigated in the prior proceeding but were not. *Pomeroy v. Waitkus*, 183 Colo. 244, 517 P.2d 396 (1974). Issue preclusion bars re-litigation of an issue if:

> (1) the issue sought to be precluded is identical to an issue actually determined in the prior proceeding; (2) the party against whom [issue preclusion] is asserted has been a party to or is in privity with a party to the prior proceeding; (3) there is a final judgment on the merits in the prior proceeding; and (4) the party against whom the doctrine is asserted had a full and fair opportunity to litigate the issue in the prior proceeding.

Youngs v. Indus. Claim Appeals Off., 297 P.3d 964, 974 (Colo. App. 2012); *Feeley v. Indus. Claim Appeals Off.*, 195 P.3d 1154, 1156 (Colo. App. 2008). An issue can be identical for issue preclusion purposes if either the facts or the legal matter raised is the same. *Carpenter v. Young*, 773 P.2d 561, 565 n. 5 (Colo.1989).

6. A full and fair opportunity to litigate an issue requires not only the availability of procedures in the earlier proceeding commensurate with those in the subsequent proceeding, but also that the party against whom the doctrine is asserted has had the same incentive to vigorously defend itself in the previous action. *Sunny Acres Villa, Inc.*, 25 P.3d at 47. A party lacks the same incentive to defend where its exposure to liability is substantially less than at the prior proceeding. *Salida Sch. Dist. R-32-J v. Morrison,* 732 P.2d 1160, 1166-67 (Colo. 1987). In addition to the amount of potential money awards, significant variations in exposure may arise from differences in the finality or permanence of judgments. *Sunny Acres Villa, Inc.*, 25 P.3d at 47.

7. Claim preclusion bars re-litigation of previously decided matters and matters that could have been raised in a prior proceeding but were not. *Foster v. Plock,* 411 P.3d 1008, 1014 (Colo.App.2016). The elements of claim preclusion are: “(1) finality of the first judgment, (2) identity of subject matter, (3) identity of claims for relief, (4) identity or privity of parties to the actions.” *Camus v. State Farm Insurance*, 151 P.3d 678, 680 (Colo. App. 2006). Claim preclusion blocks litigation of claims that were or might have been decided only if the claims are tied by the same injury. *Layton Construction Co. v. Shaw Contract Flooring Servs., Inc.*, 409 P.3d 602 (Colo. App. 2016).

8. The law of the case doctrine is a "discretionary rule of practice ... based primarily on considerations of judicial economy and finality." *Brodeur v. American Home Assurance Co.,* 169 P.3d 139, 149 (Colo. 2007). Under the doctrine, although a court is “not inexorably bound by its own precedents, prior relevant rulings made in the same case are generally to be followed.” *In re Bass,* 142 P.3d 1259, 1263 (Colo.2006). Therefore, "[w]hen a court issues final rulings in a case, the 'law of the case' doctrine generally requires the court to follow its prior relevant rulings." *Giampapa v. American Family Mut. Ins. Co.,* 64 P.3d 230, 243 (Colo. 2003).

9. As found, the doctrines of issue preclusion, claim preclusion and law of the case do not bar Claimant from litigating whether the VA is an authorized provider. Initially, Claimant received treatment at different medical facilities following his work injury. Some of Claimant’s care was related to his industrial injury and some was not. He began treating at the VA in October or November, 2014. On July 9, 2020 the parties proceeded to a hearing before ALJ Nemechek on whether Claimant had proven by the preponderance of the evidence that the treatment he received at the VA for his industrial injuries was authorized. On August 28, 2020 ALJ Nemechek issued a Summary Order. He specifically found in paragraph 20 that there was no evidence that ATP Dr. Wakeshima referred Claimant to the VA. He also determined in paragraph 21 that there was insufficient evidence to conclude that Claimant’s care at the VA was within the normal progression of medical treatment.

10. As found, subsequent to the hearing before ALJ Nemechek, Dr. Wakeshima made multiple referrals for Claimant to obtain prosthetic treatment through the VA. For example, on July 16, 2020 Dr. Wakeshima wrote Claimant “specific orders for physical therapy and prosthesis to be performed/made through the VA Medical Center. I have previously not written patient any orders for prosthetic training and prosthesis to Hanger orthotics or Spaulding rehab as this was a second choice and the primary and preferred choice is to have this accomplished through the VA Medical Center.” Moreover, on December 9, 2021 Dr. Wakeshima noted that he had written a referral to the VA “to specifically address whether [Claimant] will need a new socket and document its cost as this replacement socket would be related to his work injury, and should be covered by Workers’ Compensation.” Moreover, on March 10, 2022 Dr. Wakeshima commented that there was now a formal request for prosthetic treatment through the VA. Dr. Wakeshima’s preceding comments reflect that the record is replete with referrals to the VA for Claimant’s prosthetic care subsequent to the hearing before ALJ Nemechek.

11. As found, relying on issue and claim preclusion as well as the law of the case doctrine, Respondent contends that ALJ Nemechek's determinations in his August 20, 2020 Summary Order preclude Claimant from asserting that he was referred to the VA for treatment. However, the issue sought to be precluded is not identical to an issue actually determined in the prior proceeding because Dr. Wakeshima's numerous referrals to the VA occurred after ALJ Nemechek's Summary Order. The legal and factual matters for determination of whether the VA was authorized changed when Dr. Wakeshima explicitly referred Claimant for prosthetic care at the VA. Respondent has thus failed to establish the first prong of issue preclusion. Moreover, claim preclusion does not apply because, based on Dr. Wakeshima's referrals, the claims for relief are not identical. Accordingly, Claimant is not barred from litigating the issue of whether he was referred to the VA for treatment.

Authorization

12. Authorization to provide medical treatment refers to a medical provider's legal authority to treat the claimant with the expectation that the provider will be compensated by the insurer for treatment. *Bunch v. Indus. Claim Appeals Off.,* 148 P.3d 381 (Colo. App. 2006); *One Hour Cleaners v. Indus. Claim Appeals Off.,* 914 P.2d 501 (Colo. App. 1995). Authorized providers include those medical providers to whom the claimant is directly referred by the employer, as well as providers to whom an ATP refers the claimant in the normal progression of authorized treatment. *Town of Ignacio v. Indus. Claim Appeals Off.,* 70 P.3d 513 (Colo. App. 2002); *City of Durango v. Dunagan,* 939 P.2d 496 (Colo. App. 1997). Whether an ATP has made a referral in the normal progression of authorized treatment is a question of fact for the ALJ. *Kilwein v. Indus. Claim Appeals Off.,* 198 P.3d 1274, 1276 (Colo. App. 2008); *In re Bell*, WC 5-044-948-01 (ICAO, Oct. 16, 2018). If the claimant obtains unauthorized medical treatment, the respondents are not required to pay for it. *In Re Patton*, WC's 4-793-307 & 4-794-075 (ICAO, June 18, 2010); *see Yeck v. Indus. Claim Appeals Off.,* 996 P.2d 228 (Colo. App. 1999); *Jewett v. Air Methods Corporation,* WC 5-073-549-001 (ICAO, Mar. 2, 2020) (reasoning that surgery performed by an unauthorized provider was not compensable because the employer had furnished medical treatment after receiving knowledge of the injury).

13. If an ATP refers a claimant to his personal physician based on the mistaken conclusion that a particular condition is not work related, the referral may be considered valid because the risk of mistake falls on the employer. *Cabela v. indus. Claim Appeals Off.,* 198 P.3d 1277 (Colo. App. 2008). However, an ATP may limit the scope of a referral to a specific type of treatment, and if the provider to whom the claimant was referred provides treatment beyond the scope of the referral, the care is not in the normal progression of authorized treatment. Whether a referral is limited or general in scope presents a question of fact for the ALJ. *Kilwein v. Indus. Claim Appeals Off.*, 198 P.3d 1274 (Colo. App. 2008); *Garcia v. Safeway*, W.C. 4-533-704 (ICAO, Mar. 19, 2004).

14. A referral that is based upon the treating physician's independent medical judgment and not manipulative behavior by the claimant is a referral in the normal progression of authorized treatment. *In Re Jurgens v. Prowers Medical Center*, W.C. 4-

576-630 (ICAO, June 24, 2004). In *City of Durango v. Dunagan,* 939 P.2d 496, 500 (Colo. App. 1997), the court of appeals determined that "the mere fact that the claimant requested that the authorized treating physician make a referral does not mean that said referral is outside the scope of the normal progression of treatment." To the contrary, the legal test is whether the treating physician exercised independent medical judgment in making the referral. *See Id.*; *In Re Sackett v. City Market*, W.C. 4-944-222-001 (ICAO, Apr. 21, 2015) (concluding that, where referral was made for non-medical reasons physician did not exercise his independent medical judgment and referral was unauthorized). Resolution of whether a physician exercised his independent medical judgment in making a referral is a question of fact for determination by an ALJ. *Rosson v. Owens*, W.C. 4-292-534 (ICAO, May 10, 2001).

15. As found, Claimant has established by a preponderance of the evidence that the VA is an authorized provider. In contrast, Respondent contends that Dr. Wakeshima did not exercise his independent medical judgment in making referrals to the VA but instead made the referrals because Claimant obtained treatment at the VA both before and after the Summary Order. However, the record contains ample evidence to support that Dr. Wakeshima used his independent medical judgment concerning the referrals to the VA. The record is replete with evidence that Dr. Wakeshima did not refer Claimant to the VA for nonmedical reasons. Because Claimant did not engage in manipulative behavior and Dr. Wakeshima exercised independent decision-making, the referrals occurred in the normal progression of authorized care.

16. As found, in his July 16, 2020 report Dr. Wakeshima detailed that Claimant has had excellent progress with prosthetic training through the physical therapy department at the VA. Dr. Wakeshima thus wrote Claimant a specific order for physical therapy and requested authorization for Claimant's prosthesis through the VA. He detailed that Claimant had been working with the VA and was very comfortable continuing treatment. Moreover, Dr. Wakeshima remarked that the VA has "significant experiences with prosthetic limbs, including the elderly population and therefore should be able to set [Claimant] up with the lightest and most straightforward prosthesis for his above-knee amputation as recommended on Dr. Mason's DIME." Furthermore, on January 29, 2022 Dr. Wakeshima noted that he submitted a referral directly to the VA prosthetic clinic. He specifically documented in the referral that the prosthesis might be covered under Workers' Compensation. Dr. Wakeshima also inquired in the referral whether Claimant required a new socket or further modifications to his prosthesis. He asked the VA to document estimated costs and forward the request for authorization to Claimant's Workers' Compensation carrier. On March 10, 2022 Dr. Wakeshima recounted that, although it had been difficult to acquire progress notes from the VA, Claimant's son was able to obtain them through the patient portal and could forward them. Notably, Dr. Wakeshima sought to review Claimant's progress notes to provide appropriate care and recommendations.

17. As found, simply because Claimant requested ATP Dr. Wakeshima for a referral because he was comfortable with care at the VA does not mean the referrals were outside the scope of the normal progression of treatment. Instead, the preceding

chronology reflects that Dr. Wakeshima exercised his independent medical judgment in referring Claimant to the VA. Notably, there is substantial evidence in the record that Dr. Wakeshima accommodated Claimant's request for a referral to the VA based on his professional determination that further evaluation and treatment from the VA was appropriate. Dr. Wakeshima specified that the VA had significant experience with prosthetic limbs for the elderly population and could obtain the lightest and most straightforward prosthesis for Claimant. The VA thus became authorized as a result of ATP Dr. Wakeshima's referrals in the normal course of treatment. *See In Re Jurgens v. Prowers Medical Center*, W.C. 4-576-630 (ICAO, June 24, 2004) (concluding that, where the claimant called the ATP and requested a referral to another neurosurgeon based on the recommendation of her personal chiropractor, the referral was made in the normal course of treatment and thus authorized); *Rosson v. Owens*, W.C. 4-292-534 (ICAO, May 10, 2001) (determining that ATP exercised independent medical judgment where his referral to a neurologist was based on the claimant's familiarity with the neurologist and the claimant suggested the referral).

ORDER

Based upon the preceding findings of fact and conclusions of law, the Judge enters the following order:

1. Claimant is not barred from litigating the issue of whether he was referred to the VA for treatment.

2. Based on ATP Dr. Wakeshima's referrals in the normal course of treatment, the VA is an authorized medical provider.

3. Any issues not resolved in this order are reserved for future determination.

If you are a party dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman Street, 4th Floor, Denver, Colorado, 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. *For statutory reference, see section 8-43-301(2), C.R.S. (as amended, SB09-070). For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a form for a petition to review at https://oac.colorado.gov/resources/oac-forms*.

ISSUES

1. Whether Claimant has proven by a preponderance of the evidence that continuing medical maintenance benefits in the form of opioid medications are reasonable, necessary and causally related to her August 28, 2005 industrial injuries.

2. Whether Claimant has established by a preponderance of the evidence that medical maintenance benefits in the form of Ketamine infusions are reasonable, necessary and causally related to her August 28, 2005 industrial injuries.

FINDINGS OF FACT

1. Claimant worked for Employer as a hairstylist and manager. On August 28, 2005 Claimant sustained a compensable injury to her left elbow when she slipped and fell at work. On February 10, 2010 ALJ Cannici issued an Order concluding that Claimant was permanently and totally disabled. Respondents began paying benefits pursuant to the Order and filed a Final Admission of Liability (FAL) on May 5. 2010. Claimant continued to receive maintenance care from her treating physicians. She had a Spinal Cord Stimulator (SCS) implant prior to reaching Maximum Medical Improvement (MMI).

2. On August 25, 2020 Respondents filed an application for hearing challenging the reasonableness and necessity of medical maintenance care. Respondents specifically disputed the reasonableness and necessity of opioid medications and Ketamine infusions that have been prescribed by Claimant's current Authorized Treating Physician (ATP) Paul S. Leo, M.D.

3. Respondents retained Nicholas K. Olsen as their medical expert in the present matter. On February 23, 2021 the parties conducted the post-hearing evidentiary deposition of Dr. Olsen. He explained that Claimant has been chronically using opioid medications since the date of her injury. In a report dated April 3, 2017 Dr. Olsen noted that Claimant had been on high doses of opioids for over eight years. He also commented that there was no evidence that her function had improved or the opioids had decreased her pain levels.

4. The medical records frequently reference MME levels. Dr. Olsen testified that MME stands for Morphine Milligram Equivalent. Each opioid has a conversion to MME. The MME thus serves as a standard to compare the strength of different opioids. Dr. Olsen remarked that it is generally accepted that the MME levels should be no higher than 60-90.

5. In 2017 Claimant received care from ATP Peter N. Reusswig, M.D. Claimant treated with Dr. Reusswig until he passed away. Claimant subsequently received treatment from Dr. Reusswig's partner ATP Amar Patel, M.D. beginning in 2018.

6. On July 11, 2018 Claimant visited Dr. Patel for an examination. Dr. Patel commented that Claimant had been on high dose opioid therapy for quite some time and was going to need to be weaned. The dose was simply too high. When Claimant returned to Dr. Patel on September 4, 2018 he again stated that Claimant's opioids were too high and it was necessary to start the weaning process.

7. On October 2, 2018 Claimant saw Physician's Assistant Joseph Shankland at Dr. Patel's office. PA-C Shankland reported that Claimant had a second SCS implant about three weeks before the appointment. Claimant had noticed about a 50% improvement in her pain. She was taking Hydromorphone 2 MG tablets and using five different fentanyl patches. PA-C Shankland remarked that: "Pt has already started a self taper at this time. Coming into today MME=190, after today it is MME=182. Will need to continue downward trend to get the pt below MME=120 or lower, overall goal is MME=90."

8. On December 4, 2018 Claimant returned to Dr. Patel for an evaluation. He explained that the second SCS device was helping with Claimant's back pain. In addressing weaning from opioids Dr. Patel remarked, "she has been on high dose opiates pending placement of this device (done by Dr. Beasley at BNA). Accordingly, we are going to continue weaning her. Today, Fentanyl TD reduced by 12 mcg. We will CONTINUE TO WEAN MONTHLY TO AN OME < 90. Continue Hydromorphone by mouth for now. Follow-up in 1 month. The patient appears to be using opiates appropriately, without evidence of misuse or diversion."

9. On February 5, 2019 Claimant saw Dr. Patel for an examination. Dr. Patel explained that he had a long discussion with Claimant and her husband about the goal of weaning and engaging in a minimum 4-6 week opiate free period. He remarked that Claimant could consider a Ketamine infusion that "would be excellent to assist with continuing to reduce opiates. We will see if this can get approved w/her insurance carrier."

10. On May 21, 2019 Claimant returned to Dr. Patel's office and visited Nurse Practitioner Susan Miget for an examination. Claimant reported body pain and repeated that her SCSs were not helping with pain. She reported pain levels of 8 out of 10. Claimant commented that Suboxone was making her feel sick and drunk. NP-C Miget switched Claimant from Suboxone and started her on Nucynta.

11. Claimant again visited Dr. Patel on July 2, 2019 for an examination. Dr. Patel noted that he and Claimant discussed the goal of completely weaning her from opioids within the next three months. Moreover, he also had an extensive discussion with Claimant and her husband about the reasonable option of Ketamine infusions based on her positive response to Nucynta. Dr. Patel noted that they had tried many other medications, including Gabapentin, Lyrica and Cymbalta, that were all discontinued due

to side effects. He reduced Claimant's Nucynta from 100 mg to 50 mg per day and Oxycodone from four to three per day.

12. On July 16, 2019 Claimant visited NP-C Miget for an evaluation. Claimant reported that her pain levels were 8 out of 10. NP-C Miget recounted that Claimant's husband specified Claimant had suffered severe pain since Dr. Patel had reduced her opioid medications. NP-C Miget detailed that every attempt to even slightly decrease Claimant's opioids had resulted in an immediate clinic follow-up visit to adjust medications back to previous levels. She had repeatedly asked Claimant to give any changes a few weeks to determine their effects. At the end of the visit, NP-C Miget adjusted Claimant's long-acting Nucynta back to 100 mg.

13. Dr. Patel testified at the hearing that in 2018 he sought to decrease Claimant's daily opiate pain medications. He explained that he attempted to substitute opiate medications with non-opiate treatments including Gabapentin, Lyrica, Cymbalta and Suboxone. However, after each trial of the non-opiate medications, Claimant quickly reported that she was experiencing difficult side effects and requested restoration of her opiate prescriptions. Claimant also complained that her SCS was no longer effective in mitigating her pain. Dr. Patel recommended a six-week period of abstinence from opiates because Claimant's system had become desensitized to their effectiveness. He emphasized that the goal of opioid reduction is to reach the lowest possible dose that achieves pain relief and maintains function. Dr. Patel recommended a series of Ketamine infusions to aid in abstinence. However, because of Claimant's resistance to his recommendations, Dr. Patel concluded Claimant and her husband were attempting to dictate medical care. He thus resigned as her physician. Dr. Patel summarized that Claimant needs to be completely weaned from opioid medications.

14. On September 16, 2019 Claimant began treatment with ATP Dr. Leo. On January 13, 2021 the parties conducted the pre-hearing evidentiary deposition of Dr. Leo. He noted that he sees Claimant at least monthly through Telehealth to monitor her opioid medications. Dr. Leo testified that Claimant suffers from Chronic Regional Pain Syndrome (CRPS). He recounted that Claimant was using Nucynta extended release 100 millligrams twice per day and five milligrams of Oxycodone up to four times each day for a total MME of 110. Claimant also takes a variety of non-opioid medications for her symptoms. He explained that Claimant's current medication regimen is reasonable and necessary to treat her work injuries. Dr. Leo commented that Ketamine infusions would hopefully help relieve Claimant's pain and reduce her dependence on opioids.

15. In a clinical note from October 24, 2020 Dr. Leo stated it was "absurd" that Respondents were trying to have Claimant wean off her medications "which are within the guideline for morphine equivalent and dose, and clearly helpful to her." Similarly, in his pre-hearing deposition, Dr. Leo explained that Claimant's MME of 110 was within the guidelines of between 90-120 MME's daily. He further elaborated that, even if Claimant's level of 90 MME is a "little above" the guidelines, the amount is "easily justified" and he did not "see any reason to decrease [Claimant] at this point" because it would not benefit her. Dr. Leo also acknowledged that he had not made any attempts to wean Claimant off

her opiates during treatment. He summarized that Claimant's current medication regime was appropriate.

16. Claimant testified at the hearing in this matter. She remarked that she still suffers from pain as a result of her work injuries. Claimant explained she is no longer using Fentanyl patches and has reduced her opioid use. She emphasized that she has consistently followed the recommendations of her physicians in reducing her opioid medications. Claimant would like to proceed with Ketamine infusions because the treatment may reduce her medications and alleviate her pain.

17. On February 23, 2021 the parties conducted the post-hearing evidentiary deposition of Dr. Olsen. Based on his evaluations of Claimant over the years, as well as a review of the extensive medical records, Dr. Olsen agreed with Dr. Patel that Claimant needs to be weaned from opioid medications. He explained that, given Dr. Patel's experience with Claimant and her husband during Dr. Patel's attempt to wean her from opioids, the weaning process could not be performed on an outpatient basis. Instead, weaning had to be done at an in-patient detoxification center. Dr. Olsen reasoned that, if Claimant did not accept the offer to attend an in-patient detoxification program, it would be unreasonable to allow Claimant to continue taking opioids. He explained that Claimant's intolerance to all prescribed non-narcotic medications suggests that she seeks to remain on opioid medications.

18. Respondents do not seek to terminate all of Claimant's medical maintenance benefits, but only her opioid medications. Claimant thus has the burden to prove the challenged treatment is reasonable, necessary and related to the industrial injury. The record reflects that Claimant has proven that it is more probably true than not that continuing medical maintenance benefits in the form of opioid medications are reasonable, necessary and causally related to her August 28, 2005 industrial injuries only for a six-month weaning period from the date of this order.

19. Initially, on August 28, 2005 Claimant sustained a compensable injury to her left elbow when she slipped and fell at work. Dr. Olsen persuasively explained that Claimant has used opioids dating back to her industrial injury. In a report from April 3, 2017 Dr. Olsen specified that Claimant had been on high doses of opioids for over eight years. He remarked that it is generally accepted that MME levels should be no higher than 60-90. Dr. Olsen also commented that there is no evidence that her function has improved or her pain levels have decreased. By July 11, 2018 ATP Dr. Patel also remarked that Claimant had been on high dose opioid therapy for quite some time and needed to be weaned. The medical records reveal that he continued to discuss the opioid weaning process with Claimant and her husband. Dr. Patel testified that it was apparent Claimant was fixated on staying on opioids. He remarked that Claimant and her husband had resisted all attempts to reduce opioids. Dr. Patel summarized that Claimant needs to be completely weaned from opioid medications. Finally, based on his evaluations of Claimant over the years, as well as a review of the extensive medical records, Dr. Olsen agreed with Dr. Patel that Claimant needs to be weaned from opioid medications.

20. In contrast, ATP Dr. Leo testified that Claimant's current medication regimen is reasonable and necessary to treat her work injuries. However, the medical records, in conjunction with the persuasive opinions of Drs. Patel and Olsen, reflect that Claimant necessitates weaning from opioids. Specifically, Claimant requires a reduction of opioids until her use of the medications ceases. Accordingly, Claimant has established that her use of opioids is only reasonable and necessary to treat her August 28, 2005 industrial injuries for a six-month weaning period. Claimant shall be weaned from opioids within six months from the date of this order. Respondents are thus only obligated to pay for opiate medications for the next six months while Claimant weans off her opiate medications. If Claimant is not fully weaned from her opiates after six months, then Respondents are no longer financially responsible for opioid medications under the present claim.

21. Claimant has established that it is more probably true than not that medical maintenance benefits in the form of Ketamine infusions are reasonable, necessary and causally related to her August 28, 2005 industrial injuries only for a six-month weaning period from the date of this order. The bulk of the evidence demonstrates that Ketamine infusions will reduce Claimant's reliance on opioids and thus aid in the reduction and cessation of opioid medications. Therefore, Respondents shall only be obligated to pay for Ketamine infusions for six months from the date of this order.

22. In a February 5, 2019 examination, Dr. Patel had a long discussion with Claimant and her husband about the goal of weaning and engaging in a minimum 4-6 week opiate free period. He remarked that Claimant could consider a Ketamine infusion that "would be excellent to assist with continuing to reduce opiates." Dr. Patel explained that Ketamine infusions constituted a reasonable treatment option to reduce Claimant's opioid reliance. On October 30, 2019 Dr. Leo reported that Claimant was getting relief from her SCSs and stated that "[i]f we can assure that she will have a Ketamine infusion we can then continue to decrease medications if that infusion is successful." Furthermore, Dr. Leo testified that Ketamine infusions would hopefully relieve Claimant's pain and reduce her dependence on opioids. Finally, Claimant noted she would like to proceed with Ketamine infusions with the hope that the treatment will reduce her medications and alleviate her pain.

23. In contrast, Dr. Olsen explained that there is a lack of evidence suggesting that Ketamine can do what the providers in the present matter suggest it can do. Despite Dr. Olsen's opinion, the medical records, in conjunction with the persuasive opinions of ATPs Drs. Patel and Leo, reveal that Ketamine treatment is a reasonable and necessary modality to reduce Claimant's reliance on opioids and facilitate the weaning process. However, the record reveals that Dr. Leo may not agree to reduce or wean Claimant from opioid medications. Notably, he did not "see any reason to decrease [Claimant] at this point" because it would not benefit her. Dr. Leo also acknowledged that he had not made any attempts to wean Claimant off her opiates during treatment. He summarized that Claimant's current medication regime was appropriate. Based on Dr. Leo's stated reluctance to wean Claimant from opioids, Respondents shall not be required to pay for Ketamine infusions for more than a period of six months. Accordingly, Claimant may only

receive Ketamine infusions for a six-month weaning period from the date of this order. If Claimant is not fully weaned from her opiates after six months, then Respondents are no longer financially responsible for Ketamine treatment under the present claim.

CONCLUSIONS OF LAW

1. The purpose of the "Workers' Compensation Act of Colorado" (Act) is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of any litigation. §8-40-102(1), C.R.S. A claimant in a Workers' Compensation claim has the burden of proving entitlement to benefits by a preponderance of the evidence. §8-42-101, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979); *People v. M.A.*, 104 P.3d 273, 275 (Colo. App. 2004). The facts in a Workers' Compensation case are not interpreted liberally in favor of either the rights of the injured worker or the rights of the employer. §8-43-201, C.R.S. A Workers' Compensation case is decided on its merits. §8-43-201, C.R.S.

2. The Judge's factual findings concern only evidence that is dispositive of the issues involved; the Judge has not addressed every piece of evidence that might lead to a conflicting conclusion and has rejected evidence contrary to the above findings as unpersuasive. *See Magnetic Engineering, Inc. v. ICAO,* 5 P.3d 385, 389 (Colo. App. 2000).

3. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *See Prudential Insurance Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); CJI, Civil 3:16 (2007).

Medical Maintenance Benefits

4. Generally, to prove entitlement to medical maintenance benefits, a claimant must present substantial evidence to support a determination that future medical treatment will be reasonably necessary to relieve the effects of the industrial injury or prevent further deterioration of his condition. *Grover v. Industrial Comm'n.,* 759 P.2d 705, 710-13 (Colo. 1988). However, when respondents file a final admission of liability acknowledging medical maintenance benefits pursuant to *Grover* they can seek to terminate their liability for ongoing maintenance medical treatment. *See* §8-43-201(1), C.R.S.; *Snyder v. Indus. Claim Appeals Off.*, 942 P.2d 1337 (Colo. App. 1997). When the respondents contest the liability for a particular benefit, the claimant must prove that the challenged treatment is reasonable, necessary and related to the industrial injury. *Id.* However, when respondents seek to terminate all post-MMI benefits, they shoulder the burden of proof to terminate liability for maintenance medical treatment. *In Re Claim of Arguello*, W.C. No. 4-762-736-04 (ICAO, May 3, 2016); *In Re Claim of Dunn*, W.C. No. 4-754-838 (ICAO, Oct. 1, 2013). Specifically, respondents are not liable for future

maintenance benefits when they no longer relate back to the industrial injury. *See In Re Claim of Salisbury*, W.C. No. 4-702-144 (ICAO, June 5, 2012).

Opioid Medications

5. As found, Respondents do not seek to terminate all of Claimant's medical maintenance benefits, but only her opioid medications. Claimant thus has the burden to prove the challenged treatment is reasonable, necessary and related to the industrial injury. The record reflects that Claimant has proven by a preponderance of the evidence that continuing medical maintenance benefits in the form of opioid medications are reasonable, necessary and causally related to her August 28, 2005 industrial injuries only for a six-month weaning period from the date of this order.

6. As found, initially, on August 28, 2005 Claimant sustained a compensable injury to her left elbow when she slipped and fell at work. Dr. Olsen persuasively explained that Claimant has used opioids dating back to her industrial injury. In a report from April 3, 2017 Dr. Olsen specified that Claimant had been on high doses of opioids for over eight years. He remarked that it is generally accepted that MME levels should be no higher than 60-90. Dr. Olsen also commented that there is no evidence that her function has improved or her pain levels have decreased. By July 11, 2018 ATP Dr. Patel also remarked that Claimant had been on high dose opioid therapy for quite some time and needed to be weaned. The medical records reveal that he continued to discuss the opioid weaning process with Claimant and her husband. Dr. Patel testified that it was apparent Claimant was fixated on staying on opioids. He remarked that Claimant and her husband had resisted all attempts to reduce opioids. Dr. Patel summarized that Claimant needs to be completely weaned from opioid medications. Finally, based on his evaluations of Claimant over the years, as well as a review of the extensive medical records, Dr. Olsen agreed with Dr. Patel that Claimant needs to be weaned from opioid medications.

7. As found, in contrast, ATP Dr. Leo testified that Claimant's current medication regimen is reasonable and necessary to treat her work injuries. However, the medical records, in conjunction with the persuasive opinions of Drs. Patel and Olsen, reflect that Claimant necessitates weaning from opioids. Specifically, Claimant requires a reduction of opioids until her use of the medications ceases. Accordingly, Claimant has established that her use of opioids is only reasonable and necessary to treat her August 28, 2005 industrial injuries for a six-month weaning period. Claimant shall be weaned from opioids within six months from the date of this order. Respondents are thus only obligated to pay for opiate medications for the next six months while Claimant weans off her opiate medications. If Claimant is not fully weaned from her opiates after six months, then Respondents are no longer financially responsible for opioid medications under the present claim.

Ketamine Infusions

8. As found, Claimant has established by a preponderance of the evidence that medical maintenance benefits in the form of Ketamine infusions are reasonable, necessary and causally related to her August 28, 2005 industrial injuries only for a six-

month weaning period from the date of this order. The bulk of the evidence demonstrates that Ketamine infusions will reduce Claimant's reliance on opioids and thus aid in the reduction and cessation of opioid medications. Therefore, Respondents shall only be obligated to pay for Ketamine infusions for six months from the date of this order.

9. As found, in a February 5, 2019 examination, Dr. Patel had a long discussion with Claimant and her husband about the goal of weaning and engaging in a minimum 4-6 week opiate free period. He remarked that Claimant could consider a Ketamine infusion that "would be excellent to assist with continuing to reduce opiates." Dr. Patel explained that Ketamine infusions constituted a reasonable treatment option to reduce Claimant's opioid reliance. On October 30, 2019 Dr. Leo reported that Claimant was getting relief from her SCSs and stated that "[i]f we can assure that she will have a Ketamine infusion we can then continue to decrease medications if that infusion is successful." Furthermore, Dr. Leo testified that Ketamine infusions would hopefully relieve Claimant's pain and reduce her dependence on opioids. Finally, Claimant noted she would like to proceed with Ketamine infusions with the hope that the treatment will reduce her medications and alleviate her pain.

10. As found, in contrast, Dr. Olsen explained that there is a lack of evidence suggesting that Ketamine can do what the providers in the present matter suggest it can do. Despite Dr. Olsen's opinion, the medical records, in conjunction with the persuasive opinions of ATPs Drs. Patel and Leo, reveal that Ketamine treatment is a reasonable and necessary modality to reduce Claimant's reliance on opioids and facilitate the weaning process. However, the record reveals that Dr. Leo may not agree to reduce or wean Claimant from opioid medications. Notably, he did not "see any reason to decrease [Claimant] at this point" because it would not benefit her. Dr. Leo also acknowledged that he had not made any attempts to wean Claimant off her opiates during treatment. He summarized that Claimant's current medication regime was appropriate. Based on Dr. Leo's stated reluctance to wean Claimant from opioids, Respondents shall not be required to pay for Ketamine infusions for more than a period of six months. Accordingly, Claimant may only receive Ketamine infusions for a six-month weaning period from the date of this order. If Claimant is not fully weaned from her opiates after six months, then Respondents are no longer financially responsible for Ketamine treatment under the present claim.

ORDER

Based upon the preceding findings of fact and conclusions of law, the Judge enters the following order:

1. Claimant shall receive opioid medications for a six-month weaning period from the date of this order. If Claimant is not fully weaned from her opiates after six months, then Respondents are no longer financially responsible for opioid medications under the present claim.

2. Claimant may receive Ketamine infusions for a six-month weaning period from the date of this order. If Claimant is not fully weaned from her opiates after six

months, then Respondents are no longer financially responsible for Ketamine treatment under the present claim.

3. Any issues not resolved in this order are reserved for future determination.

If you are a party dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman Street, 4th Floor, Denver, Colorado, 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. *For statutory reference, see section 8-43-301(2), C.R.S. (as amended, SB09-070). For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a form for a petition to review at https://oac.colorado.gov/resources/oac-forms*.

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. WC 5-193-745-002

ISSUES

I. Whether Respondent established by a preponderance of the evidence Respondent is entitled to withdraw its Final Admission of Liability (FAL) as a result of fraud.

II. Whether Respondent established by a preponderance of the evidence Claimant received an overpayment of worker's compensation benefits due to fraud and thus Respondent is entitled to repayment.

FINDINGS OF FACT

1. Claimant is a treasury clerk for Employer. Claimant has worked for Employer for approximately 15 years.

2. Claimant alleges she sustained a work injury on Friday, January 7, 2022 when she slipped and fell on ice in Employer's parking lot and twisted her ankle.

3. Claimant's scheduled start time is 6:00 a.m. Claimant testified at hearing she was running late to work on the morning of January 7, 2022 due to car trouble. She testified that that her common law husband, [Redacted, hereinafter DR], drove her to work that morning in a borrowed car.

4. At hearing, Claimant was shown Respondent's Exhibit F, an aerial view of her work location. Claimant testified that she and DR[Redacted] arrived in Employer's parking lot at approximately 6:25 a.m., entering through the [Redacted, hereinafter RC] entrance and pulling into a parking spot to the right of a large tree in front of her work building shown on the map. Claimant testified that upon exiting the vehicle, she slipped on ice, causing her ankle to go under the vehicle and twist. Claimant testified she initially believed she had just twisted her ankle. She testified DR[Redacted] then reminded her that they needed to pay a bill so she got back into the car. Claimant testified her and DR[Redacted] then exited Employer's parking lot and drove to a 7-11 store approximately one and a half blocks away. She testified she retrieved money from an ATM at the 7-11 store, gave DR[Redacted] the money, and proceeded to walk back to her work location while DR[Redacted] drove away. Claimant testified she walked back to work down 31st Street, turning into the work location through the entrance on 31st street.

5. Claimant testified that she was attempting to see if her ankle was "okay" while walking. Claimant testified that she did not report her alleged work injury to Employer on the date of the alleged incident because she thought she was okay. She testified that, upon arriving home after completing her shift on January 7, 2022, she experienced

swelling and bruising. She further testified that over the weakened she treated her ankle with ice and heat.

6. Claimant notified her supervisor of the alleged injury on the morning of Monday, January 10, 2022 and was sent for medical treatment.

7. Claimant presented to authorized treating physician (ATP) David Hnida, D.O. at Concentra on January 10, 2022 with complaints of persistent pain with no numbness or tingling. Physical examination of Claimant's ankle revealed ecchymosis and swelling laterally, tenderness in the lateral malleolus, and limited range of motion. X-rays revealed an avulsion fracture lateral malleolus. Dr. Hnida assessed Claimant with a right ankle fracture. He noted that the objective findings were consistent with Claimant's history and/or work-related mechanism of injury/illness. Dr. Hnida referred Claimant to an orthopedic specialist and released her to modified duty working seated duty only.

8. On March 4, 2022 ATP David Orgel, M.D. placed Claimant at maximum medical improvement (MMI) with no permanent impairment, restrictions or need for follow-up.

9. Based on Claimant's report of the injury, Respondent filed a FAL on April 13, 2022. Respondent noted $3,743.09 in TTD benefits paid for January 10, 2022 through February 24, 2022, and medical benefits paid totaling $2,407.15. Respondent further noted that it reserved the right to take credit for a TTD overpayment of $244.11 ($3,987.20 - $244.11 = $3,743.09). The FAL reflects an average weekly wage (AWW) $854.40.

10. Claimant does not dispute that she received a total of $3,987.20 in TTD benefits and $2,407.15 in medical benefits in connection with the alleged January 7, 2022 work injury.

11. DR[Redacted] testified at hearing on behalf of Claimant. He testified that he dropped Claimant off at work on the morning of January 7, 2022 and saw her fall. He testified that he and Claimant then went to a 7-11 store to retrieve cash and Claimant subsequently walked back to work. DR[Redacted] did not recall what time the alleged incident occurred. He testified that over the weekend he observed Claimant's leg, which appeared bruised and swollen. DR[Redacted] acknowledged that he and Claimant shared expenses, which would include repayment of worker's compensation benefits.

12. [Redacted, hereinafter DY] testified at hearing on behalf of Respondent. DY[Redacted] is the senior manager of Employer's treasury department and works in the same building as Claimant. DY[Redacted] reviewed Respondent's Exhibit F and testified that the numbers on the map correspond with Employer's exterior security cameras. DY[Redacted] explained that the map does not identify camera 61, which is located in the upper right hand corner of the map and covers the parking lot towards RC[Redacted], including the side of the treasury building with the large tree referenced by Claimant in her testimony. DY[Redacted] testified that he reviewed Employer's security camera footage taken from 6:00 a.m. to 7:00 a.m. on the date of the alleged incident. He testified that the video footage did not show Claimant entering or exiting Employer's parking lot in a vehicle, nor did it show Claimant slipping and falling. He testified that Claimant first

appeared on the video footage while walking outside of her work location at approximately 6:51 a.m.

13. The ALJ reviewed security camera footage from the date and time of the alleged incident, admitted as Respondent's Exhibit E. The footage contains views from multiple cameras (cameras identified on Respondent's Exhibit F as 05, 00, 1, 55, 58, as well as the camera identified by DY[Redacted] as camera 61), showing multiple angles of Employer's parking lot, the surrounding streets, and entrance to the building in which Claimant works. The footage specifically shows the area of Employer's parking lot where Claimant alleges DR[Redacted] dropped her off and she slipped and fell. At no point is Claimant observed entering or exiting the parking lot in a vehicle, entering or exiting a vehicle while in the parking lot, or slipping and falling whatsoever. The footage shows Claimant walking on a road outside of Employer's premises, walking into Employer's parking lot and entering her work building at approximately 6:51 a.m.

14. The ALJ also reviewed video footage from Employer's interior security cameras, which showed multiple areas of the workplace on the day of the alleged injury. Claimant is not observed limping or exhibiting any pain behaviors.

15. Claimant viewed part of the video footage at hearing. Claimant did not dispute the contents of the footage and offered no explanation as to why the footage did not show the alleged incident.

16. Claimant testified that her household income includes her wages and DR[Redacted] disability pay of approximately $1,100 per month. She testified to the following monthly household expenses: rent $1,050.00, car payment $400.00, Xcel energy $150.00, car insurance $200.00, and food $300.00. Claimant testified she could not afford to pay back any money owed to Respondent at a rate of $500 or $400 per month. Claimant did not identify a repayment amount she feels is feasible.

17. The ALJ credits the testimony of DY[Redacted], as supported by the records, over the testimony of Claimant and DR[Redacted].

18. Respondent proved it is more probably true than not Claimant knowingly made a false representation of material fact to Respondent for the purpose of obtaining worker's compensation benefits. Respondent relied upon Claimant's material misrepresentation in filing its FAL and paying benefits, only becoming aware of the false representation when reviewing video footage disproving Claimant's reported series of events.

19. Respondent proved it is more probably true than not Claimant received a total of $6,394.35 in medical and indemnity benefits to which she was not entitled due to fraud.

CONCLUSIONS OF LAW

Generally

The purpose of the Workers' Compensation Act of Colorado (the "Act"), Sections 8-40-101, *et seq.*, C.R.S., is to assure the quick and efficient delivery of disability and

medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. Section 8-40-102(1), C.R.S. Claimants shoulder the burden of proving entitlement to benefits by a preponderance of the evidence. Section 8-43-201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979). The facts in a workers' compensation case must be interpreted neutrally, neither in favor of the rights of claimants nor in favor of the rights of respondents. Section 8-43-201, C.R.S.

Assessing weight, credibility, and sufficiency of evidence in a workers' compensation proceeding is the exclusive domain of the administrative law judge. *University Park Care Center v. Industrial Claim Appeals Office*, 43 P.3d 637 (Colo. App. 2001). Even if other evidence in the record may have supported a contrary inference, it is for the ALJ to resolve conflicts in the evidence, make credibility determinations, and draw plausible inferences from the evidence. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness' testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *Prudential Insurance Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); *Bodensieck v. Industrial Claim Appeals Office*, 183 P.3d 684 (Colo. App. 2008). The weight and credibility to be assigned expert testimony is a matter within the discretion of the ALJ. *Cordova v. Industrial Claim Appeals Office,* 55 P.3d 186 (Colo. App. 2002). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colorado Springs Motors, Ltd. v. Industrial Commission,* 165 Colo. 504, 441 P.2d 21 (1968).

The ALJ's factual findings concern only evidence found to be dispositive of the issues involved; the ALJ has not addressed every piece of evidence that might lead to conflicting conclusions and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office,* 5 P.3d 385 (Colo. App. 2000).

Withdrawal of FAL

An ALJ may permit an insurer to withdraw an FAL and order repayment of benefits if the claimant fraudulently supplied false information upon which the insurer relied in filing the admission. §8-43-303 C.R.S.; *see also Renz v. Larimer County School Dist. Poudre R-1*, 924 P.2d 1177 (Colo. App. 1996); *In re Arczynski,* WC 4-156-147 (ICAO, Dec. 15, 2005). Because admissions of liability may not ordinarily be withdrawn retroactively, §8-43-201(1) C.R.S. provides that the party seeking reopening bears the burden of proof by a preponderance of the evidence to establish the existence of fraud. *See Salisbury v. Prowers County School District*, WC 4-702-144 (ICAO, June 5, 2012). Where the evidence is subject to more than one interpretation, the existence of fraud is a factual determination for the ALJ. *In re Arczynski, supra*.

To prove fraud or material misrepresentation, the party must show: (1) A false representation of a material existing fact, or a representation as to a material fact with reckless disregard of its truth; or concealment of a material existing fact; (2) Knowledge on the part of one making the representation that it is false; (3) Ignorance on the part of the one to whom the representation is made, or the fact concealed, of the falsity of the representation or the existence of the fact; (4) Making of the representation or concealment of the fact with the intent that it be acted upon; (5) Action based on the representation or concealment resulting in damage. *Arczynski*, *supra*, citing *Morrison v. Goodspeed*, 68 P.2d 458, 462 (Colo. 1937). Where the evidence is subject to more than one interpretation, the existence of fraud is a factual issue for resolution by the ALJ. *Arczynski, supra*; *Vargo v. Industrial Commission*, 626 P.2d 1164 (Colo. App. 1981).

As found, the preponderant evidence demonstrates Claimant knowingly provided false information to Respondent upon which Respondent relied in filing its admission of liability. Claimant reported to Employer that she slipped and fell in Employer's parking lot on January 7, 2022, injury her ankle. Claimant purports that the alleged incident occurred between 6:10 a.m. and 6:45 a.m. Video footage showing multiple areas of Employer's parking lot from 6:00 a.m. to 7:00 a.m. on January 7, 2022, including the specific area in which Claimant alleged the incident took place, establishes that no such incident occurred. The footage does not evidence anything similar to what Claimant purports took place, aside from her walking into Employer's parking lot from outside of Employer's premises. Claimant observed the footage at hearing, did not dispute the video footage, and provided no explanation for why the footage did not demonstrate the incident she reported.

In addition to the footage refuting Claimant's reports of the alleged incident, Claimant's testimony that she slipped and twisted her ankle in Employer's parking lot, left, and then elected to walk back to work on the ice and snow on a twisted ankle is incredible and unpersuasive. Moreover, Claimant is observed walking without any noticeable limp or pain behaviors on the video footage. Claimant's testimony is only corroborated by DR[Redacted], who has a shared financial interest with Claimant. That Claimant was ultimately diagnosed with a fracture is not dispositive of the fact that the fracture arose out of and occurred during the scope of Claimant's employment for Employer. The credible and persuasive evidence demonstrates that it is more probable than not the incident reported by Claimant did not occur and Claimant did not sustain a compensable work injury.

As found, Claimant knowingly made false representations to Employer indicating she sustained a work injury for the purpose of obtaining worker's compensation benefits. Respondent relied on Claimant's false representations in filing the FAL, pursuant to which Respondent paid Claimant's medical and indemnity benefits. Respondent was unaware of the falsity of Claimant's representations regarding the alleged incident until observing security footage. Based on the totality of the evidence, Respondent filed a FAL and Claimant received benefits to which she was not entitled based on Claimant's fraudulent misrepresentations. Accordingly, Respondent shall be permitted to withdraw its FAL.

Overpayment

Section 8-40-201(15.5), C.R.S, defines "overpayment" as "money received by a claimant that exceeds the amount that should have been paid, or which the claimant was not entitled to receive, or which results in duplicate benefits because of offsets that reduce disability or death benefits payable under said articles." Recovery of overpayments of benefits resulting from retroactive withdraws of admissions of liability based on fraud has been permitted. *See Stroman v. Southway Services, Inc.*, W.C. No. 4-366-989 (ICAO August 31,1999); *Vargo, supra*.

When the parties are unable to agree upon a repayment schedule, the ALJ may conduct hearings to require repayment of overpayments and to fashion a remedy with regard to overpayment at his or her discretion, including terms of repayment and schedule for recoupment. *See* §8-43-207(q), C.R.S., *Simpson v. Industrial Claim Appeals Office*, 219 P.3d 354 (Colo. App. 2009), *rev'd on other grounds*, *Louisiana Pacific Corp. v. Smith*, 881P.2d 456 (Colo. App. 1994).

Claimant received $3,987.20 in TTD benefits and $2,407.15 in medical benefits to which she was not entitled due to her fraudulent misrepresentations. As such, Respondent is entitled to recover an overpayment of $6,394.35.

Respondent requests a repayment rate of $500.00 per month. Claimant testified that she would not be able to afford a repayment rate of $400.00 to $500.00 per month, but did not otherwise propose what she considers to be a feasible repayment rate. Based on Claimant's total monthly household income and expenses, the ALJ concludes that a repayment rate of $300.00 per month is a reasonable schedule for repayment, ensuring that Respondent recoups the overpayment in a period under 24 months, while avoiding potential undue financial hardship on Claimant.

ORDER

It is therefore ordered that:

1. Respondent's admission of liability is hereby withdrawn.

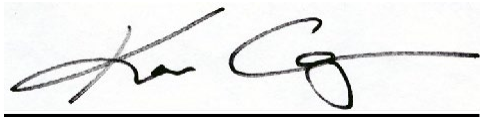
2. Claimant shall repay Respondent a total of $6,394.35 at a rate of $300.00/month until recovered in full.

3. All matters not determined herein are reserved for future determination.

If you are dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to

the above address for the Denver Office of Administrative Courts. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED: February 2, 2023



Kara R. Cayce

Denver, CO 80203

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. WC 5-204-039-001

ISSUES

I. Whether the ALJ has jurisdiction to address whether Claimant's neck and shoulders are causally related to Claimant's admitted industrial injury of April 20, 2022.

II. Whether the ALJ has jurisdiction to address Claimant's entitlement to temporary total disability (TTD) benefits from August 23, 2022 through November 16, 2022.

FINDINGS OF FACT

1. Claimant sustained an admitted an industrial injury on April 20, 2022 when he fell from a step ladder onto his outstretched arms.

2. It is undisputed Pamela J. Rizza, M.D. at Workwell is Claimant's primary authorized treating physician (ATP) in this claim. Dr. Rizza determined that Claimant sustained work-related bilateral wrist fractures.

3. Dr. Rizza referred Claimant to ATP Lisa Nash, M.D., who performed surgical repair of Claimant's right wrist on May 3, 2022.

4. Dr. Rizza subsequently diagnosed Claimant with work-related left carpal tunnel syndrome.

5. Respondents filed a General Admission of Liability (GAL) on May 17, 2022 admitting for medical benefits and TTD benefits beginning April 21, 2022, ongoing. Respondents filed a second GAL on July 6, 2022 reflecting an increase in Claimant's average weekly wage (AWW).

6. On August 23, 2022, Dr. Rizza completed a Physician's Report of Worker's Compensation Injury releasing Claimant to regular duty effective August 23, 2022.

7. Respondents filed a GAL on August 31, 2022 terminating TTD as of August 23, 2022, based upon Dr. Rizza's release of Claimant to full duty work.

8. On September 1, 2022 Dr. Rizza noted Claimant reported dizziness and neck pain and wanted to discuss a neck MRI that was ordered through his primary care physician. She wrote,

> Discussed the MRI of the neck needs to be addressed by Dr. Mistry as he ordered the test and was referred by his PCP. Shows degenerative changes, no evidence of compression fracture or trauma related changes.

> Discussed if he feels he needs other restrictions, to follow up with PCP/Dr. Mistry which is outside of his WC claim. May work full duty until CT release.
>
> (R. Ex. A, p. 57).

Dr. Rizza continued Claimant on regular duty.

9. On September 28, 2022 Claimant filed an Application for Hearing (AFH) endorsing the following issues: Medical Benefits, Authorized Provider, Reasonably Necessary, Average Weekly Wage, Temporary Total Benefits from April, 20, 2022, ongoing and Temporary Partial Benefits from April 20, 2022[1], ongoing.

10. At a follow-up evaluation on September 29, 2022 Dr. Rizza noted Claimant continued to request that his self-referral to Dr. Mistry and subsequent referrals made by Dr. Mistry be included in his worker's compensation claim. Dr. Rizza noted she reviewed Claimant's medical record and concluded it was not 51% medically probable Claimant's reported concussion symptomatology is directly related to the occupational injury he sustained on April 20, 2022. She continued Claimant on regular duty.

11. The ALJ takes administrative notice of the Office of Administrative Courts file that a Notice of Hearing was sent to the parties on October 25, 2022, notifying the parties of a January 20, 2023 hearing set in this matter.

12. Claimant underwent a left carpal tunnel release on November 17, 2022 performed by Dr. Nash.

13. On December 1, 2022, Respondents filed a GAL admitting for medical benefits and TTD benefits from November 17, 2022, ongoing.

14. Dr. Rizza placed Claimant at maximum medical improvement (MMI) on January 4, 2023 without permanent impairment or restrictions. She listed the following diagnoses: unspecified fracture of the lower end of the right and left radius, adjustment disorder with mixed anxiety and depressed mood; and carpal tunnel syndrome of the left upper limb. Dr. Rizza released Claimant for full duty work. Regarding maintenance care, she recommended one year of follow up for concerns related to Claimant's right wrist hardware or left wrist carpal tunnel surgery.

15. Respondents filed a Final Admission of Liability (FAL) on January 12, 2023, noting TTD benefits from 4/21/22 thru 8/22/22 and 11/17/22 thru 1/3/23. Respondents did not admit for post-MMI medical treatment or any permanent impairment.

16. On January 19, 2023, Claimant filed an Objection to the FAL and a Notice and Proposal and Application for a Division Independent Medical Examination (DIME).

---

[1] The Application for Hearing lists a date of "4-20-200." Based on the date of injury, April 20, 2022, the ALJ infers that the typographical error is meant to refer to the date of April 20, 2022.

17. At the commencement of the hearing on January 20, 2023, Claimant's counsel identified the following issues for hearing: (1) whether Claimant is entitled to temporary indemnity benefits from August 23, 2022 through November 16, 2022, and (2) whether Claimant's neck and shoulder conditions are causally related to the April 20, 2022 industrial injury. Claimant's counsel specified he was not pursuing the issue of AWW.

18. Claimant contends that, despite being released to full duty work by his ATP, he was unable to work from August 23, 2022 through November 16, 2022 due to dizziness and other issues.

19. Respondents' counsel argued that the ALJ does not have jurisdiction to address the issues identified by Claimant's counsel at hearing, as ATP placed Claimant at MMI and a DIME is pending. Claimant's counsel disagreed that the ALJ does not have jurisdiction to hear the stated issues.

20. At hearing Claimant stipulated that Dr. Rizza is Claimant's ATP, that she placed Claimant at MMI, and that Claimant Dr. Rizza released Claimant to full duty work during the time period for which Claimant is currently requesting TTD benefits.

CONCLUSIONS OF LAW

Generally

The purpose of the Workers' Compensation Act of Colorado (the "Act"), Sections 8-40-101, *et seq.*, C.R.S., is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. Section 8-40-102(1), C.R.S. Claimants shoulder the burden of proving entitlement to benefits by a preponderance of the evidence. Section 8-43-201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979). The facts in a workers' compensation case must be interpreted neutrally, neither in favor of the rights of claimants nor in favor of the rights of respondents. Section 8-43-201, C.R.S.

Assessing weight, credibility, and sufficiency of evidence in a workers' compensation proceeding is the exclusive domain of the administrative law judge. *University Park Care Center v. Industrial Claim Appeals Office*, 43 P.3d 637 (Colo. App. 2001). Even if other evidence in the record may have supported a contrary inference, it is for the ALJ to resolve conflicts in the evidence, make credibility determinations, and draw plausible inferences from the evidence. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness' testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *Prudential Insurance Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); *Bodensieck v. Industrial Claim Appeals Office*, 183 P.3d 684 (Colo. App. 2008). The weight and credibility to be assigned expert testimony is a matter within the discretion of the ALJ. *Cordova v. Industrial Claim Appeals*

Office, 55 P.3d 186 (Colo. App. 2002). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colorado Springs Motors, Ltd. v. Industrial Commission,* 165 Colo. 504, 441 P.2d 21 (1968).

The ALJ's factual findings concern only evidence found to be dispositive of the issues involved; the ALJ has not addressed every piece of evidence that might lead to conflicting conclusions and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office,* 5 P.3d 385 (Colo. App. 2000).

Jurisdiction

Respondents contend the ALJ does not have jurisdiction to address whether any neck and shoulder conditions are causally related to Claimant's April 20, 2022 industrial injury, as a DIME is pending. Respondents rely in part on *McCormick v. Exempla Healthcare*, W.C. No. 4-594-683 (January 27, 2006). In *McCormick*, the Panel vacated an ALJ's order that found Claimant, who had been placed at MMI by her ATP, sustained a temporary aggravation that had resolved and denied further curative medical treatment. The Panel held that the ALJ lacked jurisdiction to deny medical benefits after MMI in the absence of DIME, citing multiple other cases, including *Story v. Industrial Claim Appeals Office*, 910 P.2d 80 (Colo. App. 1995); *Eby v. Wal-Mart Stores, Inc.*, W.C. No. 4-350-176 (Feb. 14, 2001) ("once an authorized treating physician places the claimant at MMI, an ALJ lacks jurisdiction to award additional medical benefits for the purposes of curing the industrial injury and assisting the claimant to reach MMI unless the claimant undergoes a DIME."); *Anderson-Capranelli v. Republic Industries, Inc.,* W.C. No. 4-416-649 (Nov. 25, 2002) (following MMI, "In the absence of a DIME the ALJ lacks jurisdiction to adjudicate a request for additional medical benefits to cure the effects of the injury."); *Cass v. Mesa County Valley School District*, W.C. No. 4-629-629 (Aug. 26, 2005) ("[I]f an ATP places the claimant at MMI, an ALJ lacks jurisdiction to award additional medical benefits to improve the claimant's condition unless a DIME has been conducted on the issue of MMI.").

Claimant argues that *McCormick* is not applicable, as it was decided in 2006, prior to the adoption of SB 09-168, which amended section 8-43-203(2)(b)(II)(A), C.R.S. to include the following italicized language:

> An admission of liability for final payment of compensation must include a statement that ... the claimant may contest this admission if the claimant feels entitled to more compensation, to whom the claimant should provide written objection, and notice to the claimant that the case will be automatically closed as to the issues admitted in the final admission if the claimant does not, within thirty days after the date of the final admission, contest the final admission in writing and request a hearing on any disputed issues that are ripe for hearing, including the selection of an independent medical examiner pursuant to section 8-42-107.2 if an independent medical examination has not already been conducted. If an independent medical

> examination is requested pursuant to section 8-42-107.2, the claimant is not required to file a request for hearing on disputed issues that are ripe for hearing until the division's independent medical examination process is terminated for any reason. *Any issue for which a hearing or an application for a hearing is pending at the time that the final admission of liability is filed shall proceed to the hearing without the need for the applicant to refile an application for hearing on the issue*. (emphasis added)

Claimant did not cite to, nor is the ALJ aware of, any authority supporting Claimant's argument that the language of section 8-43-203(2)(b)(II)(A), C.R.S. confers jurisdiction to the ALJ to address the relatedness of other body parts in this instance. Claimant's interprets section 8-43-203(2)(b)(II)(A), C.R.S. to effectively require proceeding to hearing on any issue for which a hearing or application for hearing is pending at the time a FAL is filed is inconsistent with the statutory provisions of Section 8-42-107(8)(b), C.R.S. and well established case law. Pursuant to Section 8-42-107(8)(b)(I), C.R.S. an authorized treating physician shall make the initial determination concerning the date of MMI. If either party disputes a determination by an authorized treating physician on the question of whether the injured worker has or has not reached MMI, an independent medical examiner may be selected. §8-42-107(8)(b)(II), C.R.S. Section 8-42-107(8)(b)(III), C.R.S. specifically provides, "A hearing on this matter shall not take place until the finding of the independent medical examiner has been filed with the division."

The Colorado Supreme Court has noted that the DIME procedure is "the only way for an injured worker to challenge the treating physician's findings -- including MMI, the availability of post-MMI treatment, degree of nonscheduled impairments, and whether the impairment was caused by an on-the-job injury..." *McCormick*, *supra*, citing *Whiteside v. Smith*, 67 P.3d 1240, 1246 (Colo. 2003). MMI is defined as the point in time when the claimant's condition is "stable and no further treatment is reasonably expected to improve the condition." §8-40-201(11.5), C.R.S. A determination of MMI requires the physician to assess, as a matter of diagnosis, whether various components of the claimant's medical condition are causally related to the industrial injury. *Martinez v. Industrial Claim Appeals Office*, 176 P.3d 826 (Colo. App. 2007); *Powell v. Aurora Public Schools* W.C. No. 4-974-718-03 (Mar. 15, 2017).

Claimant's request that the ALJ address whether certain body parts and conditions are causally related to the industrial injury and thus require reasonable and necessary curative treatment is, effectively, a challenge to the ATP's finding of MMI. Absent a DIME, the ALJ does not have the authority to proceed to a hearing on those issues. *Slevin v. Larimer County*, W.C. No. 5-053-718-002 & 4-957-677 (Feb. 18, 2020) (noting that "the request by the parties to have the ALJ rule on the relatedness of the TKA surgery intended to cure and improve the claimant's medical condition is a challenge to the authorized treating doctor's finding of MMI" and concluding that the ALJ was without jurisdiction to address whether a July 2017 injury caused the need for surgery when the claimant had been placed at MMI by his ATP four months prior to the hearing before the ALJ.); *In re Claim of Dean*, W.C. No. 4-988-024-01 (INov. 7, 2016).

The ALJ also lacks jurisdiction at this time to rule on an award of TTD benefits August 23, 2022 through November 16, 2022. Claimant contends he was unable to work during this time period and sustained wage loss as a result of alleged injuries that the ATP did not deem causally related to the industrial injury. As discussed, a challenge to MMI and its inherent causal determinations are the province of a DIME in these circumstances. Additionally, Claimant's TTD was terminated on August 23, 2022 pursuant to the termination statute, section 8-42-105(3)(a)-(d), C.R.S. Claimant argues that section 8-42-105(3)(a)-(d), C.R.S. only applies to when benefits can be terminated without a hearing, and that Claimant is not precluded from demonstrating entitlement to an award of TTD from August 23, 2022 through November 16, 2022.

To prove entitlement to TTD benefits, a claimant must prove that the industrial injury caused a disability lasting more than three work shifts, he left work as a result of the disability, and the disability resulted in an actual wage loss. *See* §§8-42-(1)(g) & 8-42-105(4), C.R.S.; *Anderson v. Longmont Toyota,* 102 P.3d 323 (Colo. 2004); *City of Colorado Springs v. Industrial Claim Appeals Office,* 954 P.2d 637 (Colo. App. 1997). Section 8-42-103(1)(a), C.R.S. requires the claimant to establish a causal connection between a work-related injury and a subsequent wage loss in order to obtain TTD benefits. The term "disability" connotes two elements: (1) medical incapacity evidenced by loss or restriction of bodily function; and (2) impairment of wage earning capacity as demonstrated by claimant's inability to resume his or her prior work. *Culver v. Ace Electric*, 971 P.2d 641, 649 (Colo. 1999). The impairment of earning capacity element of disability may be evidenced by a complete inability to work or by restrictions which impair the claimant's ability effectively and properly to perform his or her regular employment. *Ortiz v. Charles J. Murphy & Co.*, 964 P.2d 595, 597 (Colo. App. 1998). Because there is no requirement that a claimant must produce evidence of medical restrictions, a claimant's testimony alone is sufficient to demonstrate a disability. *Lymburn v. Symbios Logic,* 952 P.2d 831, 833 (Colo. App. 1997).

TTD benefits shall continue until the first occurrence of any of the following: (1) the employee reaches MMI; (2) the employee returns to regular or modified employment; (3) the attending physician gives the employee a written release to return to regular employment; or (4) the attending physician gives the employee a written release to return to modified employment, the employment is offered in writing and the employee fails to begin the employment. §8-42-105(3)(a)-(d), C.R.S. Notably, an insurer is legally required to continue paying claimant temporary disability past the MMI date when the respondents initiate a DIME, However, where the DIME physician found no impairment and the MMI date was several months before the MMI determination, all of the temporary disability benefits paid after the DIME's MMI date constituted a recoverable overpayment. *Wheeler v. The Evangelical Lutheran Good Samaritan Society*, W.C. No. 4-995-488 (Apr. 23, 2019).

There is a distinction between the factors considered in an award commencing TTD benefits versus termination of TTD benefits. Once it is established that a claimant's attending physician has released her to full duty, the attending physician's opinion is conclusive, "unless the record contains conflicting opinions from attending physicians

regarding a claimant's release to work. *Burns v. Robinson Dairy, Inc.,* 911 P.2d 661, 662 (Colo. App. 1995); *Bestway Concrete v. Indus. Claim Appeals Off.,* 984 P.2d 680, 685 (Colo. App. 1999). In light of an attending physician's opinion releasing a claimant to full duty, any evidence concerning claimant self-evaluation of his ability to perform his job [is] irrelevant and should be disregarded by the ALJ. *Archuletta v. Indus. Claim Appeals Off.*, 381 P.3d 374, 377 (Colo. App. 2016).

Here, there is no dispute Claimant's ATP released Claimant to full duty on August 23, 2022. Accordingly, the ATP's opinion is conclusive, and the ALJ does not have jurisdiction at this juncture to award TTD benefits for August 23, 2022 through November 16, 2022.

ORDER

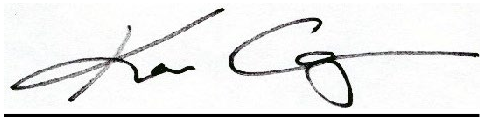
It is therefore ordered that:

1. The issues endorsed for hearing by Claimant are dismissed without prejudice for lack of jurisdiction.

2. All matters not determined herein are reserved for future determination.

If you are dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED: February 9, 2023



Kara R. Cayce
Administrative Law Judge
Office of Administrative Courts

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. WC 5-214-137-001

ISSUES

I. Whether Claimant proved by a preponderance of the evidence she sustained a compensable work injury arising out of and in the scope of her employment on August 6, 2022.

II. If compensable, whether Claimant proved by a preponderance of the evidence the treatment requested by authorized treating physician ("ATP") Hiep Lourdes Ritzer, M.D., including her referrals to Mile High Sports, Health Images, Orthopedic Centers of Colorado, and Eric K. Hammerberg, M.D., are all related to the August 6, 2022 industrial injury and necessary to cure and relieve the Claimant of the effects of her injury.

III. If compensable, whether Claimant proved by a preponderance of the evidence an entitlement to temporary partial disability ("TPD") benefits for the time period between August 17, 2022 through August 18, 2022.

IV. If compensable, whether Claimant proved by a preponderance of the evidence an entitlement to temporary total disability ("TTD") benefits from August 19, 2022, ongoing until terminated pursuant to statute.

V. If compensable, determination of Claimant's average weekly wage ("AWW").

FINDINGS OF FACT

1. Claimant is a 50-year-old woman who works for Employer as a personal shopper/curb assistant. Claimant began working for Employer on May 8, 2022. Claimant's job duties included picking product for orders and delivering the orders curbside to customers.

2. Claimant worked Tuesday through Saturday, 4:00 a.m. to 12:30 p.m.

3. Claimant testified that an AWW of $803.38 most accurately reflects her weekly wages, based on gross earnings of $9,525.84 earned between May 8, 2022 and July 29, 2022, a period of 83 calendar days.

Prior History

4. Claimant has a history of seizure disorder and a congenital condition known as Chiari I malformation. Claimant treated with Eric K. Hammerberg, M.D. for the seizure disorder.

5. Claimant was involved in a motor vehicle accident ("MVA") in August 2018. On August 5, 2018 Claimant sought treatment at the emergency department of Denver Health after being involved in the MVA. Claimant complained of bilateral hip pain, as well abdominal pain, back pain and neck pain. There was no evidence of trauma to the head, cervical or thoracic spine, abdominal or extremities.

6. On September 5, 2018 Claimant reported to Dr. Hammerberg that after the MVA she experienced pain in her wrists, elbows, shoulders, neck, hips and feet. She complained of constant pain at the base of her neck into her bilateral shoulder blades, down into the left upper extremity and hand, also on the right side, as well as pain in the lower spine at the thoracolumbar junction and both hips. An EMG of upper extremities showed evidence of bilateral carpal tunnel syndrome.

7. On October 25, 2018 Claimant sought treatment at an emergency department for neck pain and nerve symptoms in her arms.

8. On November 29, 2018 Claimant reported increased neck pain after feeling a pop, as well as a "constellation of symptoms" which the provider noted Claimant believed was related to her Chiari I malformation. Claimant complained of blurry vision, numbness of the mouth and jaw, difficulty swallowing, clumsiness of hands, bilateral carpal tunnel syndrome, and tension headaches.

9. On December 19, 2018 Dr. Hammerberg noted Claimant's reports of pain in her posterior neck and over the left temporomandibular joint ("TMJ").

10. On April 30, 2019 Claimant presented to an emergency department at Lutheran Hospital with complaints of intermittent numbness and tingling to her bilateral upper extremities as well as headaches, shortness of breath and bilateral chest pain.

11. Claimant returned to the emergency department at Lutheran Hospital on May 1, 2019 for complaints of neck pain and headaches on her left side, with numbness, dizziness and tingling to the left side of her face as well as her left arm. A CT scan was negative for acute abnormalities.

August 6, 2022 Alleged Work Injury

12. Claimant alleges she sustained a compensable work injury while working for Employer at approximately 9:00 a.m. on Saturday, August 6, 2022. Claimant testified that she was putting a box containing three industrial-sized bottles of cleaning product into the bed of a pickup truck when the left handle of the box gave way. Claimant testified that the box containing the bottles jostled around, pushing her head back and jostling her body back and forth for a while until she was able to use her body to push the box against the truck and into the bed of the vehicle. Claimant estimates the box containing the bottles weighed approximately 30 pounds.

13. Claimant testified that after the incident she felt a lot of pressure in her back and right shoulder blade and "just did not feel right." She testified that she felt very off balance and did not have the energy she normally did.

14. Claimant did not report the incident to a supervisor that day and finished her work shift. Claimant testified she did not immediately report her injury because she did not know she was hurt at the time and because she was unaware of the process for reporting the injury. Claimant testified that the next morning she was in extreme pain in her shoulder blade and on her right side. Per her regular schedule, Claimant was off of work Sunday and Monday, August 7 and 8, 2022. Claimant called out of work on Tuesday, August 9, 2022 and went to her primary care physician at Carbon Health, who placed Claimant on work restrictions.

15. Claimant contacted [Redacted, hereinafter FM], [Redacted, hereinafter MH], on August 10, 2022 to report her injury and restrictions.

16. Claimant testified that she did not have any physical issues or limitations leading up to the incident on August 6, 2022.

17. The ALJ reviewed security footage from the date of the work incident, submitted by Respondents as Exhibits Kii, Kiii and Kiv. Video of the exterior of Employer's store and shows Claimant reaching for and unloading product from a grocery cart. The video angle does not capture the work incident. In-store security video of Employer's backroom shows Claimant coming into view at approximately 9:07 a.m., seven minutes after the alleged accident. Claimant is seen exhibiting a normal arm swing and gait. Thereafter Claimant is observed bending, lifting, pushing, twisting, walking, standing, and performing her job duties without any noticeable pain or discomfort.

18. On August 17, 2022 Claimant presented to Hiep Lelourdes Ritzer, M.D. at Employer's designated medical provider, SCL Health Medical Group. Claimant completed a pain diagram and visual analog scale on which she indicated she was experiencing right rib pain, right upper back pain, bilateral shoulder pain, bilateral chest pain, groin pain, left wrist pain, right wrist and hand pain, bilateral palm pain, jaw pain, bilateral ankle pain, and pain in all ten toes, at levels ranging from 6-10/10. Claimant reported to Dr. Ritzer that she was injured when lifting a box of bottles of Fabuloso into the back of a truck and the box slipped out of her left hand and jerked her around. She further reported experiencing an ache in her right shoulder blade and fatigue, with back stiffness that evening. Claimant complained of pain in her right scapular area, and right lateral chest wall, right elbow and lower neck. She reported that her left shoulder was achy but had improved, and that she also had some occasional headaches and dizziness. Examination of the upper extremities was normal with no swelling or palpable edema. Tenderness was reported in the xyphoid, right posterior paracervicals, right thoracic paraspinal musculature, right trapezius, lumbar paraspinal musculature and right elbow. X-rays of the cervical spine demonstrated multilevel cervical and thoracic degenerative changes without definite acute bony abnormality and mild thoracic spine dextroscoliosis. X-rays of the elbows were negative for acute bony abnormalities. Dr. Ritzer gave an assessment of thoracic myofascial strain, right-sided chest wall pain, right elbow pain and neck pain. She opined that Claimant's symptoms were consistent with a work injury. Dr. Ritzer referred Claimant for physical therapy and placed Claimant on work restrictions of seated duty only and lifting no more than five pounds.

19. Claimant testified she attempted to return to work after being placed on restrictions by Dr. Ritzer on August 17, 2022, but that she was unable to stand or sit for any extended amount of time.

20. Claimant returned to Dr. Ritzer on August 19, 2022 complaining of 10/10 pain. She reported that she could only sit for three to four minutes without experiencing severe pain. Dr. Ritzer restricted Claimant from all work.

21. On August 22, 2022 Dr. Ritzer noted that Claimant's pain still was not managed despite undergoing a Toradol injection two days prior. Claimant reported difficulty breathing, dizziness, nausea, and diarrhea. She complained of 9-10/10 pain mostly to the right scapular right lateral chest wall. Her neck pain and medial right elbow pain had improved. Dr. Ritzer ordered MRIs of the thoracic spine and chest and referred Claimant for chiropractic treatment.

22. On August 31, 2022 Claimant reported to Dr. Ritzer that after undergoing the recent thoracic MRI she developed pressure in her upper thoracic spine that radiated up her neck. She also reported experiencing lower back pain a day or so after the MRI, with pressure to the sacrum and tightness to both gluteus and radiation down the back of her bilateral knees. Claimant complained of a tingling sensation and numbness to the right side of her neck and radiating to below her right breast. She further reported difficulties breathing and numbness down her elbow into her hand. Dr. Ritzer documented that the thoracic MRI revealed: (1) T4-5 through T7-8 and T-9-10 small disc protrusions with moderate degenerative findings of the endplates throughout. Thecal sac narrowing is mild at multiple levels. (2) Facet arthropathy in the upper and lower thoracic spine resulting in mild foraminal narrowing. She noted that x-rays of the sternum were unremarkable and a CT scan of the chest demonstrated no acute findings. Dr. Ritzer transferred care of Claimant to Yusuke Wakeshima, M.D. at Mile High Sports Rehabilitation, noting that Claimant's subjective complaints were out of proportion to the objective findings. She opined that the new complaints of neck pain and lower back pain with radiation to the back of both knees were not work related.

23. Claimant first presented to Dr. Wakeshima on September 8, 2022. She reported right neck pain, right upper back pain, right thoracic spine pain, right periscapular pain, right-sided rib pain, right axilla pain, right shoulder pain, right medial elbow pain, and right hand paresthesias beginning after an 8/6/22 work injury. Claimant denied any pre-existing conditions in those regions prior to that date. Dr. Wakeshima documented a history of Chiari malformation. Claimant reported a mechanism of injury consistent to her testimony. Dr. Wakeshima noted that Dr. Ritzer had concerns about Claimant's expanding pain complaints and minimal mechanism of injury. He documented that Claimant had undergone multiple radiologic studies that were negative for acute abnormalities, including a thoracic spine MRI which demonstrated multilevel degenerative findings, but nothing predominantly right-sided that would lead one to suspect that she has a thoracic radiculopathy condition. Dr. Wakeshima assessed Claimant with: neck pain; upper back pain on right side; periscapular pain; right shoulder pain; pain in the right axilla; rib pain on the right side; right hand paresthesia;

right elbow pain; and pain in the thoracic spine. He referred Claimant for a cervical MRI, EMG of the right upper extremity and right shoulder MRI.

24. Claimant underwent the right shoulder MRI on September 15, 2022, which demonstrated supraspinatus tendinopathy with high-grade partial-thickness partial width bursal sided tearing.

25. Dr. Wakeshima subsequently referred Claimant to Dr. Griggs (changed to Ariel Williams, M.D.) for an orthopedic surgery evaluation.

26. On September 23, 2022 Claimant reported to Dr. Wakeshima experiencing a profound increase in pain since undergoing dry needling and massage therapy. Dr. Wakeshima noted that a cervical spine MRI obtained on 9/15/22 revealed cerebellar tonsillar ectopia, multilevel degenerative disc disease from C2-3 through C6-7, moderate stenosis of the central canal at C3-4 with no foraminal impingement, and mild stenosis and central canal at C4-5 with no foraminal impingement. He further noted that the right shoulder MRI revealed supraspinatus tendinopathy with high-grade partial- thickness partial width bursal tearing, mild infraspinatus tendinopathy, and acromioclavicular and glenohumeral joint osteoarthritis. Dr. Wakeshima referred Claimant for a brain MRI.

27. Dr. Williams evaluated Claimant on September 30, 2022. Claimant reported symptoms primarily in the medial elbow, scapula, axilla and upper chest wall. Dr. Williams noted,

> She has tremendous difficulty with range of motion on exam with a lack of tolerance of even passive range of motion and a feeling of active resistance that is not consistent with a adhesive capsulitis type picture. Her shoulder external rotation is actually quite well-maintained. She does have pain with shoulder provocative maneuvers but these actually localize more to the chest wall and axilla and to the shoulder itself. In short, based upon both her history and her physical exam, I do not think her rotator cuff tear is the primary issue for her at this point although she would benefit from physical therapy for her shoulder and upper extremity as a whole. She is not indicated for surgical intervention for her rotator cuff at this time. Physical therapy may also help with her elbow where I suspect she may have a flexor pronator strain. Dr. Wakeshima is planning on nerve conduction studies and I agree that this is appropriate. She will return to me in 6 weeks to re-evaluate her shoulder and see her progress with therapy, sooner if the nerve conduction study reveals a peripheral compressive neuropathy.

(Cl. Ex. 9, pp. 109-110).

28. Dr. Wakeshima reevaluated Claimant on October 7, 2022 and referred Claimant to Dr. Hammerberg for a neurological evaluation under her worker's compensation claim for reported worsening headaches and neck pain after the injury. He noted,

> The patient presents with diffuse pain issues which is difficult to localize. If the radiologist documents that there is been no sign of interval changes on her MRI of the brain from the MRI from 2007, and Dr. Hammerberg documents that there has been no significant change regarding her Chiari I malformation neurologic conditions since he has been treating her prior to her work injury, and she still reports diffuse pain issues, I will discuss with patient about being seen by Dr. DiSorbio of pain psychology for further assessment for the psychological aspect of her chronic pain condition.

(Cl. Ex. 6, p. 83).

29. Claimant saw Dr. Hammerberg on October 18, 2022. She reported that after the alleged work injury she experienced, *inter alia*, lightheadedness, dizziness, blurry vision, photophobia, phonophobia, difficulty swallowing, hand numbness, and pain in the lower back and left hip extending into the left knee. Dr. Hammerberg reviewed Claimant's 9/15/22 cervical spine MRI, 9/15/22 right shoulder MRI, and brain MRI obtained on 9/28/22. He concluded that there were no changes in Claimant's Chiari I malformation.

30. Claimant returned to Dr. Wakeshima on November 3, 2022 with complaints of right-sided neck, back, shoulder, elbow and hand pain, as well as right hand paresthesias. Claimant was now also complaining of pain in her left shoulder, elbow, wrist, groin and anterior hip region. Dr. Wakeshima performed an EMG of the right upper extremity and compared it to Claimant's September 2018 EMG. He opined that the EMG demonstrated slight worsening of Claimant's mild carpal tunnel syndrome. He referred Claimant back to Dr. Williams for assessment.

31. Surveillance video was taken of Claimant on November 21-23, 2022 and admitted into evidence as Respondents' Exhibit L-1. Claimant is observed in the front of her home and in her garage lifting and carrying items without apparent difficulty or noticeable pain.

32. On November 14, 2022 Lawrence Lesnak, M.D. performed an Independent Medical Evaluation ("IME") at the request of Respondents. Claimant reported a mechanism of injury consistent with her testimony. Claimant reported that her current symptoms were different than those from her 2018 MVA. On examination, Claimant complained of frequent diffuse right should girdle and axillary burning pains that occur with any movement of her right upper extremity, as well as constant diffuse right elbow soreness and pain, frequent swelling of the left groin, frequent swelling throughout the entirety of her left leg and thigh, constant pins and needles as well as pain involving all of her toes, her plantar feet and diffuse symptoms involving her left leg and left lateral ankle. Claimant also reported frequent diffuse bilateral hand numbness encompassing the entirety of both hands, diffuse right arm, lateral neck and chest pains, and constant right-sided jaw and anterior throat pain. She reported that one month after the work incident she developed a frequent cough. Claimant stated she experiences frequent popping sensations in the center of her chest associated with diffuse pins and needles and a burning sensation throughout the entirety of her anterior chest and breast region.

Claimant further reported low back pain and pressure and diffuse occipital and global head pain.

33. In connection with his evaluation, Dr. Lesnak performed a Computerized Outcome Assessment, designed to identify any potential psychosocial factors that might be affecting the claimant's symptoms, recovery, or perceived function. Dr. Lesnak noted that the results of his testing strongly suggested the presence of an underlying symptom somatic disorder/somatoform disorder in Claimant.

34. Dr. Lesnak noted Claimant's expanding pain complaints. He concluded that the right shoulder MRI on 9/15/22 evidenced some rotator cuff tendinopathy without documentation of any full-thickness tears and without any documented evidence of any injury or trauma-related pathology related to her work incident. Dr. Lesnak noted that other imaging, including the cervical and thoracic spine MRIs and CT scan of the chest, did not evidence any injury or trauma related pathology. Dr. Lesnak opined,

> [t]here is absolutely no medical evidence to support that she sustained any type of injury whatsoever as it would pertain to this reported occupational incident. Additionally, there is absolutely no medical evidence to support that she has any medical diagnoses (which would be confirmed with any reproducible findings) that would in any way pertain to this reported occupational incident of 08/06/2022.

(R. Ex. I, p. 337).

35. Dr. Lesnak opined that there was no medical evidence supporting a conclusion that Claimant requires any type of activity limitations or work restrictions. He noted that there was a complete lack of any reproducible findings on examination.

36. On November 18, 2022 Dr. Wakeshima noted,

> With the patient's diffuse pain issues I also informed her that we may consider at our next appointment of having her undergo a rheumatoid panel, sedimentation rate, and ANA for further assessment for any rheumatologic conditions that could be contributing to pain. However, this would then be exploring not work-related condition, and therefore I informed her that if Dr. Lesnak determines that she is at MMI, this most likely will not be authorized by her workers' compensation carrier. However if Dr. Lesnak determines that he is not sure of the ideology of her continued pain issues, then we will have this obtained to rule out any nonwork related issues. If this is positive then her current situation will be nonwork related and will need to be treated under her private health insurance and we will then discuss maximum medical improvement (MMI) issues.

(R. Ex. G, p. 223).

37. Claimant testified that prior to the work incident she had not been informed of any tear in her right shoulder. Claimant testified that she has been restricted from working completely since being removed from work by Dr. Ritzer on August 19, 2022. Claimant testified that she believes the work incident resulted in injury to all of the body parts she marked on the pain diagram at Dr. Ritzer's August 17, 2022 evaluation (referenced herein in Finding of Fact #18 and contained in Respondents' Exhibit F, p. 96).

38. Dr. Lesnak testified at hearing on behalf of Respondents as a Level II accredited expert in physical medicine and rehabilitation. Dr. Lesnak testified consistent with his IME report and continued to opine that Claimant did not suffer any work-related injury on August 6, 2022 that caused the need for medical treatment or restrictions. Dr. Lesnak testified Claimant suffers from a somatic disorder or somatoform disorder, which he explained results from poorly controlled psychological or psychiatric symptoms that manifest themselves as bodily pain complaints in the absence of identifiable anatomic pathology. Dr. Lesnak testified that, in Claimant's case, there are various subjective complaints but a lack of reproducible findings related to the August 6, 2022 work incident. He explained that none of the imaging, including the right shoulder MRI, indicates evidence of an acute injury or aggravation. Dr. Lesnak explained that the fact Dr. William's injection did not result in relief to Claimant indicates that Claimant's right shoulder pathology, which is unrelated to this work incident, is not even symptomatic. Dr. Lesnak testified that he reviewed surveillance video taken of Claimant and Claimant's presentation on the video was different than her presentation during his examination.

39. MH[Redacted] testified at hearing on behalf of Respondents. MH[Redacted] testified that employees receive training instructing employees to immediately report injuries to their manager. He testified that there are also posters above the time clock containing information regarding how to report work injuries to Employer. Regarding Claimant's AWW, MH[Redacted] explained that the "Other Earnings" category reflected in Claimant's wage records reflects a bonus paid to associates based on the store's quarterly earnings. He testified that the bonus is not guaranteed and depends on the store's circumstances. MH[Redacted] testified that the bonus is taxed as wages.

40. Claimant's wage records indicate Claimant earned the following gross earnings, including "other earnings", during the following pay periods:

Week Ending	**Gross Earnings**	**Other Earnings**
May 13, 2022	$1,472.22	$0.00
May 27, 2022	$1,552.68	$4.46
June 10, 2022	$1,621.08	$4.46
June 24, 2022	$1,670.67	$4.46

July 8, 2022	$1,633.14	$175.46
July 22, 2022	$1,576.05	$4.46
TOTAL	$9,525.84	

41. The ALJ finds the opinion Dr. Lesnak, as supported by the medical records, more credible and persuasive than Claimant's testimony and the opinions of Drs. Ritzer, Wakeshima and Williams.

42. Claimant failed to prove it is more probably true than not she sustained a work injury arising out of and in the scope of her employment on August 6, 2022.

CONCLUSIONS OF LAW

Generally

The purpose of the Workers' Compensation Act of Colorado (the "Act"), Sections 8-40-101, *et seq.*, C.R.S., is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. Section 8-40-102(1), C.R.S. Claimants shoulder the burden of proving entitlement to benefits by a preponderance of the evidence. Section 8-43-201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979). The facts in a workers' compensation case must be interpreted neutrally, neither in favor of the rights of claimants nor in favor of the rights of respondents. Section 8-43-201, C.R.S.

Assessing weight, credibility, and sufficiency of evidence in a workers' compensation proceeding is the exclusive domain of the administrative law judge. *University Park Care Center v. Industrial Claim Appeals Office*, 43 P.3d 637 (Colo. App. 2001). Even if other evidence in the record may have supported a contrary inference, it is for the ALJ to resolve conflicts in the evidence, make credibility determinations, and draw plausible inferences from the evidence. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness' testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *Prudential Insurance Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); *Bodensieck v. Industrial Claim Appeals Office*, 183 P.3d 684 (Colo. App. 2008). The weight and credibility to be assigned expert testimony is a matter within the discretion of the ALJ. *Cordova v. Industrial Claim Appeals Office,* 55 P.3d 186 (Colo. App. 2002). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colorado Springs Motors, Ltd. v. Industrial Commission,* 165 Colo. 504, 441 P.2d 21 (1968).

The ALJ's factual findings concern only evidence found to be dispositive of the issues involved; the ALJ has not addressed every piece of evidence that might lead to conflicting conclusions and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office,* 5 P.3d 385 (Colo. App. 2000).

Compensability

To establish a compensable injury an employee must prove by a preponderance of the evidence that his injury arose out of the course and scope of employment with his employer. §8-41-301(1)(b), C.R.S. (2006); *see City of Boulder v. Streeb*, 706 P.2d 786, 791 (Colo. 1985). An injury occurs "in the course of" employment when a claimant demonstrates that the injury occurred within the time and place limits of his employment and during an activity that had some connection with his work-related functions. *Triad Painting Co. v. Blair*, 812 P.2d 638, 641 (Colo. 1991). The "arising out of" requirement is narrower and requires the claimant to demonstrate that the injury has its “origin in an employee's work-related functions and is sufficiently related thereto to be considered part of the employee’s service to the employer.” *Popovich v. Irlando,* 811 P.2d 379, 383 (Colo. 1991). The claimant must prove a causal nexus between the claimed disability and the work-related injury. *Singleton v. Kenya Corp.,* 961 P.2d 571 (Colo. App. 1998). A pre-existing disease or susceptibility to injury does not disqualify a claim if the employment aggravates, accelerates, or combines with the pre-existing disease to produce a disability or need for medical treatment. *Duncan v. Industrial Claim Appeals Office,* 107 P.3d 999 (Colo. App. 2004); *H & H Warehouse v. Vicory,* 805 P.2d 1167 (Colo. App. 1990); *Enriquez v.* Americold D/B/A Atlas Logistics, WC 4-960-513-01, (ICAO, Oct. 2, 2015).

A compensable aggravation can take the form of a worsened preexisting condition, a trigger of symptoms from a dormant condition, an acceleration of the natural course of the preexisting condition or a combination with the condition to produce disability. The compensability of an aggravation turns on whether work activities worsened the preexisting condition or demonstrate the natural progression of the preexisting condition. *Bryant v. Mesa County Valley School District #51*, WC 5-102-109- 001 (ICAO, Mar. 18, 2020).

As found, Claimant failed to prove it is more probably true than not she sustained a compensable work injury on August 6, 2022. While Claimant is credible in her testimony that a work incident occurred on August 6, 2022, the preponderant evidence does not establish that the incident actually caused any injury resulting in disability and the need for medical treatment. Each of Claimant’s providers, Dr. Ritzer, Dr. Wakeshima, and Dr. Williams, have noted Claimant’s diffuse pain complaints. Dr. Ritzer transferred care to Dr. Wakeshima, specifically noting that Claimant’s subjective complaints were out of proportion to the objective findings. While right shoulder pathology is demonstrated on imaging, Dr. Lesnak credibly opined that none of the findings evidenced any acute trauma related to the work incident.

Claimant has a documented history of diffuse pain complaints to her wrists, elbows, shoulders, neck, hips, feet, thoracolumbar spine, TMJ, and chest, as well as other complaints such shortness of breath, photophobia, phonophobia, and dizziness. Many of these same complaints presented after the work injury, including expanding and diffuse complaints after undergoing an MRI. As acknowledged in her testimony, Claimant attributes her various symptoms to the work incident of August 6, 2022. Dr. Lesnak credibly testified that Claimant has somatoform disorder. Such condition does not automatically negate Claimant's reported symptoms or the existence of a work injury; however, it does call into question Claimant's expanding and diffuse subjective complaints in the absence of objective reproducible findings, as credibly noted by Dr. Lesnak. To the extent her providers opined Claimant sustained a work injury, the preponderant evidence indicates that such conclusion was based on Claimant's subjective reporting of the work incident and her symptoms. The ALJ is persuaded by Dr. Lesnak's opinion that no injury trauma related pathology occurred as a result of the August 6, 2022 work incident.

As the preponderant evidence does not establish that Claimant sustained a compensable work injury, the remaining issues of medical treatment, temporary indemnity benefits and AWW are moot.

ORDER

It is therefore ordered that:

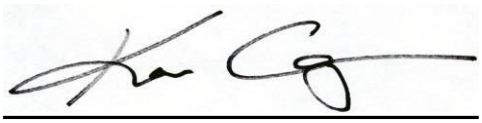
1. Claimant failed to prove by a preponderance of the evidence she suffered a compensable work injury arising out of and in the scope of her employment on August 6, 2022. Claimant claim for benefits is denied and dismissed.

2. All matters not determined herein are reserved for future determination.

If you are dissatisfied with the Judge's order, you may file a Petition to Review the order

with the Denver Office of Administrative Courts, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED: February 16, 2023.



Kara R. Cayce
Administrative Law Judge
Office of Administrative Courts
1525 Sherman Street, 4th Floor
Denver, CO 80203

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. WC 5-185-023-001

ISSUES

I. Whether Respondents proved by a preponderance of the evidence Claimant willfully violated a reasonable safety rule, resulting in a fifty percent reduction in Claimant's benefits.

FINDINGS OF FACT

1. Claimant works for Employer as a housekeeper. Claimant has worked for Employer in such capacity for separate periods of time over the course of 12 years. Claimant's first language is Spanish.

2. On October 6, 2021 Claimant sustained an admitted industrial injury to her right shoulder while lifting a bag of trash.

3. Claimant testified at hearing that, on the date of injury, she was lifting a trash bag of empty wine bottles at the Colorado Convention Center. Claimant testified that six people were typically assigned to clean a floor but, on the date of injury, only she and one other co-worker were assigned to a particular floor. Claimant testified that she "indirectly" told her supervisor she needed additional help with completing the tasks on her assigned floor by telling her co-worker, who was going on a lunch break at the time, to tell the supervisor she needed assistance. Claimant testified that she also asked [Redacted, hereinafter AR (last name unknown)], a supervisor with [Redacted, hereinafter XE], why extra people were not assisting with the cleaning on her assigned floor.

4. Claimant testified that she could not wait for her co-worker to return from his lunch break to assist in emptying the trash bins because the bins were getting full. She testified she first slightly lifted the trash bag to assess its weight. Claimant determined she was able to lift the trash bag by herself. Claimant proceeded to lift and move the bag onto a cart and at that time felt a pop and pain in her right shoulder. Claimant testified she initially did not think the bag was too heavy to lift and if she would have known the bag was so heavy she would not have attempted to lift it on her own. Claimant further testified that there was no one to ask for help lifting the bag because she was the only one on the floor at the time.

5. On October 6, 2021, Claimant completed an Employee Report of Incident in Spanish, translated to English by a co-worker, in which she stated,

> I told the XE[Redacted] Supervisor that I need help and he told me that my partner was in (*sic*) his break and that I was going to be fine doing the job own (*sic*). This when (*sic*) I went to pick a large trash bag from one of the

> bars full of beer cans that was way to (sic) heavy and this when (*sic*) my right arm pop and now it is hurting.

(R. Ex. E, p. 25).

6. Claimant's supervisor, [Redacted, hereinafter MD], completed a written statement on October 21, 2021 which read,

> October 6, 2021 around 7:50pm I saw [Claimant] dumping trash in her tilt cart by the escalator c lobby. I noticed that something was wrong with her and asked her if she was ok, she told me that she hurt her shoulder trying to lift a recycle bag from the bar. I told her that she needed to go to security and make a report. She told me that she didn't want to go, I told her that she had to go & I walked her to security. I asked her why she didn't ask for help and she told me that she saw AR[Redacted] the supervisor for XE[Redacted] across the floor but she didn't want to ask him because she didn't want him to tell her no & look at her crazy. I told her that she should have asked him or called me on the radio & asked me.

(Cl. Ex. 1, p. 5).

7. Respondents filed a General Admission of Liability ("GAL") on November 1, 2021 admitting for medical benefits and temporary total disability ("TTD") benefits. Respondents claimed a 50% reduction in Claimant's TTD benefits based on a safety rule violation. Respondents alleged Claimant violated a safety rule by failing to ask for assistance in lifting heavy items.

8. Claimant received yearly training from Employer, including ergonomics training from Employer on August 18, 2021, which included information on proper techniques for lifting. Safety tips included, "If the load is too heavy, too large, or too awkward…Stop and Get help" and "Lift properly using your legs, not your back. Get help to lift heavy objects." (R. Ex. D, pp. 13-14). Claimant signed the training attendance form attesting that she was responsible for, and understood, all of the information provided in the training.

9. [Redacted, hereinafter VK] testified at hearing on behalf of Respondents. VK[Redacted] is employed by Employer as an onboard trainer and infection prevention coordinator. VK[Redacted] explained that temporary employees through XE[Redacted], including AR[Redacted], do not supervise Employer's employees nor have any authority to instruct Employer's employees on their tasks. VK[Redacted] testified that he provided several training sessions to employees, including Claimant, regarding lifting and recycling. He testified that he ensured all employees understood the training by having them give a thumbs up, sideways, or down. He testified that Claimant indicated she understood the instructions and training by giving a thumbs up. VK[Redacted] testified that that no interpreter was present at his trainings because employees are required to be able to communicate effectively in English.

10. Claimant's job description specifically states that the ability to speak, understand, and read standard English and follow direction is required.

11. Claimant acknowledged that she attended and signed the attestation for the August 18, 2021 ergonomics training as well as a general safety training on September 9, 2021.

12. The ALJ finds that Employer had a reasonable safety rule adopted for the safety of the employees, of which Claimant was aware. Claimant's testimony that she did not she did not initially think the bag was too heavy to lift on her own is found credible. Respondents failed to demonstrate it is more probably true than not Claimant's violation of Employer's safety rule was willful.

CONCLUSIONS OF LAW

Generally

The purpose of the Workers' Compensation Act of Colorado (the "Act"), Sections 8-40-101, *et seq.*, C.R.S., is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. Section 8-40-102(1), C.R.S. Claimants shoulder the burden of proving entitlement to benefits by a preponderance of the evidence. Section 8-43-201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979). The facts in a workers' compensation case must be interpreted neutrally, neither in favor of the rights of claimants nor in favor of the rights of respondents. Section 8-43-201, C.R.S.

Assessing weight, credibility, and sufficiency of evidence in a workers' compensation proceeding is the exclusive domain of the administrative law judge. *University Park Care Center v. Industrial Claim Appeals Office*, 43 P.3d 637 (Colo. App. 2001). Even if other evidence in the record may have supported a contrary inference, it is for the ALJ to resolve conflicts in the evidence, make credibility determinations, and draw plausible inferences from the evidence. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness' testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *Prudential Insurance Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); *Bodensieck v. Industrial Claim Appeals Office*, 183 P.3d 684 (Colo. App. 2008). The weight and credibility to be assigned expert testimony is a matter within the discretion of the ALJ. *Cordova v. Industrial Claim Appeals Office,* 55 P.3d 186 (Colo. App. 2002). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colorado Springs Motors, Ltd. v. Industrial Commission,* 165 Colo. 504, 441 P.2d 21 (1968).

The ALJ's factual findings concern only evidence found to be dispositive of the issues involved; the ALJ has not addressed every piece of evidence that might lead to conflicting conclusions and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office,* 5 P.3d 385 (Colo. App. 2000).

Safety Rule Violation

Section 8-42-112(1)(b), C.R.S. authorizes a fifty percent (50%) reduction in compensation for an employee's "willful failure to obey any reasonable rule adopted by the employer for the safety of the employee." A safety rule does not have to be either formally adopted or in writing to be effective. *Lori's Family Dining, Inc. v. Industrial Claim Appeals Office,* 907 P.2d 715, 719 (Colo. App. 1995). To establish that a violation of §8-42-112(1)(b), C.R.S. has been willful, a respondent must prove by a preponderance of the evidence that a claimant acted with "deliberate intent." *In re Alverado,* WC 4-559- 275 (ICAO, Dec. 10, 2003). Willful conduct may be proven by circumstantial evidence including evidence of frequent warnings, the obviousness of the risk, and the extent of deliberation evidenced by claimant's conduct. *See In re Heien*; WC 5-059-799-01 (ICAO, Nov. 29, 2018). However, a safety rule that is not enforced by the employer will not be enforced by the Workers' Compensation system. *Burd v. Builder Services Group Inc.*, WC 5-085-572 (ICAO, July 9, 2019).

Respondents need not establish that an employee had the safety rule in mind and decided to break it. *In re Alverado*, WC 4-559-275 (ICAO, Dec. 10, 2003). Rather, it is sufficient to show the employee knew the rule and deliberately performed the forbidden act. *Id.* However, willfulness will not be established if the conduct is the result of thoughtlessness or negligence. *In re Bauer*, WC 4-495-198 (ICAO, Oct. 20, 2003). "Willfulness" also does not encompass "the negligent deviation from safe conduct dictated by common sense." *In re Gutierrez*, WC 4-561-352 (ICAO, Apr. 29, 2004). An employee's violation of a rule to facilitate the accomplishment of the employer's business does not constitute willful misconduct. *Grose v. Rivera Electric*, WC 4-418-465 (ICAO, Aug. 25, 2000). However, an employee's violation of a rule to make the job easier and speed operations is not a "plausible purpose." *Id.*; *see* 2 *Larson's Workers' Compensation Law*, §35.04. Whether an employee has deliberately violated a safety rule is a question of fact to be determined by the ALJ. *Lori's Family Dining, Inc.*, 907 P.2d at 719.

As found, Respondents failed to prove it is more probably true than not Claimant willfully violated a reasonable safety rule adopted by Employer. The credible and persuasive evidence does establish Employer has a reasonable safety rule instructing employees to ask for assistance in lifting heavy items and Claimant was aware of the rule via Employer's training. Nonetheless, the preponderant evidence does not demonstrate Claimant's violation of the rule was willful. Claimant credibly testified that, prior to fully lifting and moving the trash bag, she first assessed the weight of the bag by picking it up slightly. Claimant determined she could lift the bag by herself. She credibly testified that, had she known the bag was that heavy or believed the bag was too heavy for her to lift, she would have left the bag there and not attempted to fully lift and move

it. Claimant ultimately misjudged the weight of the trash bag and proceeded to lift and move the item without assistance. Claimant was working without additional assistance of co-workers at the time and attempting to complete her tasks as the trash bins were getting full. Based on the totality of the circumstances, Claimant lifting the trash bag by herself due to underestimating the actual weight of the bag does not rise to the level of a deliberate intentional violation of Employer's safety rule. *See In re Bauer*, *supra* ("Further, the exercise of poor judgment within the realm of the claimant's legitimate discretion might well qualify as mere 'negligence' sufficient to preclude a finding of willfulness"). Accordingly, Claimant's non-medical benefits shall not be reduced by fifty percent.

ORDER

It is therefore ordered that:

1. Respondents failed prove by a preponderance of the evidence Claimant willfully violated a reasonable safety rule adopted by Employer. Claimant's non-medical benefits shall not be reduced by fifty percent.

2. Respondents shall pay interest to Claimant at the rate of 8% per annum on all amounts of compensation not paid when due.

3. All matters not determined herein are reserved for future determination.

If you are dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

WORKERS' COMPENSATION NO. WC 5-170-824-001

ISSUES

1. Determination of Claimant's average weekly wage.

FINDINGS OF FACT

1. Claimant was employed by Employer for approximately twenty years as a mechanic. Claimant's job duties included performing tasks related to the repair and maintenance of recreational vehicles. Claimant sustained an admitted injury arising out of the course of his employment with Employer on April 22, 2021.

2. From April 12, 2020 through the end of 2020, Claimant received a weekly wage of $1,100. (Ex. C). Claimant testified that sometime in 2020, Employer lost another mechanic which required Claimant to take on additional job duties. Claimant testified that due to these additional responsibilities, Employer increased his wages.

3. Claimant's payroll records (Ex. C) demonstrate Claimant received multiple wage increases beginning with his January 4, 2021 paycheck. Claimant's weekly wage was increased as follows:

Paycheck Date	Weekly Wage	Wage Increase
1/4/2021	$1,200	$100
2/15/2021	$1,300	$100
3/8/2021	$1,400	$100
3/29/2021	$1,455	$55
4/19/2021	$1,555	$100

4. On the date of his injury, April 22, 2021, Claimant was being paid a weekly wage of $1,555.

5. Following his injury, Claimant received work restrictions from his authorized treating provider (ATP). Claimant was off work from the date of his injury until the week of June 13, 2021, when he returned and worked a reduced-hours schedule. Claimant remained on a reduced-hours schedule until April 2022. At that time, Employer ceased operations and laid-off its employees, including Claimant.

6. On May 6, 2022, Employer filed a General Admission of Liability (GAL) admitting to Claimant's $1,555.00 AWW, and paid Claimant temporary disability benefits based on that AWW. (Ex. A).

7. When Claimant's ATP released Claimant to return to work on a reduced-hours schedule in June 2021, Employer paid Claimant an hourly rate which was the equivalent of $1,555 per week (assuming a 40-hour per week schedule). (Ex. C).

8. Claimant testified that throughout his employment, he had semi-annual reviews with Employer. During those reviews, Employer never notified Claimant he would receive a pay increase. Claimant testified when he did receive a pay increase from Employer, the increased wage would appear on his paycheck without prior notice.

9. Claimant testified he had an annual review with Employer's owner, [Reduced, hereinafter JG], on April 3, 2021, and was promised a raise of $5.00 per hour to $1,755.00 per week, beginning May 3, 2021 because he was taking on more responsibility.

10. Claimant's hourly wages after returning to work in June 2021 did not reflect the purportedly promised wage of $1,755.00 per week. (Ex. C). Claimant testified he did not receive the wage increase because he did not return to work on a full-time basis following his injury, and was unable to perform his full pre-injury scope of work.

11. On April 25, 2022, Employer sent Claimant a letter notifying him Employer would be closing and employees would be laid off. The letter indicated the business was closing due to "the lack of parts and full time employees." (Ex. B).

12. The April 25, 2022 letter was signed by JG[Redacted] and contains the following signature block which identifies JG[Redacted] as "President":

JG[Redacted signature line]

13. On or about April 28, 2022, Employer ceased operations. At that time, Employer had five employees, including Claimant, Claimant's wife, JG[Redacted] and two other employees.

14. Claimant testified that JG[Redacted] began to experience a memory issues in December 2021, and ultimately that supply chain issues, and a lack of business lead to the closure of the business.

15. The ALJ does not find credible Claimant's testimony that he was promised a raise to $1,755 per week at his April 3, 2021 review. Claimant testified he had semi-annual reviews during his twenty-year tenure with Employer, and had never before been promised a raise during his annual review. Claimant offered no credible evidence why Employer purportedly deviated from this practice at his April 3, 2021 review. Moreover, Claimant received a wage increase after his April 3, 2021 review. Claimant's payroll records show his weekly wage on April 3, 2021 was $1,455 per week. (Ex. C). Claimant's pay was increased to $1,555 per week with his April 19, 2021 paycheck. (Ex. C).

16. In support of his contention that he was to receive a wage increase to $1,755 per week in May 2021, Claimant offered a letter dated December 27, 2021 addressed "To Whom it may concern," which states: "[Claimant] did not get his annual raise on May 3, 2021 due to his injury. [Claimant] was going to get a $5.00 per hour raise of $200.00 per week starting on the paycheck of May 10, 2021. To date he has still not received the raise he was promised back on April 3, 2021 at his yearly review." (Ex. 2).

17. The December 27, 2021 letter contains the following signature block, which identifies JG[Redacted] as "Owner":

Unknown[Redacted signature line]

18. The December 27, 2021 letter is not credible or persuasive evidence that Claimant would have received a wage increase but for his work injury. There are several discrepancies between the December 27, 2021 letter and the April 25, 2022 letter which cast doubt on the authenticity of the December 27, 2021 letter. The signatures purporting to be from JG[Redacted] on the December 27, 2021 letter and the April 25, 2022 letter are different. JG[Redacted] is identified on one letter as "President" and on the other as "Owner," and the letters contain different letterheads. (*Compare* Ex. B and Ex. 2). Finally, the December 27, 2021 letter was written at the time Claimant testified JG[Redacted] began to develop memory issues.

CONCLUSIONS OF LAW

Generally

The purpose of the Workers' Compensation Act of Colorado, §§ 8-40-101, *et seq.*, C.R.S. is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. *See* § 8-40-102(1), C.R.S. Claimant shoulders the burden of proving entitlement to benefits by a preponderance of the evidence. *See* § 8-43-201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 592 P.2d 792 (Colo. 1979). The facts in a workers' compensation case must be interpreted neutrally; neither in favor of the rights of the claimant, nor in favor of the rights of respondents; and a workers' compensation claim shall be decided on the merits. § 8-43-201, C.R.S.

Assessing weight, credibility, and sufficiency of evidence in Workers' Compensation proceeding is the exclusive domain of the administrative law judge. *Univ. Park Care Center v. Indus. Claim Appeals* Office, 43 P.3d 637 (Colo. App. 2001). Even if other evidence in the record may have supported a contrary inference, it is for the ALJ to resolve conflicts in the evidence, make credibility determinations, and draw plausible inferences from the evidence. *Id*. at 641. When determining credibility, the fact finder

should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *Prudential Ins. Co. v. Cline*, 57 P.2d 1205 (Colo. 1936); *Bodensieck v. Indus. Claim Appeals Office*, 183 P.3d 684 (Colo. App. 2008).

The ALJ's factual findings concern only evidence and inferences found to be dispositive of the issues involved; the ALJ has not addressed every piece of evidence or every inference that might lead to conflicting conclusions and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Eng'g, Inc. v. Indus. Claim Appeals Office*, 5 P.3d 385 (Colo. App. 2000).

AVERAGE WEEKLY WAGE

Section 8-42-102(2), C.R.S., requires the ALJ to calculate Claimant's average weekly wage based on the earnings at the time of injury as measured by the Claimant's monthly, weekly, daily, hourly, or other earnings. However, if for any reason, the ALJ determines the default method will not fairly calculate the AWW, § 8-42-102(3), C.R.S. (2016) affords the ALJ discretion to determine the AWW in such other manner as will fairly determine the wage. § 8-42-102(3), C.R.S. establishes the so-called "discretionary exception". *Benchmark/Elite, Inc. v. Simpson*, 232 P.3d 777 (Colo. 2010); *Campbell v. IBM Corp*., 867 P.2d 77 (Colo. App. 1993). The overall objective in calculating the AWW is to arrive at a fair approximation of Claimant's wage loss and diminished earning capacity. *Campbell v. IBM Corp*., supra; *Avalanche Indus. v. ICAO*, 166 P.3d 147 (Colo. App. 2007). Where the Claimant's AWW at the time of injury is not a fair approximation of Claimant's later wage loss and diminished earning capacity, the ALJ is vested with the discretionary authority to use an alternative method of determining a fair wage. *See id*.

An ALJ may base an AWW determination "not only on the claimant's wage at the time of the injury, but on other relevant factor when the case's unique circumstances require." *Avalanche Indus, Inc. v. Clark*, 198 P.3d 589 (Colo. 2008), *rev'd on other grounds, Benchmark/Elite, Inc. v. Simpson*, 232 P.3d 777 (Colo. 2010). The ALJ's discretionary authority permits the ALJ to consider post-injury pay increases a claimant would have received absent the work-related injury. *See In Re Tibbs*, W.C. No. 4-422-333 (ICAO, Apr. 12, 2001); *Wheeler v. Archdiocese of Denver Management Corp*., W.C. No. 4-669-708 (Dec. 21, 2010). But, an ALJ may not base an award on speculation or conjecture. *Nanez v. Industrial Claim Appeals Office*, 444 P.3d 820 (Colo. 2018); *Upchurch v. Industrial Commission*, 703 P.2d 628 (Colo. App. 1985). To that end, the alleged post-injury wage increase must be "sufficiently definite" to support an increase in the AWW. *Tibbs, supra; Ebersbach v. UFCW Local No. 7*, W.C. No. 4-240-475 (May 5, 1997); *Romero v. Cub Foods*, W.C. No. 4-218-823 (Sept. 28, 2000).

Claimant has failed to establish, by a preponderance of the evidence that his admitted AWW of $1,555.00 is incorrect. The evidence establishes that Claimant's AWW at the time of injury was $1,555.00. Claimant's testimony that he was "promised" a raise

to $1,755 per week effective May 3, 2021 was corroborated by any credible evidence and is not credible. As found, Claimant testified he had never before been promised a pay raise, in contrast to the raise purportedly promised on April 3, 2021. The only corroborating document, December 27, 2021 letter, contains significant discrepancies from the April 25, 2022 letter, including different signatures, different headers, and different descriptions of JG's[Redacted] role, rendering the letter uncredible. The evidence presented does not establish that Claimant's alleged post-injury wage increase was sufficiently definite to support an increase in Claimant's AWW.

ORDER

It is therefore ordered that:

1. Claimant's average weekly wage is $1,555.00. Claimant's claim for an increased average weekly wage is denied and dismissed.

2. All matters not determined herein are reserved for future determination.

If you are dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED: *nunc pro tunc* February 1, 2023

Steven R. Kabler
Administrative Law Judge
Office of Administrative Courts
1525 Sherman Street, 4th Floor
Denver, Colorado, 80203

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. WC 5-179-264-001

ISSUES

1. Whether Respondents established by a preponderance of the evidence that Claimant received an overpayment of indemnity benefits for which Respondents are entitled to repayment.

2. If Respondents established an overpayment, the terms of repayment.

FINDINGS OF FACT

1. Claimant sustained an admitted injury arising out of the course of her employment with Employer on April 29, 2021. As a result of her injury, Claimant was entitled to receive temporary total disability (TTD) benefits for the period of August 5, 2021 to December 6, 2021, a period of 17 5/7 weeks. Claimant returned to work on December 7, 2021. (Ex. B).

2. Claimant's average weekly wage (AWW) at the time of injury was $669.65. (Ex. C & D). Pursuant to § 8-42-105 (1), C.R.S., Claimant was entitled to TTD benefits at the rate of $446.43 per week (the "TTD Rate"). Based on the TTD Rate, Claimant's total TTD entitlement was $7,908.19.

3. Insurer began paying Claimant's TTD benefits at $669.65 per week, rather than the correct TTD Rate. (Ex. C). Insurer's "Payment Detail" (Ex. C) shows Insurer paid Claimant $669.65 per week for eight weeks (August 5, 2021 to October 6, 2021), and then paid the correct TTD rate for six weeks (October 7, 2021 to November 17, 2021). The Payment Detail does not document any payment of TTD after November 17, 2021. In total, Insurer paid Claimant $8,035.77 in TTD benefits. (Ex. C).

4. On January 19, 2022, Respondents filed a Petition to Modify Claimant's TTD payments seeking leave to pay Claimant at the TTD Rate. Respondents' Petition states Insurer paid TTD "at the correct rate of $446.43 from 9/16/21 - 10/6/21, however, Respondents returned to the admitted rate of $669.95 due to the absence of an Order or stipulation permitting such unilateral modification of TTD benefits." The Petition also states Insurer paid Claimant TTD benefits totaling $11,192.71 through December 7, 2021. (Ex. E).

5. The record does not contain an order from the Division granting or denying Respondent's Petition to Modify. However, on September 16, 2022, the Division sent a letter to Insurer which references a September 2, 2022 "admission," which apparently indicated Claimant's TTD payments from August 5, 2021 to December 6, 2021 were reduced from $669.65 to $446.43. The September 16, 2022 letter advised Insurer that benefits could not be reduced prior to the date of the Petition, and directed Respondents

to reinstate Claimant's TTD payment of $669.65 from August 5, 2021 to December 6, 2021. (Ex. A). The ALJ infers the Division issued an order permitting Respondents to reduce Claimant's TTD payments to the TTD Rate after January 19, 2022.

6. On October 10, 2022, Respondents filed a Final Admission of Liability (FAL), which indicates the Claimant was paid TTD at the rate of $669.65 from August 5 2021 to December 6, 2021, totaling $11,862.37. (Ex. B). The FAL also asserts an overpayment of $3,954.18. Attached to the FAL is a document entitled "Remarks" (Ex. B, p. 13), which purports to explain the overpayment calculation.

7. The "Remarks" document states: "$11,862.37 was erroneously paid in TTD benefits from August 5, 2021 to December 6, 2021 at the weekly rate of $669.65. In fact, the appropriate TTD rate was $446.43 for this time period and only $7,908.19 was owed in TTD benefits." (Ex. B., p. 13).

8. In the FAL, Respondents admit Claimant is entitled to permanent partial disability (PPD) benefits of $3,505.94. (Ex. B, p. 5). The "Remarks" document indicates the alleged overpayment of $3,954.18 would be applied to Claimant's PPD award. (Ex. B, p. 13). No evidence was admitted indicating Respondents have paid Claimant's admitted PPD benefits.

9. Multiple discrepancies exist between Respondents' Petition to Modify, the October 10, 2022 FAL, and Insurer's Payment Detail. First, the Petition to Modify indicates Insurer paid Claimant TTD benefits totaling $11,192.71 through December 7, 2021, while the October 10, 2022 FAL, indicates Insurer paid Claimant $11,862.37 for the same period. The Payment Detail, however, documents payments totaling $8,035.77, from August 5, 2021 to November 17, 2021, and includes no evidence of payments after November 17, 2021. (*Compare,* Exs. E, B., 13, and Ex. C).

10. Next, the Petition to Modify indicates Insurer paid the "correct rate of $446.43 from 9/16/21 - 10/6/21." (Ex. E). The Payment Detail, however, shows Insurer paid Claimant the incorrect rate of $669.65 for these dates. (Ex. C). The FAL "Remarks" document, on the other hand, indicates Claimant was paid $669.65 for the entire period of August 5, 2021 to December 6, 2021. (Ex. B, p. 13). Next, the Petition to Modify and FAL indicate Insurer paid Claimant TTD through December 6 or 7, 2021. The Payment Detail, however, does not document any payment after November 17, 2021. (*Compare*, Exs. E, B. p. 13, and C).

11. Respondents offered no testimony or other credible evidence at hearing explaining the discrepancies between the various documents. Given the inconsistencies, the ALJ finds neither the Petition to Modify nor the FAL to be credible evidence of the TTD benefits Insurer paid to Claimant. In contrast, Insurer's "Payment Detail" is a line-item listing of each TTD payment made to Claimant, and includes the date each payment was processed, the check number, the associated TTD time period, and the amount of each payment. Because no credible evidence was offered or admitted demonstrating TTD payments to Claimant after November 17, 2021, the ALJ finds that Exhibit C,

Insurer's Payment Detail is the only credible evidence of Insurer's payments to Claimant, and is the complete statement of TTD payments Insurer made to Claimant.

12. The credible evidence thus demonstrates Insurer paid Claimant TTD benefits totaling $8,035.77, not $11,192.71 or $11,862.37, as represented in the Petition to Modify and the FAL, respectively.

13. The credible evidence does not support Respondents' contention that Claimant received an overpayment of $3,954.18. Claimant was entitled to $7,908.19 in TTD benefits, and Respondents paid Claimant $8,035.77, resulting in an overpayment of $127.58 (*i.e.,* $8,035.77 - $7,908.19 - $127.58).

14. Claimant credibly testified that she was not aware she had received any overpayments and that if she was overpaid, she would repay the amount owed. Claimant further testified, credibly, that she is not currently employed, although she anticipated gaining employment within a few months.

CONCLUSIONS OF LAW

Generally

The purpose of the Workers' Compensation Act of Colorado, §§ 8-40-101, *et seq*., C.R.S. is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. *See* § 8-40-102(1), C.R.S. Claimant shoulders the burden of proving entitlement to benefits by a preponderance of the evidence. *See* § 8-43-201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 592 P.2d 792 (Colo. 1979). The facts in a workers' compensation case must be interpreted neutrally; neither in favor of the rights of the claimant, nor in favor of the rights of respondents; and a workers' compensation claim shall be decided on the merits. § 8-43-201, C.R.S.

Assessing weight, credibility, and sufficiency of evidence in Workers' Compensation proceeding is the exclusive domain of the administrative law judge. *Univ. Park Care Ctr. v. Indus. Claim Appeals* Office, 43 P.3d 637 (Colo. App. 2001). Even if other evidence in the record may have supported a contrary inference, it is for the ALJ to resolve conflicts in the evidence, make credibility determinations, and draw plausible inferences from the evidence. *Id*. at 641. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *Prudential Ins. Co. v. Cline*, 57 P.2d 1205 (Colo. 1936); *Bodensieck v. Indus. Claim Appeals Office*, 183 P.3d 684 (Colo. App. 2008). The weight and credibility to be assigned expert testimony is a matter within the discretion of the ALJ. *Cordova v. Indus. Claim Appeals Office*, 55 P.3d 186 (Colo. App. 2002).

The ALJ's factual findings concern only evidence and inferences found to be dispositive of the issues involved; the ALJ has not addressed every piece of evidence or every inference that might lead to conflicting conclusions and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Eng'g, Inc. v. Indus. Claim Appeals Office*, 5 P.3d 385 (Colo. App. 2000).

Effect of Division Order

As found, Respondents filed a Petition to Modify with the Division, seeking to reduce Claimant's TTD payments to the TTD Rate. No order from the Division was offered or admitted into evidence. However, the ALJ infers from Ex. A, that an Order was issued permitting Respondents to reduce Claimant's PPD payments to the TTD Rate for benefits paid after January 19, 2022. Petitions to Modify are governed by W.C.R.P. 6, 7-CCR 1101-3, which does not authorize the retroactive modification of temporary disability benefits. However, ALJs are permitted to order repayment retroactively, pursuant to § 8-43-207 (q), C.R.S. Thus, the ALJ concludes that W.C.R.P. 6 does not bar the Respondents from recovery of an overpayment made prior to the Division's order.

Overpayment

Pursuant to § 8–43–303(1) C.R.S., upon a *prima facie* showing that the claimant received an overpayment in benefits, the award shall be reopened solely as to overpayments and repayment shall be ordered. No such reopening shall affect the earlier award as to moneys already paid except in cases of fraud or overpayment. *Id.* In relevant part, the Colorado Workers' Compensation Act defines "overpayment" as "money received by a claimant that exceeds the amount that should have been paid, or which the claimant was not entitled to receive. § 8-40-201 (15.5), C.R.S. (2021).[1] An overpayment may occur even if it did not exist at the time the claimant received disability or death benefits. *Simpson v. ICAO,* 219 P.3d 354, 358 (Colo. App. 2009). Section 8-42-113.5 (1)(c), C.R.S., authorizes insurers to seek and order for repayment of an overpayment, and ALJs are authorized to conduct hearings to require such repayments. § 8-43-207 (q), C.R.S. Respondents may retroactively recover an overpayment of benefits, and such recover is not limited to duplicate benefits. *In re Wheeler*, W.C. No. 4-995-488-004 (ICAO Apr. 23, 2019); *In Re Haney,* W.C. No. 4-796-763 (ICAP, July 28, 2011).

Respondents bear the burden of proof to establish, by a preponderance of the evidence, that a claimant received and overpayment, and that respondents are entitled to recovery of that overpayment. *City & Cty. of Denver v. Indus. Claim Appeals Off.*, 58 P.3d 1162, 1164-1165 (Colo. App. 2002); See *In Re: Robert D. Scott,* W.C. No. 4-777-

[1] The General Assembly amended § 8-40-201 (15.5), C.R.S., effective January 1, 2022, removing the phrase "money received by a claimant that exceeds the amount that should have been paid, or which the claimant was not entitled to receive " from the definition of "overpayment." However, the matter before the ALJ is based payments prior to January 1, 2022, consequently the operative, applicable statute is the Worker's Compensation Act in effect prior to January 1, 2022. *See Stark v. Zimmerman*, 638 P.2d 843 (Colo 1981) (repeal of a statutory provision does not operate retroactively to modify vested rights or liabilities); *Martinez v. People*, 484 P.2d 792 (Colo 1971) (repealed statutory provisions remain in force as far as pending actions, suits and proceedings are concerned).

897, (ICAO Oct. 28, 2009). Respondents have established by a preponderance of the evidence that Claimant received $127.58 for TTD benefits to which she was not entitled. Accordingly, Respondents are entitled recover from Claimant the overpayment of $127.58.

Repayment

Under § 8-43-303 (1), C.R.S., upon a finding of an overpayment, an order of repayment is mandatory. When the parties are unable to agree upon a repayment schedule, the ALJ is empowered, pursuant to § 8-43-207(q), C.R.S., to conduct hearings to "[r]equire repayment of overpayments." In *Simpson v. Indus. Claim Appeals Office*, 219 P.3d 354 (Colo. App. 2009), *rev'd on other grounds*, *Benchmark/Elite, Inc. v. Simpson*, 232 P.3d 777 (Colo. 2010), the Colorado Court of Appeals held that with regard to overpayments, the ALJ has discretion to fashion a remedy. Further, the ALJ has the authority to determine the terms of repayment and the ALJ's schedule for recoupment will not be disturbed absent an abuse of discretion. *See Louisiana Pacific Corp. v. Smith*, 881P.2d 456 (Colo. App. 1994).

Insufficient evidence was admitted permitting the ALJ to determine whether Respondents have paid Claimant the $3,505.94 in PPD benefits to which she is entitled. If Respondents have not paid Claimant's PPD benefits, Respondents may take credit for the $127.58 overpayment against PPD benefits due and owing, less any accrued interest on the outstanding PPD benefits.

If Respondents have paid Claimant PPD benefits, Claimant shall repay Respondents $127.58. Claimant credibly testified she is currently unemployed, although she anticipates obtaining employment within a few months. The ALJ finds that requiring immediate repayment of the overpayment may impose financial hardship on the Claimant who is unemployed. Therefore, if Respondents have paid Claimant's PPD benefits in full, Claimant shall pay Respondents $127.58 within six months of the date of this Order.

ORDER

It is therefore ordered that:

1. Claimant received an overpayment in the amount of $127.58, for which Respondents are entitled to repayment.

2. If Respondents have not paid Claimant's PPD benefits of $3,505.94, Respondents may credit the overpayment of $127.58 against her PPD benefits.

3. If Respondents have paid Claimant's PPD benefits of $3,505.95 in full, Claimant shall repay the overpayment of $127.58 within six months of the date of this Order.

4. Respondents shall pay 8% interest on all sums not paid when due.

5. All matters not determined herein are reserved for future determination.

If you are dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED: February 23, 2023

Steven R. Kabler
Administrative Law Judge
Office of Administrative Courts
1525 Sherman Street, 4th Floor
Denver, Colorado, 80203

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. WC 5-207-497-001

ISSUES

1. Whether Claimant established by a preponderance of the evidence that he sustained a compensable injury to his right shoulder arising out of the course of his employment with Employer.

2. Whether Claimant established by a preponderance of the evidence an entitlement to medical benefits

3. Whether Claimant established by a preponderance of the evidence an entitlement to temporary total disability benefits.

4. Whether Respondents established by a preponderance of the evidence that Claimant was responsible for his own termination.

FINDINGS OF FACT

1. Claimant was employed by Employer as a truck driver for approximately five years. Claimant's job duties included driving a truck and making deliveries of products, including cement powder, liquid admix, and other materials used in construction.

2. Claimant alleges he sustained an injury to his right shoulder March 11, 2022 or March 17, 2022[1] while making a delivery to a [Redacted, hereinafter MM] facility in Fort Collins, Colorado. Claimant testified while opening a set of heavy, metal container doors his right shoulder "gave out."

3. Claimant initially testified his injury occurred at approximately 1:00 p.m., on March 17, 2022, and that he returned to Employer's terminal after 5:00 p.m. Claimant asserted he could not report his injury to either the terminal manager, [Redacted, hereinafter TS], or Employer's safety manager, [Redacted, hereinafter MK], because it was after hours, and neither TS[Redacted] nor MK[Redacted] was present at the terminal.

4. Claimant testified he did not work the two days after the injury and verbally reported his injury to TS[Redacted] when he returned to work the following Monday. Claimant testified he told TS[Redacted] he injured his shoulder and would need to see a doctor, and then went to work that day. Claimant testified he discussed his alleged injury with TS[Redacted] two additional times after the initial conversation. Claimant testified Employer did not refer Claimant to a physician, and did not offer medical treatment after these conversations. Claimant also testified that he initially did not want to pursue a workers' compensation claim and wanted to handle his injury under other insurance.

[1] The date of Claimant's alleged injury is in dispute, and is discussed below.

5. TS[Redacted] testified at hearing that he had no recollection of any conversation with Claimant regarding an injury to his right shoulder, and that Claimant did not report any injury in March 2022.

6. Over the next two months, Claimant continued to work for Employer, and had regular interactions with MK[Redacted]. MK[Redacted] testified that she and Claimant would smoke cigarettes together at the terminal, and during this time Claimant did not report the alleged injury to her, and she did not observe any behavior consistent with an injury. MK[Redacted] credibly testified that Claimant first reported an injury on June 6, 2022 or June 8, 2022.

7. Employer's policy requires all employees to immediately report all injuries in writing, and that employees could be terminated for not following this policy. Claimant agreed that this was Employer's policy, and that he was aware of the policy at the time of his injury. Claimant had been previously written up for failing to timely report an injury.

8. Notwithstanding his knowledge of this policy, Claimant did not immediately file a written report. Claimant first notified Employer of his alleged March 2022 injury on June 6, 2022, when he reported the injury to MK[Redacted], and completed the appropriate paperwork on June 8, 2022. On June 8, 2022, Employer terminated Claimant's employment for failure to timely report his alleged injury.

MEDICAL TREATMENT

Claimant's Prior Relevant Medical History

9. Claimant has a history of right shoulder issues that began in November 2018 when he fell on his right shoulder while fishing. Following that incident, Claimant sought and received treatment at the Veterans' Administration Medical Center (VAMC)[2]. At Claimant's first documented right shoulder examination on May 20, 2019, he reported a six-month history of right shoulder pain, with occasional numbness and tingling in the right elbow to the hand, and worsening pain with lifting. Claimant's examination was consistent with rotator cuff tendonitis. No MRI was performed, but an x-ray demonstrated mild degenerative changes. Claimant was referred for physical therapy for his right shoulder, which Claimant later indicated did not help. (Ex. N).

10. Following the November 2018 injury, Claimant received treatment at the VA, including participating in physical therapy. In October 2019, received a right shoulder subacromial steroid injection. (Ex. N). Claimant later returned to the VAMC, in April 2020, for evaluation of his right shoulder, and reported the steroid injection provided approximately one and a half months of relief. An MRI was recommended, but was not performed. (Ex. N). Claimant continued to report pain and issues with his right shoulder through at least April 1, 2020. No additional evidence was admitted indicating Claimant

[2] The admitted medical records from the VAMC contain numerous transcription or typographical errors, however, the ALJ is able to discern relevant information regarding Claimant's treatment and evaluations at the VAMC.

received treatment or evaluation for his right shoulder after April 1, 2020 at the VAMC, until May 2022.

Post March 2022 Treatment

11. Claimant's first documented medical treatment for his right shoulder after the alleged date of injury was on May 28, 2022, when he was evaluated at the VAMC by James Thompson, PA. At that visit, Claimant reported right shoulder pain present since February 2022, and was referred for an MRI. Claimant did not report his shoulder pain arose from his employment, that he sustained an injury while opening a container door, or that the injury occurred in March 2022. (Ex. N).

12. On June 21, 2022, Claimant underwent a right shoulder MRI. The MRI was interpreted as showing significant pathology in Claimant's right shoulder, primarily large, retracted tears of the supraspinatus and infraspinatus tendons. The specific MRI findings were:

> Acromioclavicular joint degenerative changes appear relatively significant. Significant superior humeral head migration. Bulk of the supraspinatus is torn and retracted to level of the AC joint with thickened edematous fibers more anteriorly possibly remaining intact. Infraspinatus tendon torn and retracted to level of the glenoid. Partially visualized supraspinatus and infraspinatus muscles appearing significantly atrophied with small surrounding-and internal-edema. Teres minor with small tearing through musculotendinous junction with possible partial tearing of the tendon. Subscapularis with moderate tendinosis and partial Interstitial tearing. Glenohumeral joint with effusion containing small debris. Small subcortical cystic changes with slight narrow edema involving the superolateral humeral head. There may be chronic degenerative superior labral tearing. Potential chronic partial humeral avulsion inferior glenohumeral ligament. Some laxity in the more proximal middle glenohumeral ligament may indicate partial tearing. (Ex. N).

13. Claimant's last documented medical visit for his right shoulder was on August 11, 2022, at the VAMC. Claimant was referred for a consult with neurosurgery for a consideration of a reverse TSA (total shoulder arthroplasty). (Ex. N). At hearing Claimant testified that surgery has been recommended and that he has not undergone the procedure because a new physician was assigned by the VAMC.

14. Claimant presented no credible testimony or medical reports opining that his shoulder pathology was causally related to a work-related injury.

15. Robert Messenbaugh, M.D., was admitted as an expert in orthopedic surgery, and testified at hearing. Dr. Messenbaugh performed an independent medical examination

(IME) of Claimant on October 18, 2022, a subsequent review of additional records, and issued two reports, dated October 18, 2022 and December 10, 2022. (Ex. K & L).

16. Based on his October 18, 2022 examination, and review of records, including Claimant's right shoulder MRI, Dr. Messenbaugh opined that Claimant had severe, chronic damage to his right shoulder, including a complete rotator cuff tear, retracted biceps tendon, and atrophy of the rotator cuff muscles. He noted that Claimant's right humeral head was pulled upward into the socket, which he opined was evidence of a severe chronic condition. He testified that the MRI did not show any damage caused by trauma in March 2022. Dr. Messenbaugh also testified that Claimant's VAMC records confirmed he had chronic right shoulder problems that existed prior to March 2022.

17. Dr. Messenbaugh further testified that given Claimant's preexisting shoulder condition, it was probable Claimant could experience pain opening a container door, but that it was unlikely that it would have caused any alteration of his shoulder anatomy or injury. Dr. Messenbaugh agreed that surgery on Claimant's right shoulder is indicated, but does not believe that the surgery is related to any alleged work injury. Dr. Messenbaugh's testimony was credible and persuasive.

DATE OF INJURY

18. As noted above, the date of Claimant's alleged injury is the subject of dispute. Claimant initially testified his injury occurred on March 17, 2022, at a MM[Redacted] facility in Fort Collins, Colorado at approximately 1:00 p.m., and that he returned to Employer's terminal after 5:00 p.m., on the date of injury.

19. Employer utilizes a tracking system for its drivers which creates a "Driver's Log" which records information regarding driver's start time and end time, driving time, and GPS locations throughout the day. Claimant's Driver's Logs for the month of March 2022 are contained in Exhibit S, pages 447 to 581. Claimant agreed his Driver's Logs were accurate.

20. Claimant's Driver's Logs show he was not in Fort Collins on March 17, 2022, and he returned to Employer's terminal at 10:39 a.m. on that day. Thus, the Driver's Logs are inconsistent with Claimant's initial testimony regarding the time and date of injury, and when he returned to Employer's terminal. After being questioned about this at hearing, Claimant reviewed his Driver's Logs, and indicated he now believed his injury occurred on March 11, 2022, not March 17, 2022.

21. Although the March 11, 2022 Driver's Log shows Claimant was in Fort Collins, the record indicates he left Fort Collins at 12:30 p.m., returned to the terminal at 1:44 p.m., not after 5:00 p.m., as he testified. Claimant's Driver's Logs for the month of March 2022 show Claimant did not return to the terminal after 5:00 on any date, and returned after 4:00 p.m., on only two dates (March 16, 2022 and March 28, 2022). Claimant was not in Fort Collins on either of those dates. (Ex. S).

22. After Claimant reported his injury in June 2022, he later completed a Worker's Claim for Compensation (WCC), on July 12, 2022. Two versions of the WCC form were

admitted into evidence: Claimant's Exhibit 1 and Respondents' Exhibit B. On Respondents' Exhibit B, the date of injury is listed as March 22, 2022. Claimant's version of the WCC is the same document as Respondents' version, except the date of injury is listed as March 1, 2022, in different color ink and different handwriting than the remainder of the form. (Compare Ex. 1 & Ex. B). No evidence was admitted explaining the discrepancy between the two WCC forms. Both WCC forms indicate Claimant reported an injury on April 22, 2022.

23. On June 20, 2022 and July 21, 2022, Respondents filed two Notices of Contest which list the date of injury as March 1, 2022. (Ex. 2). Similarly, Claimant's Application for Hearing and Respondents' Response to Application for Hearing also list the date of injury as March 1, 2022. (Ex. 3 & Ex. I). In response to written discovery, Claimant indicated the injury occurred on March 17, 2022, and that he reported the injury to TS[Redacted] when he arrived at Employer's Terminal on that date. (Ex. J).

24. Given the multiple discrepancies regarding the date of Claimant's alleged injury, ranging from sometime in February 2022, as reported to the VAMC, to April 22, 2022, the ALJ is unable to determine when, if ever, Claimant experienced pain in his right shoulder from opening a metal container.

CONCLUSIONS OF LAW

Generally

The purpose of the Workers' Compensation Act of Colorado, §§ 8-40-101, et seq., C.R.S. is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. *See* § 8-40-102(1), C.R.S. Claimant shoulders the burden of proving entitlement to benefits by a preponderance of the evidence. *See* § 8-43-201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 592 P.2d 792 (Colo. 1979). The facts in a workers' compensation case must be interpreted neutrally; neither in favor of the rights of the claimant, nor in favor of the rights of respondents; and a workers' compensation claim shall be decided on the merits. § 8-43-201, C.R.S.

Assessing weight, credibility, and sufficiency of evidence in Workers' Compensation proceeding is the exclusive domain of the administrative law judge. *University Park Care Center v. Industrial Claim Appeals* Office, 43 P.3d 637 (Colo. App. 2001). Even if other evidence in the record may have supported a contrary inference, it is for the ALJ to resolve conflicts in the evidence, make credibility determinations, and draw plausible inferences from the evidence. *Id*. at 641. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *Prudential Insurance Co. v. Cline*, 57 P.2d 1205 (Colo. 1936); *Bodensieck v. Industrial Claim Appeals Office*, 183 P.3d 684 (Colo. App. 2008). The weight and credibility to be assigned expert

testimony is a matter within the discretion of the ALJ. *Cordova v. Industrial Claim Appeals Office*, 55 P.3d 186 (Colo. App. 2002). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colorado Springs Motors, Ltd. v. Industrial Commission*, 441 P.2d 21 (Colo. 1968).

The ALJ's factual findings concern only evidence and inferences found to be dispositive of the issues involved; the ALJ has not addressed every piece of evidence or every inference that might lead to conflicting conclusions and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office*, 5 P.3d 385 (Colo. App. 2000).

COMPENSABILITY

Claimant has failed to establish by a preponderance of the evidence that he sustained a compensable right shoulder injury arising out of the course of his employment with Employer. Notwithstanding the multiple discrepancies related to the alleged date of injury, Claimant has failed to establish that he sustained an injury to his right shoulder arising out of the course of his employment with Employer. Dr. Messenbaugh credibly testified that Claimant has significant, pre-existing pathology in his right shoulder. His testimony is supported by the June 21, 2022 MRI which demonstrates significant pathology in Claimant's right shoulder, including multiple torn or potentially torn tendons, retraction of ligaments and displacement of the humeral head.

No health care provider credibly testified that the pathology in Claimant's right shoulder was consistent with an injury sustained by opening a heavy door, or that the pathology in Claimant's shoulder was caused by or aggravated by a work activity.

While Claimant may have experienced pain in his right shoulder while opening a metal container, Claimant has failed to establish that such an incident, if it occurred, caused a compensable injury. Claimant's testimony regarding the alleged injury was contradictory, inconsistent, and uncorroborated. Claimant testified that his right arm "gave out" when he opened a heavy, metal container door in March 2022, but he did not seek medical attention for his right shoulder until May 28, 2022, and did not report the alleged injury to Employer until June 2022. When Claimant did seek treatment, he did not report the injury as work-related, or indicate it was caused by opening a metal container door. Instead, Claimant reported that his right shoulder began to worsen in February 2022. Based on the totality of the evidence, Claimant has failed to establish it is more likely than not that he sustained a compensable injury to his right shoulder arising out of the course of his employment.

MEDICAL BENEFITS

Respondents are liable to provide medical treatment that is reasonable and necessary to cure and relieve the effects of the industrial injury. § 8-42-101(1)(a), C.R.S. The question of whether the claimant proved treatment is reasonable and necessary is one of fact for the ALJ. *Kroupa v. Indus. Claim Appeals Office,* 53 P.3d 1192 (Colo. App.

2002). *Hobirk v. Colorado Springs School Dist. #11,* W.C. No. 4-835-556-01 (ICAO Nov. 15, 2012). A service is medically necessary if it cures or relieves the effects of the injury and is directly associated with the claimant's physical needs. *Bellone v. Indus. Claim Appeals Office,* 940 P.2d 1116 (Colo. App. 1997); *Parker v. Iowa Tanklines, Inc.*, W.C. No. 4-517-537, (ICAO, May 31, 2006). The determination of whether services are medically necessary, or incidental to obtaining such service, is a question of fact for the ALJ. *Id.*

Because Claimant has failed to establish a compensable injury, Claimant has failed to establish an entitlement to medical treatment for his right shoulder issues.

TEMPORARY TOTAL DISABILITY

To prove entitlement to Temporary Total Disability (TTD) benefits, Claimant must prove her industrial injury caused a disability lasting more than three work shifts, she left work as a result of the disability, and the disability resulted in an actual wage loss. *Anderson v. Longmont Toyota,* 102 P.3d 323 (Colo. 2004); *City of Colorado Springs v. Indus. Claim Appeals Office,* 954 P.2d 637 (Colo. App. 1997). Section 8-42-103(1)(a) requires Claimant to establish a causal connection between a work-related injury and a subsequent wage loss in order to obtain TTD benefits. *PDM Molding, Inc. v. Stanberg*, 898 P.2d 542 (Colo. 1995). The term "disability" connotes two elements: (1) medical incapacity evidenced by loss or restriction of bodily function; and (2) impairment of wage-earning capacity as demonstrated by Claimant's inability to resume his or her prior work. *Culver v. Ace Electric*, 971 P.2d 641, 649 (Colo. 1999).

The impairment of earning capacity element of disability may be evidenced by a complete inability to work, or by restrictions which impair the claimant's ability effectively and properly to perform regular employment. *Ortiz v. Charles J. Murphy & Co.*, 964 P.2d 595, 597 (Colo. App. 1998) TTD benefits ordinarily continue until terminated by the occurrence of one of the criteria listed in § 8-42-105 (3), C.R.S. The existence of disability is a question of fact for the ALJ. No requirement exists that a claimant produce evidence of medical restrictions, a claimant's testimony alone is sufficient to demonstrate a disability. *Lymburn v. Symbios Logic,* 952 P.2d 831, 833 (Colo. App. 1997).

Because Claimant has failed to establish a compensable injury, Clamant has not established an entitlement to temporary disability benefits.

CAUSE OF TERMINATION

Because Claimant has failed to establish a compensable injury or entitlement to TTD benefits, the issue of whether Claimant was responsible for his own termination is moot.

ORDER

It is therefore ordered that:

1. Claimant's claim for workers' compensation benefits is denied and dismissed.

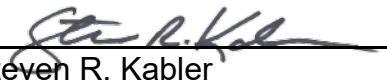
2. Claimant is not entitled to workers' compensation medical benefits.

3. Claimant is not entitled to temporary disability benefits.

4. The issue of Claimant's responsibility for termination is moot.

If you are dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED: February 23, 2023



Steven R. Kabler
Administrative Law Judge
Office of Administrative Courts
1525 Sherman Street, 4th Floor
Denver, Colorado, 80203

ISSUES

I. Whether Respondents established, by a preponderance of the evidence, that Claimant was responsible for the termination of his employment thereby precluding his entitlement to TTD pursuant to C.R.S. §§ 8-42-103 (1) (g) and 8-42-105 (4) (a).

II. If Respondents failed to demonstrate that Claimant was responsible for his resulting wage loss, whether Claimant established, by a preponderance of the evidence, that he is entitled to temporary total disability (TTD) benefits commencing July 29, 2022 and ongoing.[1]

FINDINGS OF FACT

Based on the evidence presented at hearing, the ALJ enters the following findings of fact:

1. Claimant is a former employee of Respondent-Employer. He was hired on October 19, 2015 (Ex. D), and was working as a foreman when he sustained admitted injuries to his low back and left shoulder on or about November 15, 2021. As his acute back pain improved, it was discovered that Claimant had also suffered a right inguinal hernia as a consequence of the industrial accident. (Ex. 5).

2. As noted, liability for these injures has been accepted. (Exs. E, F). Claimant was referred to physical therapy to treat his low back and shoulder injuries. He was also referred to a general surgeon to evaluate his inguinal hernia. These initial referrals were ignored resulting in the need to "redo" the referral and "reconsult" a different therapist and general surgeon. (Ex. 5, pp. 13, 31). Ultimately, Claimant would participate in therapy. He would also undergo a right inguinal hernia repair with Dr. Ihor Jurij Fedorak on February 3, 2022. (Ex. 6, p. 20). Claimant was off of work from February 3, 2022 through June 5, 2022, as he recovered from his injury and hernia surgery. (Ex. F). Claimant returned to work in a modified capacity following his surgery. Claimant continued to work within his restrictions as a foreman/supervisor doing office tasks and training others in the shop, from June 6, 2022, until he was fired by Employer on July 29, 2022[2].

---

[1] Respondents stipulated that because Claimant was working in a modified duty capacity with physical restrictions, he would be considered temporarily disabled and entitled to TTD benefits commencing July 29, 2022 and ongoing if they failed to establish that he was responsible for the termination of his employment and subsequent wage loss. Nonetheless, Respondents also contend that Claimant is not entitled to TTD benefits because he is working in a family owned business.

[2] The ALJ credits Claimant's testimony to find that he was informed that his employment with Respondent-Employer was terminated on July 29, 2022, not July 28, 2022 as referenced in the Termination Report and testified to by [Redacted, hereinafter MW].

3. MW[Redacted] testified as the owner/operations manager of Respondent-Employer. MW[Redacted] testified that Claimant returned to work in a modified capacity after undergoing hernia surgery. According to MW[Redacted], Claimant returned to work as a foreman training others. He also worked in the office performing light duty tasks. In addition to his work for Employer, MW[Redacted] suggested that Claimant was self-employed in a variety of businesses including an adult object/lingerie shop co- owned with his wife, a vending machine business and as a car salesman.

4. MW[Redacted] testified that sometime in June, 2022, he initiated an investigation into Claimant's behavior at work after receiving complaints from employees of the company, including a worker that Claimant supervised. According to MW[Redacted], an employee under Claimant's supervision made "serious" accusations about Claimant's conduct in the workplace prompting MW[Redacted] to gather witness statements from Claimant's co-workers. Because none of the complaining witnesses testified at hearing and because Claimant objected to the introduction of the witness statements without authentication/foundation, which objections were sustained prior to hearing, the exact nature of the complaints are unknown. However, the evidence presented supports a finding that Respondents insist that Claimant inappropriately used his position as a foreman/supervisor to gain access the personnel file of a subordinate worker he was supervising to obtain her birthdate.

5. MW[Redacted] testified that company personnel files contain confidential identifying information about the employee, such as their driver's license and social security numbers and seemingly, in this case, their birthdates. According to MW[Redacted], Claimant had no authority to go "digging around" in the files to obtain this kind of information. Consequently, MW[Redacted] testified he considered Claimant's actions immoral. MW[Redacted] testified further that by accessing the personnel file to obtain confidential information about another employee of the company, Claimant violated company policy and safety protocols. After investigating the complaint, MW[Redacted] testified that he summoned Claimant to a meeting on July 28, 2022, during which he demanded that Claimant explain his actions. According to MW[Redacted], he advised Claimant that a complaint had been filed alleging that he had engaged in inappropriate workplace conduct and that he had misused company information. Claimant generally denied the allegations against him. Moreover, Claimant denied MW's[Redacted] contention that he (Claimant) mentioned the name of the person he suspected of making the complaints based upon a prior dispute between the two, i.e. between Claimant and the complainant. While MW[Redacted] referenced that a complaint had been filed, he would not confirm the identity the complainant(s) nor would he provide Claimant any details regarding the allegations of inappropriate conduct raised by the complaining party(ies). Indeed, MW[Redacted] testified that he only gave Claimant an "overview" of the allegations of inappropriate conduct made by the complainant(s). MW[Redacted] testified that he instructed Claimant to provide a written response to the allegations of wrongdoing within 24 hours.

6. Because he didn't know the nature of the allegations leveled against him and because he did not know how he had supposedly violated company policy, Claimant testified that he could not respond to the accusations. The ALJ infers from

Claimant's testimony that he needed more information regarding the allegations of inappropriate conduct and misuse of confidential information before he could provide the written response requested by MW[Redacted]. Nonetheless, the evidence presented supports a finding that MW[Redacted] took Claimant's reported inability to respond to the allegations as a refusal to provide a statement. MW[Redacted] testified that because Claimant refused to present any evidence, facts, or a statement refuting the allegations against him, he determined the complainant's assertions were true. Upon concluding that the allegations against Claimant were true, MW[Redacted] testified that he summarily terminated Claimant's employment on July 28, 2022.

7. MW[Redacted] testified that following the July 28, 2022 meeting with Claimant, he drafted a termination letter (Termination Report) and gave a copy of it to Claimant as he left the building. The Termination Report provides the following basis for Claimant's termination: "Other employees made allegations of inappropriate conduct in the work place and misuse of confidential company information. MW[Redacted], the owner, did an investigation and found the offense to be a terminateable (sic) offense." (Ex. 13).

8. Clearly the Termination Report does not identify any accusers or provide specific detail on the alleged inappropriate conduct Claimant supposedly carried out in the work place and no witness testified about these details. Consequently, the nature of the "inappropriate conduct" Claimant allegedly instigated is unknown. Moreover, the report does not provide detail on what confidential company information was allegedly accessed or how it was misused. As noted above, the evidence presented supports a finding that Respondents maintain that Claimant's decision to access the personnel file of a subordinate to obtain her birthdate constituted "misuse of confidential company information" because birthdates are treated as confidential information at the company and because Claimant purportedly obtained this information by accessing the complainant's personnel file. Indeed, during his testimony, MW[Redacted] clarified that he considered employee birthdates confidential company information and that by accessing the complainant's personnel file to obtain her birthdate, Claimant misused company information for his benefit, although the evidence presented fails to establish the nature of that benefit or how this information was "misused" other than that Claimant allegedly obtained the complainant's birthdate[3]. Because he considered Claimant's alleged conduct of obtaining a co-employee's birthdate from the personnel file a complete breach of trust between Claimant and the company rather than a safety rule per se, MW[Redacted] testified that he did not follow a progressive discipline protocol before terminating Claimant. Rather, MW[Redacted] testified that Claimant was simply fired.

9. MW[Redacted] testified that access to employee files is protected by lock and key. The cabinet where these files are kept is locked and has a sign on it providing that the files are confidential and that inappropriate or wrongful access could lead to

[3] Although a vague reference to a gift or gifts was raised during the testimony of MW[Redacted], no foundation for how this reference may have constituted inappropriate workplace conduct or misuse of confidential information was presented. Accordingly, the ALJ is disinclined to speculate on what role a gift or gifts may have played in Claimant's termination.

termination. There is only one key to the file cabinet and only three people have access to that key, i.e. MW[Redacted] and two other high level employees of the company, i.e. [Redacted, hereinafter LW] and [Redacted, hereinafter SR]. Anyone seeking access to the cabinet was required to go to one of the aforementioned persons and explain why access was necessary. If access was granted, the cabinet would be opened and the key-holder would monitor the employee requesting access as they reviewed and/or modified the contents of the personnel file selected. Filing of materials, such as performance evaluation reports, would be managed in the same fashion, specifically the supervisor for an employee would gain access to the personnel files of those employees under his direction from the gatekeeper who would then observe as the report would be placed in the file.

10. Based upon the evidence presented, the ALJ finds that MW[Redacted] probably had no direct knowledge regarding any breach of confidences on Claimant's part. Rather, the evidence presented persuades the ALJ that the information forming the basis of Claimant's termination, including the suggestion that Claimant accessed the complainant's personnel file to obtain her birthday, came from employee statements which MW[Redacted] simply concluded were true and which, as noted above, were not supported by witness testimony or introduced into evidence.

11. Claimant testified that he supervised 15 employees for Respondent-Employer. He testified further that as a supervisor, he was routinely granted access to the personnel files of those employees under his direction in order to review their past performance evaluations so he could recommend appropriate wage increases as part of his new performance review. Claimant testified that he was given access to the files by LW[Redacted], SR[Redacted] or MW[Redacted], who would supervise him as he reviewed the files. Claimant was never given the key to independently access the file cabinet. Based upon the evidence presented, the ALJ finds that Claimant was probably never left alone while reviewing subordinate employee files.

12. Claimant disputes that he participated in a meeting with MW[Redacted] on July 28, 2022. Rather, Claimant testified that the meeting took place on Friday, July 29, 2022 and that he was terminated during this meeting. Claimant testified that at the outset of this meeting, MW[Redacted] presented him with the July 28, 2022, Termination Report and asked him if he had anything to say. Claimant testified that he read the Termination Report and informed MW[Redacted] he had "no idea what [MW[Redacted]] was talking about." Based upon the evidence presented, the ALJ infers from Claimant's testimony that he had no understanding of the basis for the allegations raised in the termination report.

13. Claimant testified that MW[Redacted] refused to provide the names of any of the complainants whose statements formed the basis of the termination report. He testified further that he was unaware that someone was complaining about him prior to the July 29, 2022 meeting. Finally, Claimant confirmed MW's[Redacted] testimony that no details regarding the allegations of inappropriate work place conduct were provided during the meeting since MW[Redacted] considered those details confidential. Indeed,

when Claimant asked MW[Redacted] what he had done to get fired, MW[Redacted] purportedly responded, “You tell me.”

14. Claimant reported that he was given an opportunity to provide a written statement in response to the allegations contained in the Termination Report; however, he testified that he did not know what to write because he did not know who had complained about him and because he had no understanding of the nature of his alleged wrongdoing. As Claimant testified, he had no idea what he had done at the time he was handed the termination report.[4]

15. Claimant testified that after returning to work in a modified capacity, he retained his supervisory capacity and had to access personnel files to complete performance evaluations for the employees under his direction. Claimant testified that between his return to work and the date of his termination, he had to gain permission to access personnel and during this period MW[Redacted] would monitor him as he accessed/reviewed the file. Claimant was never denied access to personnel files during this same period, i.e. from June 6, 2022 to July 28, 2022. Claimant adamantly denied ever using confidential information contained in the personnel files for any other purpose than to evaluate those employees under his supervision.

16. Claimant testified that he was never trained in the management/protection of information contained in the personnel files. He also testified that he never considered the potential ramifications of unauthorized/inappropriate access to a file because he never would and did not access personnel files for anything but legitimate business reasons.

17. Claimant testified that he has not received any unemployment compensation benefits since his termination. He also testified that he could not return to his regular position as a working foreman for Employer given his current lifting limitations and physical restrictions.

18. Claimant testified that since his termination, he has not derived any income from the sale of cars. Indeed, Claimant testified that he did not work in the auto sales business at any time while working for Employer. Rather, Claimant testified that on one occasion during his employment with Respondent-Employer he had a personal vehicle that had broken down car in front of his house, which he decided to sell. Based upon the evidence presented, the ALJ is not convinced that Claimant has been or currently is employed as a car salesman.

19. Concerning the contention that he is self-employed as the owner of a vending machine business, Claimant testified that he maintained a single vending

[4] Although Claimant did not know the identity of the person(s) alleging misconduct or the substance of those accusations at the time he was asked to provide a written statement, he testified that through the litigation process he subsequently learned the identity of the complainant, recognized her to be a worker under his supervision and learned the basis for her complaint. Again, none of the details surrounding the complaint are known as the complaining witness did not testify.

machine containing soda, chips and candy at Employer's premises until he was terminated. Claimant testified that upon his termination he was instructed to remove his vending machine from Employer's building. Claimant testified that the vending machine is in his garage and that he has not derived any income from this or any other vending machine since being terminated by Employer. Based upon the evidence presented, the ALJ is not convinced that Claimant is independently employed in a vending machine business.

20. Claimant testified that his wife owns a clothing store that he has volunteered his time at both before and after his termination from Respondent- Employer. The shop does not sell lingerie. According to Claimant, he agreed to volunteer in the shop after his termination to help "keep her business afloat." Claimant testified that after his termination from Employer, he has volunteered his time in the shop six days a week, Monday through Saturday, 11:00 a.m. to 7:30 p.m. daily. Prior to his termination, Claimant he would spend approximately 4 hours volunteering at the store arriving there after his shift for Respondent-Employer.

21. The clothing shop has not turned a profit since its establishment and Claimant does not take a salary nor is he paid by the shop for his work there. Indeed, Claimant has never been paid for his volunteer time while working in the shop. Claimant does not have an expectation of being paid and he has no agreement with the shop that he will be paid for his time in the future.

22. Claimant testified that he works alone when volunteering his time in the shop. Claimant's volunteer duties include keeping the store open, stocking items, moving mannequins, organizing the items for sale, selling the store's items, assisting customers with their shopping, and completing customer purchases. Previously, the shop had an employee who would be paid $150.00 for 10 hours of work involving the same tasks Claimant is now performing on a volunteer basis. Claimant testified that the shop has had no employees since his termination on July 29, 2022, suggesting that the shop could not afford to pay any employee's. Claimant agreed that if he did not volunteer at the shop, it would be necessary to hire an employee if they could afford it but if not, the shop would close. Accordingly, Claimant agreed that his volunteer work allows the shop to remain open and devote more money to paying the shop's bills, rent, utilities, so it can remain a viable business. Nonetheless, the shop has not been profitable and Claimant has not derived any income for the time he spends working there.

23. Claimant denied that he experienced increased back pain as a result of moving mannequins. He also denied lifting items in excess of his assigned restrictions, testifying that the October 17, 2022 physical therapy note in these regards was inaccurate because his physical therapist misunderstood his reports to her. Finally, Claimant denied experiencing increased back pain following a break-in to his wife's apparel shop which required a cleanup. While he acknowledged the break-in, Claimant testified that the cleanup simply required sweeping the floors of the shop. Based upon the evidence presented, the ALJ finds that Claimant has not suffered subsequent injuries since being released to modified duty.

CONCLUSIONS OF LAW

Based upon the foregoing findings of fact, the ALJ draws the following conclusions of law:

Generally

A. The purpose of the Workers' Compensation Act of Colorado (Act), Sections 8-40-101, C.R.S. 2007, *et seq*., is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. Section 8-40-102(1), C.R.S. The facts in a workers' compensation case must be interpreted neutrally, neither in favor of the rights of the claimant nor in favor of the rights of the respondents. Section 8-43-201, C.R.S.

B. In accordance with §8-43-215 C.R.S., this decision contains specific Findings of Fact, Conclusions of Law and an Order. In rendering this decision, the ALJ has made credibility determinations, drawn plausible inferences from the record, and resolved essential conflicts in the evidence. *See Davison v. Industrial Claim Appeals Office*, 84 P.3d 1023 (Colo. 2004). This decision does not specifically address every item contained in the record; instead, incredible or implausible testimony or unpersuasive arguable inferences have been implicitly rejected. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office*, 5 P.3d 385 (Colo.App. 2000).

C. In deciding whether a party has met the burden of proof, the ALJ is empowered "to resolve conflicts in the evidence, make credibility determinations, determine the weight to be accorded to expert testimony, and draw plausible inferences from the evidence." *See Bodensecki v. ICAO*, 183 P.3d 684 (Colo.App. *2008).* In short, the ALJ determines the credibility of the witnesses. *Arenas v. ICAO,* 8 P.3d 558 (Colo.App. 2000). The weight and credibility to be assigned evidence is a matter within the discretion of the ALJ. *Cordova v. ICAO*, 55 P.3d 186 (Colo.App. 2002). The fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions, the reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness, whether the testimony has been contradicted, and bias, prejudice, or interest. *See Prudential Insurance Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); CJI, Civil 3:16 (2007). In this case, the ALJ credits the testimony of Claimant and MW[Redacted] regarding the housing/storage of confidential employee information in a protected filing cabinet. While the ALJ is convinced that Claimant routinely accessed the personnel files of the employees he supervised, the evidence presented fails to persuade the ALJ that he accessed those files inappropriately or that he gathered the personal information of an employee under his supervision, which he later "misused" for his personal benefit. Accordingly, Respondents have not carried their burden to establish that Claimant performed a volitional act which he would reasonably expect to cause the loss of his employment. See *Patchek v. Dept. of Public Safety*, W.C. No. 4-432-201 (ICAO, Sept. 27, 2001).

Responsibility for Termination

A. Because Claimant's injury in this case was after July 1, 1999, C.R.S. §§ 8-42-103 (1) (g) and 8-42-105 (4) (a), collectively referred to as the "termination statutes", apply to assertions that Claimant is responsible for his wage loss. These provisions state, "In cases where it is determined that a temporarily disabled employee is responsible for termination of employment, the resulting wage loss shall not be attributable to the on-the-job injury." Under the termination statutes, a claimant who is responsible for the termination of modified or regular employment is not entitled to temporary disability benefits absent a worsening of condition, which reestablishes the causal connection between the injury and the wage loss. See *Anderson v. Longmont Toyota*, Colo. 102 P.3d 323 (Colo. 2004); see also *Colorado Springs Disposal d/b/a Bestway Disposal v. Industrial Claim Appeals Office*, 58 P.3d 1061 (Colo.App. 2002); *Grisbaum v. Industrial Claim Appeals Office*, 109 P.3d 1054 (Colo. App. 2005). As a result, the claimant loses the right to temporary benefits following the termination date. *Padilla v. Digital Equipment Corp.*, 902 P.2d 414, 416 (Colo.App. 1994).

B. Since the termination statutes provide a defense to an otherwise valid claim for temporary disability benefits, Respondents shoulder the burden of proving, by a preponderance of the evidence, that Claimant is responsible for his termination and subsequent wage loss. *Colorado Compensation Insurance Authority v. Industrial Claims Appeals Office,* 20 P.3d 1209 (Colo.App. 2000). Claimant's suggestion that Respondents' failure to follow its own progressive disciplinary policy precludes a determination of whether he was responsible for his termination is unpersuasive. See generally, *Keil v. Industrial Claim Appeals Office*, 847 P.2d 235 (Colo.App. 1993) (employer's failure to follow its established discipline procedures did not prohibit a determination that an employee was responsible for termination). To the contrary, as noted in *Keil*, the dispositive issue is whether the employee performed a volitional act or otherwise exercised a degree of control over the circumstances resulting in discharge. Moreover, Respondents do not have to prove Claimant knew or should have known that his conduct would result in his termination. *Gonzales v. Industrial Commission*, 740 P.2d. 999 (Colo. 1987). Rather, it is necessary only that Respondents establish that Claimant is "responsible" for his/her termination and subsequent wage loss through a volitional act or the exercise of some control over the circumstances surrounding the termination.

C. The concept of "responsibility" is similar to the concept of "fault" under the previous version of the statute. See, *PDM Molding, Inc. v. Stanberg*, 898 P.2d 542 (Colo. 1995). "Fault" requires a volitional act or the exercise of some control of the circumstances surrounding the termination. *Padilla v. Digital Equipment Corp.*, 902 P.2d 414 (Colo.App. 1994). "Fault" does not require "willful intent" on the part of the Claimant. *Richards v. Winter Park Recreational Association*, 919 P.2d 933 (Colo.App. 1996) (unemployment insurance); *Harrison v. Dunmire Property Management, Inc.,*
W.C. no. 4-676-410 (ICAO, April 9, 2008). In other words, an employee is "responsible" for their termination if the employee precipitated the employment termination through a volitional act that an employee would reasonably expect to result in the loss of employment. *Patchek v. Colorado Department of Public Safety, supra.* A volitional act does not mean moral or ethical culpability. It simply means that the claimant performed an act, which led to his/her termination. *Gleason v. Southland Corp*., W.C. No. 4-149-

631 (ICAO, June 13, 1994). Thus, as noted above, the fault determination depends upon whether a claimant performed some volitional act or otherwise exercised a degree of control over the circumstances resulting in termination. *See Padilla v. Digital Equipment Corp.*, 902 P.2d 414 (Colo.App. 1994), *opinion after remand*, 908 P.2d 1185 (Colo.App. 1995). In this case, Respondents assert that Claimant is responsible for his termination and subsequent wage loss after July 29, 2022 because he "inappropriately, without permission or business reason, and in violation of employer's policies and rules, wrongly accessed a coworkers confidential personnel file and obtained that employee's personal information . . .", namely that workers birthdate. According to Respondent- Employer, Claimant then used that information for his personal benefit. The ALJ is not persuaded.

D. The written "Termination Report" in this case provides that Claimant was terminated because "other employees made allegations that he engaged in inappropriate conduct in the work place" and because he misused confidential company information. In this case, the termination report does not identify any accusers or provide specific detail on the alleged inappropriate conduct Claimant supposedly instigated in the work place and no witness testified about these details. Moreover, the report does not provide detail on what confidential company information was allegedly accessed or how it was misused.

E. Although testimony was presented suggesting that Claimant accessed a file containing a subordinate coworker's birthdate, the ALJ finds this evidence to rest on the veracity and competency of other persons rather than MW[Redacted]. As found, MW[Redacted] probably had no direct knowledge regarding any breach of confidences based upon confidential information Claimant allegedly lifted from the complainant's personnel file. Rather, the evidence presented persuades the ALJ that the information forming the basis of Claimant's termination, including the suggestion that Claimant accessed the complainant's personnel file to obtain her birthday, came from employee statements which MW[Redacted] simply concluded were true and which, as noted above, were not supported by witness testimony or introduced into evidence. While there may be substantially more to the allegations leading to Claimant's dismissal, Respondents never produced a complaining witness to corroborate Claimant's alleged "inappropriate conduct" and MW[Redacted] did not testify about why the complaining witness statements led him to believe that personal information had been used inappropriately. Here, Respondents urge the ALJ to conclude that Claimant had to have obtained the complainant's birthdate from the personnel file simply because she complained and because he had regular access to the files. As presented, the evidence simply fails to establish that Claimant obtained the complainant's birthdate from her personnel file or that he used this information for an inappropriate reason. Consequently, the ALJ agrees with Claimant that it would indeed be a slippery slope to determine that Claimant performed a volitional act that he would reasonably expect to result in the loss of employment when the evidence presented regarding those alleged volitional acts was based upon the vague and unverified statements of coworkers who did not testify. Considering the entire evidentiary record, the ALJ concludes that Claimant probably did not exercise a degree of control over the circumstances

surrounding his termination by accessing and misusing confidential workplace information. Accordingly, Respondents have failed to establish that Claimant is responsible for the loss of his employment. While the evidence presented supports a conclusion that Claimant is not responsible for his termination and subsequent wage loss after July 29, 2022, Respondents assertion that Claimant is not entitled to TTD because he is working must also be addressed.

Claimant's Entitlement to Temporary Total Disability Benefits

F. To prove entitlement to temporary total disability (TTD) benefits, Claimant must prove that the industrial injury caused a disability lasting more than three work shifts, that he left work as a result of the disability, and that the disability resulted in an actual wage loss. *PDM Molding, Inc. v. Stanberg,* 898 P.2d 542 (Colo. 1995); *City of Colorado Springs v. Industrial Claim Appeals Office,* 954 P.2d 637 (Colo.App. 1997). A claimant must establish a causal connection between the industrial injury and the subsequent wage loss in order to be entitled to TTD benefits. Section 8-42-103, C.R.S.; *Liberty Heights at Northgate v. Industrial Claim Appeals Office,* 30 P. 3d 872 (Colo.App. 2001).

G. As stated in *PDM Molding*, the term "disability" refers to the claimant's physical inability to perform regular employment. *See also McKinley v. Bronco Billy's,* 903 P.2d 1239 (Colo.App. 1995). As noted above, Section 8-42-103(1) (a), C.R.S., requires Claimant to establish a causal connection between a work-related injury and a subsequent wage loss in order to obtain TTD benefits. *PDM Molding, Inc. v. Stanberg, supra*. The term disability connotes two elements: (1) Medical incapacity evidenced by loss or restriction of bodily function; and (2) Impairment of wage earning capacity as demonstrated by Claimant's inability to resume her prior work. *Culver v. Ace Electric*, 971 P.2d 641 (Colo. 1999). The impairment of the earning capacity element of disability may be evidenced by a complete inability to work, or by restrictions which impair the claimant's ability to effectively and properly perform his/her regular employment. *Ortiz v. Charles J. Murphy & Co.*, 964 P.2d 595 (Colo.App. 1998).

H. In this case, Respondents concede that Claimant was provided with work restrictions that impaired his ability to perform his regular employment. Indeed, Respondents noted that Claimant was working modified duty when his employment was terminated. Accordingly, Respondents stipulated that, if they failed to establish that Claimant was responsible for his termination he would be entitled to TTD commencing July 29, 2022 and ongoing, if not for the fact that he was self-employed and also working in a family business. Specifically Respondents contend that Claimant is employed selling cars, maintaining a vending machine business and working in a family owned apparel shop. The ALJ is not persuaded.

I. Although raised by Respondent's through the testimony of MW[Redacted], the evidence presented fails to support that Claimant is employed in vehicle sales or through an independent vending machine business. In fact, Respondents do not assert that Claimant is working in either capacity in their position statement. Rather, Respondents contend that Claimant is employed in the capacity as a "sales associate"

by his wife's apparel shop. Accordingly, Respondents contend that Claimant is not entitled to TTD.

J. Although Respondents recognize that Claimant is not remunerated for his time in the shop, they urge the ALJ find and conclude that Claimant is not entitled to TTD because the time he spends volunteering in his wife's apparel shop essentially constitutes a reinvestment of the wages that would normally be paid to an "employee" into the business which allows the shop to save money by devoting the payroll savings towards paying the shops bills, rent and utilities. Indeed, Respondents assert that the value of Claimant's volunteer time in the shop saves the business $765.00 in wages weekly, which is being reinvested into the organization to maintain its viability. Accordingly, Respondents contend that Claimant is actually employed by the shop. In support of their contention that Claimant is not entitled to TTD, Respondents argue that there is "no requirement that Claimant net any income from his employment and work" in the shop. Rather, Respondents note that Claimant is free to donate the value of his earnings to charity, refuse the money, give it away or as in this case, "reinvest it into his business." Based upon the evidence presented, the ALJ is not convinced that Claimant fits the definition of an employee working or under a contract for hire that would entitle him to any wages that he could refuse, donate or reinvest into his wife's business.

K. The Workers' Compensation Act (Act) defines "employee" in C.R.S. § 8-40-202(1)(b), as "[e]very person in the service of any person, association of persons, firm, or private corporation . . . under any contract of hire, express or implied . . . but not including any persons who are expressly excluded from [the Act]...." For purposes of Colorado's Workers' Compensation Act, an employer-employee relationship is established when the parties enter into a contract of hire. *Younger v. City and County of Denver*, 810 P.2d 647, 652-653 (Colo. 1991). In *Denver Truck Exchange v. Perryman*, 134 Colo. 586, 593, 307 P.2d 805, 810 (1957), the Colorado Supreme Court stated that "[a] contract of hire is subject to the same rules as other contracts even though workmen's compensation laws are liberally construed in our state." Further, the Court held that "[a] contract is an agreement which creates an obligation. Its essentials are competent parties, subject matter, a legal consideration, mutuality of agreement, and mutuality of obligation." *Id.* 134 Colo. at 592, 307 P.2d at 810 (quoting 17 C.J.S. 310, § 1a). However, the Court has also determined that "[a] contract of hire may be formed even though not every formality attending commercial contractual arrangements is observed as long as the fundamental elements of contract formation are present." *Aspen Highlands Skiing Corp. v. Apostolou*, 866 P.2d 1384, 1387 (Colo. 1994); see also *Rocky Mountain Dairy Products v. Pease*, 161 Colo. 216, 220, 422 P.2d 630, 632 (1966).

L. In this case, Respondents contend that Claimant is "obligated" and "must" continue his work in the shop 8.5 hours per day, six days per week "for if he does not, the business will close and the investments in the business by he and his wife will be lost." Consequently, Respondents argue that there is, and has been since Claimant was terminated on July 29, 2022, an employee/employer relationship between himself and his wife's business. According to Respondents, merely because Claimant "[puts]

the earnings and income realized by this time, energies, efforts and hours back into the business' accounts, [rather] than his personal [bank] account or pocket" does not mean he is not an employee of the shop.

M. Based upon the evidence presented, the ALJ finds/concludes that Claimant is volunteering in his wife's business because the work he is performing for the shop is within his physical restrictions and he wants/needs something to do since being terminated because he has been unable to find other modified duty work. The ALJ is not convinced that the evidence presented supports a conclusion that Claimant is "controlled" by his wife's business and he "must" work there. Indeed, while Claimant spends a significant amount of time in the shop, the evidence presented supports a finding/conclusion that he does so by choice. Nothing about the evidence presented persuades the ALJ that Claimant could not simply walk away from the shop and chalk up any losses incurred by closure of the business as a bad investment. Simply put, the evidence presented fails to persuade the ALJ that Claimant is "duty-bound" to spend his time in the shop. Rather, the evidence presented supports a reasonable inference that Claimant spends time there because he has not been able to secure other work within his restrictions. Because Claimant has received no pay for his work in the shop, either before or after his industrial injury and subsequent termination and because he has no reasonable expectation of compensation in the future, the ALJ concludes that Claimant is acting as a volunteer for his wife's shop. Claimant's volunteer work for his wife's business does not satisfy the basic definition of him acting as an "employee" "in the service of" the employer under a contract of hire. Indeed, the ALJ is convinced that there is no mutuality of obligations between the shop and Claimant. Rather, if a party performs services without the expectation of remuneration, as is the case here, the person is a "volunteer," and not an employee within the meaning of the Workers' Compensation Act. See *Hall v. State Compensation Insurance Fund*, 154 Colo. 47, 387 P.2d 899 (1963). Because there was no contract between Claimant and the shop that created an employer/employee relationship, the ALJ concludes that Claimant could not demand compensation as an employee that he could refuse to take, donate or reinvest into the business.

N. As noted above, to receive temporary disability benefits, Claimant must prove that his injury caused a disability, that he left work as a result of the injury and that his temporary disability is total and lasts more than three regular working days. Sections 8-42-103(1) (a) and (b), 8-42-105(1), C.R.S. 2020; *Anderson v. Longmont Toyota, Inc.*, 102 P.3d 323 (Colo. 2004); *PDM Molding, Inc. v. Stanberg,* 898 P.2d 542 (Colo. 1995). Because Respondents have stipulated that Claimant is disabled within the meaning of C.R.S. § 8-42-105, as evidenced by restriction of bodily function and the offer of modified duty to accommodate his restrictions, the analysis concerning Claimant's entitlement to TTD shifts to the question of whether Claimant suffered an actual wage loss.[5] In this case, the evidence presented supports a conclusion that Claimant has

[5] Even if Respondents had not stipulated that Claimant is disabled, Claimant's testimony combined with the content of his medical records persuades the ALJ that his low back injury and hernia has resulted in medical incapacity as evidenced by a loss/restriction in bodily function, which restriction has reduced his wage earning capacity as demonstrated by his inability to return to full duty employment based on the

suffered a wage loss as a direct result of his disabling low back/hernia injuries. Indeed, Claimant credibly testified that he is incapable of returning to his regular position for Employer and has been unable to secure other modified work within his restrictions for which he has derived pay since his employment was terminated. Accordingly, the ALJ concludes that Claimant has established that he has suffered an actual wage loss directly related to his industrial injury. Because Claimant's industrial injury caused a disability and he has suffered an actual wage loss as a result of his work injuries, he is entitled to TTD. C.R.S. §§ 8-42-103(1) (a) and (b); 8-42-1051); *Culver v. Ace Electric*, 971 P.2d 641 (Colo. 1999); *Hendricks v. Keebler Company*, W.C. No. 4-373-392 (ICAO, June 11, 1999).

O. Once the claimant has established a disability and a resulting wage loss, the entitlement to temporary disability benefits continues until terminated in accordance with C.R.S. § 8-42-105(3)(a)-(d). Because none of the factors permitting TTD to be terminated under C.R.S. § 8-42-105(3) (a)-(d) have not been met, the ALJ is persuaded that Claimant is entitled to TTD benefits commencing July 29, 2022 and ongoing.

ORDER

It is therefore ordered that:

1. Respondents have failed to establish, by a preponderance of the evidence, that Claimant is responsible for the termination of his employment and subsequent wage loss.

2. Respondent shall pay Claimant TTD benefits commencing July 29, 2022 and ongoing, at the appropriate TTD rate associated with Claimant's average weekly wage (AWW). The parties shall determine Claimant's AWW and the amount of the offsets to which Respondents are entitled. If the parties are unable to reach an agreement regarding the amount of the AWW or offset, either may apply for a hearing to determine the same.

3. Insurer shall pay interest to Claimant at the rate of 8% per annum on all amounts of compensation not paid when due.

4. All matters not determined herein are reserved for future determination

---

imposition work-related restrictions. Consequently, the ALJ would have concluded that Claimant is "disabled" within the meaning of C.R.S. § 8-42-105.

Dated: February 8, 2023

Richard M. Lamphere
Administrative Law Judge
Office of Administrative Courts
2864 S. Circle Drive, Suite 810
Colorado Springs, CO 80906

NOTE: If you are dissatisfied with the ALJ's order, you may file a Petition to Review the order with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the ALJ; and (2) That you mailed it to the above address for the **Denver Office of Administrative Courts**. You may file your Petition to Review electronically by emailing the Petition to Review to the following email address: oac-ptr@state.co.us. If the Petition to Review is emailed to the aforementioned email address, the Petition to Review is deemed filed in Denver pursuant to OACRP 26(A) and Section 8-43-301, C.R.S. If the Petition to Review is filed by email to the proper email address, it does not need to be mailed to the Denver Office of Administrative Courts. For statutory reference, see Section 8-43- 301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. WC 5-146-595-001

ISSUES

I. Whether Respondents produced clear and convincing evidence to overcome the Division Independent Medical Examination (DIME) opinion of Dr. Anjmun Sharma regarding permanent medical impairment.

II. Whether Claimant established, by a preponderance of the evidence, that he is entitled to maintenance care to cure and alleviate the ongoing effects of his August 26, 2020 admitted industrial injury.

III. Whether Claimant established, by a preponderance of the evidence, that he is entitled to a disfigurement award and if so, the amount of said disfigurement benefit.

FINDINGS OF FACT

Based on the evidence presented at hearing, the ALJ enters the following findings of fact:

1. Claimant suffered serious injuries in the course and scope of his employment on August 26, 2020, when the blade on a demolition saw he was using to cut down a flagpole bound between two metal layers on the pole causing the saw to kick back violently. Claimant lost his grip on the tool which subsequently came into direct contact with the left side of his chest. The saw traveled across Claimant's chest carving a path through the skin, muscle and bone of the left ribs and sternum while severely lacerating the lower portion of Claimant's left lung.

2. Fortuitously for Claimant, the jobsite was located on the grounds of a local hospital and he was close to the emergency room at the time of the accident. Claimant was able to ambulate to the emergency department room entrance where the severity of Claimant's injuries were assessed. Claimant was immediately transported to the operating room for hemorrhage control and further injury assessment. Following successful ligation of a completely severed mammary artery, Claimant underwent a thoracotomy with placement of two chest tubes to treat a left sided pneumothorax. Claimant was then airlifted to Parkview Medical Center in Pueblo, Colorado for hospitalization and additional treatment. (See generally, Resp. Exs. G, H and I).

3. After surgical repair and initial recovery from his chest wound, it was discovered that Claimant had also sustained an injury to his left shoulder during the August 26, 2020 accident. Claimant ultimately underwent additional surgery to repair a labral and subscapularis tear in the left shoulder.

4. Following extensive post-surgical care with his authorized treating provider (ATP), Dr. Thomas Centi, Claimant was placed at maximum medical improvement (MMI) on November 2, 2021. (Resp. Ex. A, p. 9). Dr. Centi assigned Claimant an 11% upper extremity impairment rating for reduced range of motion in the left shoulder. *Id.* at pp. 10-11.

5. Respondents filed a Final Admission of Liability (FAL) admitting to Dr. Centi's impairment rating on December 17, 2021. (Resp. Ex. A). Claimant objected to the FAL and requested a Division Independent Medical Examination (DIME). Dr. Anjmun Sharma was selected as the DIME physician.

6. Dr. Sharma completed the DIME on May 2, 2022. (Resp. Ex. E). Following his medical records review and physical examination, Dr. Sharma, assigned a 17% scheduled left upper extremity impairment rating and a 10% whole person impairment for a skin disorder pursuant to Chapter 13, Section 13.4, Table 1 at p. 232 of the AMA *Guides to the Evaluation of Permanent Impairment*, Third Edition (*Revised*) (hereinafter the Guides) (Resp. Ex. E, p. 23, 47).

7. Dr. Sharma assigned the aforementioned 10% whole person impairment for the residual scarring on Claimant's left upper torso and chest caused by the laceration from the saw blade. In allocating impairment for Claimant's scarring, Dr. Sharma noted:

> The patient does meet the criteria for skin disorders. Referencing page 231 (sic) of the AMA Guide, impairment classification for skin disease, the patient meets the criteria under Class II, 10 to 20% of the whole person. The patient belongs in Class II when signs and symptoms of skin disorder are present and intermittent treatment is required which I commented on in Section E of this report of the patient's subjective complaints of using a special cream and there are some limitation in the performance of some activities of daily living, which the patient has reported an (sic) which is commensurate with his current for (sic) functional activity status.[1]

(Resp. Ex. E, p. 47).

8. Dr. Sharma did not recommend maintenance medical treatment. (Resp. Ex. E, p. 47).

9. Dr. Carlos Cebrian performed an independent medical examination (IME) of Claimant at the request of Respondents on August 10, 2022. Dr. Cebrian also

[1] As referenced Section E of Dr. Sharma's DIME report notes that Claimant did not have "full range of motion" and reported "some pain" and "functional limitation in the performance of certain physical activities of daily living" associated with his scar. Claimant also reported that he is to "use a certain type of cream for soothing his symptoms", i.e. the pain related to his scar.

testified via pre-hearing deposition on October 21, 2022. Dr. Cebrian was admitted as an expert in occupational medicine. (Depo. of Dr. Cebrian, 6:19-21).

10. In his written IME report and throughout his deposition testimony, Dr. Cebrian opines that Dr. Sharma erred by assigning impairment for a Class 2 condition of the skin, i.e. for the scarring on Claimant's chest caused by the laceration from the saw blade on August 26, 2020 (See generally, Resp. Ex. F; Depo. of Dr. Cebrian, 15:6- 8).

11. During his deposition, Dr. Cebrian acknowledged that section 13.4 of the Guides, provides that if there is "any loss of function due to sensory deficit, pain or discomfort in the scar area, the scar should be evaluated according to criteria in Chapter 4 of the Guides. (Depo. of Dr. Cebrian, 16:20-25). Dr. Cebrian also noted that loss of function due to a scar, including loss of function due to limited motion in the scar area should be evaluated according to the criteria in chapter 3 or if in the chest, Chapter 5 of the Guides. (Depo. of Dr. Cebrian, 17:1-5). Because Claimant's scar was painful and having an effect on his range of motion which was limiting his functional abilities, Dr. Cebrian opined that any impairment associated with Claimant's scar would be rated in accordance with the principles in Chapter 3 of the Guides, which Dr. Cebrian noted is the chapter concerning extremities, involving the shoulder, elbow and wrist. *Id*. at ll. 6- 10.

12. Dr. Cebrian testified that Claimant did not meet the Guides to receive an impairment rating for his chest scar because even if the scar was causing some limitation in Claimant's ability to carry out his activities of daily living, there was no way to separate the range of motion loss due to Claimant's left shoulder injury from the range of motion loss attributable to Claimant's chest scar. (Depo. of Dr. Cebrian, 19:7- 15). Based upon the type of shoulder injury Claimant sustained and the surgery directed to that shoulder, Dr. Cebrian testified that the range of motion deficits Claimant was experiencing in the arm and chest wall were "exclusively" related to the shoulder injury. Alternatively, Dr. Cebrian opined that if there was range of motion loss due to the scar, it was "such a minimal component" that any range of motion loss from the scar would be accounted for in the range of motion loss attributable to the left shoulder. (Depo. of Dr. Cebrian, 19:16-22). Accordingly, Dr. Cebrian testified that to assign a separate rating for Claimant's scar would be duplicative. *Id*. at ll. 23-24.

13. In support of his opinions, Dr. Cebrian reasoned that although Claimant had some discomfort and thickness in his scar, the scar was not causing any abnormalities in his range of motion or difficulties with pushing, pulling, lifting, or engaging in overhead activity. Instead, Dr. Cebrian concluded that those issues were attributable to Claimant's left shoulder injury, and not from the chest scar itself. According to Dr. Cebrian, there must be a functional loss specific to the scar itself and not from another injured body part to receive a rating under Chapter 13 of the Guides. Indeed, Dr. Cebrian noted: "And related to [Claimant] there is nothing specifically that can be pinpointed to the scar in isolation that you would assign an impairment rating for that scar itself . . ." (Resp. Ex. F, p. 88, Depo. of Dr. Cebrian, 18:7-24).

14. Dr. Cebrian stated that “the scar itself wasn’t restrictive to the point that it was the scar that was preventing range of motion in [Claimant’s] shoulder”. (Depo. of Dr. Cebrian, 22:22-24). Instead, it was Claimant’s shoulder limitations that were restricting his range of motion. Specifically, Dr. Cebrian noted, Claimant’s “scar, the location of the scar wasn’t something that was causing [Claimant] to not be able to move his shoulder to the full extent. It was the shoulder joint itself”. (Depo. of Dr. Cebrian, 23:1-3).

15. During cross-examination, Dr. Cebrian admitted that there “may be residual effects” from Claimant’s scar, “but not to the point that it qualifies for a separate permanent impairment”. (Depo. of Dr. Cebrian, 31:22-24).

16. Dr. Sharma testified by deposition of November 4, 2022 as a Level II accredited physician with a board certification in family practice. (Depo. of Dr. Sharma, 6:7-13). Dr. Sharma testified that he did assign a Class 2 rating for Claimant’s scar because Claimant reported “using medication, anti-inflammatories for pain, sometimes over-the-counter gel, like Voltaren” and because “there’s limitations of performance of some activities of daily living”, such as “[p]utting on [his] shirt, taking off [his] shirt, perhaps brushing his hair, combing his hair, maybe even cleaning himself or cleaning parts of his body on his chest, maybe it’s hurting, also when he is cleaning his chest in the shower. (Depo. of Dr. Sharma, 13:4-14). Dr. Sharma made clear that Claimant’s functional limitations were caused by both the shoulder injury and the scar and he rated both based upon his review of the medical records, his physical examination and asking Claimant “questions with regard to his scar and activities of daily living”. (Depo. of Dr. Sharma, 14:12-25, 15:1-6).

17. Concerning Claimant’s need for ongoing medical treatment, Dr. Sharma testified that Claimant will need ongoing anti-inflammatories and over-the-counter preparations such as Voltaren gel to manage his pain which will “[mitigate] his symptoms of pain” and allow him to be as “functional as possible”. (Depo. of Dr. Sharma, 16:2-25; 17:1-3).

18. Dr. Sharma testified that his assignment of impairment related to Claimant’s chest scar was based on pain and loss of function not range of motion loss. (Depo. Dr. Sharma, 20:3-18).

19. Claimant testified that he has limited mobility of his left shoulder and chest wall describing a rough scar that felt wadded up. He reported persistent pain, aching and numbness in the left pectoralis muscle and chest wall. He admitted he did not need to go back to a doctor for the scar, that he had no scheduled appointments for treatment of scar, and that he was using oils and cream that were recommended, rather than prescribed.

20. The evidence presented supports a finding that none of Claimant’s authorized treating physicians have recommended that he undergo maintenance care.

Dr. Cebrian also concluded that no medical maintenance care was reasonable, necessary, or related to Claimant's August 26, 2020 injury. (Resp. Ex. F, p. 87). Dr. Cebrian reasoned that Claimant's lack of work restrictions indicated Claimant was "doing well, was stable, and there really wasn't any medical treatment that was going to make any difference with any of [Claimant's] ongoing complaints that he had". (Depo. of Dr. Cebrian, 13: 24-25, 14:1-3).

21. As noted above, Dr. Sharma did not indicate that Claimant required maintenance care in his DIME report. Nonetheless, the ALJ credits Claimant's testimony regarding his ongoing symptoms and the subsequent testimony of Dr. Sharma to find that Claimant probably requires ongoing over-the-counter analgesics, including topic analgesics, to manage the persistent pain associated with his chest injury and resultant scar. Without such analgesics, the ALJ is convinced that Claimant's condition will probably deteriorate further resulting in worsening pain and greater functional decline. Accordingly, the ALJ concludes that Claimant has proven, by a preponderance of the evidence, that he is entitled to a general order for ongoing maintenance treatment. The contrary opinions of Dr. Cebrian are unpersuasive.

22. Visual inspection of the left side of Claimant's body, including his left shoulder, left chest and left torso reveals the following scarring:

- A total of three (3) arthroscopic surgical scars located about the left shoulder. These scars are all thin in width and vary in length between ⅜ to ½ inch long. They also vary in color from being lighter than the surrounding skin to a light pink. While the scars on the front and outside of the shoulder appear to be of the same contour as the surrounding skin, the scar located on the upper back aspect of the left shoulder is slightly depressed.

- In addition to the left shoulder scarring, there is a large, variously pigmented, rough appearing and thickened scar which begins in the center of the chest wall in the area of the mid sternum and runs diagonally down the chest for approximately 14 inches terminating below the left pectoralis muscle on the lower aspect of the left ribs. This scar varies in width with some portions appearing up to ½-inch wide. Multiple pairs of lightly pigmented and slightly raised suture scars appear adjacent to and run along the length of this scar. There is a secondary surgical scar from Claimant's thoracotomy located below the left nipple. This scar extends from the left side of the chest wall over the pectoralis muscle for approximately 10 inches before it intersects with the aforementioned 14-inch scar described above. This surgical scar varies in width from ⅜ to ½ an inch, is red in color and raised when compared to the surrounding skin.

- Below the 10-inch scar on the left side of the torso are two additional scars the first appearing approximately 1 inch long by ⅜ inch wide. This scar is red in color and raised when compared to the color and contour of the surrounding skin. The second scar is approximately 3 inches long and

½ inch wide. This scar is pink in color and raised when compared to the surrounding skin.

CONCLUSIONS OF LAW

Based upon the foregoing findings of fact, the ALJ draws the following conclusions of law:

Generally

A. The purpose of the "Workers' Compensation Act of Colorado" (Act) is to Assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of any litigation. §8-40-102(1), C.R.S. A Claimant in a Workers' Compensation claim has the burden of proving entitlement to benefits by a preponderance of the evidence. §8-42-101, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979); *People v. M.A.*, 104 P.3d 273, 275 (Colo.App. 2004). The facts in a Workers' Compensation case are not interpreted liberally in favor of either the rights of the injured worker or the rights of the employer. §8-43-201, C.R.S. A Workers' Compensation case is decided on its merits. §8-43-201, C.R.S.

B. In accordance with Section 8-43-215, C.R.S., this decision contains Specific Findings of Fact, Conclusions of Law, and an Order. In rendering this decision the ALJ has made credibility determinations, drawn plausible inferences from the record, and resolved essential conflicts in the evidence. See *Davison v. Industrial Claim Appeals Office*, 84 P.3d 1023 (Colo. 2004). This decision does not specifically address every item contained in the record; instead, incredible or implausible testimony or unpersuasive arguable inferences have been implicitly rejected. *Magnetic Engineering, Inc. v. Industrial Clam Appeals Office*, 5 P.3d 385 (Colo.App. 2000).

C. In determining credibility, the ALJ should consider the witness' manner and demeanor on the stand, means of knowledge, strength of memory, opportunity for observation, consistency or inconsistency of testimony and actions, reasonableness or unreasonableness of testimony and actions, the probability or improbability of testimony and actions, the motives of the witness, whether the testimony has been contradicted by other witnesses or evidence, and any bias, prejudice or interest in the outcome of the case. *Colorado Jury Instructions, Civil*, 3:16. The ALJ, as fact-finder, is charged with resolving conflicts in expert testimony. *Rockwell Int'l v. Turnbull,* 802 P.2d 1182, 1183 (Colo.App. 1990). The weight and credibility to be assigned expert testimony is a matter within the discretion of the ALJ. *Cordova v. Industrial Claim Appeals Office,* 55 P.3d 186 (Colo.App. 2002). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colorado Springs Motors, Ltd. v. Industrial Commission,* 441 P.2d 21 (Colo. 1968); *see also Dow Chemical Co. v. Industrial Claim Appeals Office,* 843 P.2d 122 (Colo.App. 1992) (ALJ may credit one medical opinion to the exclusion of a contrary medical opinion).

Overcoming Dr. Sharma's Impairment Rating Opinion

D. A DIME physician's findings regarding causation and whole person impairment are binding on the parties unless overcome by "clear and convincing evidence". *Section 8-42-107(8) (b) (III), C.R.S.*; *Qual-Med v. Industrial Claim Appears Office*, 961 P.2d 590 (Colo.App. 1998). "Clear and convincing evidence" is evidence that demonstrates that it is "highly probable" the DIME physician's rating is incorrect. *Qual-Med, Inc. v. Industrial Claim Appeals Office*, *supra*. In other words, to overcome a DIME physician's opinion concerning the cause of a particular component of a claimant's overall medical impairment or the degree of whole person impairment, "there must be evidence establishing that the DIME physician's determination is incorrect and this evidence must be "unmistakable and free from serious or substantial doubt". *Adams v. Sealy, Inc*., W.C. No. 4-476-254 (ICAP, Oct. 4, 2001). The enhanced burden of proof reflects an underlying assumption that the physician selected by an independent and unbiased tribunal will provide a more reliable medical opinion. *Qual- Med v. Industrial Claim Appears Office, supra.*

E. The ALJ may consider a variety of factors in determining whether a DIME physician erred in his opinions, including whether the DIME appropriately utilized the AMA Guides in his opinions. *Section 8-43-301(8), C.R.S.*; *Wackenhut Corp. v. Indus. Claim Appeals Office*, 17 P.3d 2002 (Colo.App. 2000); *Aldabbas v. Ultramar Diamond Shamrock*, W.C. No. 4-574-397 (ICAO August 18, 2004). In this case, Dr. Sharma testified that he assigned a separate impairment rating for Claimant's chest scar on the basis that it was causing him pain which in turn restricted his ability to "fully and unreservedly" perform such activities of daily living as donning/doffing his shirt, brushing/combing his hair and cleaning parts of his body, including his chest because "it's hurting". (Depo. of Dr. Sharma, pp. 13-16, ll. 1-9). Respondents' challenge to the impairment rating opinion of Dr. Sharma centers on Dr. Cebrian's opinion that no specific functional deficits can be "pinpointed" to the scar in isolation that you would assign an impairment rating based upon a limitation of Claimant's activities of daily living. (Depo. of Dr. Cebrian, 18:7-15). While admitting that the scar may cause some discomfort and may be thickened creating some residual limitations (effects) in some areas, Dr. Cebrian testified that these factors were not what is causing Claimant's limitation with functional activities. *Id.* at ll. 16-19. Rather, Dr. Cebrian testified that Claimant's left shoulder injury is what is causing his limitations with pushing, pulling, lifting and reaching/lifting overhead because the shoulder injury is responsible range of motion loss and thus, Claimant's functional limitations. *Id*. at ll. 19-24. (See also, Resp. Ex. F, pp. 88-89). Because there is "no way to separate out what's coming from the shoulder (injury) and what's coming from the scar" when assessing the impairing components of the injuries in this case, Dr. Cebrian testified that Dr. Sharma erred when he assigned a separate impairment for the scar. (Depo. of Dr. Cebrian, 19:7-24). Indeed, Dr. Cebrian testified that given the type of shoulder injury Claimant sustained, along with the documented range of motion deficits in the left shoulder post-surgery, any "minimal component" of range of motion loss attributable to the scar would be completely subsumed in the range of motion impairment related to the left shoulder. Accordingly, Dr. Cebrian opined that assigning impairment for functional deficits based

upon range of motion loss caused by the scar, even if caused by pain and some residual effects, essentially amounted to impermissible impairment double dipping. (Depo. of Dr. Cebrian, 19:23-24; See also, Resp. Ex. F, p. 89).

F. Pursuant to the *AMA Guides, Section 1.2,* Structure and Use of the *Guides*, "[i]n practice, the first key to effective and reliable evaluation of impairment is a review of office and hospital records maintained by the physicians who have provided care since the onset of the medical condition". This same section of the *AMA Guides* continues by noting, "This information gathering and analysis serves as the foundation upon which the evaluation of a permanent impairment is carried out. It is most important that the evaluator obtain enough clinical information to characterize the medical condition fully in accordance with the requirements of the guides". *In Re Goffinett,* W.C. No. 4-677-750 (Industrial Claims Appeals Panel, Apr. 16, 2008). Based upon the evidence presented, including Dr. Sharma's DIME report, the ALJ is convinced that Dr. Sharma adhered to the principals of the Guides by conducting a thorough review the medical records to gather information to accurately and fully describe Claimant's medical condition. Indeed, Dr. Sharma testified that he rated both Claimant's shoulder and skin disorder, i.e. his scar based upon his review of the medical records, his physical examination and asking Claimant "questions with regard to his scar and activities of daily living". (Depo. of Dr. Sharma, 14:12-25, 15:1-6).

G. The Guides also provide a method for determining the impairing effect of scars following bodily injury. Indeed, Section 13.4 provides "If a scar involves a loss of sweat gland function, hair growth, nail growth or pigment formation, the effect of such loss on performance of the activities of daily living should be evaluated. Furthermore, any loss of function due to sensory deficit pain or discomfort in the scar area should be evaluated according to the criteria in Chapter 4. Loss of function due to limited motion in the scar area should be evaluated according to criteria in Chapter 3 or if the chest wall excursion is limited in Chapter 5". The ALJ agrees with Dr. Cebrian that the guidance for rating scars in Section 13.4 should be interpreted to indicate that if a scar is having an effect on range of motion, then the impairing nature of the scar should be rated pursuant to Chapter 3, which is an extremity chapter containing the extremities, including the shoulder.

H. Based upon the evidence presented, the ALJ is persuaded that Dr. Sharma followed the principles set out in Section 13.4 of the Guides. Furthermore, the ALJ is convinced that Dr. Sharma properly considered and appropriately used Table 1-Impairment Classification for Skin Disease when calculating Claimant's impairment rating. The difference between Dr. Sharma and Dr. Cebrian regarding impairment is not based on whether Dr. Sharma appropriately utilized the principles set out in the AMA Guides, but rather on Dr. Cebrian's belief/opinion that any functional deficits caused by range or motion loss owing to Claimant's chest scar, were already accounted for in the range of motion loss attributable to Claimant's shoulder injury.

I. While it is clear that Dr. Cebrian believes that Dr. Sharma has erred because there is nothing that specifically indicated that the scar was affecting

Claimant's functional activities and because Claimant's left shoulder range of motion was limited to the extent that there would be no effect from the scar on Claimant's range of motion and activities of daily living, the ALJ has considered all of the DIME physician's written and oral testimony[2] to find and conclude that Dr. Sharma did not believe that all the deficits in Claimant's functionality were due to the range of motion loss caused by Claimant's left shoulder injury and he cited specific examples of those activities he believed were impaired secondary to Claimant's extensive chest scar. Moreover, Dr. Sharma addressed Claimant's use of topical agents to treat the ongoing pain and sensitivity caused by the scar, which forms the basis for his ongoing functional limitations. As a result, the ALJ is not persuaded that Dr. Sharma erred in assigning a Class 2 permanent impairment based on Table 1 for Claimant's extensive chest scar. Indeed, after considering the totality of the evidence presented, including the DIME report of Dr. Sharma, the report of Dr. Cebrian along with the balance of the medical record, the ALJ concludes that Respondents have failed to produce unmistakable evidence establishing that Dr. Sharma's determination that Claimant is entitled to a separate impairment for his chest scar is highly probably incorrect. Rather, the ALJ concludes that the evidence presented establishes a mere difference of opinion between Dr. Sharma, as the DIME physician and Dr. Cebrian regarding the impairing components of Claimant's extensive injuries. A difference of opinion does not rise to the level of clear and convincing evidence that is required to overcome Dr. Sharma's opinions concerning impairment. *See generally, Gonzales v. Browning Farris Indust. of Colorado, W.C. No. 4-350-356 (ICAO March 22, 2000),* Consequently, Respondents request to set aside the impairment rating opinion of Dr. Sharma must be denied and dismissed.

Claimant's Entitlement to Maintenance Medical Treatment

J. The need for medical treatment may extend beyond the point of maximum medical improvement (MMI) where a claimant requires periodic maintenance care to relieve the effects of the work related injury or prevent further deterioration of his/her condition. *Grover v. Indus. Comm'n*, 759 P.2d 705 (Colo. 1988). In *Milco Construction v. Cowan,* 860 P.2d 539 (Colo.App. 1992), the Court of Appeals established a two-step procedure for awarding ongoing medical benefits under *Grover v. Industrial Commission, supra*. The Court stated that an ALJ must first determine whether there is substantial evidence in the record to show the reasonable necessity for future medical treatment "designed to relieve the effects of the injury or to prevent deterioration of the claimant's present condition". If the claimant reaches this threshold, the Court stated that the ALJ should then enter "a general order, similar to that described in *Grover*".

K. While a claimant does not have to prove the need for a specific medical benefit, and respondents remain free to contest the reasonable necessity of any future treatment; the claimant must prove the probable need for some treatment after MMI due to the work injury. *Milco Construction v. Cowan*, *supra.* Indeed, a claimant is only

[2] When rendering his order, the ALJ should consider all of the DIME physician's written and oral testimony. See *Lambert and Sons, Inc. v. Industrial Claim Appeals Office,* 984 P.2d 656, 659 (Colo.App. 1998).

entitled to such future benefits as long as the industrial injury is the proximate cause of his/her need for medical treatment. *Merriman v. Indus. Comm'n*, 210 P.2d 448 (Colo. 1949); *Standard Metals Corp. v. Ball*, 172 Colo. 510, 474 P.2d 622 (1970); C.R.S. § 8-41-301(1) (c). Ongoing benefits may be denied if the current and ongoing need for medical treatment or disability is not proximately caused by an injury arising out of and in the course of employment. *Snyder v. Industrial Claim Appeals Office,* 942 P.2d 1337 (Colo.App. 1997). In other words, the mere occurrence of a compensable injury does not require an ALJ to find that all subsequent medical treatment was caused by the industrial injury. To the contrary, the range of compensable consequences of an industrial injury is limited to those, which flow proximately and naturally from the injury. *Standard Metals Corp. v. Ball*, *supra*.

L. The question of whether the claimant met the burden of proof to establish his/her entitlement to ongoing medical benefits is one of fact for determination by the ALJ. *Holly Nursing Care Center v. Industrial* Claim Appeals Office, 992 P.2d 701 (Colo. App. 1999); *Renzelman v. Falcon School District,* W. C. No. 4-508-925 (August 4, 2003). In this case, Dr. Sharma indicated in his DIME report that Claimant did not require maintenance medical care. Nonetheless, he testified that Claimant was managing the pain associated with his chest scar with over-the-counter medications and other preparations, including Tylenol, Ibuprofen and Voltaren gel, which he needed to "mitigate" his pain symptoms to "allow him to be as functional as possible". (Depo. of Dr. Sharma, 16:2-9; 17:1-3 and 21:6-15). The ALJ credits Claimant's testimony and the opinions of Dr. Sharma to finds/conclude that Claimant's present condition will likely deteriorate and he will, more probably than not, experience functional decline without the continued use of the aforementioned over-the-counter analgesics, including Voltaren gel or an equivalent preparation. Accordingly, the ALJ concludes that Claimant has proven, by a preponderance of the evidence, that he is entitled to a general award of maintenance medical care. In concluding that Claimant has established his entitlement to maintenance medical benefits, the ALJ specifically rejects Dr. Cebrian's opinion that there "really [isn't] any medical treatment that [is] going to make any difference with any of [Claimant's] ongoing complaints . . . " Nonetheless, even with a general award of maintenance medical benefits, Respondents retain the right to dispute whether the need for future medical treatment is related to Claimant's compensable injury or whether that treatment is reasonable and necessary. *See Hanna v. Print Expediters Inc.,* 77 P.3d 863 (Colo.App. 2003) (a general award of future medical benefits is subject to the employer's right to contest compensability, reasonableness, or necessity).

Claimant Entitlement to Disfigurement Benefits

M. In *Arkin v. Industrial Commission*, 145 Colo. 463, 358 P.2d 879 (1961), the Court held that the term "disfigurement", as used in the statute, contemplates that there be an "observable impairment of the natural appearance of [the] person". In this case, the ALJ finds and concludes that as a result of his August 26, 2020 work injury; Claimant has visible disfigurement to the body consisting of significant scarring as described in Finding of Fact, ¶ 22 above.

N. Respondents suggestion that Claimant would not be entitled to disfigurement if he received an impairment rating for the substantial scarring is unpersuasive. In concluding that Claimant is entitled to both an impairment rating for his chest scar and a disfigurement award for his disfiguring scarring, the ALJ finds the case of *Gonzales v. Advanced Component Systems*, 949 P.2d 569 (Colo. 1997) instructive. In *Gonzales*, the Court held that the impairment rating statute did not "preclude other recovery" available to the claimant under the disfigurement statute enumerated at C.R.S. § 8-42-108 for a functionally impairing and disfiguring facial scar. Analogous to the situation presented in *Gonzales*, the impairment assigned for Claimant's chest scar is to compensate him for the functional deficits caused by his injury while the disfigurement award is designed to compensate Claimant for the visible,
i.e. observable alteration in the natural appearance of his body. Accordingly, the ALJ is not convinced that Claimant's receipt of an impairment rating and a disfigurement award for the same scar constitutes a "duplicative" award as asserted by Respondents. Because visual inspection of Claimant's chest, left torso and left shoulder supports a finding that he has suffered an "observable impairment of the natural appearance of [the] person", the ALJ finds/concludes that he is entitled to a disfigurement award. Nonetheless, a question remains as to whether Claimant's disfigurement constitutes "extensive body scars" so as to trigger the second tier of disfigurement benefits as referenced in C.R.S. § 8-42-108 (2).

O. "Extensive" is defined as, "Widely extended in space, time, or scope; great or wide or capable of being extended". Black's Law Dictionary, *Definitions of the Terms and Phrases of American and English Jurisprudence, Ancient and Modern*, Sixth Ed. 1990. The common and ordinary meaning of the word "extensive" is "having wide or considerable extent", with the term "extent" being defined as the "amount of space or surface that something occupies*". Webster's New Collegiate Dictionary*, (1973). In interpreting C.R.S. § 8-42-108 (2), the ALJ gives the terms and phrases used in the statute their plain and ordinary meanings, and has read them in context and construed them according to the rules of grammar and common usage. Based upon that interpretation the ALJ concludes that the statute contemplates that in order to trigger a second tier disfigurement award, there must be evidence of scars or alteration in the appearance of the body over a wide area. Without question, the residual scars located on Claimant's chest, torso and left upper injury are substantially unsightly and entitle him to a significant disfigurement award. Moreover, Claimant's disfigurement covers an expansive portion of the chest and left torso and is not limited/confined to these areas. Rather, there is an extension of the scarring associated with Claimant's injuries to his left shoulder. While the scarring on the left shoulder is not nearly as severe as the scarring on the chest/torso, it constitutes an expansion of the body parts beyond the chest, which have also been visibly altered due to Claimant's injuries. Accordingly, the ALJ finds/concludes that Claimant's scarring is "extensive" as contemplated by C.R.S. § 8-42-108 (2) (b). As these scars are normally exposed to public view, Respondents shall pay Claimant $7,800.00 for the above-described disfigurement. Insurer shall be given credit for any amount previously paid for disfigurement in connection with this claim.

ORDER

It is therefore ordered that:

1. Respondents' request to set aside the impairment rating opinions of Dr. Sharma is denied and dismissed.

2. Respondents shall provide all reasonable, necessary and related maintenance medical treatment to prevent deterioration of Claimant's present condition and otherwise relieve him from the ongoing chest pain related to his industrial injury, including the continued provision of over-the-counter analgesics such as Ibuproen, Tylenol and Voltaren gel or an equivalent preparation. Respondents retain the right to challenge any future request for maintenance treatment on the grounds that it is not reasonable, necessary or related to Claimant's November 26, 2014 industrial injury. *See generally*, *Grover v. Industrial Commission,* 759 P.2d 705 (Colo. 1988); *Stollmeyer v. Industrial Claim Appeals Office,* 916 P.2d 609 (Colo.App. 1995); Section 8-42-101 (1) (a), C.R.S.; *Hanna v. Print Expediters Inc., supra.*

3. Respondents shall pay Claimant $7,800.00 in disfigurement benefits.

4. Any and all issues not determined herein are reserved for future decision.

DATED: February 10. 2023

Colorado Springs, CO 80906

NOTE: If you are dissatisfied with the ALJ's order, you may file a Petition to Review the order with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the ALJ; and (2) That you mailed it to the above address for the **Denver Office of Administrative Courts**. You may file your Petition to Review electronically by emailing the Petition to Review to the following email address: oac-ptr@state.co.us. If the Petition to Review is emailed to the aforementioned email address, the Petition to Review is deemed filed in Denver pursuant to OACRP 26(A) and Section 8-43-301, C.R.S. If the Petition to Review is filed by email to the proper email address, it does not need to be mailed to the Denver Office of Administrative Courts. For statutory reference, see Section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. WC 5-201-484-001

ISSUES

1. Did Claimant prove by a preponderance of the evidence that he suffered a compensable injury arising out of the motor vehicle accident on March 12, 2022?

2. If Claimant suffered a compensable injury, is Claimant entitled to ongoing medical and indemnity benefits?

3. If Claimant suffered a compensable injury, is Claimant entitled to temporary partial disability benefits?

STIPULATIONS

The parties stipulate that Claimant was in travel status at the time of his March 12, 2022, motor vehicle accident.

FINDINGS OF FACT

Based on the evidence presented at hearing, the ALJ makes the following findings of fact:

1. Claimant is a 44 year-old man who is a national restoration project manager for Employer. Claimant resides in Alabama, but traveled to Colorado on January 1, 2022, for work.

2. On Saturday, March 12, 2022, Claimant was driving from the job site back to his hotel in Boulder. He was stopped at a light when he was rear-ended. Claimant was wearing his seatbelt, and the airbags did not deploy.

3. Claimant was driving a 2021 Dodge Ram, 4 x4, quad cab, half-ton pickup, and the vehicle that rear-ended him was a significantly smaller vehicle. Claimant thought the vehicle was a Ford Fusion. (Tr. 29:7-11). The impact did not cause Claimant to hit the vehicle in front of him, which was also stopped. Claimant's vehicle suffered very little damage. (Ex. 12). The driver who rear ended Claimant told the police he was going approximately five miles per hour. Claimant told subsequent medical providers that the car that hit him was going five miles per hour. (Ex. D).

4. Claimant called the police, and when they arrived, he said he felt fine. Claimant testified that while he was sitting in his vehicle waiting for the police to complete their report, the back of his neck started hurting. He reported this to the police, but declined to go the emergency room. (Tr.26:3-20).

5. Right after the accident Claimant tried to contact his managers, but no one was available. He texted [Redacted, hereinafter KP], the national operations

manager, told him he had been rear ended and asked KP[Redacted] to call him. (Ex. 5). KP[Redacted] called Claimant and provided him with Employer's insurance information.

6. The following day, Sunday, March 13, 2022, Claimant went to AFC Urgent Care in Boulder. He reported being in a motor vehicle accident the previous day. Claimant denied hitting his head or losing consciousness. He reported headaches and occasional dizziness with pain in his neck and left shoulder. Claimant was able to move his neck and shoulder normally. There was no swelling, and he had full range of motion in his neck and shoulder. Claimant was advised to rest for 48-72 hours and take Tylenol/Ibuprofen for pain. (Ex. B). Claimant testified that he felt the practitioner at AFC Urgent Care was dismissive of him. (Tr. 43: 20-25).

7. Claimant emailed [Redacted, hereinafter DH], Director of Risk Operations, and others on March 13, 2022. Claimant provided details regarding the accident, and stated he walked to urgent care that morning because his neck and shoulder were really sore, his back was stiff, he was light headed/dizzy and had a bad headache. Claimant further explained that the nurse practitioner told him the soreness was from the impact of the accident, but he should seek further care if he did not get better. DH[Redacted] agreed Claimant should be reevaluated if he did not improve, and she also suggested massage therapy. (Ex. 7).

8. Claimant testified he continued to work following his accident. He went back into the field on March 15, 2022, visited job sites and checked with supervisors about projects they were working on. (Tr. 81:3-25).

9. Claimant regularly communicated with Employer regarding his condition. On March 16, 2022, [Redacted, hereinafter NH], Loss Control Specialist for Employer, emailed Claimant and said "[a]s we discussed, please utilize our nurse triage program, WorkCare, in the event of future injuries, be they vehicle accident related or not. Obviously call 911 or go to the ER if the situation warrants." (Ex. 7). There is no evidence in the record that Claimant ever utilized WorkCare.

10. On Friday, March 18, 2022, nearly a week after the accident, Claimant had a telephonic meeting with NH[Redacted] and [Redacted, hereinafter MZ] from Employer's risk management department. DH[Redacted] recapped the meeting in an email to Claimant. According to the email, Claimant was to remain off-site that weekend, and the following Monday through Wednesday. If by Wednesday, Claimant needed more time off, he was to notify Employer. Claimant was to only work in the capacity of phone calls and emails. Claimant told Employer his dizzy spells were less frequent. He was instructed to notify Employer immediately if his pain worsened, and he was given a list of facilities to visit for massage/muscle therapy, including Concentra Urgent Care. (Ex. K). Claimant testified that NH's[Redacted] email "pretty much summarized" the meeting. (Tr. 41:24-42:1).

11. Claimant testified he told NH[Redacted] he was going to the doctor the next day, which would have been a Saturday, for a follow-up because he was still having issues. He testified his symptoms were not as severe, but still present. (Tr. 42:5-

22). The ALJ does not find this testimony credible. First, there is no mention of Claimant's plan to go to the doctor on a Saturday in NH's[Redacted] email summarizing the meeting with Claimant. Second, it is not logical that Claimant would go to a doctor for a "follow-up" on a Saturday. The only places claimant could have gone on a Saturday would be an urgent care or emergency room (ER). And by Claimant's own testimony, his symptoms were not severe.

12. On Saturday, March 19, 2022, Claimant went to Boulder Medical Center for an Urgent Care visit. Caroline Cooper, AP evaluated Claimant. Claimant told Ms. Cooper that he had been rear ended the previous week, and the driver was going five miles per hour. He complained of left shoulder and back pain, headaches, and neck stiffness. He denied any vomiting, and reported nausea one to two times throughout the week. According to Claimant, the nausea and dizziness ended on Thursday, March 17, 2022. Claimant denied the visit as a workers' compensation visit. According to the medical record, Claimant had left shoulder pain and neck pain, but he declined a work note or physical therapy order. Claimant was also assessed with a "concussion without loss of consciousness, sequela." Claimant was to rest for two weeks, and gradually increase physical exertion in a stepwise manner. Ms. Cooper ordered x-rays of Claimant's cervical spine and his left shoulder. (Ex. C). The x-rays revealed no acute injuries in any of these regions. (Ex. D).

13. Claimant spoke with MZ[Redacted] on March 20, 2022 and told her he went to Boulder Medical Center the previous day for another evaluation, and the doctor determined he suffered a concussion as a result of the accident. He also told MZ[Redacted] that the dizzy spells were back, and his balance was off. (Ex. 9). Claimant told Ms. Cooper, however, that he had not had any dizziness of nausea since March 17, 2022. (Ex. C).

14. The ALJ finds Claimant's subjective reports of dizziness and nausea were inconsistent, and not credible.

15. Claimant testified he fell in the shower and hit his head on March 21, 2022. According to Claimant, he was rinsing the shampoo out of his hair, and when he leaned back and closed his eyes, he got dizzy and lightheaded. (Tr. 48:7-22).

16. Claimant went to Foothills ER at Boulder Community Health that same day with a chief complaint of dizziness. The record notes Claimant's motor vehicle accident, and his "continuing worsening and new symptoms." The record also says Claimant took a Flexeril Saturday night and woke up vomiting with more dizziness. Claimant reported being dizzy and unsteady when he fell in the shower that morning and hit his head. He had no specific visual symptoms and no headache. Claimant had a CT scan of his head that revealed no significant intracranial abnormality. Dale Wang, M.D. noted '[n]ormal head and neck imaging. The dizziness and headache are symptoms that are more likely to be a concussion. Symptomatic treatment as discussed. Follow up in worker's compensation clinic." (Ex. 15). There is no evidence in the record that Claimant followed up in a worker's compensation clinic or utilized WorkCare as instructed by his Employer.

17. The very next day, on March 22, 2022, Claimant went to Boulder Medical Center for another urgent care visit. According to the medial record, Claimant went to the ER the previous day and was diagnosed with a concussion. There is no mention of Claimant falling in the shower and hitting his head, just that he had dizziness and vomiting due to the Flexeril he took. Claimant wanted to be cleared to go back to work that day. He reported feeling "great" and denied any dizziness, headaches, sensitivity to light, or blurred vision. Claimant was given a "work/school status note" stating he was cleared to return to work on March 22, 2022. (Ex. F).

18. Claimant spoke with MZ[Redacted] that day, and reported a general resolution of his symptoms. MZ[Redacted] noted on March 22, 2022, Claimant reported his headache and "dizzy spells" had resolved. (Ex. 9).

19. Claimant returned to work on March 22, 2022, and continued to report regularly to Employer how he was feeling. After a few days of work, on March 25, 2023, Claimant reported he was feeling "ok." Claimant noted he had been busy the past few days at work, but he reported no symptoms. (Ex. 9).

20. Claimant testified at hearing that he may have been misquoted by MZ[Redacted] on March 25, 2022 and he "believed" he told her that he was not feeling "a hundred percent and that [he] had been wearing a hard hat and [his] head was hurting at the time." (Tr. 58:4-21). Claimant's account of this conversation is not supported by the call log MZ[Redacted] kept.

21. On March 30, 2022, Claimant spoke with MZ[Redacted] and told her that his headaches were back, and he was not sure if wearing a hard hat applied pressure to his head. (Ex. 9).

22. Two days later, on April 1, 2022, Claimant went to Boulder Medical Center for an Urgent Care visit and reported having amnesia symptoms, worse headaches, and daily vomiting for the past six days. They sent Claimant to the ER because of his new and/or worsening symptoms, and provided Claimant information regarding local concussion clinics. (Ex. F and Ex. 16). There is no evidence in the record Claimant contacted WorkCare.

23. Claimant's chief complaint in the ER was a headache. The record notes that he had been seen previously for a headache and dizziness, and underwent a CT that was negative. According to Claimant, his symptoms had improved, but a week prior (approximately March 25, 2022) he worked quite hard, and woke up the next day with worsening of symptoms, including a headache, dizziness, and continued vomiting. David Whitling, M.D., ordered a brain MRI. Claimant's MRI showed no sign of acute pathology, but noted mild white matter disease within the periventricular regions in the right centrum semiovale. Dr. Whitling discussed with Claimant the likely diagnosis of post-concussion syndrome, and the need for self-care and follow up with a concussion specialist. Claimant was discharged that evening in "good" condition. (Ex. G).

24. Claimant was in the emergency room from 10:52 a.m. to 6:37 p.m. on April 1, 2022. (Ex. G). Claimant filed a Worker's Claim for Compensation on April 1, 2022. With respect to body parts injured, it stated "left shoulder, back, neck, head injury (ringing in ears, dizziness, difficulty in word finding, headaches, etc. . . .)" Under nature of injury it says "see medical records." [Redacted, hereinafter BP] signed the form for Claimant. (Ex. M). Claimant's counsel entered his appearance with the Division on April 1, 2022, and BP[Redacted] signed the certificate of service. (Ex. N).

25. There is no reference in Claimant's April 1, 2022, medical records of him having ringing in his ears or difficulty in word finding.

26. According to the phone log, Claimant called MZ[Redacted] from the ER, while he was waiting for an MRI. She noted that he was seeing a concussion specialist. Employer was fully in support of keeping Claimant off of work until he made a full recovery. They discussed sending Claimant back to Alabama to recover, but wanted clearance from the doctor that it was safe for him to fly. MZ[Redacted] advised Claimant not to drive until he was cleared to do so. (Ex. 9).

27. Claimant told the physicians in the ER on April 1, 2022, he had been vomiting for six days. Even though Claimant was in regular communication with MZ[Redacted], updating her regarding his symptoms, there is no evidence that anytime between March 25, 2022 and April 1, 2022 Claimant reported he had been vomiting, let alone daily. Additionally, there is no reference in the phone log regarding Claimant having ringing in his ears, or difficulty in word finding.

28. On April 5, 2022, three and a half weeks after the accident, Claimant was evaluated by Kathryn Reitz, D.O., at the Colorado Concussion Clinic. Dr. Reitz felt that based on the mechanism of injury, Claimant's high symptom score, and his abnormal concussion neurologic examination, Claimant suffered a concussion. She noted that Claimant had a concussion diagnosis related to the accident by at least three other providers. She opined that his high symptom score and medical history of diabetes and ADHD increased his risk of Post-Concussion Syndrome (PCS). According to Dr. Reitz, "PCS is defined as having the constellation of concussion symptoms present for longer than 3 months." (Ex. 19).

29. The medical professionals who diagnosed Claimant with a concussion made such a diagnosis based upon Claimant's subjective symptoms. The ALJ finds Claimant's description of his alleged concussion symptoms, to his Employer and medical providers, is vastly inconsistent and not reliable.

30. Claimant underwent an IME with Lawrence Lesnak, D.O. on June 27, 2022. Dr. Lesnak opined, to a reasonably degree of medical probability, that Claimant did not sustain "any type of cerebral concussion or mild traumatic brain injury or any injuries to his cervical spine structures or left shoulder" as a result of the motor vehicle accident on March 12, 2022. In reaching this opinion, Dr. Lesnak reviewed Claimant's medical records, including the imaging studies, and he personally examined Claimant. (Ex. A).

31. Dr. Lesnak acknowledged the white matter disease on Claimant's MRI, but opined it was "completely unrelated to his involvement in the motor vehicle collision on 03/12/2022." He noted this is a "very typical finding identified in hypertensive patients and is consistent with cerebral microvascular ischemia." (Ex. A).

32. Dr. Reitz, in response to Dr. Lesnak's opinions, asserted that "[w]hite matter changes can be seen with concussion." Dr. Reitz does not assert that the white matter on Claimant's MRI was caused by the alleged concussion, and she acknowledged not having a prior MRI to compare findings. (Ex. 19).

33. Dr. Reitz further opined "[t]he diagnosis of concussion does not require that a patient hit their head nor lose consciousness. If he did hit his head or did have a loss of consciousness then a diagnosis of concussion is more likely. But, concussion may be caused by whiplash or violent shaking to the body without direct head involvement." (Ex. 19). There is no objective evidence in the record that Claimant ever suffered whiplash or violent shaking. Dr. Reitz concludes Claimant "had an accidentwith enough force to cause sudden neurological change." (Ex. 19). There is no objective evidence in the record that Claimant suffered a "sudden neurological change" as a result of the March 12, 2022 motor vehicle accident. Claimant's alleged symptoms escalated three weeks after the accident. The ALJ finds Dr. Reitz's opinion credible, but not persuasive.

34. Dr. Lesnak was deposed on October 31, 2022, regarding the conclusions in his IME report, and his determination Claimant did not sustain a concussion. Dr. Lesnak testified "if there's any concussion, if there's any temporary or even permanent injury to the brain, the symptoms are always worst [sic] at the onset, immediately following the incident; and then they improve and hopefully recover." (Dep. Tr. 31:14-18).

35. Dr. Lesnak reviewed the several tests Dr. Reitz performed. He testified these tests lack any controls for validation. (Dep. Tr. 26:4-23). Many of them, for example, the cognitive and balance testing, are dependent upon Claimant's own efforts and his own report of symptoms. (Ex. 19). As found, Claimant's report of symptoms was inconsistent and not credible.

36. Dr. Lesnak also performed tests on Claimant. He noted Claimant's speech was "fluent without evidence of semantic or phonemic language errors." Claimant's closed-eye, finger nose testing showed no abnormalities, and the Romberg sign was negative. Claimant did not have any ocular nystagmus and a modified Hallpike-Dix test, which measures vertigo, reproduced no symptoms. Dr. Lesnak opined Claimant exhibited the ability to perform abstract thinking, multistep, mathematical calculations without difficulty, and also showed both short, and long-term memory recall. (Ex. 19).

37. John Hughes, M.D., conducted an independent medical examination of Claimant in June 2022. Dr. Hughes opined that Claimant presented with a "straightforward history" of head and cervical spine injuries. He further opined that Claimant suffered a closed head injury with concussion, improving over a course of

interdisciplinary care. Dr. Hughes concluded that Claimant was not at MMI. The ALJ finds Dr. Hughes's opinion to be credible, but not persuasive.

38. Considering the mechanism of injury, Claimant's performance on cognitive tests, his normal CT imaging and unremarkable MRI, Dr. Lesnak concluded that Claimant suffered no concussion. (Dep. Tr. 35:11-36:18). The ALJ finds Dr. Lesnak's opinion credible and persuasive.

39. Claimant also alleged injuries to his left shoulder and neck, but he has never been assessed as having more than shoulder and neck pain. (Ex. C). His thoracic spine MRI revealed only degenerative changes with "[n]o evidence of acute thoracic spine fracture or dislocation." The MRI of his cervical spine revealed only degenerative changes, with "[n]o evidence of acute cervical spine fracture or dislocation." The x-ray of Claimant's left shoulder revealed "[n]o evidence of left shoulder fracture or distortion." (Ex. D).

40. Claimant receives a base wage of $2,692.31 per pay period or $70,000 annually. (Ex. J). This translates to an average weekly wage of approximately $1,346.15. Claimant has continued to receive his regular salary every pay period following his March 12, 2022 motor vehicle accident, even though he has not been working. (Ex. H); (Tr. 96:21-25).

41. Based on the totality of the evidence, the ALJ finds that Claimant did not suffer a compensable injury as a result of the March 12, 2022 motor vehicle accident.

CONCLUSIONS OF LAW

Generally

The purpose of the Workers' Compensation Act of Colorado, § 8-40-101, *et seq*., C.R.S. is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of litigation. *See* § 8-40-102(1), C.R.S. Claimant shoulders the burden of proving entitlement to benefits by a preponderance of the evidence. *See* § 8-43-201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 592 P.2d 792 (Colo. 1979). The facts in a workers' compensation case must be interpreted neutrally; neither in favor of the rights of the claimant, nor in favor of the rights of respondents; and a workers' compensation claim shall be decided on the merits. § 8-43-201, C.R.S.

Assessing weight, credibility, and sufficiency of evidence in a Workers' Compensation proceeding is the exclusive domain of the ALJ. *Univ. Park Care Ctr. v. Indus. Claim Appeals* Office, 43 P.3d 637 (Colo. App. 2001). Even if other evidence in the record may have supported a contrary inference, it is for the ALJ to resolve conflicts in the evidence, make credibility determinations, and draw plausible inferences from the evidence. *Id*. at 641. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the

reasonableness or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *Prudential Insur. Co. v. Cline*, 57 P.2d 1205 (Colo. 1936); *Bodensieck v. Indus. Claim Appeals Office*, 183 P.3d 684 (Colo. App. 2008). The weight and credibility to be assigned expert testimony is a matter within the discretion of the ALJ. *Cordova v. Indus. Claim Appeals Office*, 55 P.3d 186 (Colo. App. 2002). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colo. Springs Motors, Ltd. v. Indus. Comm'n*, 441 P.2d 21 (Colo. 1968).

The ALJ's factual findings concern only evidence and inferences found to be dispositive of the issues involved; the ALJ has not addressed every piece of evidence or every inference that might lead to conflicting conclusions and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Eng'g, Inc. v. Indus. Claim Appeals Office*, 5 P.3d 385 (Colo. App. 2000).

Claimant has the initial burden to prove that he or she suffered an injury arising out of and in the course of employment. C.R.S. § 8-41-301(1); *Faulkner v. Industrial Claim Appeals Office,* 12 P.3d 844 (Colo. App. 2000). Also, with particular importance to this claim, it is not enough to establish merely that an "accident" occurred in order for a claim to be compensable. *Wherry v. City and County of Denver,* 2002 WL 596784, W.C. No. 4-475-818 (ICAO, Mar. 7, 2002). A claimant must also show that an "injury" resulted from the accident. *Id*. Injury is defined here as physical trauma caused by the accident. *Id*. A compensable industrial accident is therefore one in which an injury has resulted requiring the need for formal medical treatment or causing disability. *Id*.

While in travel status, Claimant was involved in a minor motor vehicle accident on March 12, 2022. Claimant's large pickup truck was rear ended by a smaller vehicle that was going approximately five miles per hour. Claimant's airbags did not deploy, he did not hit his head, nor did he lose consciousness. Claimant testified he continued to work following the accident, and went back out into the field on March 15, 2022. Claimant regularly communicated with Employer regarding any symptoms he was experiencing. Employer instructed Claimant to utilize the nurse triage program, WorkCare, in the event of any other issues related to the accident or not, and go to the ER if situation warranted. There is no evidence in the record that Claimant ever utilized WorkCare.

Initially, Claimant experienced headaches and occasional dizziness, but the nausea and dizziness ended on March 17, 2022. According to Claimant, his dizziness returned on March 20, 2022, and led to his falling in the shower and hitting his head, on March 21, 2022. Based on Claimant's description of his symptoms, he was diagnosed with a concussion. As found, Claimant's description of his symptoms was vastly inconsistent, and not reliable. For example, the day after Claimant went to the ER because he woke up with vomiting and dizziness prior to falling in the shower, Claimant was seeking a release to work. He told the providers her felt "great" and denied any dizziness, headaches, sensitivity to light, or blurred vision. Similarly, on April 1, 2022, Claimant went to the ER and complained of worse headaches and vomiting for six days.

Claimant however, never told Employer he was vomiting for six days even though he regularly communicated with Employer regarding his condition.

During Claimant's IME with Dr. Lesnak he displayed fluent speech, mathematical reasoning abilities, and also good long-term and short-term recall. There were no objective findings of a concussion during this examination. Dr. Lesnak performed a modified Hallpike-Dix test, looked at ocular nystagmus, had Claimant perform finger-to-nose testing and noted the lack of any Rhomberg sign.

This is consistent with imaging of Claimant's head. The CT scan from March 21, 2022 was normal, and he MRI from April 1, 2022 similarly showed no signs of any acute pathologies. While there was mild periventricular white matter disease, there is no objective evidence that this was caused by the accident.

Although there are multiple medical credible opinions, the ALJ finds Dr. Lesnak's opinion to be the most persuasive. Dr. Reitz relies heavily on Claimant's own reporting and efforts. And as found, Claimant's reporting of symptoms is inconsistent and not reliable. Considering the mechanism of injury, Claimant's performance on cognitive tests, his normal CT imaging and unremarkable MRI, Dr. Lesnak concluded that Claimant suffered no concussion. The ALJ finds Dr. Lesnak's opinion credible and persuasive. Based on the totality of the evidence, Claimant did not suffer a compensable injury.

ORDER

It is therefore ordered that:

1. Claimant did not suffer a compensable injury as a result of the March 12, 2022 car accident. Any claim for benefits or compensation is denied and dismissed with prejudice.

2. All matters not determined herein are reserved for future determination.

If you are dissatisfied with the Judge's order, you may file a Petition to Review the order with the Denver Office of Administrative Courts, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the Judge's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the Judge; and (2) That you mailed it to the above address for the Denver Office of Administrative Courts. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED: February 9, 2023

Victoria E. Lovato
Administrative Law Judge
Office of Administrative Courts
1525 Sherman Street, 4th Floor
Denver, Colorado, 80203

PROCEDURAL HISTORY

Respondents filed an Application for Hearing on September 8, 2022, primarily on the issue of overcoming the Division of Workers' Compensation Independent Medical Examination (DIME) physician's determination that Claimant had not reached maximum medical improvement (MMI). Other issues included medical benefits that are reasonably necessary and permanent partial disability benefits. Respondents clarified at hearing that waiver, overpayment and credit offsets were no longer issues for hearing, as Claimant's benefits were terminated as of July 8, 2022 when the authorized treating physician (ATP) placed Claimant at MMI and that the issues were listed because Respondents were concerned that Claimant may have been receiving benefits on another worker's compensation claim for her right upper extremity with a date of injury of August 25, 2019. He noted that Claimant's benefits on the prior claim had stopped prior to Claimant's date of injury in this matter. Counsel also mentioned that there were delays in obtaining both a DIME in the prior claim and the DIME with Dr. Orent for this injury. The DIME in this matter was requested by Respondents, took place on August 8, 2022 and a report was issued on August 29, 2022. No Final Admissions of Liability have been lodged in this claim.

Claimant filed a Response to Application for Hearing on October 7, 2022 on issues that included medical benefits that are reasonably necessary, average weekly wage, temporary disability benefits and, if Claimant was found to be at MMI, then permanent partial disability benefits and *Grover* medical benefits.

Claimant and Dr. Sander Orent, M.D. testified on behalf of Claimant, and John Aschberger, M.D. and Douglas Scott, M.D. testified on behalf of Respondents.

Claimant's exhibits 1 through 10 were admitted into evidence. Respondents' exhibits A through L, N, and P were admitted into evidence. Exhibits M, O and Q were not admitted.

Also submitted, post-hearing, was Respondent Addendum Report from Dr. Aschberger dated January 16, 2023 (Integrated Medical Evaluation report dated January 18, 2023). This exhibit was designated as Respondents' Exhibit R. During the hearing and following the DIME physician's testimony, Respondents made an offer of proof regarding Dr. Aschberger's potential rebuttal testimony. Respondents' moved for leave to submit this report, in lieu of a continued hearing, as further evidence for review, which was granted over Claimant's objection. Exhibit R was admitted.

Also discussed during the January 5, 2023 hearing was the outstanding Motion to Withdraw as Counsel by [Redacted, hereinafter BR]. The parties agreed that an order would be appropriate considering his passing and an order was issued on January 12, 2023.

A status conference was held on January 24, 2023 regarding evidentiary matters. The parties agreed to a submission deadline of February 8, 2023 for position statements or proposed orders. Claimant withdrew his motion to submit as supplemental exhibit the IME recording of Claimant's appointment with Dr. Kleinman. Respondents withdrew their request for submission of Respondents' Supplemental Exhibits 1 through 5. Those exhibits were stricken from the record by order of this ALJ dated January 24, 2023. There was no further discussion with regard to Dr. Aschberger's addendum report dated January 16, 2023.

STIPULATIONS OF THE PARTIES

The parties stipulated that Claimant is entitled to *Grover* maintenance medical care if Respondents meet their burden of proving by clear and convincing evidence that the DIME was overcome on the issue of MMI.

The parties further stipulated to an average weekly wage of $333.00 and that, if Claimant was found not at MMI in accordance to with the DIME physician's opinion, and that Claimant was entitled to continued temporary total disability benefits, the period of benefits should be from July 20, 2021 to present. The parties further agreed that the calculation of TTD would be agreed upon by the parties and this ALJ need not address the exact amount.

The stipulations of the parties were accepted and approved by this ALJ and are incorporated in this order.

ISSUES

I. Whether Respondents proved by clear and convincing evidence that the Division Independent Medical Examination (DIME) physician, Dr. Sander Orent, was incorrect in his determinations of maximum medical improvement (MMI).

II. If Respondents proved that Claimant is at MMI, whether Respondents proved by a preponderance of the evidence that the date of MMI was July 20, 2021.

III. Whether Respondents proved by a preponderance of the evidence that there was a non-work related intervening event that ended Respondents' liability towards Claimant.

IV. If Respondents failed to prove that Claimant was at MMI, whether Claimant is entitled to temporary total disability (TTD) benefits and interest from July 20, 2021 to the present and continued until terminated by law.

FINDINGS OF FACT

Based on the evidence presented at hearing, the ALJ enters the following findings of fact:

A. Generally

1. Claimant was 56 years old at the time of the hearing. She was employed as a housekeeper for Employer as of approximately May 2019. Her duties involved cleaning hotel rooms, including kitchenettes with microwaves and refrigerators. This ALJ noted that Claimant was short in stature and the medical records noted that she was four foot, eight inches tall[1] and has no formal education. Claimant had difficulty reaching the tops of the microwaves as they exceeded her height.

2. Claimant sustained an admitted work related injury of August 25, 2019 related to her right upper extremity. She was placed on modified duty that included working up to three hours a day, lift, push and pull up to 10 lbs. constantly, and no reaching above shoulder with the right upper extremity, could not grip, squeeze or pinch with the right upper extremity, should wear a splint or brace on the right upper extremity constantly, could do no sweeping, mopping or vacuuming with the right hand and no overhead work with the right arm.[2] The medical records suggest that Claimant was required to exceed her restrictions.

3. On February 15, 2020 Claimant was in the process of cleaning a microwave. She could not reach the top in order to clean, it due to her height. She stepped onto a chair with the left foot. She was cleaning with the left hand since she was restricted from using her right hand overhead. Her right leg slipped, then the chair slipped out from under her, causing her to lose her balance. She twisted her back and lower extremities then Claimant fell onto her left side, landing on her left hip and knee, injuring her right ankle, knees, lower back and hip. The medical records suggest that the chair landed on her.

B. Medical Records

4. Claimant was seen the same day at Concentra Fort Collins by Sheree Montoya, NP. She documented Claimant's mechanism of injury as follows:

> Left side posterior hip pain Pt states when she went to stand on a chair to clean the top of a refrigerator the chair fell on top of her causing her to fall down landing on her left side twisting her back and landing on her *left lateral knee* She has not treated with anything as it happened just prior to arrival. *[Emphasis added]*

5. Nurse Montoya noted that Claimant had burning pain radiating to the left buttocks, causing decreased lateral bending, decreased spine range of motion (ROM), decreased rotation. The symptoms were exacerbated by twisting, climbing stairs, and walking. On exam she noted that Claimant had joint stiffness, back pain, with tenderness in the left lumbar paraspinals and left sacroiliac joint. She also noted that claimant had abnormal thoracolumbar spine range of motion and a positive FABER test[3] on the left, but otherwise within normal limits. She diagnosed sacroiliac strain and prescribed ice, medications, physical therapy, and provided modified work restrictions. She noted that history and mechanism of injury were obtained directly from the patient and appeared to be consistent with presenting symptoms and physical exam.

---

[1] Claimant reported to Psychologist Brady on August 3, 2020 that she was four foot six inches.
[2] Respondents' Exhibit D, Bates 295 through 298, PA Toth, January 18, 2020.
[3] Test to identify pathology within the hip, lumbar spine or sacroiliac region.

5. Claimant presented to Jeffrey Baker, MD, on February 17, 2020, with *complaints of left hip, left le*g, and lower back pain *with radiating pain to the knee*. The pain was worse when going up the stairs as she *gets a "pulling" sensation, lifting her leg*, and had difficulty sleeping through the night due to the pain. Claimant reported that she was under restrictions due to her prior workers' compensation claim and that Employer was having her work in excess of her restrictions, which is why she fell. On exam, Claimant had tenderness in the left sacroiliac joint and loss of range of motion, but had a negative exam otherwise. An *injection of dexamethasone sodium phosphate* was administered* and Claimant was diagnosed with sacroiliac strain. She was returned to modified work, including restrictions of 10 lbs. lifting occasionally, push/pull up to 20 lbs. occasionally, bend or twist occasionally and no climbing ladders.

6. Claimant was also seen by Nicholas Wright, DPT, in physical therapy on February 17, 2020. PT Wright noted Claimant was tender to palpation in the left quadrant of the paraspinals and the gluteus maximus, and had abnormal range of motion (ROM) in extension, bilateral thoracolumbar side bending, pain in the left low back and gluteus with resisted motion, pain in the low back with hamstring, gluteal and hip stretching. She had symptoms consistent with left lumbosacral contusion and experienced notable benefit from manipulation. Claimant retuned for therapy with Mr. Wright on February 18, 2020 and reported that her back pain was improving but that she continued to have pain in the lateral knee but had no symptoms distal to the knee. *He put a patch with dexamethasone on the left lateral knee*, noting that Claimant had a lateral collateral ligament (LCL) sprain. On February 19, 2020 Mr. Wright stated that Claimant reported decreased lateral knee and gluteal region pain but that the pain persists in the left low back.

5. On February 24, 2020, Claimant reported that she was still having notable pain to the left low posterior ribcage but the gluteal and lateral knee pain were both improving. Mr. Wright noted Claimant had *a "popping" sound occurring bilaterally in her knees and the left knee was painful*. Claimant continued with physical therapy complaining of both low back/SI joint as well as left knee pain.

6. Dr. Baker attended Claimant on February 25, 2020. Claimant complained of *sharp left lateral knee* pain with intermittent and variable degrees of intensity and dullness. Claimant informed Dr. Baker that the *injection in her left knee* did not make much difference.[4] *Associated symptoms included clicking, tenderness, and painful walking*. *Exacerbating factors included knee extension, direct pressure*, using stairs and walking. On exam Dr. Baker noted that there was *tenderness over and in the lateral tibial plateau of the left knee* with a slight flexion limitation, but was otherwise unremarkable. He also noted that Claimant continued to have tenderness in the left sacroiliac joint with limited range of motion. Dr. Baker diagnosed contusion of the left knee and referred Claimant to physical therapy. He also diagnosed sacroiliac strain. Claimant reported that physical therapy and the patches of lidocaine were helping. Claimant described her low back pain as burning and constant though did wax and wane.

5. Mr. Wright attended Claimant on March 17, 2020 and noted that Claimant's

[4] This ALJ infers that the injection of dexamethasone sodium phosphate administered on February 17, 2020 was for the left knee. See * above.

low back was painful to the point that it caused difficulty breathing. Claimant had pain to left" low back/glute" with resisted glute in prone, pain to left low back with hamstring, gluteal and hip external and internal rotation (ER/IR) with passive range of motion and stretching.[5] Mr. Wright noted that progress was slower than expected.

6. On March 24, 2020, Dr. Baker's diagnoses were sacroiliac strain and thoracic myofascial strain. He specifically noted as follows:

> [Claimant] is returning for a recheck of injury(s): Left thoracolumbar strain that occurred on 2/15/2020. This is her 2nd WC claim, she is being treated for her right wrist, shoulder and neck also. She reports that her boss makes her do activities that are outside her WC and that is why she fell. She was put on naproxen and *lidocaine patches but the patches were not approved.* She has done 12 PT visits and is progressing slower than expected. The pain is a left thoracolumbar area. She is applying the bengay and that is helping. Pain is sharp and worse with stairs, sleeping and *lifting her leg*. She has had 12 visits with PT and feels that it s (sic.) improving. She feels that she is about 70%. *Her Adjustor did call and stated that the knee would not be covered. (Emphasis added).*
>
> …
>
> There is left mid back pain. There is left lower back pain. The pain does not radiate. The symptoms occur intermittently. She describes her pain as sharp in nature. The severity of the pain is variable (constantly present but the level of intensity waxes and wanes). Associated symptoms decreased lateral bending, decreased rotation, decreased flexion, … Exacerbating factors include twisting, lifting and bending, but not sitting and not standing. Relieving factors include heat, rest, nonsteroidal anti-inflammatory drugs, physical therapy and muscle rub.

Claimant restrictions were changed to 20 lbs. lifting frequently, push/pull up to 40 lbs. frequently, bend and twist frequently, but was to perform no ladder climbing. He referred Claimant to chiropractic care for the lumbar spine.

7. On April 2, 2020 Claimant returned to manual therapy with Mr. Wright to address ongoing left hip mobility as it reduced the complaints of lumbar spine pain, stating that Claimant's *left hip dysfunction* almost certainly limited her lumbar spine recovery.

8. On April 7, 2020 Dr. Baker noted that "Her Adjustor did call and stated that the knee would not be covered." He also noted that Claimant was not currently working due to COVID-19. He noted Claimant had muscle pain, back pain, *muscle weakness*, night pain, and limited ROM.

9. On April 22, 2020, Claimant *complained of left knee and right leg pain* with walking. The pain was also in the left thoracolumbar area. She was applying the muscle rub and that was helping. Pain was sharp and worse with stairs, sleeping and lifting her leg. She was doing PT and felt that it was improving her function. Stephen Toth, PA, noted that Claimant was referred to a Chiropractor and that was currently on hold per DORA due to COVID-19. PA Toth also noted that Claimant's Adjustor called and stated that the knee would not be covered. She was not currently working also due to COVID-19. This ALJ noted that from this date forward, Claimant's providers did not mention either examining Claimant's knee or taking Claimant's complaints of knee pain. In fact,

[5] This ALJ infers that IR is internal rotation, ER is external rotation and PROM is passive range of motion.

the knee was left blank in some of the records.

> Physical Exam
> Constitutional: well appearing and well nourished.
> Head/Face: Normocephalic and atraumatic.
> Eyes: conjunctiva and lids with no swelling, erythema or discharge. Extraoccular movement intact.
> ENT: . No erythema or edema of the external ears or nose. Hearing is grossly normal.
> Neck: trachea midline, no JVD.
> Pulmonary: no increased work of breathing or signs of respiratory distress.
> Knee:
> Lumbosacral Spine: Appears normal. Tenderness present in left sacroiliac joint, but

10. Claimant continued with physical therapy for her lumbar spine and SI joint. On May 8, 2020 Claimant reported that she had low back pain upon standing from a prolonged sitting position. She was also *worried about dragging her left toes* when trying to walk quickly. Mr. Wright noted in the assessment that:

> Therapy Assessment:
> Overall Progress Slower than expected Today is the first time that I can remember [Claimant] reporting a concern with L toe dragging The complaint is with fast walking/running. As she hasn t (sic.) had any sign of DF weakness from radicular compression, I assume this complaint comes from altered mechanics, potentially due to lumbar stiffness I have provided her with a heel walking exercise to address this issue, but remain focused on the low back

11. Scott Parker, D.C., evaluated Claimant on May 13, 2020. He took a history of the mechanism of the injuries consistent with Claimant's hearing testimony. Claimant was complaining of left-sided thoracolumbar pain which she rated at 7/10, *left lateral knee pain* which aggravated her back, *numbness* traveling from the left gluteus musculature laterally *in the lower extremity to the left great toe and second toe* which was constant since this fall. He noted on exam that restrictions were palpated at left SI joint, L5 slightly to the left, T6-T7 anterior, the left T7 rib, T12 LP in the left, and L1 slightly to the left. He noted that Claimant had moderate muscle spasm palpated in the thoracic and lumbar regions, trigger points noted in the bilateral thoracic and lumbar regions and adhesions palpated throughout bilateral thoracolumbar fascia.

12. On May 27, 2020, Claimant reported to PA Toth that her back pain was worse with pain radiating down her left side radiating down her left glute. She noted that she had been tripping as a result of her *left foot giving way while walking*.

13. Claimant had multiple chiropractic visits focused on her lumbar, sacroiliac dysfunction and thoracolumbar pain. On June 3, 2020 Dr. Parker noted that Claimant continued with low back pain, that it was especially so when she would put on herpants or shoes. He documented that her pain was a 6/10. She complained that she continued to have *lower extremity numbness* though it was somewhat improved. Claimant was also complaining of *continuing knee pain* that was concerning to her. While Dr. Parker states Claimant had full range of motion of the lumbar spine, they were not documented as being with an inclinometer or whether it was passive or active range of motion, and Claimant complained of discomfort. Dr. Parker clearly examined the lower extremities because he stated that Claimant gave a "suboptimal effort." He also noted that there were adhesions are palpated in the bilateral thoracolumbar fascia, trigger points in the

bilateral thoracolumbar muscles and mild muscle spasm palpated.

14. PA Toth evaluated Claimant on July 8, 2020 and continued to diagnose thoracic myofascial strain, sacroiliac strain and radicular low back pain. He ordered lumbar and sacroiliac MRIs at this time. He noted that while Claimant did have improvement in her range of motion, that she was still stiff, having lower left back and hip pain and *numbness radiating down the left leg*. He ordered continued chiropractic care, and her HEP[6], noting that she declined dry needling due to concerns of risks, as noted in prior records. On July 17, 2020 PT Wright noted Claimant was tolerating the dry needling treatment.

15. Claimant continued with chiropractic care, due to continued low back pain, adhesions and muscle spasms in the lumbar spine, including when he released her from his care on July 29, 2020. What is apparent from reading Dr. Parker's records and the records from other providers at Concentra is that significant portions of the reports are likely copy and pasted information from prior records and this ALJ is disinclined to rely on every notation in Dr. Parker's reports stating that there was full range of motion despite "moderate muscle spasms," trigger points, and adhesions.

16. Claimant was evaluated by Molly M. Brady, PsyD. on August 3, 2020 pursuant to a referral from Mr. Toth to evaluate whether any mental or emotional factors could complicate the treatment of Claimant's medical condition, and to make recommendations with regard to treatment. The Behavioral Health assessment was initially recommended in January 2020 by Jon Erickson, M.D., who had completed an IME at Respondents' request regarding the 2019 claim. BHI 2 testing was valid though potentially indicated that psychological factors may have been contributing to Claimant's perception of pain and disability. Results also were indicative of the presence of an optimistic outlook, emotional control, or an unusual degree of acceptance with a likely support system. Dr. Brady wrote that "[G]iven that validity indicators do not suggest that [Claimant] is magnifying her sense of distress by responding in a biased manner, this may be an accurate report of her internal perception of emotional distress." Dr. Brady diagnosed Claimant with pain disorder and adjustment disorder with mixed anxiety and depressed mood. She noted that "the onset of the injury to [Claimant]'s right arm, a significant stressor, functioned to exacerbate that pre-existing anxiety and dysphoria to a significant extent." She opined that the majority of the symptoms of psychological adjustment developed related to her workplace injury.[7] Dr. Brady recommended interventions including relaxation training, mindfulness-based stress reduction training, biofeedback training, coping skill development to decrease psychological distress, stress management techniques, behavioral activation, and education on the interaction between psychological distress and physiological pain experiences. Claimant continued with psychologic treatment through April 12, 2021 and Dr. Brady recommended an additional 5 visits given Claimant's progress with treatment.[8]

---

[6] Home exercise program.

[7] Specifically relating to the August 25, 2019 work related injury. Dr. Brady was engaged to treat Claimant under that claim.

[8] No other records were provided as exhibits after April, 2021. Exhibit D was the DIME packet provided under the 2019 claim and Dr. Lindenbaum (DIME) conducted his evaluation on May 27, 2022. This ALJ

17. Claimant had an MRI of the lumbar spine without contrast on August 14, 2020. Dr. Eric Nyberg read the results as follows:

> Disc Spaces:
> Lower thoracic spine: Mild disc bulges without significant spinal canal or foraminal stenosis.
> L1-2: Mild disc degeneration without spinal canal or foraminal stenosis.
> L2-3: Mild disc degeneration without spinal canal or foraminal stenosis.
> L3-4: Mild disc degeneration with broad disc bulge resulting in mild bilateral foraminal stenosis.
> L4-5: Mild disc degeneration with minimal disc bulge resulting in mild bilateral foraminal stenosis.
> L5-S1: Mild disc degeneration and bilateral facet arthrosis resulting in mild to moderate right and mild left foraminal stenosis.

18. Also on August 14, 2020 Claimant had a MRI of the pelvis. Dr. Andrew Mills noted that there was no acute or aggressive osseous abnormality, chronic degenerative changes of the lumbar spine at L3-S1 and patent appearance of the SI joint which showed minimal degenerative changes.

19. On August 18, 2020 Nurse Elva Saint advised Claimant to return to physical therapy for more PT as the left low back pain persisted. The *main concern at that point is was the left lower extremity (L LE) heaviness and quickness to fatigue as well as the left knee complaints.* Claimant gave good effort and tolerated the PT sessions, treatment and exercises well. Claimant completed her course of PT without much improvement. In fact the records show that Claimant slowly continued to deteriorate.

20. Claimant was seen on September 9, 2020 by PA Toth who documented that Claimant complained of back pain, d*ifficulty bearing weight on the left foot, and some numbness in left leg*. She also *complained of bilateral knee pain* and *was limping since seeing the chiropractor and states that is the reason for not going anymore*. Claimant denied "outside causation of injury including sports, hobbies, accidents or external employment." On system review, PA Toth documented *back pain and limping*, but found nothing abnormal during exam. PA Toth referred Claimant to a physiatrist for further evaluation.

21. On October 5, 2020, Claimant presented to Gregory Reichhardt, MD for evaluation of her low back injury and knee pain. Dr. Reichhardt reviewed the mechanism of injury, which was consistent with Claimant's testimony. He mentioned that Claimant was referred to Dr. Brady who diagnosed pain disorder and adjustment disorder with mixed anxiety and depressed mood. Upon exam, Claimant complained of low back pain across the L4-L5 level, diffuse *left gluteal pain*, lateral hip and *lateral thigh symptoms going down to the foot, with leg weakness and left knee pain*. Dr. Reichhardt's work-related impressions and diagnosis were low back pain, probably discogenic, with possible component of radicular involvement, causing left lower extremity pain and weakness, left knee pain with a February 15, 2020 mechanism of injury, pain disorder and adjustment disorder with mixed anxiety and depressed mood, and *right ankle pain*. *Dr. Reichhardt deferred to Concentra providers regarding the causation of any right lower*

---

infers that no further treatment with Dr. Brady took place as Claimant was found to be at MMI as of December 4, 2020 in the 2019 claim.

extremity complaints. Dr. Reichhardt recommended trigger point injections for the lumbar spine, an *MRI of the left knee* and that she continue treating with Dr. Brady for the pain disorder and adjustment disorder. On the M-164 he also recommended an *EMG/NCV*[9] *study of the left lower extremity*.

22. Dr. Reichhardt noted on October 28, 2020 that Claimant had a normal left lower extremity electrodiagnostic evaluation. The study was negative for left-sided axons loss lumbosacral radiculopathy, lumbosacral plexopathy, peroneal or tibial mononeuropathy and for peripheral polyneuropathy. Dr. Reichhardt did not have a good explanation for the *lower extremity weakness* and recommended she see her PCP. Claimant requested the trial of trigger point injections. He also stated that future considerations would also be for a hip MRI arthrogram.

23. Dr. Baker followed up with Claimant on October 19, 2020 and noted on physical exam that Claimant had *left knee tenderness in the lateral femoral condyle*, in the *lateral hamstrings*, diffusely *over the lateral knee* and in the *lateral tibial plateau*, a positive lateral McMurray test and positive medial McMurray test.[10] He diagnosed sacroiliac strain, radicular low back pain and *strain of the left knee*. He *ordered the MRI of the left knee* and noted that the EMG/NCV was already scheduled. He also documented that he did not anticipate MMI until at least January 31, 2021.

24. Claimant proceeded with trigger point injections on November 18, 2020 over the bilateral L5 paraspinals, left gluteus maximus and left tensor fascial latae. His diagnosis did not change.

25. Claimant was evaluated by Dr. Reichhardt for an impairment evaluation with regard to her August 25, 2019 claim on December 4, 2020. He placed her at MMI for that claim and provided an impairment rating. He noted that Claimant had completed a Functional Capacity Evaluation on October 27, 2020 during which Claimant functioned at a "sub-sedentary level."[11]

26. On December 8, 2020 Claimant had an MRI of the left knee. Dr. Jamie Colonnello noted that the left knee medial and cruciate ligaments were intact, there was medial and patellofemoral compartment predominant chodrosis/osteoarthritis of the left knee, cartilage loss most pronounced at the medial compartment involving weight-bearing surfaces of the medial femoral condyle as well as joint effusion. This ALJ infers that the joint effusion is a sign of joint inflammation or aggravation of underlying joint osteoarthritis.

27. Claimant returned to see Dr. Reichhardt on December 11, 2020 and noted that she was having *weakness in the right leg* which she thought was *related to dry needling.* Claimant complained that they hit a nerve and one day after her second dry needling treatment, she had difficulty coordinating her right leg then got worse after her last chiropractic treatment and had paresthesias over the lateral aspect of the left lower leg. She was having *pain down the posterolateral aspect of both thighs*. Moderate pain behavior was noted. He observed Claimant to be somewhat angry, but he was not sure

---

[9] Electromyography (EMG) and Nerve Conduction Velocity (NCV).

[10] McMurrays test is a test to assess knee injuries, including meniscal tears.

[11] The functional capacity evaluation (FCE) report is not contained in the exhibits in evidence.

if this was just her communication style. He noted giveaway weakness but overall normal strength with encouragement. His impression was probable discogenic pain, and he felt that there was a pain disorder with adjustment disorder and mixed mood and anxiety. The doctor was unclear why her legs were weak and the loss of coordination, and he recommended possibly a repeat MRI. She indicated that she was upset because she had not met the orthopedic doctor. Dr. Reichhardt recommended an evaluation with an orthopedist with regard to Claimant's left knee complaints. Multiple other evaluations occurred following this exam, he documented Claimant's distress at the failure to identify the causes of her pain and discomfort, provided a knee neoprene brace as well as topical medications for the knee, while awaiting the results of an IME as the orthopedic evaluation was not authorized. Claimant was insistent that her right lower extremity symptoms of weakness were related to dry needling, chiropractic care and the EMG testing.

28. An Independent Medical Evaluation (IME) took place on January 6, 2021 with Dr. Jon M. Erickson. He noted that he had previously evaluated Claimant regarding her 2019 upper extremity injuries, and those findings are not relevant in this matter.

29. Dr. Reichhardt attended her on January 28, 2021, rating her pain as 9 out of 10 with weakness in both legs and inability to walk. He felt that her leg weakness was related to the pain. The patient still wanted to see an orthopedist at that point.

30. Claimant underwent an IME with Dr. Douglass Scott on February 23, 2021. He noted that claimant had a lower back injury, and that Claimant informed him she had left knee pain as well as issues with the right leg. On exam, the left knee appeared normal, with no tenderness and had full range of motion and strength. He reviewed the medical records and drew multiple conclusions based on this analysis of the records, that are not persuasive to this ALJ. He conducted a physical examination and noted no swelling in the left knee and no crepitus and no deformity or tenderness to the left knee. He noted in his diagnosis that the right knee was unrelated to the original injury. The pain disorder was noted and he suspected there were psychological or somatoform disorders present. He noted that the changes on the MRI of the left knee of chondrosis/ osteoarthritis probably pre-existed the injury. He reviewed the mechanism of injury, and opined that it occurred without significant force or velocity as her right foot was on the floor and her given height of 4'8. He diagnosed her with a lumbosacral strain as he noted that the EMG was normal, without neurological impairment and did not appreciate an injury to either lower extremity. He stated that, based on Claimant's initial response to treatment for the low back, he opined Claimant had reached MMI on June 3, 2020 without impairment and required no further medical care after that date.

31. On February 11, 2021 Dr. Reichhardt noted Claimant had a mild gait alteration and discussed Claimant's left knee pain with PA Toth who advised Dr. Reichhardt that Claimant did not have immediate pain in her left knee following the accident and had not reported it until after 10 days of the injury. Relying of the accuracy of this information Dr. Reichhardt noted that the left knee condition was probably not related to her injury. As found, this is not credible, as Nurse Montoya documented on February 15, 2020 that Claimant landed on her left lateral knee and Dr. Baker documented on February 17, 2020, two days later, that Claimant complained of left hip, left leg, and lower back pain with radiating pain to the knee, with pain worse when going

up the stairs as she had a "pulling" sensation, lifting her leg. He further injected that knee with medication.

32. On April 8, 2021 Dr. Reichhardt recommend evaluation with Dr. Quickert for an SI joint injection as provocative maneuvers qualified her for the treatment, including tender to palpation, pain in the low back, pain over both sacroiliac areas, negative straight leg test, positive Patrick's maneuver, positive gapping and positive iliac compression tests. He also referred Claimant for x-ray of the lumbar spine to rule out a foreign body (dry needling needle). There were multiple subsequent records documenting symptoms of the left knee as sharp pain, worse with cold, constantly present, with symptoms of clicking, "popping" sound at the time of her injury, tenderness and painful walking. Documentation of joint pain, muscle pain, back pain, joint stiffness, muscle weakness, limping and night pain. Exams of the left knee showing tenderness diffusely over the anterior knee, diffusely over the anterolateral aspect, diffusely over the anteromedial aspect, in the lateral femoral condyle, in the lateral hamstrings, diffusely over the lateral knee and in the lateral tibial plateau.

33. Dr. Scott issued a Rule 16 UMR on April 23, 2021 noting that, based on Dr. Reichhardt's exam, it may be reasonable to perform an SI joint injection. However, based on his prior opinion, that Claimant was at MMI as of June 3, 202 and required no further care, it was not related to the February 15, 2020 work related injury.

34. Claimant had the x-ray performed at Banner Imaging on May 7, 2021, which was read by Dr. Gregory Reuter. It showed mild L5-S1 degenerative changes but no foreign body.

35. On June 24, 2021 Dr. Reichhardt recommended a trial of massage therapy. Claimant returned to Concentra on June 30, 2021 and Dr. Baker made a referral for massage therapy, which took place at Medical Massage of the Rockies between July 9 through August 3, 2021.

36. Claimant was evaluated by Julie Quickert, APRN[12] on June 25, 2021. She noted tenderness with light palpation of the lumbar spine and left SI joint, paraspinal tenderness and muscle tightness noted with light palpation, generally reduced ROM of L- spine, increased pain reported with forward flexion greater than extension, or bilateral flexion. Strength to the bilateral lower extremities was normal and equal, straight leg raise test was negative, FABER test was positive on the left and thigh thrust and Iliac compression test were positive. She recommended proceeding with the SI joint injection but, as Claimant requested ask about a guarantee that there would be no further complications, she did not proceed.

37. On June 28, 2021 Dr. Douglas Scott issued a report in response to a Rule 16 request for authorization from Dr. Timo Quickert/Nurse Quickert for the SI joint injection. He opined that the SI joint injection was not reasonably necessary or related to the February 15, 2020 work related injury as Claimant had reached MMI as of June 3, 2020.

38. On July 20, 2021, Dr. Reichhardt examined Claimant finding tenderness to palpation in the lumbar spine with mild lumbar paraspinal muscle spasm and decreased

[12] Advanced Practice Registered Nurse.

lumbar range of motion. Examination of the left knee also showed tenderness to palpation though no effusion or instability. Dr. Reichhardt's final impressions were that Claimant had a low back and left lower extremity pain and weakness. He related the lumbar spine and left knee pain mechanism of injury as related to the February 15, 2020 work related fall and injury. He opined that Claimant should be allowed to have an SI joint injection under maintenance care as well as physical therapy to review her home exercise program (HEP), medications, laboratory tests, and follow ups with an advanced practice provider.

39. Dr. Reichhardt placed Claimant at MMI as of July 20, 2021 and assigned permanent lifting, pushing and pulling restrictions of 20 pounds and limit bending and twisting at the waist to an occasional basis.

40. He assigned a 14% lower extremity rating based on range of motion limitations of the left lower extremity, and a 5% rating for arthritis for a total of 18% for the lower extremity. Claimant's lower extremity rating converted to a 7% whole person rating. He assigned Claimant a 5% whole person impairment for specific disorder and a 12% for loss of range of motion of the lumbar spine, which combined to a 16% whole person impairment. Dr. Reichhardt also issued a mental impairment rating of 1% whole person impairment. Claimant's combined impairments were 23% whole person related to the February 15, 2020 work related injuries.[13]

41. On July 30, 2021 Dr. Baker ordered the maintenance physical therapy to review a HEP, which took place with Brian Busey, MPT beginning as of August 5, 2021, through September 13, 2021, and February 15, 2022 through March 31, 2022. Mr. Busey noted Claimant had moderate antalgia, with abnormal range of motion. She was using a cane in the left hand due to her right "wrist injury." He noted that the overall response was that Claimant was not progressing.

42. Dr. Baker's final diagnosis as of August 20, 2021 were strain of the left knee, radicular low back pain, adjustment disorder. He stated that the objective findings were consistent with the history and work related mechanism of injury. His final work related restrictions were to limit lifting, pushing, pulling and carrying to 20 lbs., and limit bending and twisting at the waist to an occasional basis. These restrictions were consistent with Dr. Reichhardt's final restrictions given on July 20, 2021. Dr. Baker also recommended maintenance care, concurring with Dr. Reichhardt in this regard, including 6 follow up visits with a provider, 4 follow up visits with a PT, coverage of medications, and any lab tests to monitor for side effects, if needed over each for the next 2 years Availability of an SI injection and an Orthopedic consult for the left knee.

43. Respondents requested a DIME and Sander Orent, MD was selected to conduct the examination. Dr. Orent documented on August 10, 2022 that Claimant reported she had constant low back pain when walking, bending, sitting, and sleeping. The pain started at waist level and radiated down both legs. Dr. Orent noted marked weakness in the right leg and trouble raising her left leg. Claimant had pain and swelling

[13] While Dr. Reichhardt's narrative report notes that Claimant's mental impairment is "zero" the final combined impairment rating includes the 1% mental impairment. The 16% lumbar spine rating combined with 7% whole person for the left lower extremity is 22%. The 22% combined with the 1% is 23% whole person impairment in accordance with the *AMA Guides* Combined Values Chart at p. 254.

noted in both knees and her right ankle.

44. Dr. Orent's diagnoses were (1) Lumbar strain secondary to fall with symptoms of lumbar radiculopathy and some symptom magnification noted, but clear evidence of injury. (2) Bilateral knee contusions. The left occurring at the time of injury with swelling and notably an effusion in the joint on imaging and the right apparently manipulated by a chiropractor causing her ongoing pain and discomfort. This happened in the course and scope of her injury. He noted it strange that a chiropractor would be manipulating her knee. The diagnoses of the knees were bilateral knee strains, possible meniscal injuries and on the left exacerbation of preexisting osteoarthritis as the result of the fall with ongoing symptomology requiring further care. (3) A diagnosis of right ankle sprain. The swelling was obvious over the right lateral malleolus. His opinion was that the mechanism of injury was certainly consistent, there had been no intervening events, there was swelling over the joint and he believed the patient's history.

45. Dr. Orent found Claimant was clearly not at MMI as she required a repeat MRI of the lumbar spine, repeat EMG nerve conduction studies to determine why her legs were so weak, consideration of hyaluronic or other viscosupplementation into the left knee and an MRI of the right knee and the right ankle. Further care would be dictated based on the findings of those studies. Regarding her lumbar spine, it was clear and obvious she had ongoing pain, and recommended repeat imaging. He also stated that injection into the SI joint was reasonable and should proceed given the changes noted on her imaging. In addition, she had a facet syndrome and possible discogenic pain in the lumbar spine which should be further sorted by a repeat MRI with further treatment as necessitated.

46. Dr. Orent assigned a provisional impairment rating to Claimant. He rated the lumbar spine, bilateral knees, and right ankle for a combined 50% whole person impairment without basis for apportionment. Claimant was also unable to work as she was barely able to ambulate or get out of a seated chair at the time of his examination.

47. Following the initial report, on August 18, 2022 Dr. Orent issues a supplemental report correcting an error regarding the impairment for the right lower extremity, but concluded the error was minor and, with the corrected rating, the final whole person impairment did not change.

48. Claimant was evaluated on November 11, 2022 by Dr. John Aschberger, for an IME requested by Respondents. Dr. Aschberger opined that Claimant had a upper motor neuron neurological problems, likely above the cervical spine. Dr. Aschberger opined that there had been progressive involvement affecting both lower extremities that may be explained by further workup. He further stated that Claimant's presentation showed deterioration probably affecting her presentation at the time of the DIME, affecting the impairment rating issued by Dr. Orent, and that it may not reflect the actual residual from the work injury alone. He further opined that Dr. Reichhardt's impairment would be the best estimate for the correct impairment.

49. Dr. Reichhardt did examine Claimant on November 14, 2022, following his conversation with Dr. Aschberger. He confirmed Claimant had lower extremity clonus and a positive right sided upper extremity Hoffman's, which had been negative previously. He noted that the clonus was likely caused by cervical spine impingement

and stenosis at the cervical spine level. He recommended Claimant be seen immediately by Salud Clinic. He did not related any cervical spine issue with her February 15, 2020 fall.

50. On December 14, 2022 Dr. Scott issued a supplemental report at Respondents' request. He reviewed further records and noted that his opinions had not changed with regard to the February 15, 2020 work related injury, opining that Claimant reached MMI as of June 3, 2020, and that any impairment provided by Dr. Orent was questionable, in light of Dr. Parker's findings on that date.

C. Claimant's Testimony

51. Claimant stated that she recalled her treatment at Concentra with multiple providers. She also recalled her care under Dr. Reichhardt, and that he took measurements of her movement. She also recalled seeing Dr. Quickert and that injections were recommended. She denied having declined to go through them only that the injections were not authorized by Insurer, so she was unable to have the injection. She continues to be open to having the injections. She recalled seeing an IME physician but did not recall his name. She recalled being released by Dr. Reichhardt but continued with physical therapy after that date for several months. Her condition with the weakness in her lower extremities continued to deteriorate and she started using a cane over a year before the hearing in this matter. She stated that she had recently returned to see Dr. Reichhardt due to her continued deterioration including her right ankle. She informed Dr. Reichhardt that she has had many falls due to the weakness in her lower extremities.

52. Claimant recalled when they tried to perform dry needling in her lumbar spine, they pinched a nerve and there was a lot of blood. The next day she could not move her right foot properly. Somehow, it affected her right leg. Since that time she has had greater weakness in both leg and has had many falls.

53. Claimant testified that prior to her work related injuries of August 25, 2019 and February 15, 2020 she was healthy and did not have any limitations or restrictions. However, she now has limitations caused by her injury and could not work at this time. Even when she was working, prior to being laid off due to COVID-19, her employer would violate her restrictions and make her perform activities outside of her restrictions.

54. In November 2022 she was called in for an evaluation with Dr. Reichhardt, who asked her questions related to the weakness in her lower extremities and for the name of her personal care provider (PCP). She noted that Dr. Reichhardt attempted to contact her PCP but could not reach her. He recommended that she schedule an appointment. Claimant scheduled the appointment and was evaluated by Katie at Salud Family Health in Fort Collins.

55. Claimant acknowledge that she had travelled due to an emergency to Mexico but was only there for approximately one month after she was released and no longer going to therapy. After she returned, she restarted therapy in the Spring of 2022. She testified that she started using a cane approximately a year before because the weakness in her legs caused her to be unstable and caused multiple falls.

D. Testimony of Dr. Douglas Scott

56. Dr. Douglas Scott testified at hearing on behalf of Respondents, Board Certified Occupational Medicine expert as well as a Level II accredited physician. He explained his examination of Claimant when he conducted the IME as well as review of the records. He opined that, based on the mechanism of injury and his consideration of the chiropractor's finding on June 3, 2020, Claimant reached MMI without impairment at that time. He stated that he disagreed with Dr. Orent's findings, especially with regard to the lower extremities, as they were not part of the initial injury in his opinion. Further, he question Dr. Orent's range of motion numbers.

57. He was of the opinion that Claimant was disqualified from receiving further care under the workers' compensation system because her current problems were not related to her work related injury. However, he did concede that a degenerative or chronic conditions did not disqualify Claimant from receiving benefit under the WC system. He further opined that Claimant should have been released to work without restrictions as of June 3, 2020 as she had a normal exam including the ability to perform a squat despite the pain. He noted that pain alone does not equate to injury or impairment.

E. Testimony of Dr. John Aschberger

58. Respondents also called Dr. John Aschberger to testify in this matter as a Board Certified expert in Physical Medicine and Rehabilitation as well as a Level II accredited physician. He noted he had reviewed the records and examined Claimant. He specified that at the time of the exam, Claimant was having difficulty walking and standing, and was assisted by her husband. He could not perform ROM measurements because she was not stable on her feet. He stated he found clonus of the left knee and bilateral ankles representing a possible upper motor neuron neurological finding. She had an abnormal gait.

59. Dr. Aschberger recalled that Claimant reported having worsening of condition following her treatment with the chiropractor, though there was some mention in the records that following a walk with a friend she had problems with walking. He further opined that the records did not support a left knee or left lower extremity injury. He opined that Claimant reported multiple falls and that they may constitute an aggravation or new injury. He agreed with Dr. Reichhardt's determination of MMI and impairment. He stated that the SI joint injection could provide some relief and could be done as maintenance medical care. He did not change his opinions relayed in his IME report.

F. Testimony of Dr. Sander Orent, DIME physician

60. Dr. Orent, a Board Certified Occupational Medicine and Internal Medicine expert as well as a Level II accredited physician, was called by Claimant as the Division selected DIME physician. Dr. Orent testified at hearing as a Board Certified Occupational Medicine and Internal Medicine expert as well as a Level II accredited physician. He stated that there were no upper motor neuron findings when he examined Claimant in

August 2022. He did identify severe lumbar dysfunction as well as bilateral lower extremity injuries. He noted that he considered the medical records as well as Claimant's reports of the injuries when he made the determination to related the right lower extremity and ankle injuries to the February 15, 2020 work related injury. He chose to believe Claimant's reports despite the lack of a specific report in the medical documentation that Claimant had been hurt either by the dry needling or the chiropractor's records, especially considering his examination and findings of swelling in the knees as the right ankle. He opined that something was going on in Claimant's spine that needed to be addressed as well as her lower extremities, especially considering that the weakness of her lower extremities has resulted in multiple falls. He opined that Claimant's ongoing deterioration required further investigation and that providers should not rely on 2 year old exams.

61. Dr. Orent stated that simply because a Claimant had an asymptomatic condition did not mean that the condition could not be aggravated, causing the asymptomatic condition to flare and become symptomatic. He opined that this is what happened when the chiropractor manipulated Claimant's knees. He failed to understand why the chiropractor, who was in charge of addressing lumbar spine issues, was addressing anything with regard to Claimant's knees. Now Claimant has effusion in both knees as well as an antalgic gait, which he related to the February 15, 2020 work injury.

62. Dr. Orent further considered the Claimant's adequate mechanism of injury and the sequelae caused by the ongoing injuries and treatment when making his causation analysis. He continued to opine that Claimant was not at MMI and required further diagnostic testing and medical care as stated in his report, including viscosupplementation in the knees, SI joint injection and even repeat MRI of the lumbar spine and repeat EMG, related to her February 15, 2020 admitted work injury as laid out in his DIME report. He stated that Dr. Scott and Dr. Aschberger simply disagreed with his opinions and that physicians frequently disagree with each other.

63. Dr. Orent testified persuasively that he took valid measurements of Claimant's lumbar spine at the time of his examination. He confirmed that the measurements were in fact the numbers he took during the examination and disputed Dr. Scott's opinion that it was not possible to obtain the numbers Dr. Orent actually obtained. Dr. Orent continued to opine that Claimant injured her lumbar spine and bilateral lower extremities, including her right and left knees and her right ankle. He appropriately provided a provisional rating as required by the Division in accordance with the requirements for a DIME physician. He considered the medical records, Claimant's testimony and the responses Claimant provided him at the time of her examination, as well as the mechanism of injury and the sequelae treatment she received to arrive at his opinions as laid out in his DIME report. He continued to opine that Claimant was not at MMI and required further diagnostic evaluation and treatment as he had previously laid out. His opinion did not change from that reflected in his DIME report despite the testimony of Drs. Scott and Dr. Aschberger. He stated that they simply have a different opinion.

64. Dr. Orent stated that, even if Claimant was found to be at MMI, that she continued to require medical care related to her work injury.

G. Ultimate Findings of Fact

65. As found, Respondents have failed to overcome by clear and convincing evidence the opinions of Dr. Sander Orent, the DIME physician in this matter. Dr. Sander considered the evidence, the facts as described by Claimant, the medical records, the mechanism of injury and examined Claimant in order to arrive at his opinions in this matter. Dr. Orent is credible and his opinions more persuasive than the contrary opinions provided by Dr. Aschberger and Dr. Scott. Claimant explained to Dr. Orent how her injury occurred, Dr. Orent reviewed the records and examined Claimant in order to perform a causality analysis and reach the determination that Claimant injured her low back, left lower extremity, her bilateral knees and her right ankle, all as a consequence of the February 15, 2020 work related injury. This includes further injury to her lower extremities caused by treatment while under the care of her workers' compensation authorized treating providers.

66. As found, Dr. Orent credibly concluded that, due to the progression of Claimant's symptomology, she required further medical care, including but not limited to repeat MRI of the lumbar spine, repeat EMG nerve conduction studies to determine why her legs are so weak, consideration of hyaluronic or other viscosupplementation into the left knee, SI joint injections and MRIs of the right knee and the right ankle. He opined that this diagnostic care and treatment are essential to cure and relieve Claimant from the effects of her February 15, 2020 admitted work related injury.

67. Drs. Aschberger and Scott did not disagree that Claimant needed further evaluations. In fact, they recommended Claimant seek further evaluation outside of the workers' compensation system with her PCP. However, neither were able to identify what exactly was happening to Claimant other than that she continuing to have complaints of pain in her low back, lower extremities including weakness. Those physicians simply concluded that since the treatment provided did not resolve her complaints that they were probably unrelated to the work injury. Dr. Orent credibly opined that Claimant continue to suffer from the work related injuries and required further care and diagnostic treatment and that Drs. Aschberger's and Dr. Scott's opinions were simply difference of opinions.

68. Dr. Scott is simply not credible in his opinion that, based on his understanding of the mechanism of injury, Claimant should have reached MMI as of June 3, 2020 when the chiropractor identified Claimant was able to perform a squat, despite Claimant's continuing symptoms. He relied heavily on Dr. Parker's notations. However, Dr. Parker's notes are suspect. From the initial exams on May 13, 2020 he stated that Claimant "transitions from a seated to a standing position without difficulty, pain complaints or pain behaviors." The phraseology of "transitioned from a seated to a standing position without difficulty, pain complaints, or pain behaviors" is commonly added in most of Dr. Parker's reports despite complaints of pain and symptoms. Dr. Parker clearly documents that Claimant was having significant pain with ratings at 6/10 and 7/10, with left lateral knee pain and numbness traveling from her gluteus musculature laterally in the left lower extremity to the left great toe and second toe. He noted significant loss of range of motion, positive Patrick's, Hibb's, Yeoman's, and hyperextension, and while he may not have provided significant chiropractic care to the lower extremity, his exam notes that he clearly examined the lower extremity,

manipulating them. On June 3, 2020 Dr. Parker documented that Claimant continued to have a 6/10 pain with activity and noted that she had palpable adhesions, trigger points and muscle spasms. Therefore, Dr. Scott's reliance of Dr. Parker's normal findings make his opinions not credible.

69. Claimant was under medical restrictions issued by her ATPs, including Dr. Reichhardt who stated as of July 20, 2021 that Claimant was limited in her ability to work including a 20 lbs. lifting, pushing and pulling limitation as well as limited bending and twisting. These restrictions are similar to Claimant's restrictions when she was laid off from her employment due to COVID-19. Further, both Dr. Aschberger and Dr. Reichhardt noted in their more recent reports that Claimant was not able to engage in employment at that time. This is consistent with Dr. Orent's opinion as well. Claimant has shown the she has been unable to return to her employment with Employer of injury or any other employment due to her work restrictions.

70. As found, Claimant's loss of employment was caused by a combination of her physical limitations, her restrictions and due to the COVID-19 pandemic. As found, from the totality of the evidence, including Claimant's credible testimony and the medical records, Claimant has proven that it was more likely than not that that she left work as a result of the disability related to this claim and has incurred an actual wage loss. This has caused a disability lasting more than three work shifts. Claimant has proven that it was more likely than not that there was a causal connection between a work-related injury which caused her subsequent wage loss. As found, Claimant continues to have work restrictions that limit her ability to return to her prior employment or any other employment.

71. Testimony and evidence inconsistent with the above findings is either not credible and/or not persuasive.

CONCLUSIONS OF LAW

A. Generally

The purpose of the "Workers' Compensation Act of Colorado" is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of any litigation. Section 8-40-102(1), C.R.S. (2021). The facts in a Workers' Compensation case are not interpreted liberally in favor of either the rights of the injured worker or the rights of the employer. Section 8-43-201, *supra*. A Workers' Compensation case is decided on its merits. Section 8-43-201, *supra*.

The ALJ's factual findings concern only evidence that is dispositive of the issues involved. This decision does not specifically address every item contained in the record and the ALJ has not addressed every piece of evidence that might lead to a conflicting conclusion. The ALJ has specifically rejected evidence contrary to the above findings as not credible or unpersuasive. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office*, 5 P.3d 385 (Colo. App. 2000). In general, the claimant has the burden of proving entitlement to benefits by a preponderance of the evidence, including the causal relationship between the work related injury and the medical condition for which Claimant is seeking benefits. Sec. 8-43- 201, C.R.S. A preponderance of the evidence is that which

leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not, *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979). Claimant is not required to prove causation by medical certainty. Rather it is sufficient if the claimant presents evidence of circumstances indicating with reasonable probability that the condition for which they seeks medical treatment resulted from or was precipitated by the industrial injury, so that the ALJ may infer a causal relationship between the injury and need for treatment. See *Industrial Commission v. Riley*, 165 Colo. 586, 441 P.2d 3 (1968).

In deciding whether a party has met the burden of proof, the ALJ is empowered "to resolve conflicts in the evidence, make credibility determinations, determine the weight to be accorded to expert testimony, and draw plausible inferences from the evidence." See *Bodensieck v. ICAO*, 183 P.3d 684 (Colo. App. 2008). The ALJ determines the credibility of the witnesses. *Arenas v. ICAO*, 8 P.3d 558 (Colo. App. 2000). Assessing weight, credibility and sufficiency of evidence in a workers' compensation proceeding is the exclusive domain of administrative law judge. *University Park Care Center v. Industrial Claim Appeals Office*, 43, P.3d 637 (Colo. App. 2001). The weight and credibility assigned to evidence is a matter within the discretion of the ALJ. *Cordova v. ICAO*, 55 P.3d 186 (Colo. App. 2002). The same principles for credibility determinations that apply to lay witnesses apply to expert witnesses as well. See *Burnham v. Grant*, 24 Colo. App. 131, 134 P. 254 (1913); see also *Heinicke v. ICAO*, 197 P.3d 220 (Colo. App. 2008). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colorado Springs Motors, Ltd. v. Industrial Commission*, 441, P.2d 21 (Colo. 1968).

The fact finder should consider, among other things, the consistency, or inconsistency of the witness's testimony and actions, the reasonableness, or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness, whether the testimony has been contradicted, and bias, prejudice, or interest. See *Prudential Ins. Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); *Kroupa v. Industrial Claim Appeals Office*, 53 P.3d 1192 (Colo. App. 2002). A workers' compensation case is decided on its merits. Sec. 8-43-201, C.R.S.

B. Whether Respondents overcame the DIME physician's opinion, that Claimant is not at MMI, by clear and convincing evidence.

"Maximum Medical Improvement" (MMI) is defined as the point when any medically determinable physical or mental impairment because of the industrial injury has become stable and when no further treatment is reasonably expected to improve the condition. Section 8-40-201(11.5), C.R.S.

A DIME physician's findings of MMI, causation, and impairment are binding on the parties unless overcome by "clear and convincing evidence." §8-42-107(8)(b)(III), C.R.S. The party challenging a DIME physician's conclusions must demonstrate it is "highly probable" the determination is incorrect. *Cordova v. ICAO*, 55 P.3d 186 (Colo. App. 2002); *Qual-Med, Inc. v. ICAO*, 961 P.2d 590 (Colo. App. 1998). Clear and convincing evidence means evidence which is stronger than a mere preponderance. It is evidence that is highly probable and free from serious or substantial doubt. *Metro Moving Storage Co. v. Gussert*, 914 P.2d 411 (Colo. App. 1995). A party meets this burden if the evidence

contradicting the DIME physician is “unmistakable and free from serious or substantial doubt.” *Leming v. ICAO,* 62 P.3d 1015 (Colo. App. 2002). A “mere difference of medical opinion” does not constitute clear and convincing evidence. E.g., *Gutierrez v. Startek USA, Inc.,* W.C. No. 4-842-550-01, *ICAO,* (March 18, 2016); *Javalera v. Monte Vista Head Start, Inc*., W.C. Nos. 4-532-166 & 4-523- 097, ICAO, (July 19, 2004); *Shultz v. Anheuser Busch, Inc*., W.C. No. 4-380-560 (ICAP, Nov. 17, 2000). Further, a finding of MMI inherently involves issues of diagnosis because the physician must determine what medical conditions exist and which are causally related to the industrial injury*. Cordova v. Industrial Claim Appeals Office,* 55 P.3d 186 (Colo. App. 2002). Because the determination of causation is an inherent part of the diagnostic process, the DIME physician's finding that a condition is or is not related to the industrial injury must be overcome by clear and convincing evidence. *Cordova v. Industrial Claim Appeals Office, supra.*

If the DIME physician offers ambiguous or conflicting opinions concerning MMI it is for the ALJ to resolve the ambiguity and determine the DIME physician's true opinion as a matter of fact. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office*, *supra*, (if DIME physician offers ambiguous or conflicting opinions on MMI, it is for ALJ to resolve such ambiguity and conflicts and determine the DIME physician's true opinion). A DIME physician's finding of MMI consists not only of the initial report, but also any subsequent opinion given by the physician. See *Andrade v. ICAO*, 121 P.3d 328 (Colo. App. 2005). Thus, the ALJ should consider all of the DIME physician's written and oral testimony. *Lambert & Sons, Inc. v. ICAO*, 984 P.2d 656, 659 (Colo. App. 1998); *In Re Dazzio,* W.C. No. 4-660-149 (ICAP, June 30, 2008); *Andrade v. Industrial Claim Appeals Office,* 121 P.3d 328 (Colo. App. 2005). Once the ALJ determines the DIME physician's true opinion, if supported by substantial evidence, then the party seeking to overcome that opinion bears the burden of proof by clear and convincing evidence to overcome that finding of the DIME physician’s true opinion regarding MMI. Section 8-42-107(8)(b), C.R.S.; see *Fera v. Resources One, LLC, D/B/A Terra Firma,* W. C. No. 4-589-175, ICAO, (May 25, 2005) [aff'd, *Resources One, LLC v. Industrial Claim Appeals Office* 148 P.3d 287 (Colo. App. 2006)]; *Leprino Foods Co. v. ICAO*, *134 P.3d 475 (Colo. App. 2005); In re Claim of Licata*, W.C. No. 4-863-323-04, ICAO, (July 26, 2016) and *Magnetic Engineering, Inc. v*. ICAO, *supra*. Lastly, Respondents bear the burden of proof to overcome by clear and convincing evidence the DIME physician's finding that MMI had not been attained. See also *Viloch v. Opus Northwest, LLC*, W. C. No. 4-514-339, ICAO, (June 17, 2005); *Gurule v. Western Forge*, W. C. No. 4-351-883, ICAO, (December 26, 2001). The enhanced burden of proof reflects an underlying assumption that the physician selected by an independent and unbiased tribunal will provide a more reliable medical opinion. *Qual-Med v. ICAO, supra*. Since the DIME physician is required to identify and evaluate all losses and restrictions which result from the industrial injury as part of the diagnostic assessment process, the DIME physician's opinion regarding causation of those losses and restrictions is subject to the same enhanced burden of proof. *Qual-Med v. ICAO, supra.*

In other words, to overcome a DIME physician's opinion, “there must be evidence establishing that the DIME physician's determination [and true opinion] is incorrect and this evidence must be unmistakable and free from serious or substantial doubt.” *Adams v. Sealy, Inc.,* W.C. No. 4-476-254 (ICAP, Oct. 4, 2001). The mere difference of medical

opinion does not constitute clear and convincing evidence to overcome the opinion of the DIME physician. *Javalera v. Monte Vista Head Start, Inc*., *supra*; *Shultz v. Anheuser Busch, Inc*., *supra.*

In the case at bench, Respondents' had the burden of proof to overcome Dr. Orent's opinions on MMI and causation. Respondents relied on the opinions of Drs. Scott and Aschberger, as well as other medical reports, to support their contentions. The ALJ found Drs. Scott and Aschberger were unpersuasive in their opinions with regard to causation and MMI, especially their diverging opinions. Dr. Aschberger put great emphasis on his findings that there was a clonus sign at the low extremities but more importantly at the right upper extremity. It is clear from the record that Claimant has continuously complained of right upper extremity problems related to the admitted August 25, 2019 work related injury. Dr. Aschberger's report makes little mention of his review of records from the 2019 claim or Claimant's symptoms in that case, which are extensive in this ALJ consideration and that case is not before the court at this time. Dr. Aschberger actually recommended further diagnostic work up with regard to Claimant's symptoms outside of the Workers' Compensation system considering his examination to determine if there was a true upper motor neuron condition, though he suspected there was. However, there was no specific diagnosis provided and little that shows that Dr. Orent is incorrect in his determination. Dr. Aschberger's opinion was, in fact, somewhat speculative and just a different opinion than Dr. Orent's. Dr. Aschberger's opinion amounted to a mere difference of medical opinion with those of Dr. Orent's, which does not rise to the level of clear and convincing evidence that is unmistakable and fee from serious or substantial doubts and is insufficient to show that it is highly probable the DIME physician's opinion on MMI is incorrect. See *In re Claim of Tomsha*, W.C. No. 5-088-642-002 (I.C.A.O. March 18, 2021).

With regard to Dr. Scott's opinions, he is simply not credible. In his estimation Claimant should have reached MMI within four months of her injury. In his opinion, based on his understanding of the mechanism of injury, Claimant should have reached MMI as of June 3, 2020 when the chiropractor identified Claimant was able to perform a squat, despite Claimant's continuing symptoms. He relies heavily on Dr. Parker's notations. However, Dr. Parker's notes are suspect and conflicting. From the initial exams on May 13, 2020 he stated that Claimant "transitions from a seated to a standing position without difficulty, pain complaints or pain behaviors," which is a phrase he frequently uses in his notes despite complaints of pain and symptoms. Dr. Parker clearly documents that Claimant was having significant pain with ratings at 6/10 and 7/10, with left lateral knee pain and numbness traveling from her gluteus musculature laterally in the left lower extremity to the left great toe and second toe. He noted significant loss of range of motion, positive Patrick's, Hibb's, Yeoman's, and hyperextension, and while he may not have provided significant chiropractic care to the lower extremity, his exam notes that he clearly examined the lower extremity, manipulating them. On June 3, 2020 Dr. Parker documented that Claimant continued to have a 6/10 pain with activity and noted that she had palpable adhesions, trigger points and muscle spasms. Therefore, Dr. Scott's reliance of Dr. Parker's normal findings make his opinions not credible.

As found, Dr. Reichhardt found Claimant at MMI as of July 20, 2021 based on a stagnated system. He was awaiting authorization for SI joint injections he recommended

with Dr. Quickert, which were denied. His hands were tied as he found his recommendations rejected and could offer nothing else. Further, Dr. Reichhardt relied on communications from Mr. Toth that Claimant had not complained of leg pain during the initial visits. Mr. Toth mislead Dr. Reichhardt in this matter. And while this ALJ was more persuaded by Dr. Reichhardt's opinion than by Dr. Scott or Dr. Aschberger, his opinion did not rise to the level of clear and convincing evidence that was free from doubt. It was simply a difference of opinion.

Respondents argued that because Dr. Brady mentioned that Claimant was wearing an ankle brace on August 3, 2020 and that clearly the somatic distress and pain magnification were the causes of Claimant's continuing symptoms, her continuing problems were not the work related injury. This is not persuasive. In fact, Dr. Brady diagnosed a pain disorder and adjustment disorder which were either caused by or aggravated by the work related claim of 2019.

Respondents also argued that Dr. Orent made a mistake, which was not corrected, following the Incomplete Notice of August 18, 2022. This is not correct. In fact, Dr. Orent did correct his mistake and issued a letter on the same day, including the revised summary form.[14] Immediately thereafter, the DIME Unit at the Division issued the "Notice: DIME Report "Not at MMI"" on August 25, 2022 to the parties.[15] As found, Dr. Orent's true opinion is found to be inclusive of this revised report.

Respondents also argue that based on Dr. Scott and Dr. Kleinman's opinions, Claimant's conditions were preexisting. The existence of a preexisting medical condition does not preclude the employee from suffering a compensable injury where the industrial aggravation is the proximate cause of the disability or need for treatment. *See H & H Warehouse v. Vicory*, 805 P.2d 1167 (Colo. App. 1990); *see also Subsequent Injury Fund v. Thompson*, 793 P.2d 576 (Colo. App. 1990). A work related injury is compensable if it "aggravates accelerates or combines with "a preexisting disease or infirmity to produce disability or need for treatment. *See H & H Warehouse v. Vicory, supra.* If a direct causal relationship exists between the mechanism of injury and resultant disability, the injury is compensable if it caused a preexisting condition to become disabling. *Duncan v. Industrial Claim Apps. Office*, 107 P.3d 999 (Colo. App. 2004). However, there must be some affirmative causal connection beyond a mere assumption that the asserted mechanism of injury was sufficient to have caused an aggravation. *Brown v. Industrial Commission*, 447 P.2d 694 (Colo. 1968). It is not sufficient to show that the asserted mechanism could have caused an aggravation, but rather Claimant must show that it is more likely than not that the mechanism of injury did, in fact, caused an aggravation. *Id*. Further, when a claimant experiences symptoms while at work, it is for the ALJ to determine whether a subsequent need for medical treatment was caused by an industrial aggravation of the pre-existing condition or by the natural progression of the pre-existing condition. *In re Cotts,* W.C. No. 4-606-563 (ICAP, Aug. 18, 2005).

Pain is a typical symptom from the aggravation of a pre-existing condition, and if the pain triggers the claimant's need for medical treatment, the claimant has suffered a compensable injury. *Merriman v. Industrial Commission*, 210 P.2d 448 (Colo. 1949);

---

[14] See Claimant's Exhibit 7, bates 25, and Exhibit 8, bates 27-29.
[15] See Exhibit 9, bate 32.

Dietrich v. Estes Express Lines, W.C. No. 4-921-616-03 (September 9, 2016). But the mere fact that a claimant experiences symptoms at work does not necessarily mean the employment aggravated or accelerated the pre-existing condition. *Finn v. Industrial Commission*, 437 P.2d 542 (Colo. 1968); *Cotts v. Exempla*, W.C. No. 4-606-563 (August 18, 2005). Rather, the ALJ must determine whether the need for treatment was the proximate result of an industrial aggravation or is merely the direct and natural consequence of the pre-existing condition. *F.R. Orr Const. v. Rinta,* 717 P.2d 965 (Colo. App. 1985); *Carlson v. Joslins Dry Goods Company*, W.C. No. 4-177-843 (March 31, 2000).

As found, Claimant credibly testified that, before her workers' compensation incidents, Claimant she was in good health and did not have any medical or health problems which affected her low back and bilateral lower extremities. Neither were any medical record in evidence presented that showed to the contrary. While the diagnostic testing showed Claimant clearly had degenerative conditions, those conditions were asymptomatic. Dr. Orent credibly testified that Claimant's current problems with her low back and bilateral lower extremities are related to her February 15, 2020 work related accident. He also credibly testified that the need for the recommended care was related to the claim. Further, he opined that it was not only the injuries she sustained at the specific date and time of the work related event or accident but the sequelae that results from those injuries were also related to the February 15, 2020 work related claim. In short, because Claimant was further injured during the course of her treatment for the work related injury, those additional injuries are also related to the February 15 2020 claim and compensable. While Dr. Parker's records did not record causing an injury to Claimant's right knee, he did examine them including doing range of motion of the knee. It is not surprising or unanticipated that he would not record causing an injury to a patient.

Lastly, Respondents argue that Dr. Orent was in error because he relied on Claimant's reports instead of pointing to particular medical records to substantiate his opinion.[16] As found, Dr. Orent did substantiate his opinions, first by stating that he acknowledge that Dr. Reichhardt obtained better range of motions but that Claimant's condition had clearly worsened since that time. Secondly, Dr. Orent's range of motion testing was valid and therefore no second set needed to be completed under the *AMA Guides*. Further, he opined that Claimant clearly explained what had occurred with regard to the reporting. Claimant did complain of her lower extremity weakness. The medical records show a pattern of Claimant's complaints, despite the providers being told by Insurer that the knee complaints were not compensable. Dr. Reichhardt also documented in his records that Claimant was complaining of bilateral lower extremity pain and weakness from his initial report of October 5, 2020, despite noting that it was not initially reported because Employer did not list it initially.

As Dr. Orent testified, chiropractors are not trained in range of motion for the purposes of evaluating MMI and impairment. Dr. Scott's opinion also ignores the reports that followed from Dr. Parker. Claimant reported she still experienced low back pain, but treatment was helpful. The fact that treatment continued to be helpful to Claimant shows

[16] Respondents specify in their brief that Dr. Orent's reliance of Claimant's statements is "outside of the Guides page 246." The AMA Guides have nothing on this page and the MTGs for both low back and lower extremities have less than 246 pages each.

that Claimant had not reached the level of maximum improvement. It is reasonable to believe additional care would continue to improve Claimant's condition. All of Dr. Parker's impressions noted "slowly improving (objective greater than subjective) low back pain/ lumbosacral strain and thoracolumbar pain complaints." By definition, Claimant had not reached a point of stability.

After considering the multitude of reports in evidence[17] from both the 2019 and the 2020 claims as well as the testimony of three experts, this ALJ concludes from the totality of the evidence, based on the heightened standard of proof, Respondents failed to show by clear and convincing evidence that Dr. Orent was in error.

C. Whether there was an Intervening Event

An intervening injury may sever the causal connection between the industrial injury and the claimant's condition. *See Standard Metals Corp. v. Ball*, 172 Colo. 510, 474 P.2d 622 (1970). Further, the existence of an intervening event is an affirmative defense. Consequently, it is Respondent's burden to prove that Claimant's disability is attributable to the intervening injury or condition and not the industrial injury. *See Owens v. ICAO*, 49 P.3d 1187 (Colo. App. 2002); *see also Atlantic & Pacific Insurance Co. v. Barnes*, 666 P.2d 163 (Colo. App. 1983). Similarly, the question of whether the disability and need for treatment were caused by the industrial injury or by an intervening cause is a question of fact. *Owens v. Industrial Claim Appeals Office, supra.* It is also clear that, pursuant to the Court's conclusion in the *Owens* case cited above, that no compensability exists if the disability or need for treatment was caused as a direct result of an independent intervening cause. Whether Respondents have sustained their burden to prove Claimant's disability was triggered by an intervening event is a question of fact for resolution by the ALJ. *See City of Aurora v. Dortch*, 799 P.2d 462 (Colo. App. 1990).

Respondents stated that Claimant had an intervening event, speculating that something must have happened when Claimant was in Mexico on an emergency. Claimant testified that she had traveled to Mexico and stayed there for approximately one month but did not recall exactly when. She confirmed it was after she had been released from physical therapy in the fall of 2021 and when she restarted physical therapy in February 2022. However, there was no confirmation or credible evidence that Claimant suffered any accident or incident while she was in Mexico.

Claimant did testify that the weakness in her legs had caused her to fall multiple times. This was documented by Dr. Reichhardt in his November 2022 report. However, it has not been persuasively proven that it was more likely than not that Claimant's falls were caused by a condition other than the documented and diagnosed lumbar spine injury with radiculopathy or the bilateral lower extremity injuries diagnosed by Dr. Orent in his DIME report. The records are full of complaints that Claimant had weakness in her bilateral lower extremities. Dr. Aschberger and Dr. Reichhardt speculated that Claimant has some stenosis or upper motor neuron condition, but this has not been confirmed either, and no diagnostic testing has been completed to rule out the probability that the falls are a consequence of the weakness caused by the work related lower extremity

[17] There are approximately 1300 pages of records, including medical records and pleadings.

injuries or the radicular symptoms. Dr. Reichhardt continued to note in his November 14, 2022 report that Claimant had suffered a work related low back discogenic injury with radicular involvement and a left knee injury. He rated both. And these records and opinions were considered by the DIME physician. Nothing in those reports persuaded this ALJ that there was clear and convincing evidence of a diagnosis that was not work related as determined by Dr. Orent.

Respondents also point to the event Claimant reported when she was walking with a friend in April 2020 and was feeling pain in her knee. This ALJ finds no merit in this theory or suggestion as walking in and of itself is found not to be a causative intervening event. Claimant likely walked many places, including in her home, the medical providers buildings, and for every other activity of daily living. Even if Claimant had just been walking while in the course and scope of her employment that would likely not be considered a work related injury as there would be no cause and effect, no heightened risk.

This ALJ has insufficient evidence to determine that it is more probable than not that Claimant suffered an intervening event. Respondents have failed to show that it was more probable than not that Claimant had an intervening event at this time.

It is further found that Respondents have failed to overcome the determination of the DIME physician's opinion by clear and convincing evidence that there was no intervening event. Dr. Orent acknowledged reading the opinions of Dr. Aschberger and Dr. Reichhardt with regard to the clonus signs, as well as Dr. Aschberger's testimony and this information did not change his opinions.

D. Entitlement of Temporary Total Disability benefits

To prove entitlement to Temporary Total Disability (TTD) benefits, a claimant must prove that the industrial injury caused a disability lasting more than three work shifts, that she left work as a result of the disability, and that the disability resulted in an actual wage loss. *See* Sections 8-42-(1)(g), 8-42-105(4); *Anderson v. Longmont Toyota,* 102 P.3d 323 (Colo. 2004); *City of Colorado Springs v. Industrial Claim Appeals Office,* 954 P.2d 637 (Colo. App. 1997). Section 8-42-103(1)(a) requires the claimant to establish a causal connection between a work-related injury and a subsequent wage loss in order to obtain TTD benefits. The term "disability" connotes two elements: (1) medical incapacity evidenced by loss or restriction of bodily function; and (2) impairment of wage earning capacity as demonstrated by claimant's inability to resume his or her prior work. *Culver v. Ace Electric*, 971 P.2d 641, 649 (Colo. 1999). The impairment of earning capacity element of disability may be evidenced by a complete inability to work, or by restrictions which impair the claimant's ability effectively and properly to perform his or her regular employment. *Ortiz v. Charles J. Murphy & Co.*, 964 P.2d 595, 597 (Colo. App. 1998) (citing *Ricks v. Industrial Claim Appeals Office*, P.2d 1118 (Colo. App. 1991)). Because there is no requirement that a claimant must produce evidence of medical restrictions, a claimant's testimony alone is sufficient to demonstrate a disability. *Lymburn v. Symbios Logic,* 952 P.2d 831, 833 (Colo. App. 1997).

TTD benefits shall continue until the first occurrence of any of the following: (1) the employee reaches MMI; (2) the employee returns to regular or modified employment; (3) the attending physician gives the employee a written release to return to regular employment; or (4) the attending physician gives the employee a written release to return to modified employment, the employment is offered in writing and the employee fails to begin the employment. §8-42-105(3)(a)-(d), C.R.S.

Claimant was given work restrictions as of the date of her injury on February 15, 2020. She continued working until sometime in March 2020, when she was laid off from work due to the COVID-19 pandemic. This was a time when her employer failed to comply with her work restrictions. She continued on work restrictions when Dr. Reichhardt placed her at MMI on July 20, 2021. At that time she continued having work restrictions of 20 lbs. lifting, pushing and pulling, and limit bending and twisting at the waist to an occasional basis. In fact, Dr. Orent stated that he saw no possibility of Claimant engaging in any form of active employment at that time and Dr. Aschberger opined that Claimant could not work or was not employable. Claimant has established by a preponderance of the evidence that she is entitlement to TTD benefits as a result of her work related injury from the date she had previously been placed at MMI on July 20, 2021 until terminated by law.

ORDER

IT IS THEREFORE ORDERED:

1. Respondents failed to prove by clear and convincing evidence that the DIME physician was incorrect. Claimant is not at maximum medical improvement.

2. Respondents shall pay for reasonably necessary and medical care related to the February 15, 2020 work injury, in accordance with the Colorado Fee Schedule, to cure and relieve her of the compensable injury.

3. Respondents shall pay temporary total disability benefits as of July 20, 2021 and continuing until terminated by law.

4. Respondents shall pay interest on any benefits at the rate of eight percent (8%) per annum for all benefits that were not paid when due.

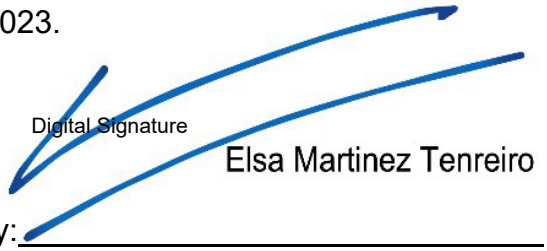
5. Claimant’s average weekly wage is $333.00 pursuant to the stipulation of the parties.

6. All matters not determined here are reserved for future determination.

If you are dissatisfied with the ALJ's order, you may file a Petition to Review the order with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail, as

long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the ALJ; and (2) That you mailed it to the above address for the **Denver Office of Administrative Courts**. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED this 17th day of February, 2023.



By: _____

Administrative Law Judge
1525 Sherman Street, 4th Floor
Denver, CO 80203

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. 5-203-196-001

ISSUES

I. Whether Claimant proved by a preponderance of the evidence that Claimant was injured in the course and scope of his employment on April 8, 2022.

IF THE CLAIM IS DEEMED COMPENSABLE, THEN:

II. Whether Claimant proved by a preponderance of the evidence that he is entitled to medical benefits that are authorized, reasonably necessary and related to the April 8, 2022 work related injury.

III. If Claimant proved he is entitled to medical benefits, who is his authorized treating physician.

IV. Whether Claimant established what his average weekly wage (AWW) is.[1]

V. Whether Claimant established by a preponderance of the evidence he is entitled to temporary total disability benefits (TTD) or temporary partial disability (TPD) benefits.

VI. Whether Respondents proved by a preponderance of the evidence Claimant was terminated for cause or was responsible for his wage loss.

STIPULATIONS OF THE PARTIES

The parties stipulated that, if compensability was established, then Claimant's agreed upon average weekly wage (AWW) was $507.59.

The parties further stipulated, if compensability was established, that they only require a general award for temporary disability and that the parties would calculate and/or negotiate the amounts due and owing as Claimant received unemployment benefits for which Respondents are entitled to an offset.

These stipulations are approved and become part of the order.

PROCEDURAL ISSUES

Claimant limited the period of temporary total disability benefits being requested from April 18, 2022 through June 8, 2022 and temporary partial disability benefits thereafter. Respondents asserted that temporary disability benefits would terminate as of April 26, 2022 if the authorized treating physician placed Claimant at maximum medical improvement.

Respondents also withdrew the issues of waiver, estoppel, latches and overpayment.

---

[1] See stipulation.

FINDINGS OF FACT

Based on the evidence presented at hearing, the ALJ enters the following findings of fact:

A. Generally:

1. Claimant was 27 years old at the time of the hearing. He worked in the housekeeping department for Employer since approximately April 1, 2021. His job included high and low dusting, vacuuming, mopping, cleaning bathrooms, wipe down counters and surfaces, mirrors, ledges, cleaning bathrooms, and general housekeeping chores. He was hired to clean the office suites on the 2nd floor, the call center and the common areas (which did not include all hallways).

2. On April 8, 2022 Claimant was scheduled to work from 5:00 p.m., after they closed the medical care facility. That particular day he was assigned extra duties of cleaning baseboards of the lobby and hallways, in addition to his normal tasks. He started cleaning the hallway baseboards around 11:20 p.m., for which he had to bend over in awkward positions, kneeling and bent over, when he started feeling pain in his low back after starting the task. He started having pain in his lower back after approximately one half hour. However, he completed his tasks for the day, including taking out the trash, locking up the janitor closet and turning in his dirty rags around 12:20 a.m. on April 9, 2022.

3. His wife picked him up from work because he was unable to drive. He went home and started feeling excruciating low back pain but also nausea, vomiting, and had a fever. He did not see a medical provider and stated he wanted to see how he was feeling the following work day and whether he would recover quickly, as Saturday and Sunday were his days off. He did not report his symptoms to his employer at that time as he was concerned with losing his job. He had bed rest the whole weekend. He had not had a problem like this before but he assumed that the symptoms would get better by Monday. On April 9, 2022 his pain level was a 3/10 on a 10-point pain scale.

4. His back started to get worse and on Monday he called the human resource department (HR) and spoke with [Redacted, hereinafter MB], advising her that he would not be in to work as he was feeling sick. At that time, Claimant thought he might have COVID because of the nausea, vomiting and fever as well as back pain. He did not mention that he had any work related injury.

5. Claimant called his employer on multiple occasions to advise he would be unable to work. By April 14, 2022 his back pain was unbearable and he sought medical attention.

6. Claimant went to his primary care provider (PCP), but his regular provider, Dr. Moran was not available, so he was seen by Linsey Durrough, a nurse practitioner at Banner. By that time, his pain level was at around an 8/10 and was excruciating. Ms. Durrough provided him with a medical excuse letter, which he provided to Employer on April 14, 2022.

7. Claimant did not have any history of back pain or problems prior to April 8, 2022.

B. Medical Records:

8. On April 14, 2022 Claimant was evaluated by Nurse Practitioner Lyndsay Dorrough at Banner Heath BMG Health Clinic, Timnath Family Medicine,[2] under the direction of Dr. William Ratliff. Claimant provided a history as follows:

> [Redacted, hereinafter MA] Is a 26 year old male presenting with back pain. This started last week, Friday. Reports was squatting cleaning/installing baseboards at work and developed back pain after 1/2 hour of doing activity. Reports no heavy lifting at work, no popping sensation felt Reports no hx previous injury. Pain starts lower back and works up to mid back. Pain has been 9/10. Aleve did not help the pain. Does not wish to pursue workman's compensation evaluation at this time. States pain makes him feel nauseated. Has not worked since occurred. No radiation down legs, foot drop or incontinence.

Claimant reported pain in his mid and low back as well as nausea due to the pain, but no numbness, tingling or lower extremity symptoms. On exam Nurse Durrogh noted pain in the paraspinal muscles of the thoracic spine on the right side, muscle spasms on the right thoracic and lower back. Pain and limited range of motion (ROM) on extension and with flexion. She diagnosed thoracic back pain, lumbar back pain, and muscle spasms. She prescribed celecoxib, tizanadine, lidocaine patches and x-rays, and recommended he avoid lifting and twisting as well as a trial of heat, Epsom salts and rest. She advised if symptoms persist despite medication she would order physical therapy. She further stated that "If you chose to file workman's compensation claim (we are not covered), recommend filing with your company. We discussed if you file with workman's compensation this visit may not be covered under that insurance." Nurse Dorrough also provided Claimant with a note that stated that "['Claimant] was seen in clinic today. May return to work Monday April 18, 2022."

9. Dr. Curtis Henderson evaluated Claimant on April 18, 2022 at Banner Fort Collins Medical Center Emergency Department regarding his back pain. The history of illness was consistent with Claimant's testimony. On exam, Dr. Henderson found right-sided paravertebral musculature spasm, but most of Claimant's pain was left sided, some sacral discomfort, decreased range of motion due to the pain. Claimant was prescribed Toradol, Norflex IM and Norco. Dr. Henderson recommended rest in reclined position, restrict activity until reevaluated by specialist or PCP, outpatient physical therapy, use ice and heat, no lifting and return to ER if conditions worsen. He excused Claimant from work for one week with a return date of April 25, 2022. The discharge summary specified that Claimant should restrict activities, no lifting, rest in a reclined position, use ice and heat.

10. Respondent Insurer provided a designated provider list (DPL) indicating Claimant could choose from Concentra of Fort Collins, Banner Occupational Health in

[2] Claimant was previously seen at the clinic by Dr. Robert Moran on March 28, 2022 for a general checkup. No concerns were reported regarding low back or thoracic spine issues, though dysthymia (depression) was present.

either Greely or Loveland and UCHealth Occupational Medicine Clinic Harmony Campus. Employer provider a similar one. Neither of these DPLs were dated.

11. Claimant was seen on April 19, 2022 at Banner Occupational Health Clinic in Loveland by Bryan Copas, PA-C, for low to mid back pain radiating to the right shoulder. Claimant complained of fatigue, fever, trouble sleeping, dizziness, shortness of breath, wheezing, nausea, neck pain, scoliosis, joint pain, joint stiffness, joint swelling, muscle cramping, muscle pain, muscle weakness, and back pain. Claimant complained of problems walking, feeling dizzy, difficulty concentrating, and loss of memory. He advised he did not have preexisting conditions. Mr. Copas documented a mechanism of injury consistent with Claimant's testimony at hearing. Claimant reported that the following day (April 9, 2022) after his initial onset of symptoms, he developed nausea and a fever. On exam, Mr. Copas documented decreased range of motion (DROM) and loss of strength of T-spine and L-spine with all planes limited by 5-10 degrees except for rotations bilaterally which was normal. He reported tenderness and response to light touch was diffuse and without localization, he had slight scoliosis of lower T-spine to right (dextroscoliosis), and slight scoliosis of L-spine to left (levoscoliosis)[3], an exaggerated response to slightest touch over the bilateral SI joints as well as diffusely throughout back and posterior right shoulder. Mr. Copas diagnosed dorsalgia, specifically stating that "[T]he cause of this problem is not known at this time., (sic.) and No clear dominant pathology." He recommended restricted duty through April 26, 2022 including no bending, carrying, climbing, crawling, kneeling, lifting, repetitive lifting, pushing, pulling squatting, stooping or twisting. Lastly, he stated that claimant's symptoms should resolve with conservative care, regardless of the cause of the injury. This report was co-signed by Dr. Daniel Bates.

12. On April 19, 2022 [Redacted, hereinafter BP] issued the BP[Redacted] First Report of Injury, which includes a general first report comments. The note seems to have been written by an Employer representative stating as follows:

> The claimant worked on Friday 4/8 and then was off for his scheduled days off on 4/9 and 4/10. On 4/11 the claimant called off for their scheduled shift stating they were starting to get a sore throat and felt sick to their stomach. The claimant then called off again on 4/12 stating they were still feeling awful and would not be in. On 4/13 the claimant called off and stated they were still feeling pretty sick and thought it was the stomach bug. On 4/14 the claimant called in to call off again stating they were still not feeling well at which point they were informed they would need to provide a doctor's note since it had been more than 3 days in a row. They stated they would be providing a doctor's note after their appointment that afternoon. The doctor's note received did not stale anything about the reason for the absence. It just slated the claimant was seen and may return to work on April 18th. On April 18th the claimant stopped by our office to drop off a doctor's note that excused him from work until April 25th at which point in time he stated he was Injured at work and was experiencing back pain. The claimant failed to report this injury in a timely manner and it seems odd/suspicious that the claimant reported they had a stomach bug and then it turned into a back Injury 10 days later.

[3] Mr. Copas read the x-ray films of the T-spine and L-spine as demonstrating dextroscoliosis of lower T-spine and levoscoliosis of L-spine, consistent with his exam.

13. PA-C Andrea Hibma from UCHealth evaluated Claimant on April 21, 2022. Claimant reported that "[T]he injury occurred at approximately 11:20 pm as he was cleaning the baseboards in the hallway of an office" on April 8, 2022. He describe the movements as follows:

> He states that he initially bend at the waist to wipe the baseboards, but then started to crouch/kneel to clean. He states that he does typically clean the baseboards, but "it is not in my job description to clean baseboards in the hall". He typically cleans the baseboards in the lobby and suites only. MA[Redacted] states that he was doing this activity for approximately an hour. He states that about five minutes after he was finished he noticed pain to his entire back and went home.

Claimant reported "severe" ache and numbness to the anterior and posterior lower legs, right greater than left. He reported difficulty sleeping due to discomfort and that he had not returned to work yet. He also advised that he reported his injury to his employer the prior week. Claimant denied any prior back injuries. Ms. Hibma review the medical records of Claimant's visits with his PCP and Banner ER. Following exam, she diagnosed a thoracic myofascial strain and an acute myofascial lumbar strain, recommending physical therapy. Since Ms. Hibma noted that she believed Claimant's condition was related to activities of his employment but was not certain, she recommended a Level II physician evaluate Claimant to make a causation determination.

14. Claimant was evaluated by Paul Braunlin, P.T. on April 22, 2022 in the UCHealth Physical Therapy and Rehabilitation Clinic for his myofascial thoracic and lumbar strains, pursuant to a referral by PAC Andrea Hibman. Mr. Braunlin noted that Claimant was injured on April 8, 2022 when working in stooped position cleaning baseboards. He documented that Claimant was finishing up a dose of prednisone, which was helping, was taking a muscle relaxant, which was helping Claimant sleep. He indicated Claimant had pain levels that would range from a 3/10 to a 10/10, intermittent numbness into his thighs, and multiple functional limitations. On exam, Mr. Braunlin noted that Claimant had no altered gait thought slow, could stand and walk on his heels and toes, had a negative straight leg test, symmetrical quadriceps and Achilles reflexes. Mr. Braunlin provided 25 minutes of therapeutic exercises and Claimant's posture and gait improved.

15. On April 26, 2022 Claimant was evaluated at UCHealth Occupational Medicine Clinic, Harmony Campus, by Kimberly Siegel, M.D. in the discussion portion of her report she stated:

> [Claimant] reports worsening widespread pain involving the mid and lower back pain, right upper back, right neck, bilateral thighs, and right knee 2-1/2 weeks after onset of pain in the context of cleaning baseboards for 1 hour. He attributes this pain to bending and squatting and notes that it is not normally his responsibility to clean the baseboards in the hallway, though he does normally clean them in the lobby and suites. Frequent bending and squatting over 1 hour while performing a job task that he normally does in a different location is a questionable mechanism of injury. It is consistent with muscular soreness or minor muscular strain at most. It is not consistent with worsening diffuse back, neck, and lower extremity pain despite 2.5 weeks of rest (no work since date of injury). It is clear that MA[Redacted] does have thoracolumbar scoliosis (obviously pre-existing and not work-related) which may or may not account for some of his pain. However, I think

> nonorganic cause(s), such as psychosocial factors, are more likely. In my opinion, MA's[Redacted] current symptoms are not probably work-related.

Dr. Siegel discharged Claimant as she stated that "[T]he worker is discharged from care due to having symptomas (sic.) that are not probably work-related." She referred Claimant to consult his PCP or other provider outside the workers' compensation system for further evaluation or treatment. She specifically noted on the WC M-164 form that MMI was unknown at that time.

16. On April 26, 2022 Claimant's counsel wrote to Respondents demanding they continue to pay for Claimant's reasonably necessary and related medical benefits or the right to select a provider would pass to Claimant.

17. Respondents responded by stating that as of April 26, 202 the claim was denied and that no further medical care would be covered.

18. Respondents filed a Notice of Contest on April 27, 2022 denying that Claimant had a work related injury.

19. The following day, on April 28, 2022, Claimant was evaluated by Dr. William Ratliff of Banner Health Fort Collins regarding is lumbar and thoracic pain and scoliosis. Claimant reported that he had a follow up with workers compensation who advised his condition was not work related. Claimant provided a history consistent with his testimony at hearing. Claimant had some paraspinal thoracic and lumbar pain, but no midline tenderness of the thoracic and lumbar region. He had discomfort with rotation in both directions but no loss of ROM on exam. He diagnosed thoracic and lumbar back pain and scoliosis of the thoracolumbar spine. He recommended physical therapy and ordered MRIs.

20. On May 27, 2022 Dr. Ratliff issued a letter that Claimant was unable to return to work until May 31, 2022 with no lifting greater than 10 lbs., no bending over at the back for 4 weeks.

21. On May 19, 2022 Claimant was attended by Dr. John Shonk of the Neurosurgery Office at Banner Health. Dr. Shonk took the following history:

> Patient is a 26-year-old, right-handed, Hispanic male who reports onset of originally thoracic back symptoms and now on his pain diagram shows pain throughout the head, posterior and lateral neck across the shoulder blades and in between them going down into the lower thoracic and lumbar back wrapping around to the lateral rib cage at about the T7-T12 level and then across the obliques as well as the lumbar paraspinous muscles with paresthesias of anterior posterior thighs and right calf. Patient notes that this pain on my scale by his reporting is ranging from 2-10 out of 10 averaging 5 out of 10 is aching to burning to sharp and piercing in character with no radicular symptoms and no decreased sensation in the saddle region or decreased sensation or control of the bowel or bladder. Patient's pain is increased by holding a constant position, rapid movements, bending, twisting, stress as well as changes in weather to cold wet stormy. Patient has difficulty getting to maintaining sleep and to wake up very stiff in the morning.

Dr. Shonk noted that Claimant's injuries were brought on by cleaning baseboards on April 8, 2022.

22. Claimant had MRIs of his thoracic and lumbar spine on May 23, 2022, which were read by radiologist Malay Bhatt, M.D. The thoracic spine MRI showed no abnormalities other than mild a dextroconvex thoracic curvature at the apex of T10. The lumbar spine MRI showed mild diffuse disc bulges at L4-L5 and L5-S1, with trace inferior foraminal narrowing at L4-L5 and left facet hypertrophy; no high-grade canal stenosis and mild left foraminal narrowing at L5-S1, in addition to mild levoconvex lumbar bowing.

23. Claimant returned to see Dr. Shonk on May 31, 2022 regarding his bilateral sacroiliac joint arthropathy and cervical facet arthropathy with myofascial pain syndrome. Claimant complained of pain at a level of 2 out of 10, but also marked the posterior neck upper trapezius shoulders lumbar paraspinous muscles and some paresthesias in the lower extremities. He noted that the pain goes from aching to burning to sharp throbbing and piercing. Claimant had still not completed physical therapy or cervical facet blocks previously recommended. He principally wanted to go over the MRI results to determine if Claimant could return to his regular medium duty job cleaning. Dr. Shunk advised he saw no indication to prevent him from returning to his regular work though still recommended Claimant use good biomechanics and proceed with an SI joint injections.

24. Claimant returned to see Dr. Ratliff due to ongoing back pain on June 10, 2022. He reported Claimant attempted to return to work in housekeeping at a hotel but the pain in his mid and low back increased. He was released from work and advised to return part time the following week. He noted that Celebrex helped control his pain and continued with physical therapy. Dr. Ratliff recommended that when Claimant return to work only to light duty, refraining from bending at the waist and lifting greater than 10 lbs. for the following two weeks.

25. On June 24, 2022 Claimant was seen by Dr. Inhyup Kim at Banner Neurology Clinic for review of seizure history and possible recurrence. Dr. Kim recommended seizure medications. Claimant returned to see Dr. Kim on August 30, 2022 due to further seizures-like activity. Dr. Chelsea Risinger examined Claimant at Banner Fort Collins Medical Center on July 2, 2022 in the emergency room due to a reported seizure in a store, that caused Claimant to fall on his right knee and sprain his right hip. No significant findings and nothing regarding the low back. He was released from care.

26. Claimant was evaluated at Banner Health Fort Collins by Dr. Steven Broman regarding back pain on July 26, 2022. Claimant reported his back pain had gotten better but that he bent down and strained his upper back. Dr. Broman limited Claimant's activities and made a new referral to PT. Claimant followed up on August 22, 2022 with Dr. Benjamin Kober, who documented that Claimant was cleaning cabins the prior day and was walking without golf cart assistance at work. He noted that Claimant had an acute on chronic problem in the lumbar spine. He assessed back muscle spasm though physical exam was "largely unremarkable." Dr. Kober noted that Claimant had "some mild lower thoracic muscle spasticity with tenderness." He prescribed anti- inflammatory and muscle relaxers as well as further physical therapy.

27. Claimant was examined by Dr. Anjmun Sharma on September 12, 2022 for an independent medical evaluation (IME) at Claimant's request. Dr. Sharma documented a history of present illness relatively consistent with Claimants' testimony. He reviewed the records. Upon physical exam, Dr. Sharma noted mild paravertebral muscle spasm but otherwise a normal exam, including no Waddell signs and negative Faber and

Patrick's tests. Dr. Sharma opined that Claimant sustained a work related lumbar strain within a reasonably degree of medical probability from the activities he was performing on April 8, 2022 when he stood up from a stooped position. He noted that this was a common injury that occurs in the workplace. He recommended that Claimant be allowed to continue his physical therapy (PT) of approximately 6 to 12 visits. He did state Claimant did not require an MRI, would be at maximum medical improvement (MMI) at the conclusion of the PT sessions and that his prognosis was excellent.

28. Dr. Douglas Scott issued an IME dated October 18, 2022, as requested by Respondents, related to Claimant's complaints of thoracolumbar spine pain. He reviewed 540 pages of medical records. Dr. Scott noted that Claimant had a thoracolumbar myofascial or muscle strain related to the April 8, 2022 work activities. However, he opined that it resolved by April 28, 2022. He wrote a supplemental report on December 6, 2022. Dr. Scott testified that from his report and records, he believed claimant suffered a temporary and mild myofascial strain of the thoracolumbar spine on April 8, 2022.

29. Other medical records prior to Claimant's date of injury are not relevant to this case as they relate to other medical issues.

C. Claimant's Testimony

30. On April 18, 2022 Claimant went to his employer and completed a work incident report and reported the symptoms he believed were caused by the work he had performed bending and twisting awkwardly to clean the baseboards. He noted that his pain was a 3/10 when he left work on April 9, 2022 but was an 8/10 by the time he completed the accident report. He was assisted in completing the report by his wife, who explained some of the terminology. This was after he had been seen at the emergency room earlier that day by Dr. Henderson.

31. Claimant explained that he was scared of losing his job, as he did not have any other job, needed to support his family and that was why he did not report the injury before this. He explained that he was not able to perform the job at that time due to his pain and back injury. If he could not perform his job, he believed he would have been terminated. Claimant did not return to work for Employer.

32. Claimant stated that the pain became so severe by April 18, 2022 that his wife called an ambulance and he was taken to the emergency room. Claimant was evaluated by Dr. Henderson. Claimant indicated that he advised Dr. Henderson that he was hurt while cleaning baseboards, bending in awkward positions, twisting his back, while feeling discomfort doing the job.

33. He stated that when he was cleared to return to work, his employer would not take him back, so he went to work for a chain hotel in the housekeeping department starting on June 9, 2022. He worked there until approximately June 15, 2022 but the pain due to flare-ups did not allow him to continue that employment.

34. He then found another job with a commercial camping cite company, around the first week of August, also as a housekeeper. He was able to continue that employment until around the end of August. He left because of a back pain flare-up that caused low back pain that did not allow him to perform his work anymore.

35. He started working for a commercial space building around September 1, 2022 performing janitorial tasks that were more varied and allowed him to continue work there through the date of the hearing. This last employer was aware of his back pain and injury, and knew he was being seen by his doctors and physical therapy for back related problems. They were able to accommodate him with different tasks that would not cause the symptoms to flare-up. This job is limited to light vacuuming and doing wipe downs, which allows him to avoid bending and twisting.

36. Claimant stated that since the April 8, 2022 accident he has had flare-ups if he does anything that might exceed his physical abilities, which flare up his condition and cause further temporary flare-ups.

37. Claimant was provided with a designated prover notification letter on April 18, 2022 and he chose to be seen by Dr. Brian Copas at Banner Occupational Health Clinic in Loveland. But after seeing Copas, Claimant was seen by a different provider, Dr. Siegel's assistant, PA Hibma at UCHealth Harmony on April 21, 2022. Then on April 26, 2022 Claimant was seen by Dr. Siegel. When Dr. Siegel opined that Claimant's back issues were not work related, she referred Claimant to be seen by his PCP. He was attended by Dr. Ratliff who referred him to physical therapy.

D. Employer Records and Witness Testimony:

38. The Front Desk Receptionist, [Redacted, hereinafter BR], handled the incoming phone calls, performed general office work, and would send out communications. She would receive the calls from employees that were calling off from work. When she would receive one of these calls, she would write down the pertinent information, the description of who was calling and why, and then would send a message to the employee's manager or to HR. BR[Redacted] spoke with Claimant on April 11, 2022, when he called in to work to advise that he was not well, had a sore throat and was sick to his stomach. BR[Redacted] advised that Claimant did not report a work injury nor that he was having back pain at the time of the call.

39. The next day, April 12, 2022 [Redacted, hereinafter LH], the HR administrative assistant since November 16, 2021, took the call from Claimant when he called off from work again. LH[Redacted] issued an email that Claimant was "still feeling awful and won't be in to work tonight. I have updated his timesheet and asked him to call tomorrow to let us know how he is feeling." She advised that Claimant had not made any statements with regard to his back pain or that he had any work injury at that time.

40. Then on April 13, 2022 Claimant called again and spoke with BR[Redacted], to advise he was "pretty sick" and thought he had the stomach flu. BR[Redacted] advised LH[Redacted] by email. She did recall that Claimant never reported that he had back pain.

41. On April 14, 2022 Claimant spoke with [Redacted, hereinafter AC], the HR Manager for Employer since 2016, who advised the staff, including BR[Redacted] and LH[Redacted], that Claimant had called out sick again. She noted that Claimant had a doctor's appointment that afternoon and advised the staff and Claimant that he had to provide the doctor's note at that point.

42. When LH[Redacted] received the doctor's note, it did not mention a work related injury nor that he was having back pain. When LH[Redacted] would receive any paperwork or medical reports from employees, she would generally scan them and send them to the HR Manager who worked off-site.

43. LH[Redacted] advised the staff by email, when she received the doctor's note, that Claimant could return to work beginning April 18, 2022.

44. The next time BR[Redacted] had any interaction with Claimant was when he went to the office on April 18, 2022 to report the injury. She directed him to LH[Redacted] and had no further interactions with Claimant.

45. On April 18, 2022, when Claimant went into the office to report the injury, LH[Redacted] stated that she printed out the forms and gave Claimant and his wife the workers' compensation paperwork to fill out and the designated provider list (DPL). The DPL was not marked up when she provided it to Claimant.[4] Once the accident report was filled out she scanned and sent the paperwork to AC[Redacted]. The Employee Accident Report stated that

> Team lead had me do lobby baseboards and hallway baseboards on the same night by myself, was rushed to do it. CEO of surgery center mentioned just the lobby baseboards needed to be wiped by the Team. Bent over for a full hour wiping them down. Afterwards my back started getting stressed. April 9th, back pain started from a 3-10. Didn't realize this would get worse until today. I didn't want to lose this job. Back pain is at an 8-10 as of lately.

He noted that his back pain was in his spine, lower back, left and right shoulder.

46. LH[Redacted] advised the staff that Claimant had hurt his back and had a doctor's note that he could return to work beginning Monday, April 25, 2022, after he was evaluated by his PCP.

47. On April 19, 2022 AC[Redacted] completed a "Management Accident Investigation Report." She noted the following:

> [Claimant] was assigned to wipe down baseboards in his area of work after a customer complaint was received that the baseboards were very dusty and hadn't been cleaned in awhile (sic.). [Claimant] states he was bending over/kneeling to wipe/clean all of the baseboards for about an hour of his shift. [Claimant] worked from 5pm-12:40am. [Claimant] said his back felt a little sore at the end of his shift. Then on 4/9 [Claimant] states he was even more sore and by 4/18, his pain was an 8/10 and his entire back hurt.

48. Employer made a record of a conversation with Claimant on April 20, 2022 stating that Claimant had called to update Employer regarding his injury. AC[Redacted], the HR Manager, had spoken to Claimant and Claimant had informed her that he had seen his PCP, and reported that "his back was very messed up and he was possibly going to need surgery or something."

49. On April 26, 2022 LH[Redacted] reported to AC[Redacted], that Claimant and his wife had been into the office on April 18, 2022 and requested to fill out a worker's

[4] LH[Redacted] specifically noted that someone had made notations by the doctors' names in the DPL included in the exhibits for hearing. (Exhibit 11)

compensation form for his back that “he had injured from work.” She had given them the appropriate paperwork to fil out for his injury as well as a copy of the DPL, advising Claimant that he would need to “visit them as well.” LH[Redacted] stated that “I did ask him why he didn’t report it sooner, he said that the back pain started on the 9th, but it wasn’t bad, then it got bad so he decided to report it. He told me he was scared of losing his job if he reported it, but was in too much pain to ignore it.”

50. The HR Manager testified that Claimant was not terminated for reporting an employment related injury. She stated that Claimant provided an “off-work” note releasing him from work through April 25, 2022, but Claimant did not return to work on April 26, 2022, or thereafter and his employment was ultimately terminated at the beginning of June for failing to attend work and communicate regarding his absences. The HR Manager, who was found credible, testified that had Claimant communicated regarding ongoing work restrictions or worker’s compensation treatment, his employment would not have been terminated.

E. Ultimate Findings

51. As found, Claimant is credible with regard to the cause of injury. Claimant has proven by a preponderance of the evidence that he injured his low back and thoracic back in the course and scope of his employment causing a work related injury while bending over and crouching cleaning baseboards for Employer on April 8, 2022. This is supported by Claimant’s testimony as well as medical records from Nurse Durrogh, Dr. Henderson, PA Copas, PA Hibma, and Dr. Anjmun Sharma. Dr. Siegel is specifically not found credible. Her analysis that Claimant has psychological overlay though stating Claimant’s injury may be consistent with muscular soreness or minor muscular strain is contradictory and found not persuasive. Further, her reliance on the fact that Claimant performed the duty of cleaning baseboards in areas he was generally assigned to is not persuasive. Claimant’s testimony that he did not generally perform the additional tasks of cleaning baseboards in the hallways, in addition to his normal tasks was persuasive, especially in light of the fact that this was supposed to be a team duty, but Claimant was advised to perform it quickly and on his own, which he did in the limited time he was given.

52. As found, Claimant was provided a DPL on April 18, 2022 when he made a claim for his work-related injuries. Claimant chose to see medical providers at Banner Occupational Health Clinic in Loveland. PA Copas was the provider that examined Claimant on the April 19, 2022 and Dr. Bates was the co-signer of his report. Neither party indicated that Claimant had been provided with permission to change medical providers at that time, and no change of physician form was provided among the exhibits. As found Claimant was not authorized to change providers, therefore, neither UCHealth Occ. Med. Harmony Clinic nor Dr. Siegel were authorized treating providers. As found, since Dr. Siegel was not an authorized treating provider, the referral she made to Claimant’s PCP, Dr. Ratliff was also not authorized. Neither was Claimant authorized to change providers to PA Hibma at UCHealth Occ Med, Dr. Chunk from Banner Neurology or any other providers that were not within the chain of referral from PA Copas and Dr. Bates.

53. As found, while the physical therapy ordered by PA Hibma was reasonably necessary and related to the April 8, 2022 work related injury, it was not authorized or within the chain of referral.

54. As found, Claimant has proven that he was entitled to medical benefits that are reasonably necessary and related to cure and relieve Claimant from the effects of the work related injury of April 8, 2022.

55. As found, Claimant was placed on medical restrictions by PA Copas and Dr. Bates on April 19, 2022. While other providers have given other restrictions or taken them away, Claimant credibly testified that he was unable to return to janitorial duties that required him to bend and twist, and ultimately found employment on June 1, 2022. Claimant is entitled to temporary total disability benefits from April 18, 2022 through May 31, 2022. Claimant did not return to employment with Employer and failed to communicate with Employer about his absences. Respondents showed Claimant was responsible for his termination and wage loss beginning June 1, 2022.

56. Testimony and evidence inconsistent with the above findings is either not credible and/or not persuasive.

CONCLUSIONS OF LAW

A. Generally

The purpose of the "Workers' Compensation Act of Colorado" is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of any litigation. Section 8-40-102(1), C.R.S. (2021). The facts in a Workers' Compensation case are not interpreted liberally in favor of either the rights of the injured worker or the rights of the employer. Section 8-43-201, *supra*. A Workers' Compensation case is decided on its merits. Section 8-43-201, *supra*.

The ALJ's factual findings concern only evidence that is dispositive of the issues involved. This decision does not specifically address every item contained in the record and the ALJ has not addressed every piece of evidence that might lead to a conflicting conclusion. The ALJ has specifically rejected evidence contrary to the above findings as not credible or unpersuasive. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office*, 5 P.3d 385 (Colo. App. 2000). In general, the claimant has the burden of proving entitlement to benefits by a preponderance of the evidence, including the causal relationship between the work related injury and the medical condition for which Claimant is seeking benefits. Sec. 8-43- 201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not, *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979). Claimant is not required to prove causation by medical certainty. Rather it is sufficient if the claimant presents evidence of circumstances indicating with reasonable probability that the condition for which they seeks medical treatment resulted from or was precipitated by the industrial injury, so that the ALJ may infer a causal relationship between the injury and need for treatment. See *Industrial Commission v. Riley*, 165 Colo. 586, 441 P.2d 3 (1968).

In deciding whether a party has met the burden of proof, the ALJ is empowered "to resolve conflicts in the evidence, make credibility determinations, determine the weight to be accorded to expert testimony, and draw plausible inferences from the evidence." See *Bodensieck v. ICAO*, 183 P.3d 684 (Colo. App. 2008). The ALJ determines the credibility of the witnesses. *Arenas v. ICAO*, 8 P.3d 558 (Colo. App. 2000). Assessing weight, credibility and sufficiency of evidence in a workers' compensation proceeding is the exclusive domain of administrative law judge. *University Park Care Center v. Industrial Claim Appeals Office*, 43, P.3d 637 (Colo. App. 2001). The weight and credibility assigned to evidence is a matter within the discretion of the ALJ. *Cordova v. ICAO*, 55 P.3d 186 (Colo. App. 2002). The same principles for credibility determinations that apply to lay witnesses apply to expert witnesses as well. See *Burnham v. Grant*, 24 Colo. App. 131, 134 P. 254 (1913); see also *Heinicke v. ICAO*, 197 P.3d 220 (Colo. App. 2008). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colorado Springs Motors, Ltd. v. Industrial Commission*, 441, P.2d 21 (Colo. 1968).

The fact finder should consider, among other things, the consistency, or inconsistency of the witness's testimony and actions, the reasonableness, or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness, whether the testimony has been contradicted, and bias, prejudice, or interest. See *Prudential Ins. Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); *Kroupa v. Industrial Claim Appeals Office*, 53 P.3d 1192 (Colo. App. 2002). A workers' compensation case is decided on its merits. Sec. 8-43-201, C.R.S.

B. Compensability

To receive compensation or medical benefits, a claimant must prove they are a covered employee who suffered an injury arising out of and in the course of employment. Section 8-41-301(1); *Faulkner v. Industrial Claim Appeals Office*, 12 P.3d 844 (Colo. App. 2000). The claimant must also prove by a preponderance of the evidence that that the injury or occupational disease was proximately caused by the performance of such service. Section 8-41-301(1)(b) & (c), C.R.S. The question of whether the claimant met the burden of proof is one of fact for determination by the ALJ. *City of Boulder v. Streeb*, 706 P.2d 786 (Colo. 1985).

A claimant seeking benefits for an occupational disease must establish the existence of the disease and that it was directly and proximately caused by the claimant's employment or working conditions. *See, Cowin & Co. v. Medina,* 860 P.2d 535 (Colo. App. 1992). The test for distinguishing between an accidental injury and occupational disease is whether the injury can be traced to a particular time, place, and cause. *Campbell v. IBM Corporation*, 867 P.2d 77, 81 (Colo. App. 1993).

The Act imposes additional requirements for compensability of a claim based on an occupational disease. A compensable occupational disease must meet each element of the four-part test mandated by Section 8-40-201(14), C.R.S. that defines "occupational disease" as:

> [A] disease which results directly from the employment or the conditions under which work was performed, which can be seen to have followed as a natural incident of the work and as a result of the exposure occasioned by the nature of the employment, and which can be fairly traced to the employment as a proximate cause and which does not come from a hazard to which the worker would have been equally exposed outside of the employment.

This section imposes additional proof requirements beyond that required for an accidental injury by adding the "equal exposure" element, the "peculiar risk" test, which requires that the hazards associated with the vocation must be more prevalent in the work place than in everyday life or in other occupations. *Anderson v. Brinkhoff*, 859 P.2d 819 (Colo. 1993). The employment must expose the claimant to the risk causing the disease "in a measurably greater degree and in a substantially different manner than are persons in employment generally." *Id.* at 824. The conditions of employment need not be the sole cause of the disease, but must cause, intensify, or aggravate the condition "to some reasonable degree." *Id*. *Id*. at 824. If the condition resulted from multiple or concurrent causes, the respondents may mitigate their liability by proving an apportionment of benefits. *Id*. If the claimant proves that the hazards of employment caused, intensified, or aggravated the disease process "to some reasonable degree," the burden shifts to the respondents to prove the existence of nonindustrial causes and the extent to which they contribute to the disability or need for treatment. *Cowin & Co. v. Medina*, 860 P.2d 535 (Colo. App. 1992); *Vigil v. Holnam, Inc*., W.C. No. 4-435-795 & 4-530-490 (August 31, 2005).

The mere fact a claimant experiences symptoms while performing work does not require the inference that there has been an aggravation or acceleration of a preexisting condition. *See Cotts v. Exempla, Inc.,* W.C. No. 4-606-563 (ICAP, Aug. 18, 2005). Rather, the symptoms could represent the "logical and recurrent consequence" of the pre-existing condition. *See F.R. Orr Construction v. Rinta,* 717 P.2d 965 (Colo. App. 1985); *Chasteen v. King Soopers, Inc.*, W.C. No. 4-445-608 (ICAP, April 10, 2008). Simply because a claimant's symptoms arise after the performance of a job function does not necessarily create a causal relationship based on temporal proximity. See *Scully v. Hooters of Colorado Springs,* W.C. No. 4-745-712 (ICAP, October 27, 2008).

The Colorado Workers' Compensation Medical Treatment Guidelines (MTGs) are regarded as accepted professional standards for care under the Workers' Compensation Act. *Rook v. Industrial Claim Appeals Office*, 111 P.3d 549 (Colo. App. 2005). The statement of purpose of the MTG is as follows: "In an effort to comply with its legislative charge to assure appropriate medical care at a reasonable cost, the director of the Division has promulgated these 'Medical Treatment Guidelines.' This rule provides a system of evaluation and treatment guidelines for high cost or high frequency categories of occupational injury or disease to assure appropriate medical care at a reasonable cost." WCRP 17-1(A). In addition, WCRP 17-5(C) provides that the MTGs "set forth care that is generally considered reasonable for most injured workers. However, the Division recognizes that reasonable medical practice may include deviations from these guidelines, as individual cases dictate."

The Division has adopted the MTGs to advance the statutory mandate to assure quick and efficient delivery of medical benefits to injured workers at a reasonable cost to

employers. W.C.R.P. Rule 17, Exhibit 1 effective as of April 30, 1993 and most recently updated effective January 30, 2022. Under Sec. 8-42-101(3)(b) and WCRP 17-2(A), medical providers must use the MTGs when furnishing medical treatment. The ALJ may consider the MTGs as an evidentiary tool but is not bound by the MTGs when determining if requested medical treatment is reasonably necessary or work-related. Section 8-43-201(3); *Logiudice v. Siemans Westinghouse*, W.C. No. 4-665-873 (January 25, 2011). While it is appropriate for an ALJ to consider the MTG while weighing evidence, the MTGs are not definitive. *See Jones v. T.T.C. Illinois*, Inc., W.C. No. 4-503-150 (May 5, 2006); *aff'd Jones v. Industrial Claim Appeals Office* No. 06CA1053 (Colo. App. March 1, 2007) (not selected for publication) (it is appropriate for the ALJ to consider the MTG on questions such as diagnosis, but the MTG are not definitive).

As found, Claimant has proven by a preponderance of the evidence that his thoracic and lower back injuries were a direct result of his job functions as a janitor for Employer and required medical treatment. Claimant suffered a work-related injury to his mid and low back on April 8, 2022 within the course and scope of his employment.

C. Medical Benefits

Respondents are liable for authorized medical treatment reasonably necessary to cure and relieve an employee from the effects of a work-related injury. Section 8-42-101, C.R.S.; *Sims v. Industrial Claim Appeals Office*, 797 P.2d 777 (Colo. App. 1990). Nevertheless, the right to workers' compensation benefits, including medical benefits, arises only when an injured employee establishes by a preponderance of the evidence that the need for medical treatment was proximately caused by an injury arising out of and in the course of the employment. Sec. 8-41-301(1)(c), C.R.S.; *Faulkner v. Industrial Claim Apps. Office,* 12 P.3d 844, 846 (Colo. App. 2000). Claimant must establish the causal connection with reasonable probability but need not establish it with reasonable medical certainty. *Ringsby Truck Lines, Inc. v. Industrial Commission*, 491 P.2d 106 (Colo. App. 1971); *Industrial Commission v. Royal Indemnity Co.,* 236 P.2d 293 (1951). A causal connection may be established by circumstantial evidence and expert medical testimony is not necessarily required. *Industrial Commission v. Jones*, 688 P.2d 1116 (Colo. 1984); *Industrial Commission v. Royal Indemnity Co., supra*, 236 P.2d at 295-296. All results flowing proximately and naturally from an industrial injury are compensable. See *Standard Metals Corp. v. Ball,* 172 Colo. 510, 474 P.2d 622 (1970).

As found, Claimant has shown he was injured within the course and scope of his employment with Employer sustaining a compensable injury to his low and thoracic spine for which he requires medical care that is reasonably necessary and related to the injuries. Respondents are liable for the authorized medical care within the chain of referral.

D. Authorized Treating Physician

Section 8-43-404(5)(a), C.R.S. permits an employer or insurer to select the treating physician in the first instance. *Yeck v. Indus. Claim Appeals Office*, 996 P.2d 228 (Colo. App. 1999). However, the Colorado Workers' Compensation Act requires that respondents must provide injured workers with a list of at least four designated treatment

providers. §8-43-404(5)(a)(I)(A), C.R.S. Section 8-43-404(5)(a)(I)(A), C.R.S. states that, if the employer or insurer fails to provide an injured worker with a list of at least four physicians or corporate medical providers, "the employee shall have the right to select a physician." W.C.R.P. Rule 8-2 further clarifies that once an employer is on notice that an on-the-job injury has occurred, "the employer shall provide the injured worker with a written list of designated providers." W.C.R.P. Rule 8-2(E) additionally provides that the remedy for failure to comply with the preceding requirement is that "the injured worker may select an authorized treating physician of the worker's choosing." An employer is deemed notified of an injury when it has "some knowledge of the accompanying facts connecting the injury or illness with the employment, and indicating to a reasonably conscientious manager that the case might involve a potential compensation claim." *Bunch v. industrial Claim Appeals Office,* 148 P.3d 381, 383 (Colo. App. 2006). Furthermore, W.C.R.P. 8-3(A) specifies that "[w]hen emergency care is no longer required the provisions of section 8-2 of this rule apply."

Authorization to provide medical treatment refers to a medical provider's legal authority to treat the claimant with the expectation that the provider will be compensated by the insurer for treatment. *Bunch v. Industrial Claim Appeals Office,* 148 P.3d 381 (Colo. App. 2006); *One Hour Cleaners v. Industrial Claim Appeals Office,* 914 P.2d 501 (Colo. App. 1995). Authorized providers include those medical providers to whom the claimant is directly referred by the employer, as well as providers to whom an ATP refers the claimant in the normal progression of authorized treatment. *Town of Ignacio v. Industrial Claim Appeals Office,* 70 P.3d 513 (Colo. App. 2002); *City of Durango v. Dunagan,* 939 P.2d 496 (Colo. App. 1997). Whether an ATP has made a referral in the normal progression of authorized treatment is a question of fact for the ALJ. *Kilwein v. Indus. Claim Appeals Office,* 198 P.3d 1274, 1276 (Colo. App. 2008); *In re Bell*, WC 5-044-948-01 (ICAO, Oct. 16, 2018). If the claimant obtains unauthorized medical treatment, the respondents are not required to pay for it. *In Re Patton*, WC's 4-793-307 & 4-794-075 (ICAO, June 18, 2010); *see Jewett v. Air Methods Corporation,* WC 5-073-549-001 (ICAO, Mar. 2, 2020).

As found, was attended at the Banner Fort Collins Medical Center Emergency Department on April 18, 2022 for urgent medical care. This provider is authorized under the emergency care provision.

However, as further found, Claimant selected a provider on the DPL provided by Employer on April 18, 2022. Claimant was attended by Bryan Copas, PA-C, on April 19, 2022 at Banner Occupational Health Clinic in Loveland, supervised by Dr. Daniel Bates. The report recommended conservative care. Claimant proceeded with physical therapy which was reasonably necessary and related to the injury. Claimant failed to show that PA Hibma and Dr. Siegel were authorized treating providers within the chain of referral. Neither has Claimant shown that he was authorized to change providers to other providers including Dr. Ratliff. Claimant's authorized treating provider is Banner Occupational Health Clinic, Dr. Bates and PA Copas.

E. Average Weekly Wage

An ALJ may choose from two different methods set forth in Section 8-42-102, C.R.S. to determine a claimant's average weekly wage (AWW). The first method, referred to as the " default provision," provides that an injured employee's AWW "be calculated upon the monthly, weekly, daily, hourly, or other remuneration which the injured or deceased employee was receiving at the time of injury." Sec. 8-42-102(2), C.R.S. The default provision in Section 8-42-102(2), C.R.S. provides compensation is payable based on the employee's average weekly earnings "at the time of the injury." The statute sets forth several computational methods for workers paid on an hourly, salary, per diem basis, etc. But Sec. 8-42-102(3) gives the ALJ wide discretion to "fairly" calculate the employee's AWW in any manner that is most appropriate under the circumstances. The entire objective of AWW calculation is to arrive at a "fair approximation" of the claimant's actual wage loss and diminished earning capacity because of the industrial injury. *Campbell v. IBM Corp*., 867 P.2d 77 (Colo. App. 1993); *Coates, Reid & Waldron v. Vigil*, 856 P.2d 850 (Colo. 1993); *Ebersbach v. United Food & Commercial Workers Local No. 7,* W.C. No. 4-240-475 (ICAO May 7, 1997); *Vigil v. Industrial Claim Appeals Office*, 841 P.2d 335 (Colo.App.1992).

As found, the parties stipulated to an average weekly wage of $507.59, which is accepted and adopted as Claimant's AWW.

F. Temporary Disability Benefits and Voluntary termination

To prove entitlement to temporary total disability (TTD) benefits, Claimant must prove that the industrial injury caused a disability lasting more than three work shifts, that he left work as a result of the disability, and that the disability resulted in an actual wage loss. *PDM Molding, Inc. v. Stanberg,* 898 P.2d 542 (Colo. 1995). Section 8-42-103(1)(a), C.R.S., requires Claimant to establish a causal connection between a work-related injury and a subsequent wage loss in order to obtain TTD benefits. *PDM Molding, Inc. v. Stanberg, supra*. There is no statutory requirement that a claimant must present medical opinion evidence from of an attending physician to establish his physical disability. Rather, the Claimant's testimony alone is sufficient to establish a temporary "disability." *Lymburn v. Symbois* Logic, 952 P.2d 831 (Colo. App. 1997).

The termination statutes, Sections 8-42-105(4) and 8-42-103(1)(g), C.R.S. both provide that in cases "where it is determined that a temporarily disabled employee is responsible for termination of employment, the resulting wage loss shall not be attributable to the on-the-job injury."

As found, Claimant showed by a preponderance of the evidence that he was entitled to temporary disability benefits. Claimant was initially taken off work and testified that he was unable to return to full employment due to his work restrictions and his back pain. Claimant has shown by a preponderance of the evidence that he was off work from the date he reported the incident on April 18, 2022 through May 31, 2022.

Further, Claimant testified that he was able to return to modified work on June 1, 2022. Respondents argued that Claimant would have been accommodated had Claimant remained in contact with Employer and that Employer did not terminate the employment but that Claimant failed to show upon release to employment as of June 1, 2022. The

HR manager was credible in her testimony that Claimant was at fault for his wage loss and, but for his actions, Employer would have continued to employ Claimant. Respondents have shown by a preponderance of the evidence that Claimant was at fault for his wage loss as of June 1, 2022.

ORDER

IT IS THEREFORE ORDERED:

1. Claimant has shown that he sustained a compensable work related injury on April 8, 2022 while in Employer's employment.

2. Respondents shall pay for reasonably necessary and related medical benefits for his thoracic and low back strain.

3. Dr. Bates and PA Copas at Banner Occupational Medicine are Claimant's authorized treating providers.

4. Claimant has shown he is entitled to temporary total disability benefits beginning April 18, 2022 through May 31, 2022.

5. All matters not determined here are reserved for future determination.

If you are dissatisfied with the ALJ's order, you may file a Petition to Review the order with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the ALJ; and (2) That you mailed it to the above address for the **Denver Office of Administrative Courts**. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

DATED this 22rd day of February, 2023.

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. 5-199-642-002

ISSUES

I. Whether Claimant established by a preponderance of the evidence that she sustained work related injuries in the course and scope of her employment on February 16, 2022.

IF CLAIMANT SUSTAINED A WORK RELATED INJURY, THEN:

II. Whether Claimant has proven by a preponderance of the evidence that she established a refusal to treat for nonmedical reasons and the right to select a physician passed to Claimant, who selected Karin Gallup, N.P. at La Casa of Denver Health.

PROCEDURAL HISTORY

Claimant filed an Application for Hearing on May 2, 2022 on the issues of compensability, medical benefits, AWW and TTD benefits from February 21, 2022 until terminated by law.

Respondents filed a Response to Claimant's May 2, 2022 Application for Hearing on June 14, 2022. No additional issues were listed.

Following the October 11, 2022 hearing, this ALJ issued Findings of Fact Conclusions of Law and Order dated October 31, 2022, which was served upon the parties on the same day.

Respondents filed a timely Petition to Review on November 18, 2022 and requested a transcript of the hearing. The transcript was filed with the OAC on January 5, 2023 and a briefing schedule issued on January 12, 2023. Respondents filed a Brief in Support of Petition to Review on February 1, 2023. Claimant filed a Reply Brief on February 14, 2023. This Supplemental Findings of Fact, Conclusions of Law and Order follows.

STIPULATIONS OF THE PARTIES

The parties stipulated that, if the claim was deemed compensable, then the average weekly wage was $800.00 based on $20.00 per hour, 40 hours a week. The temporary total disability benefits (TTD) rate would be $533.33.

The parties further stipulated that, if the claim was deemed compensable, then Claimant would be entitled to TTD from February 21, 2022 until terminated by law. The parties agreed that, if TTD was paid, Respondents were entitled to an offset for short-term disability benefits beginning February 21, 2022 through August 19, 2022 in the

amount of $250.00 per week, which would result in a payment of TTD of $283.33 per week while the offset lasted.

The parties also agreed that Concentra was an authorized treating provider.

The stipulations of the parties are accepted by this ALJ and shall become part of the order in this matter.

FINDINGS OF FACT

Based on the evidence presented at hearing, the ALJ enters the following findings of fact:

1. Claimant was 45 years old at the time of the hearing. Claimant was a machine operator for Employer since approximately August of 2021. She began her work through a temporary agency then was hired by Employer permanently in January 2022. She would fill the machine casings with molding powder. After the material was "cooked" she would take them out of the casings and trim the remnants of plastic parts with a tool that had a wood handle and a metal blade of approximately three to four inches long and about two inches wide. The blade was provided by her employer. She would generally start her work at 3:00 p.m. and work to 11:00 p.m.

2. Claimant had a slip and fall injury while at work for a prior employer, a hospital, where she performed housekeeping duties. She injured her low back, but not in the same way as in this case. It was higher up on her spine. She was prescribed a steroid that help her problem really well. The injury resolved and she was released from care.[1]

3. On December 2, 2019 Claimant was seen at Denver Health for a UTI and complained of back pain. The provider suspected muscle strain but made no recommendations nor provided treatment.

4. In December 2020 Claimant had a slip and fall on snow and injured her left foot. The fracture was reduced in the emergency department and she wore a cast for several weeks. She was again evaluated on December 17, 2020 for ankle pain and x-rays. There was no mention of a low back problem during this visit. Further, of note, there have been several left foot incidents as far back as September 12, 2017, including an old left fifth metatarsal fracture of unknown age.

5. Claimant was assessed by telehealth on January 8, 2021 due to complaints of lower back problems. However, those complaints clearly resolved by the next visit as there was no mention in the February 1 or February 2, 2021 follow ups and evaluations.

6. On September 17, 2021 Claimant injured her left knee, which occurred while working for the temporary agency, who had placed Claimant at Employer's business to perform work as a machine operator. She last treated for that claim on March 9, 2022 for the last time in follow up of a third viscosupplementation injection. Claimant has not

[1] Claimant did not recall the date and no records were provided for this event as it was remote.

sought any further care for that left knee injury. There was no mention of the low back pain.

7. While working for Employer, Claimant would take her breaks in her car because she would frequently be making personal phone calls on one of her 15-minute breaks and she did not like to do that in the breakroom. The employees were allowed to take their breaks anywhere on the Employer's premises. Claimant's car was required to be parked in the Employer's parking lot, which was enclosed by a fence and part of Employer's premises.

8. On February 16, 2022, while working for Employer, Claimant was taking her break and she slipped on the snow, without warning. She landed hard on her buttocks. She had been going to her car when the fall happened. She has had pain in her lumbar region and her buttocks since that time and the pain seemed to be deep in the bone at the base of her spine or buttocks, causing pain to radiate to her low back and cause muscle spasms. She stated that she sat in her car a while on her break. She had her tool in her back pocket, which she generally takes out when she sits in her car. After her break, she got out of her car to return to work, forgetting her blade. When she realized she left her blade in her car, she returned to get it to continue working.

9. Claimant testified she told the man, who was training her on the machine she was working at, about her fall while on break on February 16, 2022. She laughed it off but her pain slowly increased during her shift. She mentioned her fall again, letting him know her back pain was getting worse, but he did not seemed to care about the incident

10. As the days went on, the pain in her buttocks and low back continued to worsen. Claimant called the HR Department to advise the HR representative about the injury and requested medical attention. Claimant did not hear back from the HR representative on where Employer wanted her to go for care so she determined to go to an urgent care facility for treatment as her low back pain continued to worsen.

11. On February 22, 2022 Claimant presented at Federico F. Pena Family Health Center – Urgent Care at Denver Health for an evaluation of her low back pain, where she was treated by Amy N. Quinones, N.P. Nurse Quinones treated Claimant for "acute back pain" and took Claimant off of work from February 22, 2022 to February 24, 2022.

12. When Claimant took the note from Nurse Quinones to Employer, she was advised she could not return to work until she was fully recovered. Her Employer did not contact her after this conversation to follow up or provide her with a designated provider list.

13. On March 4, 2022 Claimant returned to Denver Health where she was evaluated by Alicen M. Nelson, M.D., whose assessment was that of "bilateral low back pain without sciatica occurring after a fall three weeks ago."

14. At the March 4, 2022 visit, Claimant had two trigger point injections in the low back area. The working diagnosis was that of chronic bilateral low back pain without sciatica.

15. On March 9, 2022 Employer filed a Workers Compensation "First Report of Injury or Illness" (FROI) stating that Claimant had injured herself on February 16, 2022, that the time of the injury occurred at approximately 6:00 p.m., and that Employer was notified on February 16, 2022 of the injury. The report documented that Claimant had "slipped on the snow, fell on her bottom, hurting her back." The report was filed by the HR manager and indicated that Claimant had reported the injury to another Employer representative (PC) on February 16, 2022.[2]

16. On March 11, 2022 Claimant had her first visit with authorized treating physician ("ATP") Theodore Villavicencio, M.D. at the Concentra Medical Centers in Lakewood where ATP Villavicencio took a history of injury as follows:

> Reason for Visit
> Chief Complaint: The patient presents today with new injury, slip and fall on 02/16/2022 injured back, reports that she has pain in back and night pain.

At that visit, Dr. Villavicencio assessed that Claimant had a lumbar contusion and a strain of the lumbar region. He started her on a muscle relaxer, and provided her work restrictions of lifting 10 lbs. and pushing/pulling up to 20 lbs. with no forward bending, noting that she should be working only sedentary office type work. He gave the opinion that Claimant's objective findings were "consistent with history and/or work-related mechanism of injury/illness." In fact, all the Work Status reports from March 11, 2022 through April 19, 2022 all show the same causation analysis. Dr. Villavicencio also indicated that MMI was unknown.

17. On March 16, 2022 Claimant started physical therapy at the Concentra offices in Lakewood with Christi Galindo, P.T. This was the first of six visits programed. She documented Claimant's back pain was 3/10 but could rise to about a 7/10. The impairments identified during the examination prevented Claimant from performing her standard activities of daily living and/or work activities. Ms. Galindo noted abnormal range of motion, pain, abnormal muscle performance and gait. She proceeded with therapeutic exercises, neuromuscular reeducation, manual therapy and therapeutic activities. The treatment was provided by Austin Lyons SPT under Ms. Galindo's supervision.

18. Respondents filed a Notice of Contest on March 18, 2022, stating that the injury or illness was not work related.

19. On March 25, 2022 Claimant returned to Concentra and this time was evaluated by ATP Autumn Schwed, D.O. who noted that Claimant indicated that physical therapy "is not helping, but got cupping which has helped" and that Claimant was 25% of the way to meeting the physical requirements of her job. Dr. Schwed referred Claimant to Dr. Samuel Chan, a physiatrist, for an evaluation.

20. Dr. Schwed also referred Claimant for an MRI and noted that the indications were for back pain and sacrococcygeal disorder. The MRI was performed on April 1, 2022. It was read by Dr. Scot E. Campbell as showing a disc bulge at the L3-4 level with left paracentral small extrusion, mild facet arthropathy, mild left subarticular recess

[2] This ALJ infers that the trainer advised the HR representative despite Claimant's impression that he did not seem to care about the fall.

stenosis, and mild right neural foraminal stenosis. He noted a central disc protrusion at L4-5 with mild facet arthropathy, mild right subarticular recess stenosis and mild right neural foraminal stenosis. He also noted a right paracentral protrusion at the L5-S1 level with mild facet arthropathy. Dr. Campbell concluded that Claimant had degenerative disc disease and facet arthropathy without high-grade stenosis or nerve root impingement.

21. Claimant was evaluated by Dr. Samuel Chan on April 12, 2022.[3] Claimant described pain in the low back spine as well as radiation into the groin but not the lower extremities. On exam, he noted that Claimant's pain was centered around the PSIS and the sacral sulci. Claimant was also positive for Patrick's, Gaenslen's, FABER's, and Yeoman's[4] testing. Dr. Chan concluded that Claimant's exam was most consistent with sacroiliac joint dysfunction and recommended sacroiliac joint injections should her symptoms persist. He also diagnosed lumbar contusion and strain of the lumbar region. He indicated Claimant was to return in four weeks. He also noted that objective findings were consistent with the work-related mechanism of injury.

22. On April 19, 2022 Claimant returned to Concentra where she was evaluated this time by Chelsea Rasis, PA-C. ATP Rasis noted that the muscle relaxer (Flexeril) helped at night with the low back pain and that cupping therapy was also providing temporary relief, stating that Claimant had more sessions scheduled. ATP Rasis documented that Dr. Chan had offered Claimant cortisone injections and that Claimant was looking into the side effects. ATP Rasis ordered six visits of chiropractic care and six acupuncture sessions. ATP Rasis continued the prior sedentary restrictions.

23. Claimant's last visit with Concentra was on May 13, 2022, when Claimant was released from care by PA Rasis required more treatment as a "Specialist Referral" was to "Consult and Treat," that Claimant should "continue medications as directed" and that Claimant's "work restrictions" were "to be managed by her PCP" (primary care provider).

24. Claimant testified that PA Rasis advised Claimant to go to her PCP for further care as the claim had been denied by the Insurer. Rasis did not allow Claimant to return to Concentra for further care. Rasis further advised Claimant that Claimant's PCP would have to provide any further medical care, such as the injections, work restrictions and that Claimant was being released to her PCP's care. As found, Concentra, by and through PA Rasis, was no longer willing to treat Claimant for her work-related injuries due to the denial of the claim by insurer.

25. Claimant started physical therapy on June 9, 2022 at Select Physical Therapy pursuant to Karen Gallup's referral. Jon Baird, PT noted that Claimant had a slip and fall in February 2022 and landed on her "butt." He documented that Claimant had had lumbar back pain, left greater than right, ever since then. Mr. Baird noted that Claimant ambulated slowly with a stiff spine pattern, a slight flexed trunk and would stand with an increased lumbar lordosis. He provided exercise education and training, as well

[3] Pages are missing from this report.
[4] Medical tests used to detect musculoskeletal abnormalities and inflammation of the lumbar vertebrae, but more commonly the sacroiliac joint.

as manual intervention modalities. He recommended ongoing therapy for a period of 3 months.

26. Claimant's return visit to Denver Health, documented in the evidence presented, was for June 23, 2022, following Concentra's refusal to continue to treat Claimant at Concentra Medical Centers. She was evaluated by Morris M. Askenazi, M.D. who indicated that Claimant continued to have significant pain and limitations and would be unable to work at that time. He ordered continued physical therapy for the following two months. He stated Claimant should be on work restrictions of no lifting more than 5 pounds overhead, no repetitive bending, limited reaching/stretching, and anticipated the limitations to continue for the following two months.

27. Following Concentra's refusal to treat, Claimant's counsel wrote to Respondents indicating that if Claimant could not get follow-up care at Concentra, Claimant was requesting to change physician to Karin Gallup, N.P. at La Casa-Denver Health, based on that refusal to treat. Based on the letter to Respondents' counsel dated June 24, 2022, a copy of the May 13, 2022 Work Activity Status Report was provided to Respondents on May 17, 2022. Respondents failed to act on this information. Further, on June 24, 2022 Claimant's counsel advised Respondents' counsel that Claimant was "treating with Karin Gallup at La Casa. [W]e are designating her as a treating physician unless we hear differently from you."[5] No credible evidence indicated that Respondents provided a new designated provider following either communication.

28. Claimant credibly testified that she had had previous episodes of back pain, which typically resolved quickly. As found, immediately prior to February 16, 2022 Claimant had no ongoing medical care for back pain and was symptom free.

29. As found, there was a medical record from Denver Health which references back pain on January 8, 2021 and resulted from the fall where Claimant injured her left ankle. At the follow-up visit on February 1, 2021, however, there was no reference to back pain, but rather only to the old metatarsal fracture of Claimant's left foot. Claimant credibly testified that she had no problems with her low back immediately prior to the work injury.

30. Claimant is found to be credible and persuasive by the ALJ. As found, Claimant was injured in the course and scope of her employment when she slipped and fell in Employer's parking lot while on her break. This is specifically not considered a deviation as Claimant was allowed to take her breaks on any area of Employer's premises and the parking lot was within Employer's premises.

31. As found, Claimant injured her low back, coccygeal area as well as her SI joint, causing a need for medical care and disability benefits.

32. Also as found, from the documents in evidence, Claimant's last appointment at Denver Health was on July 19, 2022. She was advised that they anticipated proceeding with steroid injections into her lumbar spine. She was advised that she needed to await the scheduling of the injections but had not received a call back with the scheduled

[5] It is inferred that the statement in the letter that "*Ms. Rasis* is treating with Karen Gallup at La Casa" is in error and that it is Claimant that was treating with her.

appointment to the date of the hearing. As found, Claimant continues to require medical attention related to her compensable work related injury of February 16, 2022.

33. Further, as found, Concentra refused to continue seeing her and Respondents did not provide a new designated provider willing to provide further medical care for the work related injuries. Claimant has shown that the right to select a medical provider passed to Claimant, that Claimant selected Nurse Gallup at Denver Health and that the Denver Heath system, including Nurse Gallup are authorized treating providers.

34. Claimant has remained under temporary work restrictions which the employer could not accommodate, but have paid some benefits to Claimant, as noted by the stipulation of the parties, through the Employer funded short-term disability benefits for the period of February 21, 2022 through August 19, 2022. Claimant continued to be off work in accordance with documentation from the medical providers at Denver Health.

35. Any evidence or testimony not consistent with the above findings is specifically found not relevant, credible or not persuasive.

CONCLUSIONS OF LAW

A. Generally

The purpose of the "Workers' Compensation Act of Colorado" is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of any litigation. Section 8-40-102(1), C.R.S. (2021). The facts in a Workers' Compensation case are not interpreted liberally in favor of either the rights of the injured worker or the rights of the employer. Section 8-43-201, *supra*. A Workers' Compensation case is decided on its merits. Section 8-43-201, *supra*.

The ALJ's factual findings concern only evidence that is dispositive of the issues involved. This decision does not specifically address every item contained in the record and the ALJ has not addressed every piece of evidence that might lead to a conflicting conclusion. The ALJ has specifically rejected evidence contrary to the above findings as not credible or unpersuasive. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office*, 5 P.3d 385 (Colo. App. 2000). In general, the claimant has the burden of proving entitlement to benefits by a preponderance of the evidence, including the causal relationship between the work related injury and the medical condition for which Claimant is seeking benefits. Sec. 8-43- 201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not, *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979). Claimant is not required to prove causation by medical certainty. Rather it is sufficient if the claimant presents evidence of circumstances indicating with reasonable probability that the condition for which they seeks medical treatment resulted from or was precipitated by the industrial injury, so that the ALJ may infer a causal relationship between the injury and need for treatment. See *Industrial Commission v. Riley*, 165 Colo. 586, 441 P.2d 3 (1968).

In deciding whether a party has met the burden of proof, the ALJ is empowered "to resolve conflicts in the evidence, make credibility determinations, determine the weight to be accorded to expert testimony, and draw plausible inferences from the evidence." See *Bodensieck v. ICAO*, 183 P.3d 684 (Colo. App. 2008). The ALJ determines the credibility of the witnesses. *Arenas v. ICAO*, 8 P.3d 558 (Colo. App. 2000). Assessing weight, credibility and sufficiency of evidence in a workers' compensation proceeding is the exclusive domain of administrative law judge. *University Park Care Center v. Industrial Claim Appeals Office*, 43, P.3d 637 (Colo. App. 2001). The weight and credibility assigned to evidence is a matter within the discretion of the ALJ. *Cordova v. ICAO*, 55 P.3d 186 (Colo. App. 2002). The same principles for credibility determinations that apply to lay witnesses apply to expert witnesses as well. See *Burnham v. Grant*, 24 Colo. App. 131, 134 P. 254 (1913); see also *Heinicke v. ICAO*, 197 P.3d 220 (Colo. App. 2008). To the extent expert testimony is subject to conflicting interpretations, the ALJ may resolve the conflict by crediting part or none of the testimony. *Colorado Springs Motors, Ltd. v. Industrial Commission*, 441, P.2d 21 (Colo. 1968).

The fact finder should consider, among other things, the consistency, or inconsistency of the witness's testimony and actions, the reasonableness, or unreasonableness (probability or improbability) of the testimony and actions; the motives of the witness, whether the testimony has been contradicted, and bias, prejudice, or interest. See *Prudential Ins. Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); *Kroupa v. Industrial Claim Appeals Office*, 53 P.3d 1192 (Colo. App. 2002). A workers' compensation case is decided on its merits. Sec. 8-43-201, C.R.S.

B. Compensability

For a claim to be compensable under the Act, a claimant has the burden of proving that she suffered a disability that was proximately caused by an injury arising out of and within the course and scope of employment. Sec. 8-41-301(1)(c) C.R.S.; *In re Swanson,* W.C. No. 4-589-645 (ICAO, Sept. 13, 2006). Section 8-41-301(1)(c), C.R.S. requires that an injury be "proximately caused by an injury or occupational disease arising out of and in the course of the employee's employment." Thus, the claimant is required to prove a direct causal relationship between the injury and the disability and need for treatment. However, the industrial injury need not be the sole cause of the disability if the injury is a significant, direct, and consequential factor in the disability. *See Subsequent Injury Fund v. Industrial Claim Appeals Office,* 131 P.3d 1224 (Colo. App. 2006); *Joslins Dry Goods Co. v. Industrial Claim Appeals Office,* 21 P.3d 866 (Colo. App. 2001).

Proof of causation is a threshold requirement that an injured employee must establish by a preponderance of the evidence before any compensation is awarded. *Faulkner v. Indus. Claim Appeals Off.,* 12 P.3d 844, 846 (Colo. App. 2000); *Singleton v. Kenya Corp.,* 961 P.2d 571, 574 (Colo. App. 1998). The question of causation is generally one of fact for determination by the Judge. *Faulkner,* 12 P.3d at 846.

A pre-existing condition or susceptibility to injury does not disqualify a claim if the employment aggravates, accelerates or combines with the pre-existing condition to

produce a need for medical treatment. *Duncan v. Indus. Claim Appeals Off.,* 107 P.3d 999, 1001 (Colo. App. 2004). A compensable injury is one that causes disability or the need for medical treatment. *City of Boulder v. Payne*, 162 Colo. 345, 426 P.2d 194 (1967). *Soto-Carrion v. C & T Plumbing, Inc.,* W.C. No. 4-650-711 (ICAO, Feb. 15, 2007); *David Mailand v. PSC Industrial Outsourcing LP*, W.C. No. 4-898-391-01, (ICAO, Aug. 25, 2014). The question of whether a particular disability is the result of the natural progression of a pre-existing condition, or the subsequent aggravation or acceleration of that condition, is itself a question of fact. *University Park Care Center v. Industrial Claim Appeals Office*, *supra*. The mere fact a claimant experiences symptoms while performing work does not require the inference that there has been an aggravation or acceleration of a pre-existing condition. *See Cotts v. Exempla, Inc.,* W.C. No. 4-606-563 (ICAO, Aug. 18, 2005). Rather, the symptoms could represent the "logical and recurrent consequence" of the pre-existing condition. *See F.R. Orr Construction v. Rinta,* 717 P.2d 965 (Colo. App. 1985); *Chasteen v. King Soopers, Inc.*, W.C. No. 4-445-608 (ICAO, Apr. 10, 2008); *Scully v. Hooters of Colorado Springs,* W.C. No. 4-745-712 (ICAO, Oct. 27, 2008).

The provision of medical care based on a claimant's report of symptoms does not establish an injury but only demonstrates that the claimant claimed an injury. *Washburn v. City Market*, W.C. No. 5-109-470 (ICAO, June 3, 2020). Moreover, a referral for medical care may be made so that the respondent would not forfeit its right to select the medical providers if the claim is later deemed compensable. *Id.* Because a physician provides diagnostic testing, treatment, and work restrictions based on a claimant's reported symptoms does not mandate that the claimant suffered a compensable injury. *Fay v. East Penn manufacturing Co., Inc.*, W.C. No. 5-108-430-001 (ICAO, Apr. 24, 2020); *Snyder v. Indus. Claim Appeals Off.*, 942 P.2d 1337, 1339 (Colo. App. 1997). While scientific evidence is not dispositive of compensability, the ALJ may consider and rely on medical opinions regarding the lack of a scientific theory supporting compensability when making a determination. *Savio House v. Dennis*, 665 P.2d 141 (Colo. App. 1983); *Washburn v. City Market*, *supra*.

Respondents requested that this ALJ assume that the Concentra medical providers were not furnished with the Claimant's prior history of low back pain, as set forth above, for consideration in regard to whether there was objective findings consistent with the history and work-related mechanism of injury. For example, Dr. Villavicencio on March 11, 2022 noted that Claimant had "[N]o significant past medical history." This could mean either that Dr. Villavicencio reviewed the past history and did not find it significant or that no history was provided at all. Nothing in the report provides guidance to this ALJ and therefore, this ALJ has inferred and found that Dr. Villavicencio determined that the past history was *not a significant* factor in his determination of causality as Claimant's prior conditions or symptoms were resolved and not continuing problems.

Claimant's was credible and persuasive in her description of her injuries, symptoms and pain complaints cause by the February 16, 2022 slip and fall at work. The arguments made by Respondents regarding Claimant's veracity are not persuasive. As found, Claimant has demonstrated by a preponderance of the evidence that she suffered a compensable low back injury during the course and scope of her employment with Employer on February 16, 2022 when she fell in the designated parking lot for employees

and landed on her bottom. This is supported by the opinions of Nurse Quinones, Dr. Chan, Dr. Villavicencio and Dr. Schwed and the Work Status Reports covering March 11 through April 12, 2022 indicating that Claimant's objective findings were consistent with a history of work-related mechanisms of injury. It is even supported by the Employer's First Report of Injury filed by Employer's HR representative on March 9, 2022. Claimant has shown that it was more likely than not that there was a direct causal relationship between the accident she sustained on February 16, 2022, the subsequent injuries to her low back and sacral area and the disability as well as the need for treatment.

Moreover, although the records reflect that Claimant suffered at times from back symptoms prior to February 16, 2022, those incidents did not cause the need for significant medical care and Claimant credibly testified that they were short lived symptoms that did not require the care that has been consistent since Claimant's injury of February 16, 2022. Accordingly, Claimant's work injuries were proximately cause by the February 16, 2022 accident and aggravated, accelerated or combined with any pre-existing conditions to produce the need for medical treatment. Thus, Claimant suffered compensable lumbar and sacral injuries during the course and scope of her employment with Employer on February 16, 2022.

C. Authorized Medical Benefits

Respondents are liable for authorized medical treatment that is reasonable and necessary to cure or relieve the effects of an industrial injury. Sec. 8-42-101(1)(a), C.R.S.; *Colorado Comp. Ins. Auth. v. Nofio*, 886 P.2d 714, 716 (Colo. 1994). The claimant bears the burden of demonstrating a causal connection between his industrial injuries and the need for medical treatment. *City of Durango v. Dunagan*, 939 P.2d 496 (Colo. App. 1997). The determination of whether a particular treatment modality is reasonable and necessary to treat an industrial injury is a factual determination for the ALJ. *In re of Parker*, W.C. No. 4-517-537 (ICAO, May 31, 2006); *In re Frazier,* W.C. No. 3-920-202 (ICAO, Nov. 13, 2000).

Section 8-43-404(5)(a), C.R.S. permits an employer or insurer to select the treating physician in the first instance. *Yeck v. Indus. Claim Appeals Office*, 996 P.2d 228 (Colo. App. 1999). However, the Colorado Workers' Compensation Act requires that respondents must provide injured workers with a list of at least four designated treatment providers. Section 8-43-404(5)(a)(I)(A), C.R.S. states that, if the employer or insurer fails to provide an injured worker with a list of at least four physicians or corporate medical providers, "the employee shall have the right to select a physician."

W.C.R.P. Rule 8-2 further clarifies that once an employer is on notice that an on-the-job injury has occurred, "the employer shall provide the injured worker with a written list of designated providers." W.C.R.P. Rule 8-2(E) additionally provides that the remedy for failure to comply with the preceding requirement is that "the injured worker may select an authorized treating physician of the worker's choosing." An employer is deemed notified of an injury when it has "some knowledge of the accompanying facts connecting the injury or illness with the employment, and indicating to a reasonably conscientious manager that the case might involve a potential compensation claim." *Bunch v. industrial*

Claim Appeals Office, 148 P.3d 381, 383 (Colo. App. 2006). Furthermore, W.C.R.P. 8-3(A) specifies that "[w]hen emergency care is no longer required the provisions of section 8-2 of this rule apply."

Authorization to provide medical treatment refers to a medical provider's legal authority to treat the claimant with the expectation that the provider will be compensated by the insurer for treatment. *Bunch v. Industrial Claim Appeals Office,* 148 P.3d 381 (Colo. App. 2006); *One Hour Cleaners v. Industrial Claim Appeals Office,* 914 P.2d 501 (Colo. App. 1995). Authorized providers include those medical providers to whom the claimant is directly referred by the employer, as well as providers to whom an ATP refers the claimant in the normal progression of authorized treatment. *Town of Ignacio v. Industrial Claim Appeals Office,* 70 P.3d 513 (Colo. App. 2002); *City of Durango v. Dunagan, supra*. Whether an ATP has made a referral in the normal progression of authorized treatment is a question of fact for the ALJ. *Kilwein v. Indus. Claim Appeals Office,* 198 P.3d 1274, 1276 (Colo. App. 2008); *In re Bell*, WC 5-044-948-01 (ICAO, Oct. 16, 2018). If the claimant obtains unauthorized medical treatment, the respondents are not required to pay for it. *In Re Patton*, WC's 4-793-307 & 4-794-075 (ICAO, June 18, 2010); *see Jewett v. Air Methods Corporation,* WC 5-073-549-001 (ICAO, Mar. 2, 2020).

As found, Claimant has proven by a preponderance of the evidence that she is entitled to receive reasonably necessary and causally related medical benefits for her work related injuries caused by the fall of February 16, 2022, including for her low back, SI joint and sacrococcygeal injuries. Respondents noted that they had notice of the injury on February 16, 2022. However, there is no record that Respondents provided Claimant a designated provider list within the allowed seven days.[6] Claimant went to the Denver Health Medical Center (DHMC) --Urgent care and was evaluated by Nurse Quinones for acute low back pain on February 22, 2022[7], and Claimant provided Nurse Quinones' medical note to Employer. Claimant then followed up with DHMC on March 4, 2022 and was treated with injections by Dr. Nelson. Further, Claimant's care at Denver Health Urgent Care was reasonable and necessary emergent care. Claimant was not provided an appointment with Concentra until March 11, 2022.[8] Claimant eventually saw Dr. Villavicencio on March 11, 2022 at Concentra and he found that Claimant's mechanism of injury was work related and that she required medical care.

Claimant argued at hearing that Concentra's refusal to treat was for nonmedical reasons, and thus the right to select a physician passed to Claimant. Claimant selected La Casa which operates under the auspices of Denver Health. Respondents argued at hearing and in their position statement that because the Claimant was under a denial of care there was no obligation to designate a treating provided willing to treat and that the designated provider remained designated, and thus they did not waive the right to select

[6] Seven days from February 16, 2022 was February 24, 2022.

[7] The February 22, 2022 visit would normally be considered only an emergency visit.

[8] The parties stipulated that Concentra was an authorized treating provider. Respondents failed to designate a provider until well after the date of injury and notice, and later than the seven day period required by statute. Respondents knew of the accident as of February 16m 2022 but did not designate a provider until March 11, 2022. Claimant's choice of DHMC for the initial urgent care visit and all the follow up medical care at DHMC, indicated that DHMC should be an authorized treating provider initially, before Claimant was referred to Concentra.

the medical provider. Sec. 8-43-404(5), C.R.S. implicitly contemplates that the Respondents will designate a physician *who is willing to provide treatment*. *Ruybal v. University Health Sciences Center*, 768 P.2d 1259, 1260 (Colo. App. 1988). If the employer fails to timely tender the services of a physician, the right of selection passes to the claimant and the selected physician becomes an ATP. *See Rogers v. Industrial Claim Appeals Office*, 746 P.2d 565 (Colo. App. 1987); *Garrett v. McNelly Construction Company, Inc.*, W.C. No. 4-734-158 (ICAO, Sept. 3, 2008). Whether the ATP refused to treat the claimant for nonmedical reasons, whether the insurer received notice of the refusal to treat and whether the insurer "forthwith" designated a physician who was willing to treat the claimant are questions of fact for resolution by the ALJ*. Garrett v. McNelly Construction Company, Inc.*, *supra; Ruybal*, 768 P.2d at 1260.

Here, it is specifically found that PA Rasis, as a Concentra representative, refused to treat Claimant. Claimant was credible and persuasive in her testimony that PA Rasis advised Claimant her claim was being denied and that Concentra would no longer treat her for her injuries. As found, PA Rasis in effect, referred Claimant to her primary care provider (PCP). Claimant's counsel sent a letter to Respondents that specifically notified Respondents of Concentra's refusal to treat. No other persuasive evidence that Respondents responded to the notice was within the records or evidence provided at hearing. Claimant identified her PCP to be the providers at Denver Health Medical Center's Clinic La Casa and specifically Nurse Gallup. As further found, the refusal to treat and Respondents' failure to identify a provider that was willing to treat Claimant caused the right of selection to pass to Claimant and Claimant designated Nurse Gallup of DHMC, who is now Claimant's treating provider.

Respondents argue that once they had designated a provider, in this case Concentra, that Claimant did not have the ability to select a new provider because the claim was contested and an obligation to designate a new provider would cause a "chilling effect" on Respondents' "right to legitimately contest the claims." However, the statutory requirement under Sec. 8-43-404(10)(a) set out the requirements when an authorized physician refuses to provide medical treatment to an injured worker that requires medical treatment to cure and relieve the effects of the work injuries. It actually requires the designated provided to provide notice to Employer or Insurer of the denial of care, explaining the reasons. As found, this did not occur in this case. The statute specifically states that the ALJ has jurisdiction to resolve disputes regarding whether a refusal to provide medical care was for nonmedical reasons, and this ALJ found that Claimant was credible in her testimony that PA Rasis had referred Claimant to her PCP due to nonmedical reasons, specifically because the claim was denied.

Section 8-43-404(10)(b) further elucidates the process by stating that if the Insurer receives notice that an ATP has refused to provide the necessary medical care, which in this case they did by letter of Claimant's counsel advising them of the refusal, Respondents had fifteen calendar days to designate a new provider *willing to provide medical treatment*. Respondents were provided with PA Rasis' Work Activity Status Report no later than May 17, 2022 indicating that PA Rasis was affirming that Claimant required more treatment as a "Specialist Referral" was to "Consult and Treat," that Claimant should "continue medications as directed" and that Claimant's "work restrictions"

were “to be managed by her PCP.” Counsel’s letter was written on June 24, 2022 stating they would select a new provided unless Insurer responded to the notice of refusal to treat. No response was provided other than inference that the claim was on a notice of contest. As found, this ALJ had the jurisdiction to determine that PA Rasis was acting on behalf of the Concentra provider in advising Claimant they would no longer treat because of the denial of the claim and fully determined that this refusal to treat was for nonmedical reasons.

Lastly, this ALJ declines to reweigh the evidence in this matter. As ultimately found, Claimant showed by a preponderance of the evidence that Claimant was entitled to select a physician of her choosing that was willing to treat Claimant for her work related injuries. Claimant showed that it was more likely than not that selection of an ATP passed to the Claimant and that Nurse Gallup and DHMC was authorized.

ORDER

IT IS THEREFORE ORDERED:

1. Claimant has shown by a preponderance of the evidence that she sustained compensable work related injuries to her low back, coccyx and SI joint within the course and scope of her employment on February 16, 2022.

2. The Stipulations of the parties are approved and become part of this order.

3. Claimant’s average weekly wage is $800.00.

4. Respondents shall pay temporary total disability benefits at the rate of $533.33 beginning February 21, 2022 until terminated by law.

5. Pursuant to the parties’ stipulation, Respondents may take an offset due to payment of short-term disability benefits in the amount of $250.00 per week from February 21, 2022 to August 19, 2022.

6. Respondents shall pay interest at the statutory rate of eight percent (8%) on all benefits that were not paid when due.

7. Claimant is entitled to medical benefits that are reasonably necessary and related to the February 16, 2022 injuries to her low back, coccyx and SI joint. As stipulated by the parties, Concentra is an authorized treating provider. Further, Claimant’s care at Denver Health Urgent Care was reasonable and necessary emergent care.

8. Claimant has shown by a preponderance of the evidence that selection of provider passed to Claimant due to a refusal to treat for nonmedical reasons and that La Casa--DHMC and Nurse Gallup are now authorized treating providers.

9. All matters not determined here are reserved for future determination.

If you are dissatisfied with the ALJ's order, you may file a Petition to Review the order with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the ALJ; and (2) That you mailed it to the above address for the **Denver Office of Administrative Courts**. For statutory reference, see section 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: http://www.colorado.gov/dpa/oac/forms-WC.htm.

ISSUES

- Whether Claimant has proven by a preponderance of the evidence that the right to select a treating physician passed to Claimant due to Respondents failure to comply with Section 8-43-404(5)(a) or WCRP 8-2?

- Whether Claimant has proven by a preponderance of the evidence that she is entitled to an award of temporary disability benefits?

- What is Claimant's appropriate average weekly wage ("AWW")?

FINDINGS OF FACT

1. Claimant sustained an admitted injury on March 19, 2020. Claimant testified at hearing that after work, she slipped on snow and fell onto her back. Claimant testified she began driving her car and after 7-8 minutes, her leg started to get numb. Claimant testified that when she got home, she was unable to get out of her car and needed assistance to get into her home.

2. Claimant began her employment with Employer in January 2020. Prior to her employment, Claimant passed a pre-employment physical examination which required her to complete certain lifting activities.

3. Claimant testified she arrived at work the next day and the director noticed she was walking "badly" and she informed the director what had happened. Claimant testified she was provided with a packet and told to go to Concentra. Claimant testified she reported the injury to [Redacted, hereinafter SG] on March 20, 2020.

4. The Designated Provider List entered into evidence at hearing is signed by Claimant and dated March 20, 2020. The Designated Provider List offers Concentra Aurora North and Midtown Occupational Health Services as designated providers. Concentra Aurora North is circled on the Designated Provider List. Claimant testified at hearing that she did not circle Concentra on the Designated Provider List. Claimant testified that in addition to the Designated Provider List, she was provided with a map that was colored and provided Claimant with directions to only the Concentra Aurora North facility. Claimant testified she was not provided with a choice of providers to choose from, but was instructed by Employer to go to the Aurora North location for treatment.

5. SG[Redacted] testified at hearing that in addition to the Designated Provider List, Claimant was provided with a map of the two medical facilities. A copy of the map was entered into evidence by Respondents at hearing. Claimant testified that

the map entered into evidence was not provided to her with the Designated Provider List, but was a colored map and she was instructed to go to the Concentra listed on the Designated Provider List.

6. SG[Redacted] testified that when she provided Claimant with the Designated Provider List, she printed Claimant's name on the line where the Employee's name is to be printed. SG[Redacted] testified that Claimant stated that she would go to the Concentra that was close to the Employer's location. SG[Redacted] denied providing Claimant with a colored map or being aware of any colored map being given to any employee.

7. SG[Redacted] testified at hearing that she did not recall whether she circled the Concentra Aurora North location on the Designated Provider List or if Claimant circled the Concentra Aurora North location on the Designated Provider List. But SG[Redacted] testified that Claimant indicated to her that she would seek medical treatment at the Concentra Aurora North location. SG[Redacted] testified that after Claimant indicated that she wanted to treat at the Aurora North location, SG[Redacted] informed Claimant that there were other locations where Claimant could seek treatment. SG[Redacted] testified that in addition to the Designated Provider List, she provided Claimant with a second page that includes a map of the Denver area with various Concentra locations. SG[Redacted] testified that sometimes injured workers may elect to seek medical treatment at a clinic that is closer to their home as opposed to the Concentra Aurora North location. SG[Redacted] testified that after indicating that Claimant could go to other locations, Claimant again stated that she wanted to go to the Aurora North clinic for treatment.

8. Claimant denied at hearing receiving the second page with the list of Concentra clinics from SG[Redacted]. Claimant testified she was only provided with a colored map that had the Aurora North location on it and no other locations.

9. Claimant testified that she went to the Concentra Aurora North location on March 20, 2020 for medical treatment. According to the medical records entered into evidence at hearing, Claimant was seen by Dr. Birge at Concentra on March 20, 2020. Claimant reported a history of slipping and falling at work with complaints of back pain. Claimant denied leg weakness or leg numbness. Dr. Birge reported no radicular symptoms. Claimant was diagnosed with a lumbar strain, cervical strain, lumbar contusion and coccyx contusion. Clamant was referred for an x-ray and provided prescribed cyclobenzaprine. Dr. Birge also took Claimant off of work until March 21, 2020.

10. Claimant returned to Concentra on March 21, 2020 and was evaluated by Dr. Shackelford. Claimant reported her low back pain persisted unchanged. Claimant reported she had vomited that morning which Dr. Shackelford indicated could be due to the Flexeril. Claimant was prescribed ibuprofen and allowed to return to work on modified duty on March 23, 2020 with restrictions that she be allowed to sit 90% of the time with no squatting or kneeling and limited bending at the waist.

11. Claimant testified that she returned to work for Employer and worked with restrictions until May 1, 2020. Claimant testified that after May 1, 2020 she was sent home due to the pandemic. This testimony was confirmed by the testimony of [Redacted, hereinafter KG], the human resources representative from Employer, who confirmed that Claimant was furloughed as of May 1, 2020 due to the pandemic.

12. Claimant returned to Concentra on March 25, 2020 and reported her back felt the same as it did on the previous visit. Claimant was examined by nurse practitioner ("NP") Kleberger who noted Claimant had attended on physical therapy appointment. NP Kleberger noted on examination that palpation revealed bilateral muscle spasms of the cervical spine with tenderness in the lumbar spine and muscle spasm on palpation. NP Kleberger recommended that Claimant continue with physical therapy.

13. Claimant next returned to Concentra on April 3, 2020 and was examined by NP Kleberger. NP Kleberger noted that on examination, Claimant had no muscle spasm on palpation of her cervical spine and minimal muscle spasm on palpation of her lumbar spine. NP Kleberger noted Claimant had achieved roughly 25% of anticipated healing. Claimant was instructed to continue to follow up with physical therapy.

14. Claimant returned to Concentra on April 13, 2020 and was examined by Dr. Cava. Claimant reported to Dr. Cava that while her neck pain had improved, she was still having issues with her low back pain. Dr. Cava noted Claimant reported some radicular type symptoms and recommended a magnetic resonance image ("MRI") of the lumbar spine.

15. Claimant underwent the MRI of the lumbar spine on April 24, 2020. The MRI showed a tiny bulge in the L2-L3 disc which indented on the thecal sac. A small perineural cyst or dilated nerve root sleeve associated with the exiting right L2 nerve root was also noted. Tiny perineural cysts or dilated nerve root sleeves were also noted with the exiting L3 nerve roots. A mild disc bulge asymmetric to the right which indented on the ventral thecal sac was noted at the L4-L5 level and was possibly compressing the traversing right L5 nerve root.

16. Claimant returned to Concentra on April 27, 2020 and was evaluated by NP Hedien. Claimant reported that her leg pain was feeling a lot better, but was still having pain in her back. NP Hedien referred Claimant to a physiatrist for a possible injection. NP Hedien reported that Claimant was 50% back toward meeting the physical requirements of her job. Claimant was released to return to work with lifting restrictions of 5 pounds constantly and pushing/pulling restrictions of 10 pounds constantly.

17. Claimant returned to Concentra on May 4, 2020 and was evaluated by Dr. Kawasaki. Dr. Kawasaki noted that Claimant reported pain in her low back, left greater than right with pain along the sacral and coccygeal region along with numbness in her toes. Dr. Kawasaki noted that the MRI showed disc bulges most prominently at L4-5

with potential L5 nerve impingement, which would correlate with Claimant's symptoms. Dr. Kawasaki recommended a trial of chiropractic treatment and, if there was no relief from the chiropractic treatment, she could be considered for potential interventional pain procedures including injections.

18. Claimant began the chiropractic treatment with Dr. Aspegren on May 12, 2020. Claimant underwent six chiropractic treatment with Dr. Aspegren between May 12, 2020 and May 29, 2020.

19. Claimant was examined by Dr. Cava on May 19, 2020. Dr. Cava noted Claimant had completed 10 physical therapy appointments and had a repeat evaluation with Dr. Kawasaki set for June 4, 2020. Claimant did not attend the medical appointment with Dr. Kawasaki on June 4, 2020.

20. Respondents filed a medical only General Admission of Liability on June 3, 2020.

21. Claimant testified she tried to cancel the June 4, 2020 appointment but was only provided with the option of rescheduling the appointment for another time. [Redacted, hereinafter RW], the receptionist for Concentra, testified at hearing in this matter. RW[Redacted] testified that Claimant called and cancelled the June 4, 2020 appointment because she was sick. RW[Redacted] testified that if a patient called to cancel an appointment they would require the patient also reschedule the appointment. RW[Redacted] testified Claimant's appointment was rescheduled for June 16, 2020 and then rescheduled for June 30, 2020. Claimant did not attend these appointments. Additional appointments were made for Claimant with Dr. Cava at Concentra for December 4, 2020 and December 29, 2020. Claimant failed to attend these appointments as well.

22. Claimant was provided an offer of modified employment with Employer on July 3, 2020. Claimant returned to work for Employer until August 25, 2020. KG[Redacted] testified that on August 25, 2020 Employer became aware that Claimant had permanent restrictions from an earlier workers' compensation case and KG[Redacted] requested that Claimant provide employer with updated work restrictions before they would allow her to return to work.

23. Claimant was examined at Swedish Hospital Medical Center on July 6, 2020. Claimant had previously sought treatment at Swedish Hospital on June 18, 2020 for follow up for a brain tumor which Claimant had last treated in January 2020, but did not receive medical treatment for her low back on this visit. Claimant reported a history of low back pain with right leg numbness after a fall. Claimant was referred for an MRI of the lumbar spine.

24. The MRI was performed on July 27, 2020 and was compared to a prior MRI from November 29, 2017. The July 27, 2020 MRI showed internal resolution of disc bulges that were present on the November 29, 2017 MRI and a disc bulge at the

L4-L5 level that results in right greater than left subarticular zone stenosis contacting the descending L5 nerve roots.

25. Claimant sought medical treatment with Dr. Lynn Parry on August 10, 2020. Claimant testified she was told of Dr. Parry by her attorney. Dr. Parry reviewed Claimant's medical records from Concentra and performed a physical examination. Dr. Parry diagnosed Claimant with a sacral contusion, right sacroiliac ("SI") joint dysfunction, and right sciatica. Dr. Parry agreed that Claimant was not a surgical candidate and would not likely benefit from epidural steroid injections or other pain procedures. Dr. Parry recommended therapy directed at core stabilization, a trial of an SI belt as well as one consistent health care provider. Dr. Parry provided Claimant with work restrictions of no repetitive lifting over 10 pounds, no repetitive bending or twisting, no stairs, an adjustable chair with lumbar support and the ability to change positions on an as needed basis.

26. Claimant underwent an independent medical examination ("IME") with Dr. Burris on August 25, 2020. Dr. Burris reviewed Claimant's medical records, obtained a history of the injury and performed a physical examination in connection with his IME. Dr. Burris noted that Claimant was complaining of low back pain and right leg pain and numbness. Claimant denied any past injuries, pain or problems involving her low back.

27. Dr. Burris diagnosed Claimant with lumbosacral contusion/strain. Dr. Burris opined that the findings on the April 24, 2020 MRI were degenerative in nature and, more likely than not, pre-existing and unrelated to the March 19, 2020 incident. Dr. Burris recommended additional therapy for Claimant including consideration for pool therapy that would allow Claimant to transition to a self-directed home exercise program.

28. Dr. Burris testified at hearing consistent with his medical report. Dr. Burris noted that Claimant denied any prior injuries to her low back, which Dr. Burris noted was inconsistent with the medical records. Dr. Burris testified that because of the issue involving the prior medical treatment to her low back, he would rely only on objective evidence with regard to Claimant's injury. Dr. Burris testified that the objective evidence shows Claimant has full range of motion of the lumbar spine and normal strength and there was no objective evidence that would justify a finding of work restrictions.

29. Employer provided Claimant with a letter in November 2020 that requested Claimant provide them with documentation of permanent restrictions from a prior injury or medical documentation stating that Claimant no longer needs the medical restrictions.

30. Claimant was examined by Dr. Yamamoto on November 25, 2020. Dr. Yamamoto reviewed Claimant's medical records in connection with his evaluation. Dr. Yamamoto did not indicate Claimant having a prior low back injury in connection with his evaluation. Dr. Yamamoto completed a Fitness for Duty / Accommodation Form in connection with his examination. The Fitness for Duty form indicated that Claimant had

lifting restrictions of 10 pounds with restrictions on pushing and pulling of up to 12-15 pounds. Dr. Yamamoto noted that Claimant could perform her previous job with the 10 pound lifting accommodations and the ability change positions.

31. Claimant testified at hearing that she had a prior injury to her mid back, but denied any prior injury to her low back. However, medical records entered into evidence demonstrate Claimant was seeking medical treatment for low back pain on September 28, 2017 with Dr. Rabinowitz. Claimant reported to Dr. Rabinowitz that she had low back pain with pain into her left thigh and left toes. Claimant reported the back pain was not new, but was worse. Claimant was diagnosed with sciatica of the left side associated with disorder of the lumbar spine and left leg weakness. Claimant was referred for an MRI of the lumbar spine. Claimant was seen on October 30, 2017 by Dr. Mendez and reported she had back pain that started 4-5 months ago and located in her left lower back and radiates towards her glutes.

32. Claimant's testimony that she did not have low back pain prior to her date of injury is found to be not credible or persuasive.

33. Claimant testified that she continued to work for Employer until August 25, 2020 when she was told by human resources that her restrictions were a problem. Claimant testified that she was provided with a piece of paper and was told she needed to call the number on the piece of paper. Claimant testified she called the number and spoke to ["Redacted, hereinafter MC"] who informed Claimant that the issue was not with her most restrictions from her worker' compensation injury, but were related to prior work restrictions Claimant had received. Claimant testified she has not worked since August 25, 2020.

34. Claimant returned to Swedish Medical Center on April 27, 2021 and was evaluated by Dr. Killan. Claimant reported complaints of low back pain with radiating pain in her right buttock and down her right leg. Claimant was diagnosed with a lumbar strain and it was noted that Claimant was neurovascularly intact and there was nothing to suggest a lumbar radiculopathy or sciatica.

35. Claimant eventually underwent a lumbar interlaminar epidural steroid injection on August 27, 2021 under the auspices of Dr. Pasto.

36. [Redacted, hereinafter HC], the cash management supervisor for Employer, testified at hearing in this matter. HC[Redacted] testified that Claimant was working for Employer processing deposits in a modified duty capacity. HC[Redacted] testified that there were times when Claimant would leave work early because Claimant reported she was in too much pain to complete her shift. HC[Redacted testified there was an occasion where Claimant was given a written record for a mistake and Claimant reported it was difficult for her to concentrate at work. HC[Redacted testified she told Claimant to address this issue with her doctor. HC[Redacted testified Claimant continued working on modified duty until August 25, 2020.

37. The wage records entered into evidence at hearing demonstrate that Claimant began her employment with Employer on January 21, 2020. In the 8 2/7 weeks between when she started and her March 19, 2020 injury date, Claimant earned $5,023.72 in earnings. This equates to an AWW of $606.31.

38. Respondents elicited testimony from Claimant at hearing regarding a prior workers' compensation injury she sustained which resulted in a settlement. Claimant testified that the prior workers' compensation injury involved her hands and her hands improved after she settled her claim. Claimant testified she settled this claim in July 2010.

39. With regard to the issue of authorized treating physician, Claimant argues at hearing that Respondents provided Claimant with a list of only two physicians, and therefore did not provide a list of providers in compliance with Section 8-43-404(5)(a), C.R.S. Claimant argues that the failure of Respondents to properly provide Claimant with a list of four physicians or four clinics available to treat Claimant results in the right of selection of medical provider passing to Claimant. Claimant therefore argues that her designated authorized treating physician is Dr. Parry. The ALJ is not persuaded that Claimant has demonstrated that Respondents failed to comply with Section 8-43-404(5)(a), C.R.S.

40. Conflicting testimony was presented at hearing as to what was provided to Claimant by SG[Redacted] after her workers' compensation injury. Based on the testimony and evidence presented at hearing, the ALJ credits the testimony of SG[Redacted] over the testimony of Claimant regarding what was provided to Claimant following her work injury and finds that Respondents have complied with Section 8-43-404(5)(a), C.R.S. The ALJ credits the testimony of SG[Redacted] and finds that Claimant selected the Aurora North Concentra clinic to serve as her medical provider for her workers' compensation injury. The ALJ credits the testimony of SG[Redacted] and finds that Claimant was provided with the second page that included the list on Concentra clinics in Colorado and was informed by SG[Redacted] that she could select any of the Concentra clinics listed on second page of the document.

41. With regard to the issue of temporary disability benefits, Respondents argue that Claimant has failed to demonstrate that her wage loss was related to her workers' compensation injury. In support of this argument, Respondents note that Dr. Burris opined that Claimant's records documented prior low back complaints and Claimant had full range of motion and normal motor strength of her lumbar spine.

42. However, in this case, Claimant sustained an admitted injury to her low back which resulted in medical treatment and restrictions from her authorized treating provider. Claimant was off of work until March 25, 2020 and then returned to work for employer in a modified duty position. Claimant was furloughed from work on May 1, 2020 due to the pandemic, but at that time, Claimant still had work restrictions as set forth by her authorized treating physician. The fact that Claimant had work restrictions

set forth by her treating physician when she was furloughed due to the pandemic establishes that Claimant's work injury contributed to her wage loss.

43. Employer became aware of Claimant having work restrictions related to a prior work related injury in August 2020. Employer than requested that Claimant get a full release to return to work or documentation of the prior restrictions as reflected in the November 2020 letter. Notably, however, Claimant had passed a pre-employment physical for Employer and had been found to be capable of performing the required job duties for Employer in January 2020.

44. Moreover, Claimant's restrictions that she was working with as of August 25, 2020 were related to her March 19, 2020 work injury with Employer, not related to any other injury. Because these work restrictions were related to Claimant's work injury with Employer, Claimant is entitled to an award of temporary disability benefits.

45. The ALJ notes that Dr. Burris opined that Claimant had no work restrictions related to her work injury. However, Dr. Burris is an IME physician in this case and his opinion regarding Claimant's work restrictions are not a defense to temporary disability benefits where the treating physician has established work restrictions related to Claimant's injury.

46. The ALJ therefore finds that Claimant has demonstrated that it is more likely than not that her injury on March 19, 2020 resulted in work restrictions that contributed to Claimant's loss of wages.

47. According to the wage records, Claimant was off of work with restrictions related to her work injury from May 1, 2020 through June 24, 2020. Claimant returned to work on June 25, 2020 for 2.5 hours and earned $39.38. Claimant was then off of work from June 26, 2020 to July 11, 2020.

48. Claimant returned to work on July 12, 2020 and worked until August 25, 2020. Claimant earned her regular wages during the period of July 12, 2020 through August 25, 2020, but was not earning the same weekly rate. Specifically, Claimant earned $3,635.90 during this period of 6 2/7 weeks. This equates to a weekly rate of $578.44. Claimant is entitled to an award of temporary partial disability benefits for this period of time based on Claimant's loss of earnings. The ALJ further finds that Claimant has established that the loss of earnings was related to the work restrictions set forth by the authorized treating provider in this case.

49. Employer advised Claimant on August 25, 2020 that she could not return to work until she had a release to return to work without restrictions from her prior permanent restrictions. However, at this time, Claimant was still on restrictions from her designated authorized provider (Concentra Aurora North). Therefore, Claimant is entitled to an award of TTD benefits commencing August 25, 2020 and continuing until terminated by law or statute.

CONCLUSIONS OF LAW

1. The purpose of the "Workers' Compensation Act of Colorado" is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of any litigation. Section 8-40- 102(1), C.R.S. A claimant in a Workers' Compensation claim has the burden of proving entitlement to benefits by a preponderance of the evidence. Section 8-43-201, C.R.S. A preponderance of the evidence is that leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probably true than not. *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979). The facts in a Workers' Compensation case are not interpreted liberally in favor of either the rights of the injured worker or the rights of the employer. Section 8-43-201, C.R.S., 2006. A Workers' Compensation case is decided on its merits. Section 8-43-201, *supra*.

2. The ALJ's factual findings concern only evidence that is dispositive of the issues involved; the ALJ has not addressed every piece of evidence that might lead to a conflicting conclusion and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office*, 5 P.3d 385 (Colo. App. 2000). When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and action; the motives of the witness; whether the testimony has been contradicted; and bias, prejudice, or interest. *See Prudential Insurance Co. v. Cline*, 98 Colo. 275, 57 P.2d 1205 (1936); CJI, Civil 3:16 (2006).

3. Respondents are liable for authorized medical treatment reasonably necessary to cure and relieve an employee from the effects of a work related injury. Section 8-42-101, C.R.S.; *see Sims v. Industrial Claim Appeals Office*, 797 P.2d 777 (Colo. App. 1990). Pursuant to Section 8-43-404(5), C.R.S., Respondents are afforded the right, in the first instance, to select a physician to treat the industrial injury. Once respondents have exercised their right to select the treating physician, claimant may not change physicians without first obtaining permission from the insurer or an ALJ. *See Gianetto Oil Co. v. Industrial Claim Appeals Office*, 931 P.2d 570 (Colo. App. 1996).

4. "Authorization" refers to the physician's legal authority to treat, and is distinct from whether treatment is "reasonable and necessary" within the meaning of Section 8-42-101(1)(a), C.R.S. 2008. *Leibold v. A-1 Relocation, Inc.*, W.C. No. 4-304- 437 (January 3, 2008). Section 8-43-404(5)(a) specifically states: "In all cases of injury, the employer or insurer has the right in the first instance to select the physician who attends said injured employee. If the services of a physician are not tendered at the time of the injury, the employee shall have the right to select a physician or chiropractor." "[A]n employee may engage medical services if the employer has expressly or impliedly conveyed to the employee the impression that the employee has authorization to proceed in this fashion…." *Greager v. Industrial Commission*, 701 P.2d 168 (Colo. App. 1985), *citing*, 2 A. Larson, *Workers' Compensation Law* § 61.12(g)(1983).

5. As found, Claimant reported her injury to Employer and was provided with a list of physicians authorized to treat Claimant for his injury, which included Concentra Aurora North, Midtown Occupational Health Services and the Concentra clinics on the second page of the Designated Provider List. The ALJ further finds that Claimant selected the Concentra Aurora North clinic to serve as her authorized treating provider.

6. The medical treatment Claimant received from Dr. Parry and Swedish Medical Center is found to be outside the chain of authorized providers and Respondents are not responsible for the cost of this treatment.

7. As found, Claimant's request to change her authorized provider to Dr. Parry is denied.

8. The ALJ must determine an employee's AWW by calculating the money rate at which services are paid the employee under the contract of hire in force at the time of the injury, which must include any advantage or fringe benefit provided to the Claimant in lieu of wages. Section 8-42-102(2), C.R.S.; *Celebrity Custom Builders v. Industrial Claim Appeals Office*, 916 P.2d 539 (Colo. App. 1995).

9. Section 8-42-102(2) states in pertinent part:

> (d) Where the employee is being paid by the hour, the weekly wage shall be determined by multiplying the hourly rate by the number of hours in a day during which the employee was working at the time of the injury or would have worked if the injury had not intervened, to determine the daily wage; then the weekly wage shall be determined from said daily wage in the manner set forth in paragraph (c) of this subsection (2).

10. As found, the ALJ calculates Claimant's AWW based on the wage records entered into evidence to be $606.31.

11. To prove entitlement to temporary total disability ("TTD") benefits, a claimant must prove that the industrial injury caused a disability lasting more than three work shifts, he left work as a result of the disability, and the disability resulted in an actual wage loss. *See* §§8-42-(1)(g) & 8-42-105(4), C.R.S.; *Anderson v. Longmont Toyota,* 102 P.3d 323 (Colo. 2004); *City of Colorado Springs v. Industrial Claim Appeals Office,* 954 P.2d 637 (Colo. App. 1997). Section 8-42-103(1)(a), C.R.S. requires the claimant to establish a causal connection between a work-related injury and a subsequent wage loss in order to obtain TTD benefits. The term "disability" connotes two elements: (1) medical incapacity evidenced by loss or restriction of bodily function; and (2) impairment of wage earning capacity as demonstrated by claimant's inability to resume his or her prior work. *Culver v. Ace Electric*, 971 P.2d 641, 649 (Colo. 1999). The impairment of earning capacity element of disability may be evidenced by a complete inability to work or by restrictions which impair the claimant's ability effectively and properly to perform his or her regular employment. *Ortiz v. Charles J. Murphy & Co.*, 964 P.2d 595, 597 (Colo. App. 1998). Because there is no requirement that a claimant must produce evidence of medical restrictions, a claimant's testimony alone is

sufficient to demonstrate a disability. *Lymburn v. Symbios Logic,* 952 P.2d 831, 833 (Colo. App. 1997).

12. As found, Claimant has proven by a preponderance of the evidence that she is entitled to an award of TTD benefits commencing May 1, 2020 through June 24, 2020 and from June 26, 2020 through July 12, 2020. And from August 26, 2020 and continuing until terminated by law or statute. As found, the medical records from Concentra establish that Claimant was on work restrictions related to her admitted work injury.

13. To prove entitlement to temporary partial disability (TPD) benefits, claimant must prove that the industrial injury contributed to some degree to a temporary wage loss. *PDM Molding, Inc. v. Stanberg*, 898 P.2d 542 (Colo. 1995).

14. As found, Claimant earned $39.38 on June 25, 2020. Claimant's AWW being $606.31, this results in a daily wage of $86.61. Because Claimant earned $39.38 on June 25, 2020, Claimant is entitled to temporary partial disability benefits in the amount of $31.49 for June 25, 2020 ($86.61 - $39.38 = 47.23 x 2/3 = $31.49).

15. As found, Claimant earned $3,635.90 for the period of July 12, 2020 through August 25, 2020 for a weekly wage of $578.44. Claimant is entitled to an award of $207.74 in temporary partial disability benefits for the period of July 12, 2020 through August 25, 2020 ($606.31 - $578.44 = $27.87 x 6 2/7 = $406.11 x 2/3 = $207.74).

ORDER

It is therefore ordered that:

1. Respondents shall pay Claimant TTD benefits based on an AWW of $606.31 for the period of May 1, 2020 through June 24, 2020 and from June 26, 2020 through July 12, 2020. And from August 26, 2020 and continuing until terminated by law or statute.

2. Respondents shall pay Claimant TPD benefits in the amount of $31.49 for June 25, 2020. Respondents shall pay Claimant TPD benefits in the amount of $207.74 for the period of July 12, 2020 through August 25, 2020.

3. Respondents shall pay the reasonable medical treatment necessary to cure and relieve Claimant from the effects of his industrial injury including the treatment from Concentra North Aurora.

4. Respondents are not responsible for the cost of Claimant's medical treatment with Dr. Parry or Swedish Medical Center.

5. Claimant's request for a change of physician to Dr. Parry is denied.

6. All matters not determined herein are reserved for future determination.

ISSUES

- Did Claimant prove that he sustained a compensable injury to his neck, right arm and right shoulder on June 16, 2022?
- Did Claimant prove entitlement to medical benefits?

FINDINGS OF FACT

1. Claimant worked for Employer [Redacted, hereinafter CH], the owner of the company. Claimant's job is very physically demanding. He would work 12 to 14 hours per day.

2. On June 16, 2022, Claimant left his house early that morning and went to Denver to pick up containers and load them on the trailer. He was strapping the container down on the flatbed trailer and was tightening the straps. He had placed 4 straps on the container and was tightening the fifth strap with a winch and bar. The fifth strap snapped when it broke and he fell down when the strap tension released. After the fall, he experienced pain. He immediately call the owner of the Employer, CH[Redacted], and told him about the incident. CH[Redacted] asked him if he needed an ambulance and the Claimant indicated that he did not. He said he would drive home and see how it felt. When he arrived at the yard in Del Norte, he told CH[Redacted] that he thought he had a rib "out" and would go see the chiropractor for an adjustment.

3. The Claimant testified that when he fell, he fell on to his side he hit his right shoulder and elbow. The fall knocked the wind out of him. He laid there on his back for a while after falling. The immediate pain was in his knuckles and elbow and from the middle of his back all down his right side including his right shoulder. After he went home, he took a hot bath and took Advil dual action for the pain. He experienced trouble breathing, which he attributed to having a rib "out". He had experienced having a rib out previously but lower down in his torso.

4. CH[Redacted] testified at hearing. He is the owner of [Redacted, hereinafter HI]. His company sells or rents shipping containers and storage. Claimant works for his company. He has worked for him for approximately three years. His job duties include truck driving and some mechanical work. He worked ten to twelve hours per day. He confirmed that Claimant reported the work related incident where he fell down when a

strap broke on June 16, 2022. Although the pain Claimant experienced did not seem serious at the time, it worsened over time, according to the Claimant. CH[Redacted] did not observe the Claimant work on a daily basis, but Claimant would tell him that his pain was worsening. Based on his experience, when a strap breaks one could be injured. M CH[Redacted] did not doubt that the Claimant injured himself in the way he described.

5. Claimant had seen chiropractors on occasion prior to this incident for ribs going out, hips going out, and preventative care. However, Claimant testified that the symptoms he felt after the June 16, 2022 incident were completely different, in severity than the symptoms he felt previously. Specifically, his right hand is now numb, and he has pain from his shoulder all the way down his right arm. He also has pain between his shoulder blades.

6. When he saw the chiropractor, Dr. Poindexter, after the incident, Dr. Poindexter told him that his number 1 rib was out and he popped it back in. Additionally, Claimant testified that he complained of numbness and tingling in his right hand. Claimant saw him the following week and he tried the same treatment, without relief. Claimant returned to him on the third week and the chiropractor said he was not going to do the adjustment and recommended an MRI before he provided any more treatment. The pain was not going away despite the chiropractic treatment. The Claimant continued to work in pain taking Tylenol or dual action Advil to control the pain. CH[Redacted] would notice that the Claimant was in pain when he drove with him. Claimant had to drive with his hand above his head since it was painful to have his arm down by his side. After he received the results of the MRI, CH[Redacted] told him he should remain off work until he took care of the problem since he needed him back healthy.

7. The MRI performed on July 11, 2022 showed, among other findings, a suspected free disc fragment in the right C7-T1 foramina with moderate foraminal narrowing. (Claimant Exhibit 6).

8. After Claimant received the MRI results, he met with Dr. Poindexter, to discuss the results. He took Dr. Poindexter's advice to take it easy, relaxing, keeping a pain [Redacted, hereinafter PI] and Claimant submitted a statement regarding what happened in the original incident. CH[Redacted] did not want Claimant to return to work until he received a clearance to return to work from the doctors. Claimant began treatment with Dr. Tasha Alexis at the ROMP clinic in Alamosa on July 18, 2022.[1] She took a history that the claimant injured himself when he was strapping down a load and the strap broke and slammed the patient to the ground. (Claimant Exhibit 3). The Claimant presented to the clinic for neck pain. Dr. Alexis also noted that Claimant's chiropractor recently ordered

[1] Although Claimant refers to the treating facility as the "ROMP" clinic, the medical records indicate that the facility's name was SLV Health Occupational Medicine.

an MRI due to the fact that the Claimant was not improving and the MRI showed a suspected extruded free disc fragment in the right C7-T1 foramina with moderate foraminal narrowing. She provided restrictions of no lifting, carrying or pushing or pulling greater than 25 pounds. She referred Claimant to Dr. Timothy for further evaluation and treatment.

9. [Redacted, hereinafter JH] began seeing Dr. Timothy on August 11, 2022 following the referral from Dr. Alexis. Dr. Timothy noted that JH[Redacted] had right arm pain complaints and that he had sought treatment with his chiropractor and had then sought medical care following an MRI that showed cervical spine pathology. Dr. Timothy diagnosed JH[Redacted] with radiculopathy, site unspecified, paresthesia of skin and other cervical disc displacement, high cervical region. Dr. Timothy recommended consultation with a qualified pain management specialist for a cervical epidural steroid injection at C7- T1 for a HNP/extrusion. JH[Redacted] was also referred to a back surgeon. Dr. Timothy assigned bilateral neck restrictions of no overhead work, pushing/pulling of up to 25 lbs. and lifting up to 25 lbs. He also assigned right shoulder restrictions of limited use, no overhead work and no work above chest height, pushing pulling up to 25 lbs. and lifting up to 25 lbs. (Plaintiff's Exhibit 3, pp. 16 -20).

10. Dr. Timothy referred Claimant to Denver Spine and Pain Management. He received an injection from Dr. Bainbridge at that facility.

11. Claimant testified that after he received the right C7-T1 transforaminal Epidural injections, administered on 10/26/2022 by Dr. Bainbridge, he reported his pain as 1/10. Prior to that, his pain was reported as 8/10. This is consistent with Dr. Bainbridge's chart note of October 26, 2022. (Plaintiffs Exhibit 8, pp. 77-78). Following the injection, Claimant was able to regain some functionality and use of his right hand. He testified that his hand/arm is still numb and it hurts but following the injection, he can now hold things and shift gears again when driving his truck. Claimant testified that he had never had the problems of right hand numbness or difficulty prior to the June 16, 2022 injury.

12. The injection helped his symptoms and the pain is no longer debilitating. Following the injection, he was able to return to work on November 11, 2022. Dr. Timothy allowed him to return to work with restrictions including no lifting above his head. He allowed him to drive as long as he could maintain control of his right hand.

13. Dr. Timothy testified at hearing. Dr. Timothy's specialty is physical medicine and rehabilitation, occupational medicine and is Level II accredited. He was accepted as an expert in those areas.

14. Dr. Timothy last saw Claimant on November 10, 2022 and his assessment was that Claimant had radiculopathy, site unspecified, and he had right sided disc extrusion at C7-T1, based on imaging. He recommended physical therapy.

15. Dr. Timothy testified that JH's[Redacted] pain and numbness complaints were consistent with the findings on JH's[Redacted] MRI reading at C7-T1. Dr. Timothy was in agreement with Dr. Bainbridge's treatment plan and recommendations that he provided in his initial evaluation of September 9, 2022.

16. With respect to causation, Dr. Timothy stated that his medical history reflected that JH[Redacted] reported that he was injured when a strap he was tightening down broke and he fell to the ground. Dr. Timothy further stated that given the type of pressure or loads on those straps that the strap breaking certainly could be the cause of injury, even though the mechanism of injury may not be typical of that type of injury. Dr. Timothy further testified that JH's[Redacted] injuries and the treatment he had provided as a result of those injuries, were caused by Mr. JH's[Redacted] June 16, 2022 work injury.

17. Dr. Poindexter also testified at hearing. Dr. Poindexter's specialty is chiropractic medicine. He provided chiropractic treatment to the Claimant. He last saw Claimant on July 11, 2022. At that time, he was treating him for radiculopathy of the right arm and hand and low back pain. He first saw him on August 29, 2021, prior to the work-related incident. At that time he provided conservative care including normal chiropractic adjustments. The first time he treated him post-injury was on June 24, 2022. His complaints after his injury included pain that was more intense that prior to his work injury. However, his records did not document any change in treatment pre-injury and post-injury. But, he does recall the Claimant mentioning the increased pain post-injury. Dr. Poindexter also noted that the frequency of visits had increased, post-accident. Claimant was also not responding to treatment as he previously had and at that point, Dr. Poindexter recommended an MRI since there was something different in Claimant's presentation and response to treatment. After review of the MRI, he concluded that further chiropractic was not appropriate and a surgical consult would be appropriate. It was Doctor Poindexter's opinion that the Claimant's injuries were work related. Unfortunately, since Dr. Poindexter's chart notes are not consistent with his testimony, with the exception of the recommendation for an MRI, I must look elsewhere to determine if the Claimant sustained a compensable work related injury.

18. Dr. Michael Janssen performed a medical records examination and gave his opinion that "it would give high suspicion that this may not be an occupational-related

condition specifically." Dr. Janssen stated he was asked to comment on whether the mechanism of injury correlated and if this would be a work -related condition. In response, Dr. Janssen stated "It is impossible to completely say, but C7-T1 disc herniations are less common than the rest of the subaxial cervical spine. This is an extruded disc fragment. They can occur with normal activities of daily living and occur spontaneously, and they can also occur with trauma". Dr. Janssen also states that it is impossible to directly correlate whether this is truly a compensatory injury or an incidental finding. (Plaintiff's Exhibit 9, pp. 80-81).

19. Claimant currently continues to have pain in from his mid-back all the way into his right hand. His right hand currently is numb and it hurts. But, he is able to drive and shift gears and hold things without dropping them since the injection.

20. After consideration of the evidence, I find Dr. Timothy's opinions that the injuries and treatment were caused by his June 16, 2022 work injury to be credible and persuasive. I find his opinions as to causation to be more persuasive than those of Dr. Janssen.

CONCLUSIONS OF LAW

A. Compensability

To receive compensation or medical benefits, a claimant must prove he is a covered employee who suffered an injury arising out of and in the course of employment. Section 8-41-301(1); *Faulkner v. Industrial Claim Appeals Office*, 12 P.3d 844 (Colo. App. 2000); *Pacesetter Corp. v. Collett*, *33 P.3d 1230* (Colo. App. 2001). The claimant must prove that an injury directly and proximately caused the condition for which he seeks benefits. *Wal-Mart Stores, Inc. v. Industrial Claim Appeals Office*, 989 P.2d 251 (Colo. App. 1999); *Snyder v. Industrial Claim Appeals Office*, 942 P.2d 1337 (Colo. App. 1997), *cert. denied* September 15, 1997. The claimant must prove entitlement to benefits by a preponderance of the evidence. *Page v. Clark*, 197 Colo. 306, 592 P.2d 792 (1979).

The Workers' Compensation Act recognizes a distinction between an "accident" and an "injury." Section 8-40-201(1). Workers' compensation benefits are only payable if an accident results in a compensable "injury." *City of Boulder v. Payne*, 426 P.2d 194 (Colo. 1967); *Romero v. Industrial Commission*, 632 P.2d 1052 (Colo. App. 1981). The mere fact that an incident occurred at work and caused symptoms does not necessarily establish a compensable injury. Rather, a compensable injury is one that requires medical

treatment or causes a disability. *Montgomery v. HSS, Inc*., W.C. No. 4-989-682-01 (August 17, 2016). The fact that the employer provides treatment after an employee reports symptoms does not automatically establish a compensable injury. The claimant must prove the symptoms and need for treatment were proximately caused by their work. *Snyder v. Industrial Claim Appeals Office*, 942 P.2d 1337 (Colo. App. 1997); *Madonna v. Walmart*, W.C. No. 4-997-641-02 (March 21, 2017).

Even a "minor strain" or a "temporary exacerbation" of a pre-existing condition can be a sufficient basis for a compensable claim if it was caused by a claimant's work activities and caused him to seek medical treatment*. E.g., Garcia v. Express Personnel*, W.C. No. 4-587-458 (August 24, 2004); *Conry v. City of Aurora*, W.C. No. 4-195-130 (April 17, 1996).

In this case, there is no question that an incident occurred on June 16, 2022. The question is whether the Claimant's post-accident symptoms are attributable to the incident or are as a result of the natural progression of his degenerative conditions, for which he treated prior to the incident. I conclude, based on the credible and persuasive evidence that Claimant proved he suffered a compensable injury to neck, right shoulder and right arm as the result of the incident that occurred within the course and scope of his employment on June 16, 2022.

B. Medical benefits

The respondents are liable for authorized medical treatment reasonably necessary to cure and relieve the effects of an industrial injury. Section 8-42-101. The mere occurrence of a compensable injury does not compel the ALJ to approve all requested treatment. Where the claimant's entitlement to medical benefits is disputed, the claimant must prove the treatment is reasonably needed and causally related to the industrial accident. *Wal-Mart Stores, Inc. v. Industrial Claim Appeals Office*, 989 P.2d 251 (Colo. App. 1999).

The parties have indicated that in addition to compensability, the second issue to be determined is whether the medical treatment provided related to the claimed work injury. There appears to be no question that the treatment provided was reasonable and necessary. The real issue is whether the treatment is related to the incident that occurred on June 16, 2022 or the natural progression of his preexisting condition. I conclude that the treatment provided by the authorized treating physicians were reasonable, necessary and related to the work injury.

.

ORDER

It is therefore ordered that:

1. Claimant has established by a preponderance of the evidence that he sustained a compensable work related injury to his neck, shoulder and right arm on June 16, 2022.

2. Respondents shall pay for all medical expenses, pursuant to the Workers' Compensation medical benefits fee schedule to cure and relieve Claimant from the effects of his neck, right shoulder and right arm injuries.

3. All issues not decided herein are reserved for future determination.

If you are dissatisfied with this order, you may file a Petition to Review with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on the certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail by sending it to the above address for the **Denver Office of Administrative Courts** within twenty (20) days after mailing or service of the ALJ's order. In the alternative, you may file your Petition to Review electronically by email to the following email address: oac-ptr@state.co.us. If the Petition to Review is timely served via email, it is deemed filed in Denver pursuant to OACRP 26(A) and § 8-43-301, C.R.S. If the Petition to Review is filed by email to the proper email address, it need not also be mailed to the Denver Office of Administrative Courts. For statutory reference, see § 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: https://oac.colorado.gov/resources/oac-forms

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. 5-135-286-003

ISSUES

1. Whether the claimant has demonstrated, by a preponderance of the evidence, that the left sacroiliac (SI) joint injection recommended by Dr. Ellen Price is reasonable medical treatment necessary to maintain the claimant at maximum medical improvement **(MMI).**

2. Whether the claimant has demonstrated, by a preponderance of the evidence, that he is entitled to reimbursement of costs pursuant to Section 8-42-101(5), C.R.S. Specifically, the claimant has requested cost reimbursement in the amount of $230.35.

FINDINGS OF FACT

1. The claimant was injured while working for the employer on March 8, 2019. The claimant injured his low back when he bent and twisted to pick up iron and plywood at a muddy job location. This is an admitted claim.

2. The claimant's authorized treating provider (ATP) for this claim is Work Partners Occupational Health. Throughout this claim, the claimant has primarily seen Erica Herrera, PA-C with Work Partners Occupational Health.

3. The claimant has undergone three surgeries related to the March 8, 2019 injury. On July 1, 2020, Dr. James Gebhard performed a microdiscectomy at the L4-L5 level. On June 23, 2021, Dr. Michael Janssen performed a disk replacement at the L4- L5 level. On January 10, 2022, Dr. Janssen performed a left sided LS foraminotomy for disk herniation removal and performed a left 51 foraminotomy. Following each surgery, the claimant participated in physical therapy.

4. On June 20, 2022, the claimant was seen by Dr. Laurie Marbas at Work Partners Occupational Health. On that date, Dr. Marbas placed the claimant at maximum medical improvement **(MMI).** In addition, Dr. Marbas assessed a whole person impairment rating of 31 percent. This impairment rating was related to the claimant's thoracic spine range of motion, and spondylosis of the claimant's lumbar spine. Dr. Marbas also listed a number of maintenance medical treatment modalities including medications, physical therapy, pool therapy, psychologist/therapist, pain medicine specialist, neurosurgeon, and Work Partners.

5. On January 9, 2023, the respondents filed a Final Admission of Liability (FAL) admitting for the MMI date of June 20, 2022, and the impairment rating of 31 percent whole person. In addition, the respondents admitted to "future medical care that is reasonable, necessary and related to the compensable claim."

6. As part of the recommended maintenance medical treatment, on August 24, 2022, the claimant was seen by pain management specialist, Dr. Ellen Price. On that date, Dr. Price noted that the claimant's treatment history includes physical therapy, massage, use of a TENS unit, medications, and surgical history. On examination, Dr. Price noted that the claimant had tenderness at the left sacroiliac (SI) joint on palpation. Dr. Price diagnosed bilateral sacroiliitis, left greater than right. Dr. Price recommended the claimant use an SI joint belt. She also recommended a left SI joint injection.

7. On September 21, 2022, the claimant returned to Dr. Price. On examination, Dr. Price noted tenderness at both of the claimant's SI joints. She also noted a positive Gaenslen's test and a positive Faber maneuver. Dr. Price opined that the claimant's main pain complaint was coming from his SI joint pain. Dr. Price noted that "[i]t is not uncommon for people with disk replacements or fusions to have hypermobility below the level." On that date, Dr. Price recommended that the claimant undergo bilateral SI joint injections. [1]

8. The respondents denied authorization for the recommended left SI joint injection.

9. Dr. Price continued to recommend SI joint injections for the claimant when she saw him on October 19, 2022.

10. At the request of the respondents, Dr. Brain Mathwich reviewed the claimant's medical records and opined regarding the recommended left sided SI joint injection. Dr. Mathwich opined that the claimant does not meet the Colorado Medical Treatment Guidelines (MTG) for SI joint injection. Specifically, Dr. Mathwich listed the requirements of the MTG for SI joint injection: "1. At least 3 months of pain, unresponsive to 6 weeks of conservative therapy. 2. Confounding psychological risk factors have been screened for and clinically addressed 3. Three positive physical examination findings consistent with SI joint origin pain" For each item listed, Dr. Mathwich found that the claimant does not meet these requirements. Specifically, Dr. Mathwich stated that the claimant has not undergone at least six months of conservative therapy. Dr. Mathwich also noted that the claimant has significant psychiatric issues. Finally, Dr. Mathwich noted that Dr. Price noted a positive Faber maneuver "but did not perform additional SI joint examinations."

11. The respondents relied upon Dr. Mathwich's report and denied authorization for the requested left SI joint injection.

12. On January 17, 2023, Dr. Price authored a letter regarding the recommended SI joint injections. In that letter, Dr. Price stated that she recommended the SI joint injections because the claimant has "chronic pain because of his sacroiliac joint". Dr. Price noted that this is appropriate treatment when there is a positive Gaenslen test or a positive Faber test. Dr. Price reiterated that "it is very common that

[1] Only the recommended **left** St joint injection is before the ALJ at this time.

patients have sacroiliac joint dysfunction after they have had disk replacements or fusions."

13. PA Herrera testified at the hearing. PA Herrera explained that there are various tests used to diagnose sacroiliitis. Those tests include the Fortner finger sign, the Gaenslen test, and a Faber test. PA Herrera testified that it is her understanding that Dr. Price performed all of these tests on the claimant and each was positive. PA Herrera also testified that SI joint injections are both therapeutic and diagnostic.

14. The claimant testified that his current symptoms include pain in the middle of his low back that radiates into his left leg and left hip. Specifically, the claimant indicated he has pain in his left upper buttock area below his beltline.

15. The claimant has requested cost reimbursement in the amount of $230.35 related to the denial of the left sided SI joint injection.

16. The ALJ credits the medical records and the claimant's testimony. The ALJ credits the opinions of Dr. Price over the contrary opinions of Dr. Mathwich. The ALJ specifically credits Dr. Price's statement that "it is very common that patients have sacroiliac joint dysfunction after they have had disk replacements or fusions." The ALJ also credits PA Herrera's testimony regarding the methods used in diagnosing sacroiliitis. The ALJ finds that the claimant has demonstrated that it is more likely than not that the recommended left sided SI joint injection is reasonable medical treatment necessary to maintain the claimant at **MMI.**

17. As the requested medical treatment has been found to be reasonable and necessary to maintain the claimant at **MMI,** the claimant has successfully demonstrated that he is entitled to costs related to pursuit of this treatment.

CONCLUSIONS OF LAW

1. The purpose of the Workers' Compensation Act of Colorado is to assure the quick and efficient delivery of disability and medical benefits to injured workers at a reasonable cost to employers, without the necessity of any litigation. Section 8-40- 102(1), C.R.S. A claimant in a Workers' Compensation claim has the burden of proving entitlement to benefits by a preponderance of the evidence. Section 8-43-201, C.R.S. A preponderance of the evidence is that which leads the trier-of-fact, after considering all of the evidence, to find that a fact is more probable than not. *Page v. Clark,* 197 Colo. 306, 592 P.2d 792 (1979). The facts in a Workers' Compensation case are not interpreted liberally in favor of either the rights of the injured worker or the rights of the employer. Section 8-43-201, *supra.* A Workers' Compensation case is decided on its merits. Section 8-43-201, *supra.*

2. When determining credibility, the fact finder should consider, among other things, the consistency or inconsistency of the witness's testimony and actions; the reasonableness or unreasonableness (probability or improbability) of the testimony and action; the motives of the witness; whether the testimony has been contradicted; and

bias, prejudice, or interest. *See Prudential Insurance* Co. *v. Cline,* 98 Colo. 275, 57 P.2d 1205 (1936); CJI, Civil 3:16.

3. The ALJ's factual findings concern only evidence that is dispositive of the issues involved. The ALJ has not addressed every piece of evidence that might lead to a conflicting conclusion and has rejected evidence contrary to the above findings as unpersuasive. *Magnetic Engineering, Inc. v. Industrial Claim Appeals Office,* 5 P.3d 385 (Colo. App. 2000).

4. Respondents are liable for authorized medical treatment reasonably necessary to cure and relieve an employee from the effects of a work related injury. Section 8-42-101, C.R.S.; *see Sims v. Industrial Claim Appeals Office,* 797 P.2d 777 (Colo. App. 1990).

5. The need for medical treatment may extend beyond the point of maximum medical improvement where claimant requires periodic maintenance care to prevent further deterioration of his physical condition. *Grover v. Industrial Commission,* 759 P.2d 705 (Colo. 1988). An award for *Grover* medical benefits is neither contingent upon a finding that a specific course of treatment has been recommended nor a finding that claimant is actually receiving medical treatment. *Holly Nursing Care Center v. Industrial Claim Appeals Office,* 992 P.2d 701 (Colo. App. 1999); *Stollmeyer v. Industrial Claim Appeals Office,* 916 P.2d 609 (Colo. App. 1995). Section 8-42-101, C.R.S., thus authorizes the ALJ to enter an order for future treatment if supported by substantial evidence of the need for such treatment. *Grover v. Industrial Commission, supra.*

6. As found, the claimant has demonstrated, by a preponderance of the evidence, that the left St joint injection recommended by Dr. Price is reasonable medical treatment necessary to maintain the claimant at **MMI.** As found, the medical records, the claimant's testimony, the opinions of Dr. Price, and PA Herrera's testimony regarding the methods used in diagnosing sacroiliitis, are credible and persuasive on this issue.

7. The claimant has requested costs related to the current Application for Hearing. Section 8-42-101(5), C.R.S. provides:

> If any party files an application for hearing on whether the claimant is entitled to medical maintenance benefits recommended by an authorized treating physician that are unpaid and contested, and any requested medical maintenance benefit is admitted fewer than twenty days before the hearing or ordered after application for hearing is filed, the court shall award the claimant all reasonable costs incurred in pursuing the medical benefit. Such costs do not include attorney fees.

8. As found, the claimant has demonstrated, by a preponderance of the evidence, that he is entitled to reimbursement of costs pursuant to Section 8-42-101(5), C.R.S. related to the requested left SI joint injection

ORDER

It is therefore ordered:

1. The respondents shall pay for the recommended left SI joint injection, pursuant to the Colorado Medical Fee Schedule.

2. The respondents shall pay the claimant $230.35 for reimbursement of costs.

3. All matters not determined here are reserved for future determination.

Dated February 21, 2023.

If you are dissatisfied with the ALJ's order, you may file a Petition to Review the order with the **Denver Office of Administrative Courts,** 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after service of the order, as indicated on the certificate of mailing or service; otherwise, the ALJ's order will be final. Section 8-43-301(2), C.R.S. and OACRP 26. You may access a petition to review form at: https://oac.colorado.gov/resources/oac-forms.

You may file the Petition to Review by mail, as long as the certificate of mailing attached to your petition shows: (1) That you mailed it within twenty (20) days after mailing or service of the order of the ALJ; and (2) That you mailed it to the above address for the **Denver Office of Administrative Courts.** You may file your Petition to Review electronically by emailing the Petition to Review to the following email address: **oac-ptr@state.co.us.** If the Petition to Review is emailed to the aforementioned email address, the Petition to Review is deemed filed in Denver pursuant to OACRP 26(A) and Section 8-43-301, C.R.S. If the Petition to Review is filed by email to the proper email address, it does not need to be mailed to the Denver Office of Administrative Courts.

In addition, it is recommended that you send an additional copy of your Petition to Review to the Grand Junction OAC via email at oac-gjt@state.co.us.

OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. 5-199-776-001

ISSUES

- Did Claimant prove she[1] suffered a compensable occupational disease to her bilateral upper extremities?

- Did Claimant prove treatment provided by Dr. William Schroeder on or after February 11, 2022 was authorized and reasonably needed to cure and relieve the effects of the compensable injury?

FINDINGS OF FACT

1. Claimant works for Employer as a public defender. Claimant's residence and primary office are in Salida, but she regularly appears in courts across the 11th Judicial District, including Fremont, Park, and Custer counties.

2. Claimant uses a small, employer-supplied laptop computer for data entry and drafting documents. Claimant does not have a legal assistant or paralegal to generate documents and does all her own typing. She spends approximately four to six hours per day typing pleadings, correspondence, emails, and detailed case notes.

3. Claimant works at a variety of desks, tables, and other workspaces, depending on whether she is at her Salida office or in one of the courthouses. Although the specific dimensions of each space are different, the ergonomics of each setup can fairly be described as "poor." The ergonomic deficiencies are compounded by the fact that Claimant is quite tall.

4. In her main office, Claimant has no keyboard tray and was typing with the laptop on a fixed-height desk. Eventually she fashioned a makeshift "standing desk" from a cardboard box to allow a less uncomfortable typing posture.

5. Claimant started having wrist and right elbow pain in late January 2022. She perceived the onset of symptoms to be associated with her work activities, particularly typing and mousing.

6. Claimant approached management about improving the ergonomics at her workstation in the Salida office. Employer arranged for a virtual ergonomic assessment to be completed online. Employer agreed to improve the furniture in Claimant's office, but the process was delayed by supply issues and logistical concerns related to an upcoming office move. Claimant investigated dictation software because "it physically hurt to type, [which] was very much part of her job."

[1] Claimant's preferred pronouns are she/her/hers.

7. There is no persuasive evidence Employer referred Claimant to a designated provider despite receiving notice of a potential work-related injury. Therefore, Claimant sought treatment from her personal provider.

8. Claimant saw her PCP, Dr. William Schroeder, on February 11, 2022. Examination of the upper extremities showed positive Phalen's and Tinel's tests bilaterally, worse on the right. Dr. Schroeder opined Claimant's clinical presentation was consistent with bilateral carpal tunnel syndrome (CTS). He referred Claimant to a hand specialist, physical therapy, and ordered an EMG. That same date, Dr. Schroeder noted significantly elevated liver enzymes and long-standing hypertension. He ordered more lab tests and prescribed a beta-blocker.

9. After the appointment with Dr. Schroeder, Claimant advised his supervisor, [Redacted, hereinafter DZ], that he had "officially" been diagnosed with CTS and referred to a hand specialist. Claimant asked DZ[Redacted] if he preferred any specific doctors but was not given any names of providers or clinics.

10. On February 15, 2022, Claimant emailed management that she and DZ[Redacted] were exploring solutions that would allow Claimant to continue working. She had tried dictation software but discovered that numerous corrections required almost as much keyboarding as simply typing the documents from scratch.

11. Claimant saw Becky Pack, an orthopedic PA-C, on February 18, 2022. Claimant described bilateral forearm and hand pain, worse on the right. Claimant stated the symptoms were exacerbated by typing, using a computer mouse, and heavy lifting. Examination showed positive Tinel's bilaterally. Ms. Pack diagnosed bilateral CTS and cubital tunnel syndrome and ordered an EMG. She also recommended an ergonomic evaluation of Claimant's workstation and restricted her to "light duty."

12. Around that time, Claimant continued discussions with management about ergonomic solutions. Employer planned to purchase the legal version of Dragon software in hopes it would be more efficient.

13. Claimant had an initial OT evaluation on February 24, 2022 at Heart of the Rockies Occupational Therapy. She reported increased bilateral upper extremity symptoms "when engaged in computer tasks on a daily basis." Claimant explained she spent approximately 4-6 hours each day working on the computer. Examination showed mild reduction in wrist ROM, and mild tenderness to palpation around both wrists, proximal forearms, and elbows. Tinel's was positive at both wrists and the right elbow. The therapist recommended therapy for "overuse syndrome with tendonitis and medial/ulnar nerve compressions." She also recommended nighttime splinting and "ergonomic changes to current workstation to improve BUE alignment and protection with repetitive typing/computer tasks to avoid increased overuse symptoms."

14. That same day, DZ[Redacted] emailed upper management about a part-time schedule he worked out with Claimant, which they believed struck a reasonable balance between giving Claimant's "hands a rest" while not placing excessive stress on

the other attorneys in the office from covering Claimant's caseload. DZ[Redacted] stated if the part-time schedule were not approved quickly, he would put Claimant on sick leave and reassign her cases. Management responded it needed additional information and time to review the request. As a result, DZ[Redacted] advised the office staff that Claimant's caseload would be reassigned. DZ[Redacted] hoped the reassignment would be only temporary and the part-time plan would eventually be approved.

15. Claimant was evaluated by Dr. Edmund Rowland, an orthopedic hand specialist, on February 25, 2022. She reported bilateral arm pain and occasional numbness and tingling. Examination of the right elbow showed tenderness over the common extension tendon origin, lateral epicondyle pain with resisted wrist extension, and tenderness around the ulnar nerve. The left elbow was unremarkable. Tinel's was positive at both wrists. Dr. Rowland was not convinced Claimant had CTS and cubital tunnel syndromes, and "would think more along the lines of an overuse tendonitis, lateral epicondylitis, etc." He diagnosed "likely overuse" right lateral epicondylitis, and probable radial, median, and ulnar "neuritis." Claimant wanted to avoid surgery and was hoping for nonoperative solutions "likely ergometric adjustment and/or therapy with a break from mousing and keyboarding."

16. Electrodiagnostic testing was performed on March 8, 2022. It showed mild right median neuropathy at the wrist consistent with the clinical diagnosis of CTS. No electrodiagnostic abnormalities were found in the elbows or left wrist.

17. Dr. Rowland reviewed the electrical testing data and stated Claimant's CTS would be characterized as "the mildest of mild as the numbers are nearly normal." He maintained that Claimant suffers primarily from tendinopathy and nerve irritation rather than a true compressive neuropathy. He concluded, "I do believe [Claimant's] symptoms come down to an overuse phenomenon. It is my medical advice that [she] figures out a way to type less." Dr. Rowland recommended Claimant continue working with the occupational therapist to adjust her workstation and implement a regimen of frequent breaks and regular stretching "to minimize the symptoms created by prolonged typing. I would like [her] to limit typing if at all possible."

18. On April 28, 2022, Dr. Schroeder documented Claimant's hypertension had been brought under control with medications.

19. Claimant was off work from late February to approximately the end of July 2022. Claimant's upper extremity symptoms improved significantly while she was off work but recurred "almost immediately" when she returned to regular work.

20. Dr. Carlos Cebrian performed an IME for Respondent on August 24, 2022. Dr. Cebrian diagnosed right CTS, bilateral wrist tendonitis, and bilateral elbow epicondylitis. Relying on the DOWC Cumulative Trauma Disorder Medical Treatment Guidelines (MTGs), Dr. Cebrian concluded none of the conditions were caused by Claimant's work. He opined Claimant's work involved no primary or secondary risk factors identified in the MTGs. He noted the MTGs state that typing up to seven hours per day "at an ergonomically correct workstation" is not a risk factor for CTD. Although four hours

of mousing per day is an established risk factor for CTS, Claimant does not meet that criterial because she only used a mouse for approximately one hour total with breaks. Dr. Cebrian speculated that Claimant's hypertension or elevated liver enzymes may be causative of her mild right CTS and tendinopathies.

21. Dr. Schroeder responded to Dr. Cebrian's IME on September 9, 2022. He "totally disagreed" with the "unfounded" conclusion that Claimant's condition is not work-related. Dr. Schroeder thought his opinions should be given more weight because they are based on a long-term treatment relationship.

22. Claimant's testimony regarding the onset and progression of symptoms and their temporal relationship to her work activities is credible.

23. The causation opinions of Dr. Rowland and Dr. Schroeder are credible and more persuasive than the contrary opinions of Dr. Cebrian.

24. Claimant proved she suffered a compensable occupational disease involving her bilateral upper extremities.

25. Claimant proved the evaluations and treatment provided by Dr. Schroeder, Heart of the Rockies Occupational Therapy, and Ms. Pack were reasonable needed to cure and relieve the effects of her compensable injury.

26. Claimant proved Dr. Schroeder, Heart of the Rockies Occupational Therapy, and Ms. Peck are authorized providers. Claimant had the right to select his own treating physician because Employer did not refer him to a designated provider after receiving notice of the injury.

CONCLUSIONS OF LAW

To receive compensation or medical benefits, a claimant must prove she is a covered employee who suffered an injury arising out of and in the course of employment. Section 8-41-301(1); *Faulkner v. Industrial Claim Appeals Office*, 12 P.3d 844 (Colo. App. 2000); *City of Boulder v. Streeb*, 706 P.2d 786 (Colo. 1985); *Pacesetter Corp. v. Collett*, *33 P.3d 1230* (Colo. App. 2001). The mere fact that an employee experiences symptoms while working does not compel an inference the work caused the condition. *Scully v. Hooters of Colorado Springs*, W.C. No. 4-745-712 (October 27, 2008). There is no presumption that a condition which manifests at work arose out of the employment. Rather, the Claimant must prove a direct causal relationship between the employment and the injury. Section 8-43-201; *Ramsdell v. Horn*, 781 P.2d 150 (Colo. App. 1989).

The Act imposes additional requirements for liability of an occupational disease beyond the "arising out of" and "course and scope" requirements. A compensable occupational disease must meet each element of the four-part test mandated by § 8-40-201(14), which defines an occupational disease as:

> [A] disease which results directly from the employment or the conditions under which work was performed, which can be seen to have followed as a

> natural incident of the work and as a result of the exposure occasioned by the nature of the employment, and which can be fairly traced to the employment as a proximate cause and which does not come from a hazard to which the worker would have been equally exposed outside of the employment.

The equal exposure element effectuates the "peculiar risk" test and requires that the injurious hazards associated with the employment be more prevalent in the workplace than in everyday life or other occupations. *Anderson v. Brinkhoff*, 859 P.2d 819 (Colo. 1993). The claimant "must be exposed by his or her employment to the risk causing the disease in a measurably greater degree and in a substantially different manner than are persons in employment generally." *Id.* at 824. The hazard of employment need not be the sole cause of the disease, but must cause, intensify, or aggravate the condition "to some reasonable degree." *Id*.

The Division has adopted Medical Treatment Guidelines (MTGs) to advance the statutory mandate to assure quick and efficient delivery of medical benefits to injured workers at a reasonable cost to employers. Under § 8-42-101(3)(b) and WCRP 17-2(A), medical providers must use the MTGs when furnishing medical treatment. The ALJ may consider the MTGs as an evidentiary tool but is not bound by the MTGs when determining if requested medical treatment is reasonably necessary or work-related. Section 8-43-201(3); *Logiudice v. Siemans Westinghouse*, W.C. No. 4-665-873 (January 25, 2011).

As found, Claimant proved she suffered a compensable occupational disease affecting her bilateral upper extremities. The causation opinions of Dr. Rowland and Dr. Schroeder are more persuasive than the contrary opinions offered by Dr. Cebrian. Claimant's testimony is credible. Claimant has consistently reported that her wrist and elbow symptoms were directly associated with her work activity. Although Claimant is not a medical expert, she is in the best position to say how her body responded to particular stimuli. Additionally, Claimant's condition improved when she stopped working but recurred "almost immediately" when she returned to regular work activities, which also supports a causal relationship. Dr. Cebrian's mechanical application of the MTG causation matrix is unpersuasive in this case. First, the MTGs are not binding on the ALJ in the face of persuasive contrary evidence regarding an individual claimant. In any event, the MTGs do not categorically state that computer work can never cause CTS, nerve irritation, or tendinopathy. Rather, the MTGs provide that computer work up to seven hours per day at an *"ergonomically correct"* workstation is not a risk factor for CTD. WCRP 17, Exhibit 5, § D.3 (emphasis added). None of Claimant's regular workspaces can fairly be described as "ergonomically correct." In fact, the ergonomics in her main office were so poor she resorted to building a jerry-rigged "standing desk" with a cardboard box.

Moreover, even if we concluded that Claimant's upper extremity symptoms were not caused by her work, her symptoms were aggravated and perpetuated by work activities, which ultimately prompted her to seek treatment and caused disability. Accordingly, Respondent would still be liable for a compensable aggravation irrespective of direct causation.

There is no persuasive evidence that Claimant was "equally exposed" to the injurious employment hazards outside of work. Therefore, Claimant proved a compensable occupational disease.

B. Medical benefits

The respondents are liable for medical treatment reasonably necessary to cure and relieve the effects of an industrial injury. Section 8-42-101. The claimant must prove entitlement to medical benefits by a preponderance of the evidence. *Wal-Mart Stores, Inc. v. Industrial Claim Appeals Office*, 989 P.2d 251 (Colo. App. 1999).

Besides proving treatment is reasonably necessary, the claimant must prove the provider is "authorized." *Bunch v. Industrial Claim Appeals Office*, 148 P.3d 381 (Colo. App. 2006). Under § 8-43-404(5)(a), the employer has the right to choose the treating physician in the first instance. The employer must tender medical treatment "forthwith," or the right of selection passes to the claimant. *Rogers v. Industrial Claim Appeals Office*, 746 P.2d 565 (Colo. App. 1987). The obligation to designate a physician arises when the employer receives information indicating to a reasonably conscientious manager that a potential compensation claim might be involved. *Jones v. Adolph Coors Co*., 689 P.2d 681 (Colo. App. 1984).

As found, Claimant proved the evaluations and treatment provided by Dr. Schroeder, Heart of the Rockies Occupational Therapy, and Ms. Pack were reasonably needed to cure and relieve the effects of her compensable injury. Additionally, Claimant proved Dr. Schroeder, Heart of the Rockies Occupational Therapy, and Ms. Peck are authorized providers. Claimant had the right to select her own treating physician because Employer did not refer her to a designated provider after receiving notice of the injury.

ORDER

It is therefore ordered that:

1. Claimant's claim for workers' compensation benefits is compensable.

2. Respondent shall cover treatment from authorized providers reasonably needed to cure and relieve the effects of Claimant's compensable injury, including but not limited to treatment on and after February 11, 2022 by Dr. William Schroeder, Heart of the Rockies Occupational Therapy, and PA-C Beth Pack.

3. All issues not decided herein are reserved for future determination.

If you are dissatisfied with this order, you may file a Petition to Review with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on the certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail by sending it to the above address for the **Denver Office of Administrative Courts** within twenty (20) days after mailing or service of the ALJ's order. In the alternative, you may file your Petition to Review

electronically by email to the following email address: oac-ptr@state.co.us. If the Petition to Review is timely served via email, it is deemed filed in Denver pursuant to OACRP 26(A) and § 8-43-301, C.R.S. If the Petition to Review is filed by email to the proper email address, it need not also be mailed to the Denver Office of Administrative Courts. For statutory reference, see § 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: https://oac.colorado.gov/resources/oac-forms

ISSUES

- Did Claimant prove his claim should be reopened based on a change of condition?
- Did Claimant prove a reverse total shoulder arthroplasty recommended by Dr. John Pak is reasonably needed and causally related to the admitted industrial injury?

FINDINGS OF FACT

1. Claimant worked for Employer since 2017 as a building engineer. He performed maintenance on a wide variety of physical plant systems such as HVAC, electrical, plumbing, and landscaping. The job was physically demanding, requiring heavy lifting and frequent use of the upper extremities, including overhead work.

2. Claimant suffered an admitted injury to his right shoulder on June 1, 2020 while manipulating a 150-pound steel plate to repair a loading dock leveling system. Claimant lifted the plate and felt a painful pop in his right shoulder.

3. Claimant's case is complicated by a prior work-related right shoulder injury in September 2011. The prior injury involved a torn rotator cuff and biceps rupture. Claimant had surgery for the rotator cuff tear, but the biceps was irreparable. He was put at MMI by his ATP for that claim, Dr. Daniel Peterson, on May 9, 2012. At the final appointment, Claimant reported improvement after surgery. He was working full duty but still had occasional "twinges" of pain with certain movements, and slight weakness with overhead work.[1] Examination that date showed positive impingement test and "mild" weakness. Dr. Peterson commented that Claimant had "surprisingly good strength recovery at this point for as large an RTC tear as he had." He anticipated Claimant's strength and ROM would continue to improve over time. Dr. Peterson assigned an 11% upper extremity rating for range of motion deficits. Claimant was released to work without restrictions.

4. There is no persuasive evidence Claimant sought any additional medical care for the right shoulder between May 2012 and the June 1, 2020 injury with Employer. Claimant performed physically demanding work without difficulty during that interval.

5. After the June 1, 2020 accident, Employer referred Claimant to Concentra for authorized treatment. The initial examination showed reduced range of motion and positive painful arc, Hawkins, drop arm, and empty can tests. Claimant was diagnosed with a right shoulder "strain." He was advised to wear a sling constantly and referred to physical therapy. He was given work restrictions of no use of the right arm.

[1] In 2012, Claimant was performing similar facilities maintenance work for a different employer.

6. Claimant saw Dr. Peterson at his third visit to Concentra, who has remained the primary ATP since. On June 15, 2020, Claimant discussed the prior injury with Dr. Peterson and stated, “his shoulder does not feel the same way as his previous injury.”

7. Claimant had a right shoulder MRI on June 17, 2020. It showed severe rotator cuff pathology, including supraspinatus, subscapularis, and infraspinatus tears, extensive fatty atrophy of the subscapularis muscle and lesser atrophy of the supraspinatus and infraspinatus.

8. After reviewing the MRI report, Dr. Peterson referred Claimant to Dr. Michael Simpson, an orthopedic surgeon.

9. Claimant saw Kimberly Anne Dial Shenuk, PA-C in Dr. Simpson’s office on June 19, 2020. Claimant reported his pain was improving with PT and NSAIDs. Ms. Shenuk reviewed the MRI images and opined, “there is definitely chronic involvement on top of his acute injury. There is fatty atrophy in the subscapularis, supraspinatus, and infraspinatus muscle bellies. He denies any weakness or significant pain prior to this injury.” Ms. Shenuk requested medical records from Concentra and scheduled Claimant to see Dr. Simpson.

10. Dr. Simpson evaluated Claimant on June 29, 2020. He reviewed the MRI images and confirmed the supraspinatus, infraspinatus, and subscapularis tendon tears. He noted fatty deposition in the subscapularis muscle but no atrophy of the infraspinatus. He also saw some atrophy of the supraspinatus “but more muscle than fat.” Dr. Simpson opined, “The subscap[ularis tear] is definitely chronic. Supraspinatus probably has some degree of chronicity, the infraspinatus less so.” Dr. Simpson advised Claimant that any surgery could be “quite complicated depending on what is chronic and what is acute.” He thought it reasonable to treat the “acute component” of Claimant’s “multi-tendinous tear” to maintain as much function as possible. However, the “chronic aspects” were not repairable and would likely require a capsular reconstruction or shoulder replacement arthroplasty. Dr. Simpson did not think surgery was warranted immediately because Claimant was functioning relatively well. He gave Claimant a subacromial Toradol injection and asked him to return in three weeks to further discuss the possibility of surgery.

11. Claimant returned to Dr. Simpson on July 20, 2020. His symptoms had improved in the interim with PT and the injection. Examination showed some weakness to external rotation but good supraspinatus and subscapularis compensatory function. Dr. Simpson did not recommend any surgery “at this point.” He opined Claimant’s condition may deteriorate with time and indicated Claimant could follow up periodically over the next 12 months if needed.

12. Dr. Peterson put Claimant at MMI on July 27, 2020. Claimant told Dr. Peterson he did not want surgery and thought he could return to his regular duties. Range of motion measurements showed no additional impairment compared to the 2011 rating. Dr. Peterson assigned a 0% rating after apportionment and released Claimant to full duty. Dr. Peterson opined, “[Claimant] will need medical maintenance care with Dr. Simpson

every 3 months over the next 2 years to monitor the RTC tear and determine if he will eventually need surgery."

13. Claimant returned to his regular job after MMI. Although he had no formal restrictions, Employer assigned a co-worker to help with overhead work and heavy lifting.

14. Claimant initially had no difficulty completing his work, with the co-worker's assistance. But approximately four weeks after being put at MMI, his shoulder started to become "irritated" and "agitated" by the end of his shifts. This became progressively worse over the next several months.

15. Claimant contacted Dr. Simpson's office in late November or early December 2020 for an appointment to evaluate his increased symptoms. Dr. Simpson's schedule was booked out several months, and the first available appointment was in March 2021.

16. Claimant saw Dr. Simpson on March 24, 2021. Claimant reported "worsening pain" and "more limited function in his shoulder." He was having difficulty lifting and carrying objects, and had his symptoms had reached the point that "simply trying to play the piano is hard for him." Dr. Simpson referred Claimant to Dr. John Pak for consideration of a reverse total shoulder arthroplasty.

17. Claimant was evaluated by Trisha Finnegan, NP in Dr. Pak's office on March 31, 2021. Claimant described a 9-month history of "ongoing and progressive shoulder pain" since the June 2020 work injury. He was having difficulty performing activities of daily living because of daily 8/10 pain and right shoulder weakness. Physical examination showed reduced range of motion and significant weakness of the rotator cuff muscles. It is unclear whether Dr. Pak personally saw Claimant at that appointment, but he at least reviewed the MRI images and discussed the case with Ms. Finnegan. Based on that review, Dr. Pak recommended a right shoulder reverse total arthroplasty. Dr. Pak did not discuss causation. However, his office submitted a surgical preauthorization request to Insurer under this claim.

18. Dr. Adam Farber performed an IME for Respondents on July 27, 2021. Dr. Farber reviewed the MRI images and saw no evidence of any acute injury or structural anatomical change. Instead, he opined that all pathology is pre-existing and unrelated to the June 1, 2020 injury. He noted Claimant's symptoms improved significantly within two months of the accident and he returned to work without restrictions. Dr. Farber concluded the work accident caused a temporary symptomatic exacerbation, but no structural aggravation of Claimant's longstanding, pre-existing rotator cuff pathology. Dr. Farber opined Claimant's ongoing symptoms and limitations reflected the natural progression of the failed rotator cuff repair in 2011. Although a reverse total shoulder arthroplasty may be appropriate treatment for Claimant's condition, he believes it is not causally related to the June 1, 2020 work accident.

19. Claimant had a DIME with Dr. Matthew Brodie on September 15, 2021. Dr. Brodie provided a somewhat confusing discussion of causation with respect to surgery.

He noted that Claimant improved after the 2011 injury and "had the capacity for unrestricted work" before the June 2020 injury. Additionally, Claimant sought no treatment for the shoulder "during the 9-year timeframe preceding the current work injury" despite performing physically demanding work. Dr. Brodie concluded, "it is medically probable that the claimant suffered a substantial aggravation or a new injury." He opined that without an MRI immediately before the June 2020 work injury, the post-injury findings cannot be "dated" to a specific injury date. However, he agreed that at least some of the MRI findings predated the work injury. Dr. Brodie concluded he could not provide a "definitive causal assessment" based on the available documentation, and ultimately adopted the July 27, 2020 MMI date originally assigned by Dr. Peterson.

20. Respondents files a Final Admission of Liability (FAL) based on Dr. Brodie's DIME. Claimant timely objected to the FAL and requested a hearing. The parties reached a stipulation that was approved on April 13, 2022. Respondents agreed to file an amended FAL and Claimant agreed not to object. The amended FAL closed all issues except medical benefits after MMI.

21. Claimant returned to Dr. Peterson on May 2, 2022. Dr. Peterson noted Claimant had "gotten worse" since last seen in July 2020 and a reverse total shoulder arthroplasty had been recommended. He observed supraspinatus and infraspinatus atrophy on gross inspection of the shoulder. Range of motion was significantly less than at the time of MMI, and strength testing showed "marked weakness" of the supraspinatus and infraspinatus. Dr. Peterson opined, "his claim should be re-opened as he is no longer at MMI." Dr. Peterson noted Claimant had worked five years for Employer doing building maintenance without difficulty before the work injury, and opined, "he clearly had a new injury at this company and unfortunately to restore him to previous ability and function it has now become clear that his only option is a RTSA." The arthroplasty was necessary "to restore him as much as possible to pre-injury function and pain level." He added, "I gave him 24 months of medical maintenance care . . . and in fact he has gotten worse and now he is in need of further surgery. This should not be surprising or contested." Dr. Peterson referred Claimant back to Dr. Pak.

22. Claimant was re-evaluated by Ms. Finnegan on May 9, 2022. He reported ongoing significant pain and difficulty with ADLs. Claimant reiterated that "prior to his [June 2020] injury he had been doing quite well with no difficulty performing activities of daily living or work duties." After reviewing the case with Dr. Pak, Ms. Finnegan again recommended a reverse total shoulder arthroplasty. She opined, "the patient was not having any difficulty prior to his work injury in regard to his function and mobility of his right shoulder. He denies any pain prior to his injury. Given his mechanism of injury and chronicity[2] of symptoms with failure to respond to conservative modalities, surgical intervention is indicated."

23. Dr. Farber performed a second IME for Respondents on June 28, 2022. Claimant reported 7/10 shoulder pain, aggravated by activities such as writing, playing

[2] The ALJ infers that Ms. Finnegan was referring to "chronicity" of symptoms since the June 2020 work accident.

piano, moving his fingers, fishing, and golfing. He also described weakness with lifting. His pain was worse than at the prior IME. Dr. Farber reviewed a handful of additional records, and stated his opinions were unchanged from the first IME.

24. Dr. Farber testified at hearing consistent with his reports.

25. Dr. Peterson testified in a post-hearing deposition on January 5, 2023. Dr. Peterson described objective evidence of worsening between July 2020 and May 2022, including "definite" deterioration of shoulder range of motion and strength. He disagreed with Dr. Farber that Claimant's shoulder pathology is entirely pre-existing. Instead, he agreed with Dr. Simpson's characterization of the condition as "acute on chronic." Dr. Peterson emphasized that Claimant "did extremely well" after the 2011 surgery and performed heavy work without difficulty until the June 1, 2020 injury. He agreed with Dr. Simpson and Dr. Pak that a reverse total shoulder arthroplasty is the most appropriate treatment at this juncture because a lesser surgery would not likely provide significant functional benefit.

26. Claimant's testimony is generally credible.

27. The opinions of Dr. Peterson, Dr. Simpson, Dr. Pak, and Ms. Finnegan are credible and more persuasive than the contrary opinions offered by Dr. Farber.

28. Claimant proved his condition worsened after July 27, 2020 and he is no longer at MMI.

29. Claimant proved the reverse total shoulder arthroplasty recommended by Dr. Pak is reasonably needed to cure and relieve the effects of his injury. Claimant proved the shoulder arthroplasty is causally related to the admitted June 1, 2020 work accident. Although Claimant had underlying, pre-existing rotator cuff pathology, the work injury aggravated, accelerated, and combined with the pre-existing condition to produce the need for surgery.

CONCLUSIONS OF LAW

Section 8-43-303 authorizes an ALJ to reopen any award on the grounds of error, mistake, or a change in condition. A "change in condition" refers either to a change in the condition of the original compensable injury, or to a change in the claimant's physical or mental condition that can be causally related to the original injury. *Heinicke v. Industrial Claim Appeals Office,* 197 P.3d 220 (Colo. App. 2008); *Chavez v. Industrial Commission,* 714 P.2d 1328 (Colo. App. 1985). If a claimant's condition has changed, the ALJ should consider whether the change represents the natural progression of the industrial injury, or results from a separate cause. *Goble v. Sam's Wholesale Club*, W.C. No. 4-297-675 (May 3, 2001). The authority to reopen a claim is permissive, and whether to reopen a claim if the statutory criteria have been met is left to the ALJ's discretion. *Id*. When a claimant seeks reopening based on a change of condition after MMI, a prior DIME determination is entitled to no special weight. *Cordova v. Industrial Claim Appeals Office*, 55 P.3d 186 (Colo. App. 2002). The claimant must prove a basis to reopen by a preponderance of the evidence. Section 8-43-304(4).

The respondents are liable for medical treatment reasonably necessary to cure and relieve the effects of an industrial injury. Section 8-42-101. The mere occurrence of a compensable injury does not compel the ALJ to approve all requested treatment. Where the claimant's entitlement to medical benefits is disputed, the claimant must prove the treatment is reasonably needed and causally related to the industrial accident. *Wal-Mart Stores, Inc. v. Industrial Claim Appeals Office*, 989 P.2d 251 (Colo. App. 1999). The claimant must prove entitlement to disputed medical benefits by a preponderance of the evidence. *Snyder v. Industrial Claim Appeals Office*, 942 P.2d 1337 (Colo. App. 1997).

A pre-existing condition does not disqualify a claim for medical benefits if an industrial injury aggravates, accelerates, or combines with a pre-existing condition to produce disability or a need for treatment. *H & H Warehouse v. Vicory*, 805 P.2d 1167 (Colo. App. 1990).

As found, Claimant proved his condition worsened after July 27, 2020 and he is no longer at MMI. Although Claimant was not completely symptom-free when put at MMI, his pain levels were low, and returned to work, albeit with a helper for overhead tasks and heavy lifting. Within a month of MMI his shoulder started becoming "irritated" and "agitated" by the end of his shifts. By the time he was able to get back in with Dr. Simpson in March 2021, his symptoms were significantly worse, and his functional ability had deteriorated. At that point, Dr. Simpson thought surgery was probably warranted and referred Claimant to Dr. Pak for consideration of arthroplasty. Claimant's condition continued progress over the next year, and was clearly worse when he saw Dr. Peterson in May 2022 than he had been at MMI in July 2020. Dr. Peterson persuasively explained that Claimant's subjective descriptions of worsening are corroborated by objective clinical findings.

Although it is fairly obvious that Claimant's condition worsened after MMI, the more challenging question involves causation. Claimant undeniably had significant underlying rotator cuff pathology before the June 1, 2020 injury. But his shoulder was asymptomatic (or at most minimally symptomatic), required no treatment, and did not impede his ability to perform physically demanding work. That status changed when Claimant lifted the heavy plate at work on June 1, 2020. Although Claimant's symptoms improved with therapy and an injection, they never entirely resolved, and progressively worsened over the next several months.

The ALJ credits the opinions of Dr. Simpson and Dr. Peterson that the work accident probably caused some acute tearing and further progression of the underlying condition. But even if Dr. Farber is correct that all pathology shown on the MRI was pre-existing, that is not the end of the analysis. A claimant need not show an injury objectively caused any identifiable structural change to their underlying anatomy to prove an aggravation. A purely symptomatic aggravation is sufficient for an award of medical benefits if it the symptoms were triggered by work activities and caused the claimant to need treatment she would not otherwise have required. *Merriman v. Industrial Commission*, 210 P.2d 448 (Colo. 1949); *Cambria v. Flatiron Construction*, W.C. No. 5-066-531-002 (May 7, 2019). Regardless of the underlying condition of his rotator cuff before the work accident, Claimant was not a candidate for an arthroplasty because he

had no symptoms and functional impairment. No one performs arthroplasties on asymptomatic and nondisabling shoulders, no matter how damaged they might be. Although Claimant's shoulder improved relatively quickly with PT and an injection, he remained symptomatic to some degree. He never fully returned to his pre-injury baseline level of symptomlogy and function, and started slowly worsening relatively quickly after returning to work. Evenentually the shoulder was bad enough that he sought additional evaluation and treatment. Claimant proved the worsening of his condition reflects the natural progression of the June 1, 2020 work injury.

Claimant also proved the reverse total shoulder arthroplasty is reasonably needed. Dr. Simpson, Ms. Finnegan, and Dr. Pak are persuasive that a lesser surgery is unlikely to help Claimant, and an arthroplasty is the most appropriate course of treatment.

ORDER

It is therefore ordered that:

1. Claimant's Petition to Reopen is granted.

2. Insurer shall cover the right reverse total shoulder arthroplasty recommended by Dr. John Pak.

3. All issues not decided herein are reserved for future determination.

If you are dissatisfied with this order, you may file a Petition to Review with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on the certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail by sending it to the above address for the **Denver Office of Administrative Courts** within twenty (20) days after mailing or service of the ALJ's order. In the alternative, you may file your Petition to Review electronically by email to the following email address: oac-ptr@state.co.us. If the Petition to Review is timely served via email, it is deemed filed in Denver pursuant to OACRP 26(A) and § 8-43-301, C.R.S. OFFICE OF ADMINISTRATIVE COURTS
STATE OF COLORADO
WORKERS' COMPENSATION NO. 5-113-937-001

ISSUES

- Did Claimant prove his claim should be reopened based on a change of condition?
- Did Claimant prove an L4-S1 lumbar fusion recommended by Dr. James Bee is reasonably needed and causally related to the admitted work injury?

FINDINGS OF FACT

1. Claimant worked for Employer as a delivery driver, delivering oxygen concentrators, cylinders, and associated supplies to patients' homes. The job was physically demanding and required lifting and carrying 70 pounds on a regular basis. Before going to work for Employer, Claimant performed essentially the same job for a different oxygen supply company, from approximately 2007 to 2018.

2. Claimant suffered an admitted low back injury on July 15, 2019 while moving multiple oxygen tanks down a flight of stairs. Claimant was using a two-wheeled dolly with an integrated rack, loaded with approximately 10 cylinders. Approximately halfway down the staircase, Claimant fell and felt a pop and sharp stabbing pain in his back. He rested for a few minutes, and then finished moving the tanks back to his delivery van. The injury occurred on his last stop of the day, so he returned to the warehouse and reported the injury to his manager. The manager told Claimant to "keep me posted if anything comes of it."

3. Claimant worked his regular job for approximately 10 days after the injury. The symptoms gradually worsened until he stopped working on July 26. Claimant requested treatment and was referred to Emergicare.

4. Claimant saw Dr. Michael Dallenbach at his initial appointment on July 30, 2019. Physical examination showed decreased lumbar range of motion, bilateral lumbosacral paraspinal muscle spasm, positive straight leg raise testing, and decreased strength with dorsiflexion and plantar flexion of both ankles. X-rays showed approximately 7 mm of anterolisthesis of L5 on S1, but no fracture was noted. Dr. Dallenbach diagnosed a soft tissue strain and gave Claimant a Toradol injection. He assigned work restrictions of no lifting more than 10 pounds, referred Claimant to physical therapy.

5. At the initial PT evaluation on August 1, 2019, Claimant described low back pain with radiating pain into his right buttock. The therapist noted some mild radicular symptoms on the right.

6. At a follow-up with Dr. Dallenbach on August 7, 2019, Claimant described ongoing 7/10 back pain. He was performing sedentary modified duty and the prolonged sitting was making his back pain worse. Dr. Dallenbach adjusted Claimant's restrictions to alternate sitting and walking.

7. Claimant continued PT with gradual improvement in his back pain. On August 23, 2019, the therapist documented Claimant's "main pain" was right "sciatic" pain.

8. On August 26, 2019, Claimant reported diminished strength and motion on the right side, despite slow improvement in his pain. Physical exam confirmed decreased ROM and strength on the right. Dr. Dallenbach ordered a lumbar MRI.

9. A lumbar MRI was completed on August 31, 2019. It showed significant degenerative disc and facet changes at L4-5 and L5-S1 that were "potentially causing symptoms" in a bilateral L4 and L5 distribution. The MRI also showed mild degenerative changes from T11-12 through L3-4, which the radiologist opined were not clinically significant.

10. Claimant followed up with Dr. Dallenbach on September 4, 2019 to review the MRI results. Dr. Dallenbach documented abnormal weakness on the right side in an L4-5 distribution. He referred Claimant to Dr. Michael Sparr, a physiatrist.

11. Claimant saw Dr. Sparr on September 19, 2019. He described ongoing 5-7/10 pain. The greatest pain was in the right central back and buttock, increased with bending, sitting on hard surfaces, and standing for more than 20 minutes. He described radiating pain intermittently into the right central buttock and posterior thigh with occasional cramping in his dorsal leg. He denied numbness and tingling or perceived weakness in the leg. Physical examination showed moderate tenderness over the lower lumbar paraspinal muscles and facets, particularly at L4-5 and L5-S1. Claimant was "exquisitely" tender over the right SI joint and surrounding gluteal muscles. Sacroiliac positive tests were markedly positive. Neurological examination of the legs was normal. Dr. Sparr diagnosed SI dysfunction causing right sacroiliitis and gluteal myofasciitis, with an element of trochanteric bursitis. Dr. Sparr also noted Claimant "may be experiencing some intermittent right L5 radiculitis but it is not obvious on today's examination." He noted the spondylolisthesis shown on x-rays predated the work injury. He recommended an SI joint injection and trochanteric bursa injection. He also advised Clamant to reinitiate PT.

12. On September 25, 2019, Dr. Dallenbach documented Claimant was working modified duty and doing his best to alternate positions to manage his pain. Claimant reported pain radiating down his leg. Physical therapy was helping. Claimant was eager to return to regular work but was concerned about prolonged sitting and going up and down stairs to deliver oxygen supplies.

13. Dr. Stephen Scheper performed a right SI joint injection on October 8, 2019. Claimant saw Dr. Dallenbach the next day, October 9. He described "notable improvement" after the injection. Claimant was pleased because Dr. Sparr had said it might take a couple of weeks for the injection to take effect. Contemporaneous notes from the physical therapist also documented significant benefit from the injection.

14. Claimant followed up with Dr. Sparr on October 24, 2019. His back and leg pain were significantly improved after the SI joint injection. His major pain that day was in

the right lateral buttock. He was doing aggressive deep tissue therapy, which had been beneficial. Physical examination findings were improved compared to before the injection. Dr. Sparr administered a trochanteric bursa injection.

15. On December 3, 2019 Dr. Sparr documented Claimant had responded well the injections and was only using ibuprofen once per day. Dr. Sparr switched to meloxicam to reduce the possibility of any adverse GI side effects. Claimant was still having radiating pain down through the buttocks. Dr. Sparr opined Claimant may be a candidate for epidural steroid injections in the future, but "for now," he recommended trigger point injections and aggressive manual therapy.

16. The trigger point injections and therapy were somewhat helpful.

17. At Dr. Sparr's recommendation, Claimant underwent bilateral L3, L4, and L5 medial branch blocks on February 28, 2020. Claimant had a "minimal" diagnostic response, leading Dr. Sparr to conclude that Claimant's primary issue was SI joint dysfunction. He recommended right SI joint lateral branch blocks, to be followed by a rhizotomy if the blocks were successful.

18. The lateral branch blocks were completed on May 15, 2020.

19. On May 28, 2020, Dr. Sparr documented Claimant had an "excellent diagnostic response" to the lateral branch blocks. He opined Claimant's "persistent rather severe lumbosacral pain" was probably related to ongoing SI joint dysfunction. Dr. Sparr thought Claimant was an excellent candidate for SI joint rhizotomy.

20. SI joint rhizotomies were performed on June 23, 2020. At a follow-up with Dr. Sparr on July 7, Claimant reported significant improvement and "very minimal pain" since the procedure. He was participating in physical therapy and massage.

21. Dr. Dallenbach left practice in approximately April or May 2020 and Dr. Anthony Stanulonis took over as Claimant's primary ATP.

22. On July 15, 2020, Claimant told Dr. Stanulonis he was still enjoying significant benefit from the rhizotomies, with only occasional radicular pain in the right leg. However, he was having some radicular symptoms on the left leg with prolonged sitting and standing. Dr. Stanulonis ordered massage therapy.

23. On August 14, 2020, Dr. Stanulonis noted Insurer had delayed authorization for therapy, but Claimant had finally started therapy the day before. Claimant reported less sciatic pain on the right compared to before the rhizotomies, but he was having more radicular symptoms on the left. The leg symptoms were worsened by prolonged standing.

24. Dr. Timothy O'Brien performed an IME for Respondents on October 22, 2020. Dr. O'Brien stated there was "not a shred of objective data to support [Claimant's] representation that an injury occurred." Nevertheless, he opined Claimant suffered a minor lumbosacral strain, which fully resolved within six weeks. He likened Claimant's injury to a paper cut and opined such minor injuries "heal reliably 100% of the time." In

Dr. O'Brien's opinion, further treatment was neither reasonably needed nor causally related to the work accident. Rather, Dr. O'Brien thought Claimant's ongoing symptoms were solely related to pre-existing degenerative changes in his spine. Dr. O'Brien advised Claimant to "assume responsibility for his own level of health," and opined that "Western Medicine" had nothing to offer that could not be better obtained by exercise and weight loss. Dr. O'Brien concluded Claimant was at MMI, with no impairment, no restrictions, and no need for further care.

25. Dr. Stanulonis reviewed Dr. O'Brien's report on November 13, 2020. He disagreed that Claimant had only a minor injury that healed in six weeks. Dr. Stanulonis thought Claimant may benefit from a left SI rhizotomy and a surgical evaluation. He referred Claimant back to Dr. Sparr and referred him to Dr. James Bee, a spine surgeon.

26. Claimant was evaluated by Dr. Bee and Dr. Bee's PA-C, Nathan Carpenter, on November 24, 2020. Claimant described constant pain in his low back and stated, "the longer he stands, moves, or works, it goes down the back of both legs, right leg greater than left, causing him to have difficulty walking and weakness." Examination of the lumbar spine showed diminished muscle tone, pain to palpation, and reduced range of motion. Claimant walked with a "slow, hunched over gait." Strength and sensation were normal bilaterally. X-rays obtained in the office showed disc space collapse at L4-5 and L5-S1, anterolisthesis of L5 on S1 and an "obvious" pars defect at L5-S1. Flexion and extension x-rays showed subtle instability. Dr. Bee wanted a new MRI before making any determination regarding surgery. However, he also noted Claimant's severe obesity "makes surgery difficult." He recommended "intensive weight-loss" and consideration of a gastric bypass.

27. The updated MRI was completed on December 2, 2020. Claimant returned to Dr. Bee on December 9, 2020. The MRI showed similar pathology at L4-5 and L5-S1 compared to the prior MRI. The degenerative changes at other spinal levels were again characterized as "mild." Despite the significant pathology, Dr. Bee advised that, "given his size, moving forward with surgical intervention is really not safe at this point. I think he needs to drop a significant amount of weight in order to make surgery safe." He noted Insurer had declined the referral for a gastric bypass consultation, and advised Claimant to explore the procedure through his PCP. He asked Claimant to return in six months, at which time they could entertain surgical intervention if Claimant were still symptomatic after a significant weight loss.

28. Dr. Stanulonis put Claimant at MMI on January 29, 2021 with a 13% whole person impairment rating. He opined, "[Claimant's] permanent work restrictions should be reevaluated and adjusted one year after any lumbar spinal surgery." He recommended medical treatment after MMI including "any recommended injections, spine surgeon eval and recommendations for lumbar surgery in the next 2 years after significant weight loss." Dr. Stanulonis referred Claimant to Dr. Bissell for ongoing pain management.

29. Claimant had his initial appointment with Dr. Bissell on February 8, 2021. Dr. Bissel noted Claimant's PCP had recently referred him to Dr. Fisher to discuss gastric bypass surgery. Claimant described aching, numbness, pins and needles, and stabbing

pain in his low back radiating into both legs. He explained his back has been painful "ever since" the work accident despite numerous conservative modalities including physical therapy, dry needling, ice, heat, TENS unit, NSAIDs, Tramadol, Biofreeze, and Lidocaine patches. Dr. Bissell prescribed a lumbar brace and several medications.

30. Respondents filed a Final Admission of Liability (FAL) on March 26, 2021. The FAL admitted for medical benefits after MMI. Claimant did not object to the FAL and the claim closed, except for *Grover* medical benefits.

31. Claimant underwent a laparoscopic gastric sleeve surgery on September 30, 2021. Thereafter, he rapidly lost weight. The gastric surgeon documented a 31-pound weight-loss within three weeks of the surgery.

32. Claimant followed up with Dr. Bee on November 3, 2021. He had already put lost 40 pounds since the gastric sleeve surgery. Dr. Bee obtained new flexion-extension x-rays, which showed grade 2 spondylolisthesis and some motion at the L5-S1 level. Dr. Bee reiterated Claimant was "a good candidate for an L4 to S1 anterior posterior [fusion] if indeed he loses weight." He further stated, "[Claimant] is still quite uncomfortable, but I cannot in good conscience recommend surgical intervention for someone who is still north of 300 pounds. I am going to see him back in 6 months. We would have him undergo clearance from Dr. Fisher before looking at an anterior approach."

33. On March 29, 2022, Dr. Fisher documented Claimant had lost 80 pounds. Dr. Fisher cleared Claimant for spine surgery from a gastric standpoint.

34. Claimant returned to Dr. Bee on May 4, 2022. Dr. Bee re-reviewed the imaging studies confirming significant pathology at L4-5 and L5-S1. He determined Claimant had lost enough weight to proceed with surgery. Dr. Bee's office requested preauthorization for and L4-S1 anterior and posterior lumbar fusion with pars repair.

35. Dr. O'Brien performed a record review for Respondents on May 12, 2022. The additional documentation "in no way" altered his previous opinions. Dr. O'Brien reiterated that Claimant suffered "a very minor injury" but returned to his preinjury level of function within six weeks. He opined an L5-S1 fusion was "doomed to fail" because it would not address the widespread degenerative changes at multiple spinal levels. He further stated Claimant had "too many comorbidities for the surgery to be undertaken safely."

36. Claimant had a follow-up IME with Dr. O'Brien on November 7, 2022. He maintained his opinions that the "L5-S1 surgery" recommended by Dr. Bee was neither reasonably needed nor causally related to Claimant's "minor, self-limited, self-healing lumbosacral spine strain sprain."

37. At hearing, Claimant described ongoing low back and leg symptoms. His pain is typically 4-5/10 but increases to 8/10 on "bad days." He described radiating pain, numbness and tingling in his legs, right greater than left. He weighed 275 pounds at the time of hearing. He was still losing weight, but more slowly than in the first several months

after surgery. Claimant described a restricted lifestyle and significant disability because of his symptoms. Claimant's testimony was generally credible.

38. Dr. O'Brien testified in a post-hearing deposition consistent with the opinions expressed in his reports. He continued to misidentify the surgery proposed by Dr. Bee as a "single-level" fusion confined to L5-S1.

39. There is no persuasive evidence of any pre-injury back problems or need for treatment despite performing physically demanding work for many years. Nor is there any persuasive evidence of any preinjury functional limitations related to Claimant's back.

40. Claimant proved his claim should be reopened based on a change of condition. Claimant was put at MMI on January 29, 2021 because he had exhausted conservative options and could not have surgery unless he lost significant weight. Claimant subsequently lost enough weight to become eligible for surgery.

41. Claimant proved the recommended L4-S1 fusion is reasonably needed and causally related to the work accident. Dr. Bee's opinions and recommendations are credible and more persuasive than the contrary opinions offered by Dr. O'Brien. Claimant has completed extensive conservative treatment without sustained improvement. The surgery proposed by Dr. Bee will address the two most damaged spinal levels, which are probably the primary pain generators. The presence of "mild" degenerative changes at higher levels does not preclude surgery to address the more severe pathology. Flexion-extension x-rays have shown some evidence of instability, which is another indication for a fusion. Regarding the "safety" of surgery, the ALJ credits the opinions of Dr. Bee, who owes Claimant a duty of care as a treating physician, over those of Dr. O'Brien. The argument that Claimant's injury was "minor" and resolved within six weeks is not persuasive. Claimant's preinjury baseline condition was an asymptomatic (or minimally symptomatic) back that required no treatment and caused no functional limitations. By contrast, Claimant has remained continuously symptomatic since the accident and has become disabled from his customary occupation. The work accident substantially aggravated the preexisting degenerative changes in Claimant's spine, requiring treatment, including surgery.

CONCLUSIONS OF LAW

A. Reopening

Section 8-43-303 authorizes an ALJ to reopen any award based on a change in condition. A "change in condition" refers either to a change in the condition of the original compensable injury, or to a change in the claimant's physical or mental condition that can be causally related to the original injury. *Heinicke v. Industrial Claim Appeals Office,* 197 P.3d 220 (Colo. App. 2008); *Chavez v. Industrial Commission,* 714 P.2d 1328 (Colo. App. 1985). The authority to reopen a claim is permissive, and whether to reopen a claim if the statutory criteria have been met is left to the ALJ's discretion. *Id*. The claimant must prove a basis to reopen by a preponderance of the evidence. Section 8-43-304(4).

As found, Claimant proved his claim should be reopened based on a change of condition. Claimant was put at MMI on January 29, 2021 because he had exhausted conservative options and could not have surgery unless he lost weight. Dr. Stanulonis explicitly contemplated future surgery at the time of MMI if Claimant could get his weight down. Claimant subsequently lost enough weight that he became eligible for back surgery. Although Claimant's longstanding obesity was not directly caused by the work accident, it is enmeshed with his claim because it was the reason he could not pursue the otherwise reasonably necessary surgery before being placed at MMI.[1] Now that the impediment to surgery has been removed, it is appropriate to reopen the claim and allow Claimant to proceed with Dr. Bee's recommendation.

B. Reasonable necessity and causal relationship of surgery

The respondents are liable for medical treatment reasonably necessary to cure and relieve the effects of an industrial injury. Section 8-42-101. The mere occurrence of a compensable injury does not compel the ALJ to approve all requested treatment. Where the claimant's entitlement to medical benefits is disputed, the claimant must prove the treatment is reasonably needed and causally related to the industrial accident. *Wal-Mart Stores, Inc. v. Industrial Claim Appeals Office*, 989 P.2d 251 (Colo. App. 1999). The claimant must prove entitlement to disputed medical benefits by a preponderance of the evidence. *Snyder v. Industrial Claim Appeals Office*, 942 P.2d 1337 (Colo. App. 1997).

A pre-existing condition does not disqualify a claim for medical benefits if an industrial injury aggravates, accelerates, or combines with a pre-existing condition to produce disability or a need for treatment. *H & H Warehouse v. Vicory*, 805 P.2d 1167 (Colo. App. 1990). A claimant need not show an injury objectively caused any identifiable structural change to their underlying anatomy to prove an aggravation. A purely symptomatic aggravation is sufficient for an award of medical benefits if it the symptoms were triggered by work activities and caused the claimant to need treatment he would not otherwise have required. *Merriman v. Industrial Commission*, 210 P.2d 448 (Colo. 1949); *Cambria v. Flatiron Construction*, W.C. No. 5-066-531-002 (May 7, 2019).

Claimant proved the recommended surgery is reasonably needed. Dr. Bee's opinions and recommendations are credible and more persuasive than the contrary opinions of Dr. O'Brien. Claimant has completed extensive conservative treatment including PT, massage, medications, trigger point injections, steroid injections, and rhizotomy. He also underwent bariatric surgery and lost considerable weight. None of these modalities have resolved or substantially improved his symptoms or functional capacity. It is therefore reasonable to conclude that nothing short of surgery has a reasonable prospect of success. Although there is no guarantee surgery will improve his condition, it is an appropriate option at this point given the failure of lesser interventions and the persistence of his disabling symptoms. Dr. O'Brien is correct that a single-level fusion at L5-S1 would not adequately address all significant pain generators in Claimant's

[1] The gastric sleeve treatment could potentially have been covered under the claim as necessary to allow Claimant to pursue treatment for the work injury. *E.g., Public Service Co. v. Industrial Claim Appeals Office*, 979 P.2d 584 (Colo. App. 1999). But the fact that Claimant pursued the weight loss treatment outside the claim does not alter the inherent causal connection.

spine. That is why Dr. Bee is recommending a *two-level fusion* at L4-S1. Even though Claimant has “mild” degenerative changes at the lower thoracic and upper lumbar levels, it makes sense to target the two worst levels, which are probably responsible for Claimant's leg symptoms. Additionally, Dr. Bee noted some evidence of instability on flexion-extension x-rays, which is another indication for a fusion. Regarding the “safety” of surgery, the ALJ credits the opinions of Dr. Bee, who owes Claimant a duty of care as a treating physician, over those of Dr. O’Brien.

Claimant also proved the surgery is causally related to the work injury. Dr. O’Brien’s argument that Claimant’s injury was “minor” and resolved within six weeks is not credible. Claimant’s preinjury baseline condition was an asymptomatic (or minimally symptomatic) back that required no treatment and caused no functional limitations. By contrast, Claimant has remained continuously symptomatic since the accident and has become disabled from his customary occupation. The notion that his back pain became suddenly disconnected from the work injury within six weeks, based on generic assumptions about when an injury of this “should” heal, is not persuasive. Nor is such a scenario consistent with the other persuasive medical and lay evidence in the record. The work accident substantially aggravated and accelerated the preexisting degenerative changes in Claimant’s spine, requiring treatment and ultimately surgery.

ORDER

It is therefore ordered that:

1. Claimant's Petition to Reopen is granted.

2. Insurer shall cover the L4-S1 fusion surgery recommended by Dr. Bee.

3. All issues not decided herein are reserved for future determination.

If you are dissatisfied with this order, you may file a Petition to Review with the **Denver Office of Administrative Courts**, 1525 Sherman St., 4th Floor, Denver, CO 80203. You must file your Petition to Review within twenty (20) days after mailing or service of the order, as indicated on the certificate of mailing or service; otherwise, the ALJ's order will be final. You may file the Petition to Review by mail by sending it to the above address for the **Denver Office of Administrative Courts** within twenty (20) days after mailing or service of the ALJ's order. In the alternative, you may file your Petition to Review electronically by email to the following email address: oac-ptr@state.co.us. If the Petition to Review is timely served via email, it is deemed filed in Denver pursuant to OACRP 26(A) and § 8-43-301, C.R.S. If the Petition to Review is filed by email to the proper email address, it need not also be mailed to the Denver Office of Administrative Courts. For statutory reference, see § 8-43-301(2), C.R.S. For further information regarding procedures to follow when filing a Petition to Review, see Rule 26, OACRP. You may access a petition to review form at: https://oac.colorado.gov/resources/oac-forms
